# Section IV

## New and Withdrawn Programs

### New Programs

The following programs were newly accredited since the publication of the 1995-1996 edition of this *Directory*. Additional information on these programs is included in Section III under the appropriate specialty listing.

#### Addiction Psychiatry (Psychiatry)

**New York University Medical Center Program**  
New York, NY  
Program ID: 401-35-21-004

**University of Colorado Program**  
Denver, CO  
Program ID: 401-07-21-006

**University of Maryland Program**  
Baltimore, MD  
Program ID: 401-23-21-002

**University of Texas Health Science Center at  
San Antonio Program**  
San Antonio, TX  
Program ID: 401-48-21-008

#### Adult Reconstructive Orthopaedics (Orthopaedic Surgery)

**University of Chicago Program**  
Chicago, IL  
Program ID: 261-16-21-012

#### Allergy and Immunology

**Boston University Program**  
Boston, MA  
Program ID: 020-24-21-112

**University of Texas Medical Branch Hospitals  
Program**  
Galveston, TX  
Program ID: 020-48-11-026

#### Blood Banking/Transfusion Medicine (Pathology- Anatomic and Clinical)

**American Red Cross Northern Ohio Region  
Program**  
Cleveland, OH  
Program ID: 305-38-21-071

**Deaconess Hospital Program**  
Boston, MA  
Program ID: 305-24-31-069

**Hartford Hospital Program**  
Hartford, CT  
Program ID: 305-08-21-070

**University of Texas Southwestern Medical  
School Program**  
Dallas, TX  
Program ID: 305-48-31-068

## Cardiovascular Disease (Internal Medicine)

**St John Hospital and Medical Center Program**  
Detroit, MI  
Program ID: 141-25-31-258

## Chemical Pathology (Pathology-Anatomic and Clinical)

**University of Michigan Program**  
Ann Arbor, MI  
Program ID: 306-25-21-010

## Child and Adolescent Psychiatry (Psychiatry)

**MCPHU/Medical College of Pennsylvania  
Hospital Program**  
Philadelphia, PA  
Program ID: 405-41-21-110

## Child Neurology (Neurology)

**University of Arkansas for Medical Sciences  
Program**  
Little Rock, AR  
Program ID: 185-04-21-085

**University of Oklahoma Health Sciences  
Center Program**  
Oklahoma City, OK  
Program ID: 185-39-21-086

## Clinical and Laboratory Immunology (Allergy and Immunology)

**Albert Einstein College of Medicine Program**  
Bronx, NY  
Program ID: 025-35-21-020

**Medical College of Virginia/Virginia  
Commonwealth University Program**  
Richmond, VA  
Program ID: 025-51-21-021

**St Luke's-Roosevelt Hospital Center Program**  
New York, NY  
Program ID: 025-35-11-019

**SUNY Health Science Center at Brooklyn  
Program**  
Brooklyn, NY  
Program ID: 025-35-31-018

## Clinical Cardiac Electrophysiology (Internal Medicine)

**Barnes Hospital Group Program**  
St Louis, MO  
Program ID: 154-28-31-040

**Baylor College of Medicine Program**  
Houston, TX  
Program ID: 154-48-11-072

**Bowman Gray School of Medicine Program**  
Winston-Salem, NC  
Program ID: 154-36-11-055

**Cedars-Sinai Medical Center Program**  
Los Angeles, CA  
Program ID: 154-05-21-002

**George Washington University Program**  
Washington, DC  
Program ID: 154-10-31-012

**Georgetown University Program**  
Washington, DC  
Program ID: 154-10-21-011

**Illinois Masonic Medical Center Program**  
Chicago, IL  
Program ID: 154-16-21-016

**Indiana University Medical Center Program**  
Indianapolis, IN  
Program ID: 154-17-21-021

**Johns Hopkins University Program**  
Baltimore, MD  
Program ID: 154-23-21-024

**Mayo Graduate School of Medicine  
(Rochester) Program**  
Rochester, MN  
Program ID: 154-26-31-038

**MCPHU/Hahnemann University Hospital  
Program**  
Philadelphia, PA  
Program ID: 154-41-21-061

**Medical College of Ohio at Toledo Program**  
Toledo, OH  
Program ID: 154-38-11-058

**Medical College of Virginia/Virginia  
Commonwealth University Program**  
Richmond, VA  
Program ID: 154-51-31-077

**New England Medical Center Hospitals  
Program**  
Boston, MA  
Program ID: 154-24-13-030

**New York University Medical Center Program**  
New York, NY  
Program ID: 154-35-32-049

Program ID: 310-42-21-072

**Office of the Montgomery County Coroner  
Program**  
Dayton, OH  
Program ID: 310-38-21-067

**Rhode Island Office of State Medical  
Examiners Program**  
Providence, RI  
Program ID: 310-43-21-071

**Wayne County Medical Examiner's Office  
Program**  
Detroit, MI  
Program ID: 310-25-11-013

## Geriatric Psychiatry (Psychiatry)

**Creighton University/University of Nebraska  
Program**  
Omaha, NE  
Program ID: 407-30-21-019

## New Programs

### Medical University of South Carolina Program

Charleston, SC  
Program ID: 407-45-21-035

### Milton S Hershey Medical Center of Pennsylvania State University Program

Hershey, PA  
Program ID: 407-41-21-032

### Mount Sinai School of Medicine Program

New York, NY  
Program ID: 407-35-13-026

### Stanford University Program

Stanford, CA  
Program ID: 407-05-11-003

### UCLA Medical Center Program

Los Angeles, CA  
Program ID: 407-05-21-001

### UMDNJ-Robert Wood Johnson Medical School Program

Piscataway, NJ  
Program ID: 407-33-21-021

### University Health Center of Pittsburgh Program

Pittsburgh, PA  
Program ID: 407-41-11-034

### University of Alabama Medical Center Program

Birmingham, AL  
Program ID: 407-01-21-040

### University of Hawaii Program

Honolulu, HI  
Program ID: 407-14-21-007

### University of Michigan Program

Ann Arbor, MI  
Program ID: 407-25-21-015

### University of Wisconsin Program

Madison, WI  
Program ID: 407-56-21-039

### Wayne State University/Lafayette Clinic Program

Detroit, MI  
Program ID: 407-25-31-016

## Hand Surgery (Orthopaedic Surgery)

### Walter Reed Army Medical Center Program

Washington, DC  
Program ID: 263-10-21-056

### Yale-New Haven Medical Center Program

New Haven, CT  
Program ID: 263-08-21-061

## Hematology (Pathology-Anatomic and Clinical)

### McGaw Medical Center of Northwestern University Program

Chicago, IL  
Program ID: 311-16-21-058

### Medical University of South Carolina Program

Charleston, SC  
Program ID: 311-45-21-057

### New York University Medical Center Program

New York, NY  
Program ID: 311-35-21-060

### University of Alabama Medical Center Program

Birmingham, AL  
Program ID: 311-01-21-056

### University of Maryland Program

Baltimore, MD  
Program ID: 311-23-21-059

### University of Wisconsin Program

Madison, WI  
Program ID: 311-56-21-061

## Hematology and Oncology (Internal Medicine)

### Los Angeles County-Harbor-UCLA Medical Center Program 2

Torrance, CA  
Program ID: 155-05-21-087

## Internal Medicine

### Crozer Keystone Health System Program

Upland, PA  
Program ID: 140-41-31-514

## Medical Genetics

### Baylor College of Medicine Program

Houston, TX  
Program ID: 130-48-21-012

### Case Western Reserve University Program

Cleveland, OH  
Program ID: 130-38-21-007

### Cedars-Sinai Medical Center Program

Los Angeles, CA  
Program ID: 130-05-21-010

### Children's Hospital of Philadelphia Program

Philadelphia, PA  
Program ID: 130-41-21-002

### Greenwood Genetic Center Program

Greenwood, SC  
Program ID: 130-45-21-005

### Henry Ford Hospital Program

Detroit, MI  
Program ID: 130-25-21-001

### Mayo Graduate School of Medicine (Rochester) Program

Rochester, MN  
Program ID: 130-26-21-011

### Medical College of Virginia/Virginia Commonwealth University Program

Richmond, VA  
Program ID: 130-51-21-003

### Mount Sinai School of Medicine Program

New York, NY  
Program ID: 130-35-21-006

### Oregon Health Sciences University Program

Portland, OR  
Program ID: 130-40-21-009

### University of Cincinnati Hospital Group Program

Cincinnati, OH  
Program ID: 130-38-21-013

### University of Iowa Hospitals and Clinics Program

Iowa City, IA  
Program ID: 130-18-21-004

## Nephrology (Internal Medicine)

### Deaconess Hospital Program

Boston, MA  
Program ID: 148-24-21-176

## Neurological Surgery

### UMDNJ-New Jersey Medical School Program

Newark, NJ  
Program ID: 160-33-21-106

### University of Minnesota Program

Minneapolis, MN  
Program ID: 160-26-21-042

## Neuroradiology (Radiology-Diagnostic)

### Boston University Program

Boston, MA  
Program ID: 423-24-21-091

### University of Kentucky Medical Center Program

Lexington, KY  
Program ID: 423-20-21-089

### West Virginia University Program

Morgantown, WV  
Program ID: 423-55-21-094

## Obstetrics and Gynecology

### MCPHU/Medical College of Pennsylvania Hospital Program

Philadelphia, PA  
Program ID: 220-41-21-250

## Ophthalmology

### Case Western Reserve University Program

Cleveland, OH  
Program ID: 240-38-21-123

### Wiford Hall Medical Center (AETC) Program

Lackland AFB, TX  
Program ID: 240-48-11-001

## Orthopaedic Sports Medicine (Orthopaedic Surgery)

### McGaw Medical Center of Northwestern University Program

Chicago, IL  
Program ID: 268-16-21-072

### New England Baptist Hospital Program

Boston, MA  
Program ID: 268-24-21-044

**University of Virginia Program**  
Charlottesville, VA  
Program ID: 268-51-21-057

## Orthopaedic Surgery

**Bronx-Lebanon Hospital Center Program**  
Bronx, NY  
Program ID: 260-35-11-134

**MCPHU/Medical College of Pennsylvania Hospital Program**  
Philadelphia, PA  
Program ID: 260-41-21-026

## Orthopaedic Surgery of the Spine (Orthopaedic Surgery)

**Hospital for Special Surgery/Cornell Medical Center Program**  
New York, NY  
Program ID: 267-35-21-022

Louisville, KY  
Program ID: 267-20-21-020

## Otolaryngology

**George Washington University Program**  
Washington, DC  
Program ID: 280-10-21-130

**Joint Military Medical Centers-San Antonio Program**  
Lackland AFB, TX  
Program ID: 280-48-21-131

**University of Chicago Program**  
Chicago, IL  
Program ID: 280-16-21-035

## Pain Management (Anesthesiology)

**Albert Einstein College of Medicine at Long Island Jewish Medical Center Program**  
New Hyde Park, NY  
Program ID: 048-35-31-072

**Albert Einstein College of Medicine Program**  
Bronx, NY  
Program ID: 048-35-21-062

**Loyola University Program**  
Maywood, IL  
Program ID: 048-16-31-078

**MCPHU/Allegheny General Hospital Program**  
Pittsburgh, PA  
Program ID: 048-41-21-068

**Medical College of Ohio at Toledo Program**  
Toledo, OH  
Program ID: 048-38-21-071

**Medical University of South Carolina Program**  
Charleston, SC  
Program ID: 048-45-21-074

**New England Medical Center Hospitals Program**  
Boston, MA  
Program ID: 048-24-21-091

**New York Hospital/Cornell Medical Center Program 2**  
New York, NY  
Program ID: 048-35-11-073

**New York Medical College at St Vincent's Hospital and Medical Center of New York Program**  
Valhalla, NY  
Program ID: 048-35-21-070

**New York University Medical Center Program**  
New York, NY  
Program ID: 048-35-21-084

**SUNY Health Science Center at Syracuse Program**  
Syracuse, NY  
Program ID: 048-35-21-092

**UCLA Medical Center Program**  
Los Angeles, CA  
Program ID: 048-05-21-076

**University of Arizona Program**  
Tucson, AZ  
Program ID: 048-03-21-080

**University of California (Davis) Program**  
Sacramento, CA  
Program ID: 048-05-21-064

**University of California (San Francisco) Program**  
San Francisco, CA  
Program ID: 048-05-31-082

**University of Colorado Program**  
Denver, CO  
Program ID: 048-07-21-090

**University of Massachusetts Program**  
Worcester, MA  
Program ID: 048-24-21-079

**University of Oklahoma Health Sciences Center Program**  
Oklahoma City, OK  
Program ID: 048-39-21-087

**University of Utah Program**  
Salt Lake City, UT  
Program ID: 048-49-21-086

**University of Virginia Program**  
Charlottesville, VA  
Program ID: 048-51-21-075

**Yale-New Haven Medical Center Program**  
New Haven, CT  
Program ID: 048-08-21-083

## Pathology-Anatomic and Clinical

**New York Hospital Medical Center of Queens/Cornell University Medical College Program**  
Flushing, NY  
Program ID: 300-35-11-232

## Pediatric Critical Care Medicine (Pediatrics)

**University of Cincinnati Hospital Group Program**  
Cincinnati, OH  
Program ID: 323-38-21-015

## Pediatric Gastroenterology (Pediatrics)

**Albert Einstein College of Medicine Program**  
Bronx, NY  
Program ID: 332-35-21-050

**Louisiana State University/Tulane University Program**  
New Orleans, LA  
Program ID: 332-21-21-015

**SUNY Health Science Center at Brooklyn Program**  
Brooklyn, NY  
Program ID: 332-35-21-026

**UCLA Medical Center Program**  
Los Angeles, CA  
Program ID: 332-05-31-004

## Pediatric Hematology/Oncology (Pediatrics)

**University of Virginia Program**  
Charlottesville, VA  
Program ID: 327-51-21-069

## Pediatric Pathology (Pathology-Anatomic and Clinical)

**Baylor College of Medicine Program**  
Houston, TX  
Program ID: 316-48-31-009

**Brown University Program**  
Providence, RI  
Program ID: 316-43-21-005

**Louisiana State University Program**  
New Orleans, LA  
Program ID: 316-21-21-001

**New York University Medical Center Program**  
New York, NY  
Program ID: 316-35-21-007

**Wayne State University/Detroit Medical Center Program**  
Detroit, MI  
Program ID: 316-25-21-004

## Pediatric Pulmonology (Pediatrics)

**George Washington University Program**  
Washington, DC  
Program ID: 330-10-21-049

**University of Chicago Program**  
Chicago, IL  
Program ID: 330-16-21-048

## Pediatric Surgery (Surgery-General)

### Brown University Program

Providence, RI  
Program ID: 445-43-21-031

### Emory University Program

Atlanta, GA  
Program ID: 445-12-21-033

### University of Texas Southwestern Medical School Program

Dallas, TX  
Program ID: 445-48-21-022

## Pediatric Urology (Urology)

### Johns Hopkins University Program

Baltimore, MD  
Program ID: 485-23-21-009

### University of California (San Francisco) Program

San Francisco, CA  
Program ID: 485-05-21-011

### University of Washington Program

Seattle, WA  
Program ID: 485-54-21-012

## Pediatrics

### Children's Hospital/Boston City Hospital Program

Boston, MA  
Program ID: 320-24-21-403

### Fairfax Hospital Program

Falls Church, VA  
Program ID: 320-51-21-399

### Flushing Hospital Medical Center Program

Flushing, NY  
Program ID: 320-35-31-261

### Memorial Medical Center Program

Savannah, GA  
Program ID: 320-12-21-400

### National Capital Military Medical Education Consortium Program

Washington, DC  
Program ID: 320-10-21-401

## Physical Medicine and Rehabilitation

### University of Texas at Houston Program

Houston, TX  
Program ID: 340-48-21-101

## Plastic Surgery

### University of Mississippi Medical Center Program

Jackson, MS  
Program ID: 360-27-21-126

## Preventive Medicine

### Illinois Department of Public Health Program

Springfield, IL  
Program ID: 380-16-88-099

### USAF School of Aerospace Medicine Program

San Antonio, TX  
Program ID: 380-48-77-089

### USAF School of Aerospace Medicine Program A

San Antonio, TX  
Program ID: 380-48-55-089

## Psychiatry

### Hennepin County Medical Center/St Paul Ramsey Medical Center Program

Minneapolis, MN  
Program ID: 400-26-21-285

### Kalamazoo Center for Medical Studies/Michigan State University Program

Kalamazoo, MI  
Program ID: 400-25-31-284

### Massachusetts General Hospital/McLean Hospital Program

Boston, MA  
Program ID: 400-24-21-288

### MCPHU/Medical College of Pennsylvania Hospital Program

Philadelphia, PA  
Program ID: 400-41-21-192

### Morehouse School of Medicine Program

Atlanta, GA  
Program ID: 400-12-21-262

Seattle, WA  
Program ID: 442-54-21-050

### Washington Hospital Center Program

Washington, DC  
Program ID: 442-10-21-048

### Washington University Program

St Louis, MO  
Program ID: 442-28-21-051

## Vascular and Interventional Radiology (Radiology-Diagnostic)

### Dartmouth-Hitchcock Medical Center Program

Lebanon, NH  
Program ID: 427-32-21-067

### Henry Ford Hospital Program

Detroit, MI  
Program ID: 427-25-21-055

### Massachusetts General Hospital/Harvard Medical School Program

Boston, MA  
Program ID: 427-24-21-041

### Mayo Graduate School of Medicine (Rochester) Program

Rochester, MN  
Program ID: 427-26-21-064

### Rhode Island Hospital Program

Providence, RI  
Program ID: 427-43-21-066

### UCLA Medical Center Program

Los Angeles, CA  
Program ID: 427-05-21-063

### University Health Center of Pittsburgh Program

Pittsburgh, PA  
Program ID: 427-41-21-061

**University of California (San Diego) Program**  
San Diego, CA  
Program ID: 427-05-21-058

**University of Chicago Program**  
Chicago, IL  
Program ID: 427-16-21-059

**University of Vermont Program**  
Burlington, VT  
Program ID: 427-50-21-062

**University of Virginia Program**  
Charlottesville, VA  
Program ID: 427-51-21-057

**Vanderbilt University Program**  
Nashville, TN  
Program ID: 427-47-21-060

## Vascular Surgery (Surgery-General)

**Ohio State University Program**  
Columbus, OH  
Program ID: 450-38-21-056

**University of Maryland Program**  
Baltimore, MD  
Program ID: 450-23-21-080

# Withdrawn Programs

The accreditation of the following programs was withdrawn or voluntarily withdrawn between July 1, 1995 and June 30, 1996. These programs are not listed in this *Directory*; information on them may be listed in previous editions of the *Directory*.

## Allergy and Immunology

**Childrens Hospital of Los Angeles Program**  
Los Angeles, CA  
Program ID: 020-05-21-049

**Fitzsimons Army Medical Center Program**  
Aurora, CO  
Program ID: 020-07-21-067

**University of Kentucky Medical Center Program**  
Lexington, KY  
Program ID: 020-20-21-110

**University of Texas Medical Branch Hospitals Program B**  
Galveston, TX  
Program ID: 020-48-11-027

## Anesthesiology

**Monmouth Medical Center Program**  
Long Branch, NJ  
Program ID: 040-33-11-086

**St Joseph's Hospital Health Center Program**  
Syracuse, NY  
Program ID: 040-35-12-112

**Texas Heart Institute Program**  
Houston, TX  
Program ID: 040-48-11-151

## Blood Banking/Transfusion Medicine (Pathology- Anatomic and Clinical)

**Baylor College of Medicine Program**  
Houston, TX  
Program ID: 305-48-21-062

**Case Western Reserve University Program**  
Cleveland, OH  
Program ID: 305-38-21-060

**Cleveland Clinic Foundation Program**  
Cleveland, OH  
Program ID: 305-38-21-042

## Cardiovascular Disease (Internal Medicine)

**Mercy Hospital and Medical Center Program**  
San Diego, CA  
Program ID: 141-05-11-208

**St Luke's Hospital Program**  
St Louis, MO  
Program ID: 141-28-21-109

**UMDNJ-New Jersey Medical School  
(Hackensack) Program**  
Hackensack, NJ  
Program ID: 141-33-11-012

**University of California (San Francisco)/Fresno Program**  
Fresno, CA  
Program ID: 141-05-31-133

## Child and Adolescent Psychiatry (Psychiatry)

**MCPHU/Hahnemann University Hospital Program**  
Philadelphia, PA  
Program ID: 405-41-21-109

**University of Mississippi Medical Center Program**  
Jackson, MS  
Program ID: 405-27-21-149

**Wayne State University/Fairlawn Center Program**  
Pontiac, MI  
Program ID: 405-25-11-064

**Wayne State University/Hawthorn Center Hospital Program**  
Northville, MI  
Program ID: 405-25-11-063

**West Virginia University Program**  
Morgantown, WV  
Program ID: 405-55-21-133

## Child Neurology (Neurology)

**University of Kansas Medical Center Program**  
Kansas City, KS  
Program ID: 185-19-21-073

**University of South Alabama Program**  
Mobile, AL  
Program ID: 185-01-21-056

**University of Virginia Program**  
Charlottesville, VA  
Program ID: 185-51-11-063

## Clinical and Laboratory Immunology (Allergy and Immunology)

**Massachusetts General Hospital Program**  
Boston, MA  
Program ID: 025-24-21-004

## Critical Care Medicine (Internal Medicine)

**Boston University Program**  
Boston, MA  
Program ID: 142-24-21-104

**Brigham and Women's Hospital Program**  
Boston, MA  
Program ID: 142-24-21-033

**National Naval Medical Center (Bethesda) Program**  
Bethesda, MD  
Program ID: 142-23-11-039

**New York Hospital/Cornell Medical Center Program 1**  
New York, NY  
Program ID: 142-35-21-063

**UMDNJ-Robert Wood Johnson Medical School Program 2**  
Piscataway, NJ  
Program ID: 142-33-21-137

**University of Pennsylvania Program**  
Philadelphia, PA  
Program ID: 142-41-21-078

## Dermatopathology (Dermatology and Pathology)

**Naval Medical Center (San Diego) Program**  
San Diego, CA  
Program ID: 100-05-21-038

**University of South Florida Program**  
Tampa, FL  
Program ID: 100-11-21-042

**University of Texas at Houston Program**  
Houston, TX  
Program ID: 100-48-21-037

## Endocrinology, Diabetes, and Metabolism (Internal Medicine)

**Fitzsimons Army Medical Center Program**  
Aurora, CO  
Program ID: 143-07-12-059

**University of Utah Program**  
Salt Lake City, UT  
Program ID: 143-49-21-133

## Family Practice

**Brookhaven Memorial Hospital Medical Center Program**  
Patchogue, NY  
Program ID: 120-35-11-213

**FHP Southern California Region Program**  
Cerritos, CA  
Program ID: 120-05-21-542

**Naval Hospital (Charleston) Program**  
North Charleston, SC  
Program ID: 120-45-11-017

## Forensic Pathology (Pathology-Anatomic and Clinical)

**Denver Health and Hospitals Program**  
Denver, CO  
Program ID: 310-07-21-006

**Hamilton County Coroner's Office Program**  
Cincinnati, OH  
Program ID: 310-38-11-020

**University of South Alabama Program**  
Mobile, AL  
Program ID: 310-01-21-050

## Gastroenterology (Internal Medicine)

**Fitzsimons Army Medical Center Program**  
Aurora, CO  
Program ID: 144-07-12-205

**Mercy Catholic Medical Center Program**  
Darby, PA  
Program ID: 144-41-11-173

**Naval Medical Center (Portsmouth) Program**  
Portsmouth, VA  
Program ID: 144-51-11-204

## Geriatric Medicine (Family Practice)

**Lutheran General Hospital Program**  
Park Ridge, IL  
Program ID: 125-16-11-004

**University of Southern California Program**  
Whittier, CA  
Program ID: 125-05-21-022

## Geriatric Medicine (Internal Medicine)

**East Tennessee State University Program**  
Mountain Home, TN  
Program ID: 151-47-21-039

**Marshall University School of Medicine Program**  
Huntington, WV  
Program ID: 151-55-21-096

**University of Washington Program 2**  
Boise, ID  
Program ID: 151-15-21-061

## Hand Surgery (Orthopaedic Surgery)

**Tampa General Healthcare Program**  
Tampa, FL  
Program ID: 263-11-21-043

## Hand Surgery (Plastic Surgery)

**Louisiana State University Program**  
New Orleans, LA  
Program ID: 363-21-21-006

**University of Utah Program**  
Salt Lake City, UT  
Program ID: 363-49-21-002

## Hematology (Internal Medicine)

**Brigham and Women's Hospital Program**  
Boston, MA  
Program ID: 145-24-21-005

**George Washington University Program**  
Washington, DC  
Program ID: 145-10-21-099

**Long Island College Hospital Program**  
Brooklyn, NY  
Program ID: 145-35-11-050

**Los Angeles County-Harbor-UCLA Medical Center Program**  
Torrance, CA  
Program ID: 145-05-11-151

**National Naval Medical Center (Bethesda) Program**  
Bethesda, MD  
Program ID: 145-23-11-134

**New York Hospital/Cornell Medical Center Program**  
New York, NY  
Program ID: 145-35-21-155

**Presbyterian Medical Center of the University of Pennsylvania Health System Program**  
Philadelphia, PA  
Program ID: 145-41-21-176

**St Luke's-Roosevelt Hospital Center (St Luke's) Program**  
New York, NY  
Program ID: 145-35-21-160

**Temple University Program**  
Philadelphia, PA  
Program ID: 145-41-21-030

**UMDNJ-New Jersey Medical School Program**  
Newark, NJ  
Program ID: 145-33-21-167

**University of Pennsylvania Program**  
Philadelphia, PA  
Program ID: 145-41-21-019

**University of Puerto Rico Program**  
San Juan, PR  
Program ID: 145-42-21-107

**University of Virginia Program**  
Charlottesville, VA  
Program ID: 145-51-21-017

**Western Pennsylvania Hospital Program**  
Pittsburgh, PA  
Program ID: 145-41-21-179

## Hematology (Pathology-Anatomic and Clinical)

University of California (Irvine) Program  
Orange, CA  
Program ID: 311-05-31-046

## Immunopathology (Pathology-Anatomic and Clinical)

Medical College of Virginia/Virginia  
Commonwealth University Program  
Richmond, VA  
Program ID: 313-51-11-001

## UMDNJ-Robert Wood Johnson Medical School Program

Piscataway, NJ  
Program ID: 313-33-21-018

## Washington University Program

St Louis, MO  
Program ID: 313-28-21-013

# Section V

## Graduate Medical Education Teaching Institutions

Section V lists hospitals and organizations that sponsor graduate medical education (GME) programs, serve as primary clinical sites, or participate in GME. *Sponsoring* institutions (formerly parent institutions) assume final responsibility for a GME program. Most GME programs are sponsored by specific clinical departments within a hospital, another health care institution such as a medical school, or an educational consortium. *Primary clinical sites* exist when the location of the primary teaching institution differs from that of the sponsoring institution. *Participating* institutions (formerly affiliated institutions) include hospitals or other sites recognized by at least one residency review committee as providing a major portion of required GME.

Separate listings for sponsoring institutions, primary clinical sites, and participating institutions are provided in alphabetical order by state and city. Each listing includes the institution name, address, and identification code. Also provided are codes of medical schools affiliated with each institution (where applicable) and abbreviations for the specialty and subspecialty programs sponsored by the institution. (A key for specialty and subspecialty abbreviation codes is provided in Appendix F.)

Candidates seeking a residency should refer to the list of programs in Section III. Applications for a residency position should be addressed to the program director rather than to an institution.

### Relationships Between Hospitals and Medical Schools (Medical School Affiliation)

Hospitals that sponsor an accredited program are not required to have a formal relationship with a medical school. Where such a relationship exists, the affiliation is identified by the dean of the medical school as M (major), G (graduate only), or L (limited). The medical school associated with the code number in this listing is identified in Appendix E.

Major affiliation (M) signifies that an institution is an important part of the teaching program of the medical school and is a major unit in the clinical clerkship program. Major teaching institutions provide clerkship experience in two or more of the major specialties: internal medicine, surgery, pediatrics, and obstetrics-gynecology. An institution responsible for most of the teaching in a single specialty, such as psychiatry or pediatrics, may also be considered a major affiliation. In a major teaching institution, medical students serve clinical clerkships regularly on inpatient services, under the direct supervision of medical school faculty. A major teaching institution may or may not be used for medical school residencies.

Graduate affiliation (G) indicates that the institution is affiliated with the medical school only for its graduate programs and that one or more of the following arrangements is in effect:

1. House staff of the GME programs are selected by officials of a medical school department or by a joint committee of the institution teaching staff and medical school faculty.
  2. Medical school faculty (other than the institution's attending staff) are regularly scheduled to participate in the teaching programs of the institution. No graduate affiliation is indicated if medical school faculty participation at the institution is limited to an occasional lecture or consultation visit, or if the institution's residents attend medical school teaching conferences only as visitors.
  3. A contractual arrangement (with or without financial commitment) specifies the medical school participation in the organization and supervision of the GME program in the institution.
  4. There is some degree of exchange of residents between this institution and the principal teaching institution of the medical school.
- Limited affiliation (L) signifies that the institution is affiliated with the medical school's teaching program only for brief and/or unique rotations of students or residents.

# Appendix A

## Combined Specialty Programs

Combined specialty programs have been approved by each respective specialty board; resident physicians completing these programs are accepted for board certification. Neither the Accreditation Council for Graduate Medical Education (ACGME) nor the Residency Review Committees accredit combined programs; they accredit each specialty program separately. Information in the combined program list was provided by specialty boards and through the AMA Annual Survey of Graduate Medical Education Programs. Requests for information about the guidelines for these programs should be directed to the specialty boards at the address listed in Appendix B. Applicants to combined specialty programs are encouraged to review requirements for admission to the certification process of each board in Appendix B of this directory.

### Internal Medicine/Emergency Medicine

The American Board of Internal Medicine and the American Board of Emergency Medicine offer dual certification for candidates who have completed at least 2 and a half years of suitable accredited training in each specialty. A combined residency consists of 5 years of balanced education in the two disciplines. It is strongly recommended that the participating residencies be in the same academic health center.

To meet eligibility for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The certifying examinations cannot be taken until all 5 years are satisfactorily completed.

### Internal Medicine/Family Practice

The American Board of Internal Medicine and the American Board of Family Practice offer dual certification for candidates who have satisfactorily completed 4 years of combined training in programs approved by both boards.

To be eligible for dual certification, combined residency training in internal medicine and family practice must include at least 48 months of balanced education in the two disciplines and be verified by the training director(s) of the program. The written certifying examinations cannot be taken until all required years in both specialties are completed.

### Internal Medicine/Neurology

The American Board of Internal Medicine and the American Board of Psychiatry and Neurology offer dual certification for candidates who have completed 5 years of combined training suitable to both boards. A combined residency in internal medicine and neurology must include at least 5 years of coherent education integral to residencies in the two disciplines. It is strongly recommended that the participating residencies be in the same institution.

To meet eligibility for dual certification, the resident must satisfactorily complete 60 months of training, which must be verified by the directors of both programs. The written certifying examinations cannot be taken until all required years in both specialties are satisfactorily completed.

### Internal Medicine/Pediatrics

The American Board of Internal Medicine and the American Board of Pediatrics offer dual certification in internal medicine and pediatrics. A combined residency must include at least 2 years in each specialty, for a total of 4 years of coherent training integral to residencies in the two disciplines. The participating residencies should be in the same academic health center. Continuity clinics in each specialty should be provided throughout the 4 years.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 48 months of combined education, and clinical competence in both specialties must be verified

by the directors of both programs. The certifying examinations cannot be taken until all required years in both specialties are satisfactorily completed.

### **Internal Medicine/Physical Medicine and Rehabilitation**

The American Board of Internal Medicine and the American Board of Physical Medicine and Rehabilitation offer dual certification for candidates who have completed at least 2 and a half years of suitable accredited training in each specialty. A combined residency must include at least 5 years of coherent training integral to residencies in the two disciplines. It is strongly recommended that the participating residencies be in the same institution.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The written certifying examinations cannot be taken until required training in a specialty has been satisfactorily completed. The certifying examination in internal medicine cannot be taken prior to the fall of the fifth year in the combined program.

### **Internal Medicine/Psychiatry**

The American Board of Internal Medicine and the American Board of Psychiatry and Neurology offer dual certification in internal medicine and psychiatry. A combined residency must include at least 5 years of coherent education integral to residencies in the two disciplines. Participating residencies must be in the same institution.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The written certifying examinations cannot be taken until all required years in both specialties are satisfactorily completed.

### **Neurology/Physical Medicine and Rehabilitation**

The American Board of Psychiatry and Neurology and the American Board of Physical Medicine and Rehabilitation offer dual certification in neurology and physical medicine and rehabilitation. A combined residency must include 5 years of combined education. This combined training must follow a year in a residency program that meets the requirements for neurology and should be completed in the same institution. All required years in both specialties must be satisfactorily completed prior to admission to the certifying examinations of each board.

### **Pediatrics/Emergency Medicine**

The American Board of Pediatrics and the American Board of Emergency Medicine offer dual certification for candidates who fulfill the requirements of both boards by completing joint training in 5 years. All 5 years should be completed in the same combined program; exceptions must be approved in advance by both boards. Applicants may not take the certifying examinations until all required years in both specialties have been completed.

### **Pediatrics/Physical Medicine and Rehabilitation**

The American Board of Pediatrics and the American Board of Physical Medicine and Rehabilitation permit applicants interested in pediatric rehabilitation to qualify for admission to the certifying examinations of both boards by completing a 5-year combined program. All 5 years should be completed at one academic institution; exceptions must be approved in advance by both boards.

Applicants may not take the certifying examinations until all required years in both specialties have been completed.

### **Pediatrics/Psychiatry/Child and Adolescent Psychiatry**

The American Board of Pediatrics, the American Board of Psychiatry and Neurology, and the Committee on Certification in Child and Adolescent Psychiatry have developed a committee that is overseeing training via a different format. This is a five year curriculum with 24 months of pediatrics, 18 months of adult psychiatry, and 18 months of child and adolescent psychiatry. Completion of the program will satisfy the training requirement for certification in all three areas. Applicants pursuing training in these programs may not take the certifying examinations until all training has been completed. Credit for training via this route may be obtained only by training in one of these programs.

### **Psychiatry/Neurology**

The American Board of Psychiatry and Neurology has established guidelines for combined training in psychiatry and neurology. A combined residency must include one postgraduate year (PGY1) of training that is acceptable to neurology plus a minimum of 5 years of combined residency training. The 5 years of residency training are usually taken at one approved institution but may be taken at no more than two approved institutions.

### **Surgery/Plastic Surgery**

Combined specialty programs in general surgery and plastic surgery operate in an integrated format whereby residents are matched directly into plastic surgery out of medical school; some plastic surgery rotations may be included during the first 3 years of general surgery. Upon completion of the combined program, physicians are eligible for certification by the American Board of Plastic Surgery.

# Appendix B

## Medical Specialty Board Certification Requirements

Twenty-four medical specialty boards have been approved by the American Board of Medical Specialties (ABMS) and the American Medical Association (AMA) Council on Medical Education through the Liaison Committee for Specialty Boards (LCSB). Applications for recognition as a specialty board are submitted to the LCSB and reviewed for compliance with the requirements and criteria published in the *Essentials for Approval of New Examining Boards in Medical Specialties* approved by both the ABMS and the AMA. If an applicant is approved for recognition as a medical specialty board by the LCSB, the application must then be approved by the membership of the ABMS and the AMA Council on Medical Education. The *Essentials* may be obtained from the office of the Executive Vice President of the American Board of Medical Specialties, 1007 Church St/Ste 404, Evanston, IL 60201-5913, or from the Council on Medical Education, American Medical Association, 515 N State St, Chicago, IL 60610.

The primary objective of medical specialty boards is the improvement of the quality of medical education and medical care. The primary functions of each of the medical specialty boards are to evaluate candidates in a medical specialty field who voluntarily appear for examination and to certify as diplomates those candidates who are qualified. To accomplish these functions, medical specialty boards determine whether candidates have received adequate preparation in accordance with established educational standards; provide comprehensive examinations designed to assess knowledge, skills, and experience requisite to the provision of high-quality patient care in that specialty; and certify those candidates who have satisfied the requirements.

In collaboration with the other organizations and agencies concerned, the approved medical specialty boards assist in improving the quality of medical education by elevating the standards of graduate medical education and approving facilities for specialty training.

The actual accreditation review for the approval of residency programs in each specialty is conducted by a Residency Review Committee on which the respective specialty board has equal representation with the AMA Council on Medical Education and, in some cases, with a related specialty society.

Medical specialty board certification is an additional process to receiving a medical degree, completing residency training, and receiving a license to practice medicine.

Certification requirements of each member board of ABMS are included on subsequent pages. Inquiries regarding specialty board certification requirements should be directed to the specialty board executive offices listed in Table 1. The member boards of ABMS publish materials containing statements on the requirements for certification, which are also reprinted in each edition of the *Official American Board of Medical Specialties Directory of Board Certified Medical Specialists*. This publication contains certification and biographical information on each specialist who has been certified by a member board of ABMS. The *Directory* is available from the ABMS or from Marquis Who's Who, 121 Chanlon Rd, New Providence, NJ 07974.

# American Board of Allergy and Immunology

(A Conjoint Board of the American Board of Internal Medicine and the American Board of Pediatrics)

Thomas A Fleisher, MD, Chair, Bethesda, Maryland  
 Dean D Metcalfe, MD, Co-Chair, Bethesda, Maryland  
 Dennis R Ownby, MD, Co-Chair Elect, Detroit, Michigan  
 John A Anderson, MD, Secretary, Detroit, Michigan  
 Philip Lieberman, MD, Treasurer, Cordova, Tennessee  
 Melvin Berger, MD, Cleveland, Ohio  
 Mark Ballow, MD, Buffalo, New York  
 Richard D deShazo, MD, Mobile, Alabama  
 Renata J M Engler, MD, Washington, DC  
 John Andrew Grant, MD, Galveston, Texas  
 Henry G Herrod III, MD, Memphis, Tennessee  
 Robert F Lemanske, Jr, MD, Madison, Wisconsin  
 Arnold I Levinson, MD, Philadelphia, Pennsylvania  
 Richard F Lockey, MD, Tampa, Florida  
 Lanny J Rosenwasser, MD, Denver, Colorado  
 Stanley J Szeffler, MD, Denver, Colorado  
 Abba I Terr, MD, San Francisco, California  
 Stephen I Wasserman, MD, San Diego, California  
 John W Yunginger, MD, Executive Secretary, Philadelphia, Pennsylvania

*(The Board reserves the right to make changes in its policies and procedures at any time and cannot assume responsibility for giving advance notice thereof. All applicants are advised to contact the American Board of Allergy and Immunology [ABAI] to determine whether the following information remains current.)*

## Organization

The ABAI was established in 1971 as a nonprofit organization. It is a Conjoint Board of the American Board of Internal Medicine (ABIM) and the American Board of Pediatrics (ABP) and is sponsored jointly by the American Academy of Allergy, Asthma and Immunology (AAAAI), the American Academy of Pediatrics (AAP)—Section on Allergy and Immunology, the American College of Allergy, Asthma and Immunology (ACAAI), the American Medical Association (AMA)—Section on Allergy and Immunology, and the Clinical Immunology Society (CIS).

ABAI's major purposes are to

- establish qualifications and examine physician candidates for certification as specialists in allergy/immunology;
- serve the public, physicians, hospitals, and medical schools by providing the names of physicians certified as allergists/immunologists;
- improve the quality of care in allergy/immunology to the public;
- establish and improve standards for the teaching and practice of allergy/immunology; and
- establish standards for training specialists in allergy/immunology.

## Significance of Certification

A certified specialist in allergy and immunology is a physician who has fulfilled the requirements of and has received certification as a diplomate of the ABIM and/or ABP followed by additional certification by the ABAI. Diplomates of the ABAI have detailed knowledge of the underlying pathophysiology and the methods of diagnosis, treatment, and prevention of allergic diseases such as allergic rhinitis, allergic asthma, urticaria, anaphylaxis, hypersensitivity pneumonitis, atopic and contact dermatitis, and allergic gastrointestinal disorders, as well as comparable clinical problems without an appar-

ent allergic etiology or component, such as vasomotor rhinitis, non-allergic asthma, and idiopathic and/or hereditary forms of urticaria and/or angioedema. Expertise in the management of pulmonary complications of these diseases is a further prerequisite.

In addition, diplomates of the ABAI possess breadth and depth in the understanding of immunochemistry, immunobiology, and applied pharmacology and experience in the application of this knowledge to the diagnosis, management, and prevention of immunologic diseases, such as inborn or acquired defects of host resistance, autoimmune diseases, bone marrow and solid organ transplantation, adverse drug reactions, and other conditions associated with an abnormality of the immune system. Because allergy and clinical immunology is an evolving and expanding area of medicine, diplomates may vary in their detailed knowledge of some of the aspects of allergy/immunology as defined above. Diplomates have demonstrated to the satisfaction of their peers that they possess the general qualifications specified.

## Certification Process

The ABAI is interested in candidates who have embarked voluntarily on a graduate program of study with the express purpose of excelling in the practice of the specialty of allergy/immunology. In outlining its requirements, the ABAI hopes to help the candidate select superior educational programs that will develop his/her competency in allergy/immunology. The ABAI believes that all allergists/immunologists should have a fundamental knowledge of the biological science basic to this discipline. Such knowledge is essential to the continued professional progress of any qualified allergist/immunologist. The ABAI anticipates that adequate knowledge in basic science, as applied to this discipline, will be acquired by the candidates during a post-medical school training program. The ABAI wishes to emphasize that time and training are but a means to the end of acquiring a broad knowledge of allergy/immunology. The candidate must demonstrate competency to the ABAI in order to justify certification in this discipline. The responsibility of acquiring the knowledge rests with the candidate. The ABAI is responsible for the establishment and maintenance of the standards of knowledge required for certification. Each candidate for certification must satisfy the general and professional qualifications listed below.

The examination reflects the current Program Requirements in Allergy and Immunology and the Content Outline determined by the Board of Directors, which is distributed to candidates upon application, and the following:

Candidates for certification must be familiar with the fundamental elements of the immune system, such as the types of immune cells contained in the immune system, the collections of immune cells that form anatomical organs of immunity, the circulation patterns of immune cells, the biologic role of products of the immune system, and the abnormal conditions of the immune system that constitute immunopathology. Moreover, the candidate will be expected to be proficient in understanding the molecular basis of allergic and other immune reactions, including interaction between immune cells, cell membrane signal transduction pathways, gene expression, cytokine release, receptor targeting, cellular differentiation, and death. Proficiency must be demonstrated in the diagnosis and treatments of allergic and other immunologic diseases.

Since the ABAI is a Conjoint Board representing pediatric and adult medicine, the candidate must master the spectrum of allergic and immunologic diseases as it presents in children and adults. In addition to a familiarity with allergic diseases, including allergic rhinitis, asthma, atopic dermatitis, and urticaria, the candidate must be knowledgeable in autoimmune conditions such as rheumatologic disease, inflammatory bowel disease, immune-based endocri-

nopathies, and neuroimmunological disorders. Equally important as competence in diseases of immune system dysfunction is the knowledge of human pathology that results from an absence of immunity, either whole or partial, congenital or acquired. Thus, an understanding of the primary immunodeficiency states is required, including congenital disorders, such as severe combined immunodeficiency and X-linked agammaglobulinemia; absence of specific complement components, such as C2 deficiency; lack of specific neutrophil function, such as chronic granulomatous disease; absence of specific adhesive cellular glycoproteins, such as leukocyte adhesion deficiency; and dysfunctional states of the immune system produced by external agents, such as the acquired immunodeficiency syndrome resulting from infection with the human immunodeficiency virus.

It is important for the candidate to demonstrate proficiency in the selection of appropriate clinical and laboratory tests that aid the formulation of a clinical diagnosis based on first obtaining a detailed medical history and performing a complete physical examination. The candidate must understand the scientific basis of the following list (noninclusive) of tests: serum immunoglobulin determination, functional antibody measurement, complement component and functional assays, lymphocyte subset analysis using monoclonal antibodies and flow cytometry, lymphocyte proliferation assays with mitogens and antigens, and neutrophil and monocyte chemotaxis, phagocytosis, and killing assessment. In addition, competence must be demonstrated with the use of molecular diagnostic techniques involving the binding of ligands to nucleic acid or polypeptide sequences, such as assays involving restriction fragment length polymorphisms, DNA binding proteins, messenger RNA, and Western blots. The importance of DNA replication technology, such as that demonstrated in the polymerase chain reaction, must be understood. The molecular basis for immediate hypersensitivity skin testing must be understood in the context of the detailed molecular events occurring in the tissue mast cell and blood basophil, particularly the release of preformed mediators, such as histamine, and the generation of newly formed mediators, such as leukotrienes and prostaglandins. Similarly, skin testing for T cell competence with recall antigens must be understood in relation to antigen presentation, cytokine secretion and interaction, and lymphocyte subset activation and function.

Candidates must also have familiarity with the misuse of standard tests and with controversial tests in allergy and immunology. The candidate must understand the principles and analytic methods employed in experimental clinical studies in determining safety, toxicity, and efficacy of treatments and drugs for allergic and immunologic diseases. Candidates must also be familiar with the principles and methods employed in epidemiologic studies.

A corollary of the competence of the candidate in the pathophysiology, clinical presentation, and immunologic testing of allergic and other immunologic disease is the knowledge of appropriate treatment options. For example, the common aspect of all types of asthma is the presence of airway inflammation. Definitive treatment of asthma demands that therapies be utilized that include interruption of the inflammatory response. Thus, use of drugs that decrease airway inflammation in asthma must be understood by candidates for certification. Based upon the molecular knowledge of the allergic response, the candidate must appreciate the importance of allergen avoidance and medical treatment of allergic rhinitis before initiation of the more intense treatment of immunotherapy. In the latter therapy, candidates must demonstrate competence in allergen selection and administration in successful treatment regimens.

Therapy for immunologic diseases must be understood, such as (noninclusive) intravenous immune globulin for antibody defi-

ciency, interferon for chronic granulomatous disease, HLA-identical and HLA-haploidentical (T cell-depleted) bone marrow transplants for cellular immunodeficiencies, and gene replacement therapy currently used for the immunodeficiency associated with adenosine deaminase deficiency, as well as theoretical principles/potential in other congenital immune disorders.

The candidate qualifies for examination

1. By *having passed* the certification examination of the ABIM and/or ABP, which requires 3 years of postdoctoral training in programs accredited by the Accreditation Council for Graduate Medical Education (ACGME).
2. By presentation of evidence, acceptable to the Board of Directors, of at least 2 years of full-time residency/fellowship *in allergy/immunology programs accredited by the ACGME* or other acceptable training in allergy/immunology programs. Programs are listed in the *Graduate Medical Education Directory*, published by the American Medical Association. Application forms for accreditation of new residency programs may be obtained on written request to the Secretary of the Residency Review Committee for Allergy and Immunology, 515 N State St/Ste 2000, Chicago, IL 60610, 312 464-5505, 312 464-4098 (Fax).
3. By documentation from the training program director evaluating and substantiating clinical competence and 2 full-time years of allergy/immunology training. Areas to be reviewed include clinical judgment, medical knowledge, clinical skills of history taking, physical examination and procedural skills, humanistic qualities, attitudes and professional behavior, medical care (utilizing laboratory tests and diagnostic procedures), commitment to scholarship, and work habits. The training program director must also provide written evidence of the candidate's clinical experience and readiness to sit for the examination. In compliance with the ACGME Program Requirements in Allergy and Immunology, a semiannual record must be maintained with copies to the ABAI for tracking purposes. The Evaluation Form, together with the Explanation of Ratings Scale, may be obtained from the ABAI. If a trainee has received two consecutive evaluations with overall unsatisfactory ratings, the training program director must provide the trainee and the ABAI with a written plan for remediation of the trainee's deficiencies. After 6 months, the training program director must provide the ABAI and the trainee with a report of the success or failure of the remediation program, as well as any additional plans for corrective action.
4. By documentation, upon written release of the candidate, from the Chief of Medicine or Pediatrics, ABAI diplomates in the geographical area, chiefs of community hospitals, or officers of state or regional societies to verify the medical, ethical, and moral standing and clinical competence of the candidate as a specialist in allergy/immunology.
5. By evidence of a valid, unrestricted license to practice medicine in a state, territory, possession, or province of the United States or Canada or in the United States armed forces or a written explanation of extenuating circumstances.

Candidates with a restricted, suspended, or revoked license at the time of application or examination will not be admitted to the examination or certified.

As of January 1, 1992, ABAI limits the time interval for candidates to become certified to 6 years following completion of allergy/immunology training. In the case of candidates whose applications received approval before January 1, 1992, certification is available according to ABAI policy in force at the time of initial registration. New candidates accepted after January 1, 1992, who do not gain certification within this 6-year interval can re-register in the certification process with documentation of

1. A valid, unrestricted medical license as defined above

2. Evidence of good standing within the medical community
3. Recommendation letters from two ABAI diplomates attesting to the candidate's medical, ethical, and moral standing and clinical competence as a specialist in allergy/immunology
4. 100 hours of CME Category I credit in the previous 2 years
5. Successful performance on an ABAI qualifying examination
6. Payment of current registration and examination fees.

Candidates beyond 2 years of their training will be required to include an appointment in good standing on a hospital staff.

**Conjoint Committees**—The nature of a Conjoint Board requires involvement of the sponsoring primary Boards through understanding, evaluation, trust, and input into critical areas of decision making. With these concepts in mind, the ABAI has formed two advisory committees with representation by the ABAI, ABIM, and ABP.

The Conjoint Credentials Committee will review and recommend the credentials of candidates for the certification examination to the Board for its determination.

The Conjoint Standards Committee will review and recommend the passing grade for the certification examination to the Board for its determination.

### Dual Certification

Formal special pathways exist for individuals wishing to qualify for dual certification in either allergy/immunology and pediatric pulmonology or adult rheumatology. Additional information regarding special pathways is available upon request.

### Recertification Process

Beginning with 1989, new ABAI diplomates received certificates valid for 10 years. Diplomates certified prior to 1989 are not affected by this policy. All diplomates, however, especially those involved in training programs, are strongly encouraged to recertify as often as possible, but at a minimum of every 10 years. Maintaining a current certificate is an expression of professional accountability. Presently 746 ABAI diplomates hold time-limited certificates; renewal may be achieved in the interim. ABAI recommends recertification for diplomates holding time-unlimited certificates.

For the 1996-1997 recertification cycle, the ABAI will continue to provide a preliminary, home-study, open-book examination with item feedback and a remedial examination if necessary. The diplomate is required to attain an 80% correct score in order to gain entry to the final proctored examination on August 11, 1997, which will be modular. If such an absolute score is not attained, the diplomate will be required to pass a subsequent remedial home examination with an 80% correct score. All recertification candidates will be required to complete a proctored, secure examination consisting of a 50-item Recent Advances module (emphasizing new knowledge in Allergy and Immunology) and one of three elective 150-item modules (Clinical Allergy, Clinical Immunology, or Basic Immunology) to complete the examination. The modular format will ensure that the recertification process is relevant to the diplomates' professional activities—either in the clinical and/or laboratory and research setting. Standards are established to justify public confidence. As an alternative pathway, diplomates may recertify by passing the 1997 certification examination and meeting its rigorous standard for candidates completing accredited training.

Diplomates for recertification will be examined in the following areas of clinical science: immediate hypersensitivity, immunological disorders, pharmacology and therapeutics, specific diagnostic modalities, and allergens and antigens. Attention will also be given to the following areas of basic science: immune mechanisms, cells involved in immune responses, specific immune mechanisms, and laboratory tests.

The diplomate qualifies for examination by

1. Having previously been certified by the ABAI. Because ABAI is a Conjoint Board of the ABIM and ABP, its recertification process takes into account the recertification process of its parent boards and encourages its diplomates to recertify in internal medicine or pediatrics.
2. Documentation from physicians in the ABAI diplomates community that he/she currently practices the specialty of allergy and immunology.
3. Evidence of a valid, unrestricted license to practice medicine in a state, territory, possession, or province of the United States or Canada or in the United States armed forces, or a written explanation of extenuating circumstances. Diplomates with a restricted, suspended, or revoked license at the time of application or examination will not be admitted to the examination or recertified.

### Clinical and Laboratory Immunology

In 1983 the American Board of Medical Specialties approved Certification of Special Qualification in Diagnostic Laboratory Immunology (DLI) for diplomates of the ABAI, ABIM, and ABP periodically. Such recognition was awarded in 1986, 1988, and 1990 following successful examination performance to specialists with significant experience (at least 4 years) in comprehensive DLI, or at least 1 year's training in DLI who were involved in the teaching, research, or practice setting in which the diagnostic immunology laboratory is of central importance and who were recognized by their peers as competent by way of their significant contributions to DLI.

In 1991 ABMS approved the change to a Certificate of Added Qualification in Clinical and Laboratory Immunology (CLI) for those specialists with 1 year of formal training following subspecialty certification in an immunologically based subspecialty in order to indicate the clinical interpretative skills inherent in such training.

Within the last 20 years in the combined clinical practice of allergy and immunology, the most rapid expansion of knowledge has occurred within the area of clinical immunology. This explosion of information has impacted both clinical practice and diagnostic laboratory testing. Previous certification in diagnostic laboratory immunology has been interpreted as demonstration of skills in laboratory testing in immunology rather than in the broad span of both clinical and laboratory skills. With the goal of certifying candidates in the broader sense of clinical skills and laboratory expertise in clinical immunology, the ABAI recommends that candidates be prepared to demonstrate competency by examination in the theory and practice of the following (noninclusive) clinical areas: (1) allergic diseases, (2) primary and secondary immunodeficiency diseases, (3) autoimmune diseases, (4) immunologic aspects of bone marrow and organ transplantation, (5) immune aspects of gene replacement therapy, (6) immunologic aspects of organ-specific inflammatory conditions, and (7) immune aspects of malignancy and cancer. Although these clinical areas of competence are expected of the traditional candidate in allergy/immunology, the candidate for CLI will be expected to master these concepts to a far greater degree. Moreover, since upon certification the CLI candidate should be ready to supervise an immunology laboratory, competence will be demanded in the following (noninclusive) areas: (1) quantitation of immunoglobulins; (2) measurement of specific antibodies; (3) functional and quantitative complement tests; (4) assays of lymphocyte, monocyte, neutrophil, and basophil function and quantitation; (5) autoantibody assessment; (6) rapid tests for infectious diseases; (7) DNA amplification and binding tests; (8) genetic testing; (9) histocompatibility testing; (10) prenatal diagnosis; (11) quality control testing; (12) data management and statistical analysis; and (13) regulatory agency interactions.

The examination reflects the current Program Requirements for Clinical and Laboratory Training and the Content Outline determined by the Joint Testing Committee of the ABAI, ABIM, and ABP, which is distributed to candidates upon application.

The examination will be administered to those ABAI, ABIM, and ABP diplomates following a 2-year allergy/immunology training program or immunologically related subspecialty training, eg, rheumatology or infectious disease, etc, and such subspecialty certification where available, and a third year of CLI training. Competence must be verified by the program director responsible for the third year of training. Candidates whose applications were previously approved and whose training meets the Program Requirements in CLI may also file an application. Time-limited certificates will be awarded subject to revocation by the appropriate board for cause.

Physicians taking the examination are expected to be concerned with applying laboratory methods to problems in human diseases involving changes in immune responses and will be able to perform, develop, interpret, and evaluate the clinical relevance of special laboratory procedures related to immunologically based diseases.

## Examination Methodology

### A. Announcements

The proctored certification and recertification examination is administered simultaneously in at least two US locations in alternate years. The times and places are determined by the Board and announced in the appropriate specialty journals.

### B. Applications

The act of filing an application is the candidate's responsibility. Application forms are available from the ABAI. They must be accompanied by two recently signed photographs and the necessary fees. Completed applications must be received on or before the close of registration (postmark applicable).

### C. Fees

The fees are set forth in the instruction sheet included with the application. Candidates whose applications are rejected will receive a refund of the examination fee; however, the ABAI will retain the registration fee to cover the processing and evaluation costs. A nonrefundable late fee will apply to those applications received after the close of registration and prior to the cancellation deadline.

### D. Cancellations

Candidates who are accepted for examination but fail to appear, or who withdraw after the deadline for cancellation, will have their examination fees placed into an escrow account for the next examination. For each subsequent examination, candidates will be required to pay the current registration and examination fees.

### E. Description

The written examinations vary in length from certification being two 4-hour sessions, recertification being one 4-hour session, and CLI being two 3-hour sessions. The multiple-choice questions are objective and designed to test the individual's knowledge through recall, interpretation, and problem solving. Each examination may contain previously used questions, new questions, or questions undergoing field testing. The individual's performance on field test questions will not be counted in determining results.

The ABAI does not sponsor or maintain any records on any courses that claim to be review courses in preparation for its examinations nor does it offer or endorse any specific publications or courses to prepare for its examinations.

### F. Disabled Candidates

Individuals who may need accommodation during the examination must provide written details to the Board at the time of application

for examination in order to receive information about ABAI's disability policy and approval.

### G. Irregular Behavior

All Board examinations are supervised by proctors, who are required to report any irregular behavior, which includes, but is not limited to, giving or obtaining unauthorized information or aid before, during, or after the examination as evidenced by observation or subsequent statistical analysis of answer sheets. Offering financial or other benefit to a proctor, employee, or agent of the ABAI is forbidden.

### H. Results

Individuals will be informed of the results of the examinations within 3 months of administration. The validity of the individual's performance on the examination is secured by every means available.

### I. Rescores

On written request and payment of a nominal fee, candidates may obtain rescoring within 3 months of receiving results. Answer sheets will be destroyed 12 months after administration of the examination.

### J. Certificates

Candidates/diplomates who pass the Board's examinations will be certified or recertified in the specialty of allergy/immunology as of the date of the examination and will receive a 10-year time-limited certificate, subject to revocation by the Board for cause. This information becomes public information and will be listed in the *Official ABMS Directory of Board-Certified Specialists* and the *Official ABMS Directory of Certified Allergists and Immunologists*.

Certificates issued by the ABAI shall be subject to revocation under specific circumstances, including but not limited to licensure revocation, restriction, or suspension, and/or establishment of guilt of felony, professional incompetence, professional misconduct, unethical conduct, harmful, deceptive, and fraudulent advertising, or documented chemical use and dependency.

## Special Policies

### A. Verification of Board Status

The ABAI does not issue statements of or implying "Board eligibility" for any reason. The ABMS has recommended this policy. Medical specialty certification is a process of advancement through several individual steps, including examination. Having completed one step, such as the minimal educational requirements, should not imply that a candidate is now possessed of some program qualification that is more or less equivalent to certification. For written verification of the status of an allergist/immunologist, ABAI charges a nominal fee per name.

### B. Revocation of Certificate

Certificates issued by the ABAI shall be subject to revocation under specific circumstances, including but not limited to licensure revocation, restriction, or suspension, and/or establishment of guilt of felony, professional incompetence, professional misconduct, unethical conduct, harmful, deceptive, and fraudulent advertising, or documented chemical use and dependency.

### C. Absences During Residency

Absences during residency in excess of 2 months over the 2-year allergy/immunology training program, whether for vacation, sick leave, maternity leave, etc., should be made up. If the training program director believes that an absence of more than 2 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

## Changes in Policies and Procedures

The Board reserves the right to make changes in its policies and procedures and fees at any time, and cannot assume responsibility for giving advance notice thereof. The provisions of this publication are not to be construed as a contract between any candidate and the ABAI.

# American Board of Anesthesiology

David E Longnecker, MD, President, Philadelphia, Pennsylvania  
 D David Glass, MD, Secretary-Treasurer, Lebanon, New Hampshire  
 John R Ammon, MD, Phoenix, Arizona  
 Bruce F Cullen, MD, Seattle, Washington  
 Carl C Hug, Jr, MD, PhD, Atlanta, Georgia  
 Francis M James III, MD, Winston-Salem, North Carolina  
 M Jane Matjasko, MD, Baltimore, Maryland  
 William D Owens, MD, St Louis, Missouri  
 Myer H Rosenthal, MD, Stanford, California  
 Raymond C Roy, PhD, MD, Charleston, South Carolina  
 Lawrence J Saidman, MD, San Diego, California  
 Stephen J Thomas, MD, New York, New York  
 Francis P Hughes, PhD, Executive Vice President

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Anesthesiology [ABA] to ascertain whether the information below is current.)*

## Introduction

The chair of the anesthesiology department is the director of the residency program. Although the department chair may delegate responsibility for administering the program, the ABA corresponds officially about training matters only with the department chair.

The department chair (ie, program director) has the responsibility to ensure that the training each resident completes under the aegis of the program will be acceptable to the ABA if the resident applies for certification. Nevertheless, every resident whose goal is to attain ABA certification has a responsibility to ensure that the training experiences will be acceptable to the ABA, since the resident ultimately bears the consequences if the training proves unacceptable. The responsibility of the one does not absolve the other from sharing the responsibility.

The department chair and the resident must know the Board's policies, published in the Booklet of Information, as they relate to acceptable training sequences, experiences, and settings. Residents with specific questions about the acceptance of their training should read this booklet and speak with their department chair. If there remains any doubt about the acceptance of the training, the resident should then write the Secretary of the Board at the address of the ABA office.

Applicants and candidates for ABA examinations have the responsibility to know the Board's policies, procedures, requirements, and deadlines regarding admission to and opportunities for examination.

## Primary Certification in Anesthesiology Certification Requirements

To be certified as a diplomate of the American Board of Anesthesiology, each applicant must

- A. Hold a permanent, unconditional, unrestricted, and unexpired license to practice medicine or osteopathy in one state or jurisdiction of the United States or province of Canada.
- B. Fulfill all the requirements of the continuum of education in anesthesiology.
- C. Have on file with the ABA a satisfactory certificate of clinical competence covering the final 6-month period of clinical anesthesia training in each anesthesiology residency program.
- D. Satisfy all examination requirements of the Board.
- E. Have a moral, ethical, and professional standing satisfactory to the ABA.

Persons certified by this Board are designated as diplomates in publications of the American Board of Medical Specialties and the American Society of Anesthesiologists.

## Continuum of Education in Anesthesiology

The continuum of education in anesthesiology consists of 4 years of training subsequent to the date that the medical or osteopathic degree has been conferred. It includes 12 months of nonanesthesia clinical training (clinical base year) and 36 months of graded and increasingly complex clinical training in anesthesia (CA-1, CA-2, and CA-3 years).

- A. The clinical base year must be devoted to clinical training other than clinical anesthesia. Acceptable training for the 12 months of clinical base shall include training in a transitional year, internal or emergency medicine, pediatrics, surgery or any of the surgical specialties, obstetrics and gynecology, neurology, family practice, or any combination of these as approved for the individual resident by the director of his/her training program in anesthesiology. Residents must complete the clinical base requirement before beginning clinical rotations in fulfillment of the CA-3 year requirement.

The clinical base year must be spent in residency programs in the United States that are accredited by the Accreditation Council for Graduate Medical Education (ACGME) or approved by the American Osteopathic Association. It also may be spent in Canadian institutions that are approved by the Royal College of Physicians and Surgeons of Canada and are affiliated with medical schools approved by the Liaison Committee on Medical Education.

- B. The 3-year clinical anesthesia curriculum (CA 1-3) consists of experience in basic anesthesia training, subspecialty anesthesia training, and advanced anesthesia training. It is a graded curriculum of increasing difficulty and learning that is progressively more challenging of the resident's intellect and technical skills.
  1. Experience in basic anesthesia training is intended to emphasize basic and fundamental aspects of the management of anesthesia. It is recommended that at least 12 months of the CA-1 and CA-2 years be spent in basic anesthesia training with a majority of this time occurring during the CA-1 year.
  2. Subspecialty anesthesia training experiences are required in order to emphasize the theoretical background, subject material, and practice of subspecialties of anesthesiology. These subspecialties include obstetric anesthesia, pediatric anesthesia, cardiopulmonary anesthesia, neuroanesthesia, anesthesia for outpatient surgery, recovery room care, regional anesthesia, and pain management. It is recommended that these experiences be in the form of subspecialty rotations and that they occupy 7 to 12 months of the CA-1 and CA-2 years. The sequencing of these rotations in the CA-1 and CA-2 years is left to the discretion of the program director.

In addition to the above requirements for subspecialty experiences, 2 months of training in the subspecialty of critical care medicine is required at some time during the clinical an-

esthesia years. An acceptable critical care rotation should include active participation in patient care by anesthesia residents, active involvement by anesthesia faculty experienced in the practice and teaching of critical care, and an appropriate population of critically ill patients, which includes a substantial number with multisystem disease whose care requires invasive monitoring and mechanical ventilation. Experience in routine, short-term, or overnight postanesthesia units or intermediate step-down units or emergency rooms does not fulfill this requirement.

3. Experience in advanced anesthesia training constitutes the CA-3 year. Clinical rotations in fulfillment of the CA-3 year requirement must follow completion of the clinical base and CA-1 and CA-2 years. The resident and program director in collaboration will select one of the three tracks designated as the advanced clinical track, subspecialty clinical track, or clinical scientist track. Regardless of the track selected, resident assignments in the CA-3 year should include the more difficult or complex anesthetic procedures and care of the most seriously ill patients.

Residents in the advanced clinical track are required to complete a minimum of 6 months of experience in advanced and complex clinical anesthesia assignments. The remaining 6 months may be spent in one to three selected subspecialty rotations or, alternatively, additional complex clinical anesthesia assignments may be selected.

Residents in the subspecialty clinical track may complete 9 to 12 months' experience in one subspecialty rotation along with up to 3 months of advanced experience in complex clinical anesthesia assignments. Alternatively, 6 months' experience in each of two subspecialty rotations may be selected. Such rotations may include some time assigned to medical or surgical activities directly related to the anesthesia subspecialty.

The clinical scientist track consists of clinical training and research experience during the anesthesia residency. There are two options for fulfilling the requirements of this track. Regardless of the option chosen, residents who elect this track must have a satisfactory clinical competence committee report for the 6-month period immediately preceding the beginning of the research experience.

Option A of the clinical scientist track may be fulfilled by completing 6 months of advanced or subspecialty clinical training and 6 months of clinical or laboratory investigative experience in the CA-3 year. Exceptions to this sequencing requirement must be requested prospectively by the resident's anesthesiology program director.

Option B of the clinical scientist track is intended for residents who plan careers as academic investigators. After completing the clinical base year and 12 months of clinical anesthesia, the residents must complete 18 months of clinical anesthesia training and 18 months of research experience. The anesthesiology program director may request up to 6 months of credit toward the research component of the academic investigator option for residents with a PhD degree in a discipline of relevance to the science or practice of anesthesiology. Residents who elect the academic investigator option must fulfill all of its requirements to satisfy the training required for entrance into the ABA examination system.

The anesthesiology program director may request up to 6 months of credit toward the research component of the academic investigator option for residents with a PhD degree in a discipline of relevance to the science or practice of anesthesiology, as determined by the Credentials Committee of the

ABA. The ABA must receive the request after the resident has completed a minimum of 6 months of clinical anesthesia training satisfactorily and before the resident begins the research component. The request must include the anesthesiology program director's recommendation that a specific number of months of credit be granted, acceptable documentation of the resident's PhD degree and discipline, and a current copy of the resident's curriculum vitae.

The Credentials Committee of the ABA will consider such requests on an individual basis. Approval of requests for research credit for a PhD degree is at the discretion of the Credentials Committee. Credit that has been approved will be granted upon completion of the remaining requirements of the continuum of education in anesthesiology only for the resident whose overall clinical competence is graded satisfactory for every period of clinical anesthesia training.

- C. Credit toward the CA-1 through CA-3 year requirements is granted by the ABA for clinical anesthesia training that satisfies all of the following conditions:
  1. The CA-1 through CA-3 years of training are spent in or under the sponsorship of at most two ACGME-accredited anesthesia residency programs.
  2. The period of clinical anesthesia training in or under the sponsorship of any single program is at least 6 months.
  3. The final period of training in each program ends with receipt of a satisfactory certificate of clinical competence. The final period must cover at least 6 months of clinical anesthesia training if the certificate of clinical competence for the immediately preceding period of training in the program was unsatisfactory. When the final period of training in any program ends with receipt of an unsatisfactory certificate, credit is granted for clinical anesthesia training in that program only to the date of the most recent satisfactory certificate received by the resident from that program.
  4. No more than 6 months during the first 2 clinical anesthesia years, and a maximum of 12 months during the 3 years of clinical anesthesia training, are spent training outside the parent programs in affiliated or nonaffiliated institutions. The Credentials Committee of the ABA must approve prospectively any clinical anesthesia training outside the parent program. The prospective request must include a chronological description of the rotations, information about the supervision of the resident, and assurances that the resident will be in compliance with the limits on training outside the parent program if the request is approved. Further, the resident must remain enrolled in the parent program while training at an affiliated or nonaffiliated institution, and the parent program must report the training on the clinical competence committee report filed for the period on the resident's behalf.
 

The ABA office must receive the request from the department chair on behalf of a resident at least 2 months before the resident begins the training in question. It is the responsibility of the department chair and the resident to ensure that the request is received in time.
- D. Prospective approval is required for exceptions to policies regarding the training planned for residents, the sequencing of training experiences, and training outside the parent program. The Credentials Committee of the ABA considers requests for prospective approval on an individual basis.

### Principal Objectives

The anesthesiology examination system of the ABA has two distinct parts, the written examination and the oral examination. Each is designed to assess different aspects of the candidate's ability to func-

tion as a consultant in anesthesiology as defined by the ABA. A consultant in anesthesiology is a physician who possesses knowledge, judgment, adaptability, clinical skills, technical facility, and personal characteristics sufficient to carry out the entire scope of anesthesiology practice. A consultant in anesthesiology is able to communicate effectively with peers, patients, their families, and others involved in the medical community. The consultant can serve as an expert in matters related to anesthesiology, deliberate with others, and provide advice and defend opinions in all aspects of the specialty of anesthesiology. A Board-certified anesthesiologist is able to function as the leader of the anesthesiology care team.

Because of the nature of the role of the consultant anesthesiologist, the consultant must be able to deal with emergent life-threatening situations in an independent and timely fashion. The ability to acquire and process information in an independent and timely manner is central to ensure individual responsibility for all aspects of anesthesiology care. Adequate physical and sensory faculties, such as eyesight, hearing, speech, and coordinated function of the extremities, are essential to the independent performance of the functions of a consultant anesthesiologist. Freedom from the influence of or dependency on chemical substances that impair cognitive, physical, sensory, or motor functions also is an essential characteristic of the consultant anesthesiologist.

The written examination is designed to assess the knowledge base and the cognitive and deductive skills of the candidates. It is necessary for candidates to pass the written examination to qualify for the oral examination.

The oral examination is designed to measure those aspects of the candidate's ability not readily tested by written examination. Specifically, it is designed to assess the candidate's ability to manage patients presented in clinical scenarios. The candidate's decision-making ability is evaluated with particular emphasis on the scientific and clinical rationale that led to those decisions. In addition, the candidate's ability to manage surgical and anesthetic complications, as well as unexpected changes in the clinical situation, is assessed. The principal thrust is to determine whether candidates recognize the pertinent aspects of a clinical scenario, make rational diagnoses, and develop appropriate treatment protocols. Equally important, the oral examination is designed to establish whether the candidate can effectively communicate this information to others.

### Irregular Behavior

The Board acts to maintain the integrity of its examination and certification process and to ensure the equitable and objective administration of its examinations to all candidates. Information about behavior that the Board considers a violation of the integrity of its examination and certification process is sent to all candidates scheduled for examination. Statistical analyses may be conducted to verify observations and reports of suspected irregularities in the conduct of an examination. The examination of a candidate whose conduct, in the Board's judgment, violates or attempts to violate the integrity of its examination and certification process will be invalidated, and no results will be reported. Furthermore, the candidate will be subject to punitive action as determined by the Board. In that event the candidate would be informed of the reasons for the Board's actions and could request an opportunity to present information deemed relevant to the issue and to petition the Board to reconsider its decision.

### Nonstandard Examination Administration

The ABA supports the intent of the Americans with Disabilities Act (ADA) and has a process for considering requests that its assessment programs be modified to accommodate an individual with a

disability. Anyone having questions about the process should write or call the Executive Vice President of the Board at the ABA office.

### Unforeseeable Events

In the event a natural disaster, war, government regulations, strikes, civil disorders, curtailment of transportation facilities, or other unforeseeable events make it inadvisable, illegal, or impossible for the ABA to administer an examination to a candidate at the appointed date, time, and location, or to conclude a candidate's examination, the ABA is not responsible for any of the expense the candidate may have incurred to be present for the examination or for any such expense the candidate may incur for any substitute examination.

### Application Form

Application for admission to the examination system of the ABA must be made to the Secretary upon a form prescribed by the Board. Photocopies or facsimiles of the application form are not acceptable.

Proper forms for making application and other information may be obtained by writing to the Secretary, American Board of Anesthesiology, 4101 Lake Boone Trail, The Summit/Ste 510, Raleigh, NC 27607-7506. An applicant must request an application form by writing to the Board. Telephone requests are not acceptable.

### Filing and Documentation Deadlines

The completed application and the appropriate fee must be received by the ABA on or before January 10 of the year in which the written examination is to be administered. The January 10 deadline for receipt of completed applications is absolute, and no application will be accepted after that date for any reason.

The ABA must receive all documentation it requires to make a determination about an applicant's qualifications for admission to examination no later than 60 calendar days after the deadline for filing an application for the examination. This includes, but is not limited to, references and evidence of medical licensure or of having qualified for such licensure. An application will not be accepted if the required documentation is not received by that date.

### Applicant Declaration and Consent

The application form includes the following statement, which the applicant shall be required to sign.

"I hereby make application to the American Board of Anesthesiology, Inc, for the issuance to me of a certificate, and for examination relative thereto, all in accordance with and subject to its rules and regulations, and the fee requested. I agree to disqualification from examination or from the issuance of a certificate or to forfeiture and redelivery of such certification in the event that any of the statements heretofore made by me are false or in the event that any of the rules governing such examinations are violated by me or in the event that I did not comply with or shall violate any of the provisions of the Certificate of Incorporation or By-laws of the American Board of Anesthesiology, Inc, or both, as then constituted. I understand that the American Board of Anesthesiology, Inc, may report my status in the examination system, including the result of any written or oral examination, to the director of the program in which I completed my training in clinical anesthesiology either routinely or upon the request of such program director, use any score in psychometric analyses to confirm observations and reports of suspected irregularities in the conduct of an examination, and respond to any inquiry about my status in its examination system in accordance with its policy as then constituted. I authorize any and all repositories to grant access to or to produce copies for the American Board of Anesthesiology, Inc, of all documents and records contain-

ing information and data pertaining to my practice of the medical specialty of anesthesiology and its subspecialties. I understand that such information and data will be used exclusively to study and assess the certification processes of the American Board of Anesthesiology, Inc. More particularly, such information as it pertains to me shall be held in confidence and shall be reported or released only as a part of the aggregate of such information gathered and studied without specific reference to myself or any other individuals. Such information and data will not bear in any way whatsoever upon the decision of the American Board of Anesthesiology, Inc, whether or not to grant me a certificate. I agree to hold the American Board of Anesthesiology, Inc, its members, examiners, officers, and agents free from any damage or complaint by reason of any action they, or any of them, take in connection with this application, such examinations, the grade or grades given with respect to any examination, the failure of said Board or corporation to issue to me such certification, the gathering and collecting of information and data about my practice of anesthesiology, or the use of such information or data in studies of the certification processes of the American Board of Anesthesiology, Inc, as described above."

The application form also includes the following consent, which the applicant shall be required to sign.

"I, the undersigned, in connection with my application for certification by the American Board of Anesthesiology, Inc, hereby authorize the American Board of Anesthesiology, Inc, to request, procure, and review any information regarding my medical practice, professional standing, and character, including any information related to any disciplinary action related to the practice of medicine by any state licensing agency or any institution in which I have practiced medicine and any information related to any history of substance abuse or chemical dependency and any treatment or rehabilitation related thereto.

"I hereby authorize the American Board of Anesthesiology, Inc, to request and procure such information from any individual or institution, each of which shall be absolutely immune from civil liability arising from any act, communication, report, recommendation, or disclosure of any such information even where the information involved would otherwise be deemed privileged so long as any such act, communication, report, recommendation, or disclosure is performed or made in good faith and without malice.

"I hereby authorize the American Board of Anesthesiology, Inc, to supply a copy of this consent, which has been executed by me, to any individual or institution from which it requests information relating to me."

### Entrance Requirements

To enter the examination system of the ABA, the applicant shall

- A. Have graduated from a medical school approved by the Liaison Committee for Medical Education, or have met medical educational requirements otherwise acceptable to the ABA.
- B. Provide evidence satisfactory to the Board of having been awarded a medical or osteopathic degree acceptable to the Board.
- C. Provide evidence acceptable to the Board of having satisfied the licensure requirement for certification (see "Primary Certification in Anesthesiology Certification Requirements," A).

The applicant must inform the ABA of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the ABA will determine whether the applicant satisfies the licensure requirement of the ABA.

Residents in training may submit evidence with their application of having qualified on examinations that provide eligibility

for medical licensure (eg, NBME Part III or FLEX I and II). Residents who do so must have evidence of permanent and unrestricted medical licensure on file in the ABA office by November 30 of the year in which the written examination for which they applied is administered.

- D. Have on file in the Board office evidence of having satisfactorily fulfilled all requirements of the continuum of education in anesthesiology before the date of examination and after receiving a medical or osteopathic degree. Such evidence must include a satisfactory certificate of clinical competence covering the final 6 months of clinical anesthesia training in each residency program (see paragraph C in "Continuum of Education in Anesthesiology" and "Certificate of Clinical Competence"). A grace period will be permitted so that applicants completing this requirement by August 31 may apply for the immediately preceding July written examination.
- E. Have on file with the Board evaluations of various aspects of his or her current practice of anesthesiology as solicited by the Board in determining the applicant's qualifications for admission to the examination system. Such evaluations may be requested from the residency program director or others familiar with the applicant's current practice of anesthesiology. The clinical competence committee report from the department and the evaluation of the program director and others will be used as the basis for assessing admission qualifications. The response of the program director will be given considerable weight in these deliberations.
- F. Submit proof with the application of having reestablished his or her qualifications for admission to the examination system only if residency training was completed more than 12 years before the date of application or a second or subsequent application was declared void. Acceptable proof is documentation of having qualified on an entry examination designated by the Board or of having completed a 12-month term of additional clinical training in anesthesia in an ACGME-accredited program with receipt of a satisfactory certificate of clinical competence covering the final 6 months.

The Board has designated the examination administered annually by the Joint Council on In-Training Examinations as the entry examination. Information about the entry examination and a registration form may be obtained by writing the Joint Council in care of the American Society of Anesthesiologists.

The Board shall determine that entry into the examination system is merited when a judgment of adequate levels of scholarship and clinical competence can be made from the information submitted.

### Certificate of Clinical Competence

The Board requires every residency training program to file, on forms provided by the Board, an evaluation of clinical competence in January and July on behalf of each resident who has spent any portion of the prior 6 months in clinical anesthesia training in or under the sponsorship of the residency program and its affiliates.

The program director (ie, department chair) must not chair the Clinical Competence Committee. Entry into the examination system is contingent upon the applicant's having a certificate of clinical competence on file with the Board attesting to satisfactory clinical competence during the final period of clinical anesthesia training in or under the sponsorship of each program (see "Continuum of Education in Anesthesiology," C.3, for details). The Board, therefore, will deny entry into the examination system until this requirement is fulfilled.

## Absence From Training

The total of any and all absences during clinical anesthesia training may not exceed the equivalent of 20 working days per year. Attendance at scientific meetings, not to exceed 5 working days per year, shall be considered a part of the training program. Duration of absence during the clinical base year may conform to the policy of the institution and department in which that portion of the training is served. Absences in excess of those specified will require lengthening of the total training time to the extent of the additional absence.

A lengthy interruption in training may have a deleterious effect upon the resident's knowledge or clinical competence. Therefore, when there is an absence for a period in excess of 6 months, the credentials committee of the ABA shall determine the number of months of training the resident will have to complete subsequent to resumption of the residency program to satisfy the training required for admission to the ABA examination system.

## Entrance Into the System

The ABA will notify an applicant who is admissible to its examination system after approval of all credentials. The Board, acting as a committee of the whole, reserves the right to reject an applicant for any reason deemed appropriate. If the applicant wishes to exercise the right to appeal this decision, the applicant shall inform the Board of this intention within 30 days of the date of receipt of the rejection notification. The Board reserves the right to correct clerical errors affecting its decisions.

The Board office is not responsible for breaks in communication with candidates that are due to circumstances beyond its control. Candidates must send the Board written notice of an address change immediately so that the Board's examination notices will not go astray, and they must call the Board office if they do not receive an examination notice they are expecting within the time frame described above. The candidates' social security numbers are used by the Board for identification purposes and should be included on all correspondence with the Board.

## Examination Notices

The ABA sends notification of an examination and a reply form to every candidate eligible to appear for the examination at least 4 months prior to the examination date. The notification is sent to candidates at their addresses of record on file in the Board office.

Candidates are required to respond to every written and oral examination notice by the response date established by the ABA, whether or not they accept the examination opportunity. Every reply to an examination notice will be acknowledged within 2 weeks of its receipt in the Board office.

Candidates scheduled to appear for examination are notified of the exact date, time, and location of their examination and the rules for its conduct approximately 2 months before the date of examination.

Under certain circumstances the ABA, entirely at its discretion, may grant a candidate's request for an excused absence from any scheduled examination without forfeiture of the opportunity. Such a request must be filed in writing, include the candidate's reason, and arrive in the ABA office by the response deadline specified in the examination notice or, for scheduled candidates, by the examination date. A candidate may be excused from examination if it is determined the reason warrants such a decision and there is sufficient time remaining in the application period to provide the number of examination opportunities the candidate is permitted. Candidates excused from an examination are required to appear at the next examination for which they are eligible.

## Written Examination

Written examinations are held annually in locations throughout the United States and Canada on a Saturday in July. Written examinations cover the basic and applied aspects of physiological, physical, and clinical sciences. A passing grade, as determined by the Board, is required.

## Oral Examination

Candidates who complete the written examination successfully must wait at least 6 months before being declared eligible for oral examination. Oral examinations are conducted in the spring and fall of each year at a single location in the United States. Examiners consist of Directors of the Board and others who assist as associate examiners. Oral examinations evaluate all phases of anesthesiology, but emphasize clinical practice. A passing grade, as determined by the Board, is required.

It is an ABA regulation that candidates will not be scheduled to appear at consecutive oral examinations. Therefore, candidates who do not pass an oral examination for which they are scheduled, for whatever reason, are not eligible to appear at the next regularly scheduled oral examination.

The Board reserves the right to limit the number of candidates to be admitted to any examination. Places in the oral examination schedule are limited and assigned randomly to candidates who accept the opportunity. Candidates who are not given an examination appointment, whether or not they accepted the examination opportunity, are required to appear at the next examination for which they are eligible.

## Fees

The application fee for primary certification in anesthesiology is \$1,100. It must accompany the application. For completed applications received between January 11 and November 20 of the previous year, the application fee is \$1,000—a reduction of \$100 for early filing.

The reexamination fee is \$200 for the anesthesiology written examination and \$700 for the oral examination. The reexamination fee will be charged candidates whether they have failed a previous examination, canceled a scheduled appointment for examination, or failed to appear for any examination for which they were properly scheduled.

A charge of \$50 will be made whenever a check in payment of a fee is returned for nonpayment.

A nonrefundable fee for administrative services is included in the application fee. It is \$200 for applications for primary certification that arrive after November 20 and \$100 for those received before that date. In the event an application is not accepted, or the application is accepted and subsequently withdrawn by the candidate, the fee for administrative services will be retained and the balance of the application fee will be refunded. No fee will be remitted if the candidate's notice of withdrawal from the examination system is received in the Board office after the deadline by which candidates must notify the Board of their choice of test center for the first written examination for which they are eligible.

The ABA is a nonprofit organization. The fees for application and examination are computed on the basis of the cost of maintaining the functions of the Board. The Board reserves the right to change the fees when necessary.

## Reapplication

The application of a candidate who has failed to satisfy the examination requirements in the prescribed number of opportunities or time, for whatever reason, shall be declared void. The physician may reapply by submitting a new application. Such application shall

be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who is adjudged to meet existing requirements will be readmitted into the examination system.

The reapplicant for primary certification who has had a second or subsequent application declared void for any cause, or has completed anesthesia residency training more than 12 years before the date of reapplication, must reestablish his/her qualifications for admission to the examination system before filing another application. The manner in which this may be done is described in paragraph F of the "Entrance Requirements" section. In all instances, the candidate must pass both the written and oral examinations under the new application.

### Status of Individuals

The ABA reserves to itself exclusively the right to define and confer Board-eligible status whenever such status refers to an individual's relationship to the ABA examination and certification system. The ABA shall confer Board-eligible status only on physicians who are candidates in its examination system. Thus, physicians are Board-eligible only when they are eligible to appear for an ABA examination. Board-eligible status is not conferred indefinitely.

Inquiries about the current status of individuals should be addressed to the ABA office, which will respond with one of the following statements:

- A. The physician is certified by the ABA.
- B. The physician is Board-eligible in anesthesiology.
- C. The physician is neither certified by the ABA nor Board-eligible.

### Royal College Certification

The ABA will make no statement about the comparability of the ABA diploma and another organization's certificate. The ABA will acknowledge letters it wrote prior to 1994 on behalf of physicians admitted to Fellowship in the Australian and New Zealand College of Anesthetists, the Royal College of Physicians and Surgeons of Canada, the Royal College of Anesthetists of England, the Faculty of Anesthetists of the Royal College of Surgeons in Ireland, and the College of Anesthetists of South Africa, or their antecedent organizations.

Holders of one of these Fellowships (ie, FFAs) had to have satisfactorily completed 1 year of prospectively approved training as a CA-3 year resident in an ACGME-accredited program no later than August 31, 1995, to qualify to apply to the ABA for examination. Alternatively, they must have completed 2 years of full-time anesthesiology practice in the United States or its jurisdictions, the second year of which must have occurred between January 1, 1992, and December 31, 1995.

FFAs who qualify in one of the above ways must sit for their first ABA examination no later than 1997. The deadline for filing an application for the 1997 ABA examination is January 10, 1997.

All ABA policies that apply to other applicants and candidates for primary certification also apply to FFA applicants and candidates. However, FFAs who completed their most recent year of clinical training in anesthesiology more than 12 years ago will not have to reestablish their admission qualifications before filing their first application with the ABA.

FFAs must be ABA diplomates to qualify to apply for an ABA subspecialty certificate or the certificate of continued demonstration of qualifications. Further, one year of residency training in an ACGME-accredited anesthesiology program will not satisfy the training requirements for both primary and subspecialty certification. The ABA policies that apply to other applicants and candidates for subspecialty examination and certification apply to FFA applicants and candidates.

### Alcoholism and Substance Abuse

The Americans with Disabilities Act (ADA) protects individuals with a history of alcoholism who are rehabilitated and protects former drug users who currently do not use drugs illegally. The ABA supports the intent of the ADA.

The ABA will admit qualified applicants and candidates with a history of alcoholism to its examination system and to examination if they submit documentation acceptable to the ABA that they do not currently pose a direct threat to the health and safety of others.

The ABA will admit qualified applicants and candidates with a history of illegal use of drugs to its examination system and to examination if they submit documentation acceptable to the ABA that they currently are not actively engaged in the illegal use of drugs.

After a candidate with a history of alcoholism or illegal use of drugs satisfies the examination requirements for certification, the ABA will determine whether it should defer awarding its certification to the candidate for a period of time in order to avoid certification of a candidate who poses a direct threat to the health and safety of others. If the ABA determines that deferral of the candidate's certification is appropriate because the candidate does currently pose a threat to the health and safety of others, the ABA will determine the length of time the candidate's certification is deferred following an individual assessment of the specific circumstances of the candidate's history of alcoholism or illegal use of drugs.

### Revocation of Certificate

A certificate is issued by the Board with the understanding that it remains the property of the Board during the life of the diplomate. Any certificate issued by the Board shall be subject to revocation in the event that

- A. The issuance of such certificate or its receipt by the person so certified shall have been contrary to, or in violation of, any provision of the certificate of incorporation of this Board or its by-laws; or
- B. The person certified shall not have been eligible to receive such certificate, whether or not the facts making him/her ineligible were known to, or could have been ascertained by, the Board or any of the directors at the time of issuance of such certificate; or
- C. The person certified shall have made any misstatement of fact in his/her application for such certificate or in any other statement or representation to the Board or its representatives; or
- D. The person certified shall fail to maintain a moral, ethical, and professional standing satisfactory to the Board.

The Board shall be the sole judge of whether the evidence or information before it is sufficient to require or permit revocation of any certificate issued by the Board, and the decision of the Board shall be final.

### Recertification

The American Board of Anesthesiology has increasing confidence in the concept of recertification. Therefore, pending ABMS authorization, all certifications awarded by the American Board of Anesthesiology on or after January 1, 2000, will be time-limited, expiring 10 years after issuance. The ABA takes this step to reassure the public that the diplomate continues to demonstrate the attributes of a consultant anesthesiologist.

The ABA currently has a Continued Demonstration of Qualifications program to recognize the recertification of diplomates issued a certificate that is not time-limited. It will develop a program to recertify diplomates issued a time-limited certificate. Both programs will include a commitment to continued education in anesthesiology, assessment of the quality of practice in the local environment, and evaluation of knowledge.

## Records Retention

The ABA retains documents pertaining to an individual's residency training, application for certification, examination opportunities, and examination results for the sole purpose of determining that its requirements for admission to examination for certification are fulfilled.

In the absence of an application for certification, documents pertaining to the ABA entrance requirements are retained for 7 years from the date of the most recent correspondence to or from the ABA regarding the requirements. Documents pertaining to an unsuccessful application are retained until the individual submits another application to the ABA or the aforementioned 7-year period expires, whichever occurs first. Documentation corroborating the results of a candidate's examination is retained until 1 year after the date of the most recent correspondence to or from the ABA regarding the results. Documentation corroborating the candidate's fulfillment of the ABA certification requirements is retained until 1 year after the date of the most recent correspondence to or from the ABA regarding the candidate's certification by the ABA. The ABA sees to the secure destruction of the documents in its file for an individual when the period specified for retention of the documents has expired.

The ABA retains indefinitely an electronic record for residents who trained in an ACGME-accredited anesthesiology program. This record includes entries that identify the training program, the dates of training, and the overall evaluation of the resident.

The ABA retains indefinitely microfiche and electronic records for candidates issued its certification. These records include documents and entries attesting that each certification requirement was met.

## Certification of Special Qualifications in Critical Care Medicine

### A. Definition of Critical Care Medicine

The discipline of critical care medicine has evolved over the past few decades in parallel with the development of techniques and technology for acute and long-term life support of patients with multiple organ system derangement. Because the problems encountered in the critically ill patient encompass aspects of many different specialties, critical care medicine is a multidisciplinary endeavor that crosses traditional department and specialty lines.

The critical care medicine physician is a specialist whose knowledge is of necessity broad, involving all aspects of management of the critically ill patient, and whose primary base of operation is the intensive care unit (ICU). This physician has completed training in a primary specialty and has received additional training in critical care medicine aspects of many disciplines. This background enables the physician to work in concert with the various specialists on the patient care team in the ICU; utilize recognized techniques for vital support; teach other physicians, nurses, and health professionals the practice of intensive care; and foster research.

Thus, critical care medicine is a discipline based in an ICU with its primary concern being the care of the patient with a critical illness.

### B. Certification Requirements

To be awarded a certificate of special qualifications in critical care medicine by the ABA, each applicant must

1. Be a diplomate of the ABA.
2. Fulfill the licensure requirement for certification (see "Primary Certification in Anesthesiology Certification Requirements," A).
3. Fulfill the requirement of the continuum of education in critical care medicine as defined by the ABA.

4. Satisfy the critical care medicine examination requirement of the ABA.

### C. Continuum of Education in Critical Care Medicine

The continuum of education in critical care medicine consists of 12 months of formal training in critical care medicine following completion of the continuum of education in anesthesiology. The training must be in a critical care medicine program accredited by the Residency Review Committee for Anesthesiology.

Training in critical care medicine should not be interrupted by frequent or prolonged periods of absence. Absences during the year of formal training in excess of that permitted by the institution or department will require lengthening of the total training time to the extent of the additional absence.

### D. Entrance Requirements

To enter the critical care medicine examination system of the ABA, the applicant shall

1. Submit evidence that he/she is certified by the ABA.
2. Submit proof of having fulfilled the licensure requirement for certification.
3. Have on file in the ABA office documentation of having fulfilled the requirement of the continuum of education in critical care medicine.

Evaluation of various aspects of the applicant's credentials and performance will be solicited by the ABA in assessing his or her qualifications for admission to its critical care medicine examination system. The Board shall determine that entry into its critical care medicine examination system is merited when judgment of adequate levels of scholarship and clinical competence can be made from the information submitted.

Certification by other entities will not be considered as meeting any of the requirements for entrance into the ABA critical care medicine examination system.

### E. Application Procedure

1. The proper application form and other information may be obtained by writing to the Secretary, the American Board of Anesthesiology, 4101 Lake Boone Trail, The Summit/Ste 510, Raleigh, NC 27607-7506. An applicant must request an application form by writing to the Board. Telephone requests are not acceptable.

Application for admission to the examination system of the ABA must be made to the Secretary upon a form prescribed by the Board. Photocopies or facsimiles of the application form are not acceptable.

2. The application form includes the identical statements of declaration and consent included in the application for primary certification. The applicant for examination in critical care medicine shall be required to sign each statement.

### F. Filing and Documentation Deadlines

The completed application and the appropriate fee for the 1997 critical care medicine examination must be received by the ABA on or before March 1, 1997. Applications received after the deadline will not be accepted.

The ABA must receive all documentation it requires to make a determination about an applicant's qualifications for admission to examination no later than May 1, 1997. This includes but is not limited to references, evidence of medical licensure, and verification that the training requirement is met. An application will not be accepted if the required documentation is not received by that date.

### G. Fees

The application fee for admission to the critical care medicine examination system is \$1,000. It must accompany the application.

A nonrefundable fee for administrative services of \$250 is included in the application fee. The reexamination fee for the critical

care medicine examination is \$750. The ABA policies regarding the administrative services fee and the reexamination fee are stated under "Filing and Documentation Deadlines."

A charge of \$50 will be made whenever a check in payment of a fee is returned for nonpayment.

#### H. Examination System

The ABA will notify an applicant who is accepted as a candidate for its critical care medicine examination after approval of all credentials. The Board, acting as a committee of the whole, reserves the right to reject an applicant for any reason deemed appropriate. The Board reserves the right to correct clerical errors affecting its decisions.

The written examination in critical care medicine is designed to test for the presence of basic knowledge that is considered essential for the ABA diplomate to function as a practitioner of critical care medicine. The examination analyzes the cognitive and deductive skills, as well as the clinical judgment, of the candidates.

Current plans are to administer the critical care medicine examination at one or more locations in the United States no more frequently than once every 2 years. The ABA will mail notice to all eligible candidates announcing the location(s) and date(s) of the critical care medicine examination approximately 4 months prior to the date of its scheduled administration.

Every candidate is given three opportunities to satisfy the critical care medicine examination requirement. Failure to satisfy the examination requirement within the three opportunities or the prescribed time, whichever comes first, will result in the candidate's application being declared void.

The prescribed period of time for the successful completion of the examination for certification of special qualifications in critical care medicine is the time between the date of the first examination for which the candidate is declared eligible and the next three consecutive administrations of the critical care medicine examination. Thus, the ABA, at its discretion, may excuse a candidate from at most one critical care medicine examination without forfeiture of an opportunity.

The ABA policies regarding examination notices, candidate responses, address changes, and excused absences are stated on the preceding pages. Its policies regarding examination under nonstandard conditions, irregular examination behavior, and unforeseeable events may also be found on the preceding pages.

#### I. Status of Individual

Inquiries about the current status of physicians relative to the ABA critical care medicine certification system should be addressed to the ABA office. The ABA will affirm the status of physicians who are certified in critical care medicine by the ABA. For others, the response to the inquiry will be in keeping with the ABA policy.

#### J. Reapplication

The application of a candidate who has failed to satisfy the critical care medicine examination requirement in the prescribed number of opportunities or time, for whatever reason, shall be declared void. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who is adjudged to meet existing requirements will be readmitted into the examination system.

Every reapplicant who qualified previously by Temporary Criteria is required to have completed satisfactorily the 1-year Continuum of Education in Critical Care Medicine.

## Certification of Added Qualifications in Pain Management

### A. Definition of Pain Management

Pain management is the medical discipline concerned with the diagnosis and treatment of the entire range of painful disorders. Because of the vast scope of the field, pain management is often considered a multidisciplinary subspecialty. The expertise of several disciplines is brought together in an effort to provide the maximum benefit to each patient. Although the care of patients is heavily influenced by the primary specialty of physicians who subspecialize in pain management, each member of the pain treatment team understands the anatomical and physiological basis of pain perception, the psychological factors that modify the pain experience, and the basic principles of pain management.

### B. Certification Requirements

To be awarded a certificate of added qualifications in pain management by the ABA, each applicant must

1. Be a diplomate of the ABA.
2. Fulfill the licensure requirement for certification (see "Primary Certification in Anesthesiology Certification Requirements," A).
3. Fulfill the requirement of the continuum of education in pain management as defined by the ABA.
4. Satisfy the pain management examination requirement of the ABA.

The ABA certificate of added qualifications in pain management will be valid for a period of 10 years from its date of issuance. It is left to the holder of the subspecialty certificate when to reapply to the ABA for examination and renewal of the pain management certification.

### C. Continuum of Education in Pain Management

The continuum of education in pain management consists of 12 months of formal training in acute, chronic, and oncology pain management. The 12 months of pain management training must follow the successful completion of the continuum of education in anesthesiology. The training must be in a pain management program accredited by the Residency Review Committee for Anesthesiology. Pain management training that does not meet these conditions must be approved prospectively by the Credentials Committee of the ABA, which will judge each request individually.

Training in pain management should not be interrupted by frequent or prolonged periods of absence. Absences during the year of formal training in excess of that permitted by the institution or department will require lengthening of the total training time to the extent of the additional absence.

### D. Entrance Requirements

To enter the pain management examination system of the ABA, the applicant shall

1. Submit evidence that he/she is certified by the ABA.
2. Submit evidence acceptable to the Board of having satisfied the medical licensure requirement for certification.
3. Have on file in the Board office documentation of having fulfilled the requirements of the continuum of education in pain management (see "Continuum of Education in Pain Management" or "Temporary Criteria").

Evaluation of various aspects of the applicant's credentials and performance will be solicited by the ABA in assessing his/her qualifications for admission to its pain management examination system. The Board shall determine that entry into its pain management examination system is merited when judgment of adequate levels of scholarship and clinical competence can be made from the information submitted.

Certification by other entities will not be considered as meeting any of the requirements for entrance into the ABA pain management examination system.

### E. Temporary Criteria

The ABA recognizes that initially, many applicants will not have received formal pain management training. Therefore, it has established temporary criteria that eligible pain management practitioners can fulfill to satisfy the requirement of the Continuum of Education in Pain Management. Applicants who qualify under the temporary criteria must satisfy the entrance requirements listed under "Entrance Requirements," 1 and 2.

Applicants cannot qualify under temporary criteria for pain management examinations that are administered after 1998.

1. Applicants are eligible to qualify under the temporary criteria only if they completed the Continuum of Education in Anesthesiology before September 1, 1993.

Candidates whose first application is declared void following three opportunities to satisfy the examination requirement may not qualify for readmission to the examination system under the temporary criteria.

2. The temporary criteria can be fulfilled in the following ways:
  - a. The satisfactory completion of 12 months of formal training in acute, chronic, and oncology pain management whose content and setting is acceptable to the ABA. Training in fulfillment of the temporary criteria that begins after May 1, 1994, must be approved prospectively by the Credentials Committee of the ABA. The Credentials Committee will not accept requests for prospective approval that are received after May 1, 1997.
  - b. The completion of the equivalent of 24 months of continuous, full-time pain management practice.

Credit will be granted for pain management practice only during the 8 years immediately preceding the date of the examination for which application is made. The applicant must be practicing pain management continuously during the period for which credit is requested.

Practice credit will be granted in proportion to the percentage of the applicant's time each year spent practicing pain management, except that no credit will be granted for any year in which less than 25% of the applicant's professional time was spent practicing pain management.

Verification of the percentage of professional time devoted annually to the practice of pain management and of clinical competence in anesthesiology pain management must be documented for the applicant by the Chief of Anesthesiology or the Pain Management Director. If the applicant holds both of these titles, another diplomate of the ABA must document these facts for the applicant.

- c. A combination of pain management training and continuous practice that the Credentials Committee of the ABA deems to be the equivalent of 12 months of full-time pain management training.

Exceptions to the above temporary criteria that could be considered equivalent combinations of training and practice will be considered by the Credentials Committee of the ABA on an individual basis.

### F. Application Procedure

The proper application form and other information may be obtained by writing to the Secretary, American Board of Anesthesiology, 4101 Lake Boone Trail, The Summit/Ste 510, Raleigh, NC 27606-7506. An applicant must request an application form by writing to the Board. Telephone requests are not acceptable.

Application for admission to the examination system of the ABA must be made to the Secretary upon a form prescribed by the

Board. Photocopies or facsimiles of the application form are not acceptable.

The application form includes the identical statements of declaration and consent included in the application for primary certification. The applicant for examination in pain management shall be required to sign each statement.

### G. Filing and Documentation Deadlines

The completed application and the appropriate fee for the 1996 pain management examination must be received by the ABA on or before March 1, 1996. Applications received after the deadline will not be accepted.

The ABA must receive all documentation it requires to make a determination about an applicant's qualifications for admission to examination no later than May 1, 1996. This includes but is not limited to references, evidence of medical licensure, and verification that the training requirement or temporary criteria are met. An application will not be accepted if the required documentation is not received by that date.

### H. Fees

The application fee for admission to the pain management examination system is \$1,000. The fee must accompany the application.

A nonrefundable fee for administrative services of \$250 is included in the application fee. The reexamination fee for the pain management examination is \$750. The ABA policies regarding the administrative services fee and the reexamination fee are stated on the preceding pages.

A charge of \$50 will be made whenever a check in payment of a fee is returned for nonpayment.

### I. Examination System

The ABA will notify an applicant who is accepted as a candidate for its pain management examination after approval of all credentials. The Board, acting as a committee of the whole, reserves the right to reject an applicant for any reason deemed appropriate. The Board reserves the right to correct clerical errors affecting its decisions.

The written examination in pain management is designed to test for the presence of basic knowledge that is considered essential for the ABA diplomate to function as a practitioner of pain management. The examination analyzes the cognitive and deductive skills as well as the clinical judgment of the candidates.

Current plans are to administer the pain management examination at one or more locations in the United States no more frequently than once every 2 years. The ABA will mail notice to all eligible candidates announcing the location(s) and date(s) of the pain management examination approximately 4 months prior to the date of its scheduled administration.

Every candidate is given three opportunities to satisfy the pain management examination requirement. Failure to satisfy the examination requirement within the three opportunities or the prescribed time, whichever comes first, will result in the candidate's application being declared void.

The prescribed period of time for the successful completion of the examination for certification of added qualifications in pain management is the time between the date of the first examination for which the candidate is declared eligible and the next three consecutive administrations of the pain management examination. Thus, the ABA, at its discretion, may excuse a candidate from at most one pain management examination without forfeiture of an opportunity.

The ABA policies regarding examination notices, candidate responses, address changes, and excused absences are stated on the preceding pages. Its policies regarding nonstandard examination administration, irregular examination behavior, and unforeseeable events may also be found on the preceding pages.

**J. Status of Individuals**

Inquiries about the current status of physicians relative to the ABA pain management certification system should be addressed to the ABA office. The ABA will affirm the status of physicians who are certified in pain management by the ABA. For others, the response to the inquiry will be in keeping with ABA policy.

**K. Reapplication**

The application of a candidate who has failed to satisfy the examination requirement in the prescribed number of opportunities or time for whatever reason shall be declared void. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who is adjudged to meet existing requirements will be readmitted into the examination system.

Every applicant who qualified previously by temporary criteria is required to have completed satisfactorily the 1-year continuum of education in pain management.

# American Board of Colon and Rectal Surgery

David J Schoetz, Jr, MD, President, Burlington, Massachusetts  
 Theodore E Eisenstat, MD, Vice President, Plainfield, New Jersey  
 Herand Abcarian, MD, Secretary-Treasurer/Executive Director, Taylor, Michigan

H Randolph Bailey, MD, Houston, Texas  
 Robert W Beart, Jr, MD, Los Angeles, California  
 Marvin L Corman, MD, Santa Barbara, California  
 Thomas H Dailey, MD, New York, New York  
 John M Daly, MD, New York, New York  
 Philip H Gordon, MD, Montreal, Quebec  
 Richard L Nelson, MD, Chicago, Illinois  
 David A Rothenberger, MD, St Paul, Minnesota

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Colon and Rectal Surgery to ascertain whether the information below is current.)*

**Qualifications of Candidates**

All candidates shall comply with the following regulations:

**General Requirements**

1. A candidate shall appear personally before the Board and shall submit to the required examinations.
2. A candidate shall limit the majority of his/her practice to colon and rectal surgery.
3. A candidate may be required to deliver to the Board sufficient case reports to demonstrate proficiency in colon and rectal surgery.
4. A bibliography of papers and books published by the candidate shall be submitted to the Board upon its request.
5. The moral and ethical fitness of a candidate must be satisfactory to the Board and in conformity with the *Statements on Principles* of the American College of Surgeons and the *Principles of Medical Ethics* of the American Medical Association. Practices not conforming therewith may result in rejection of an application or in deferral of examination until such matters have been resolved satisfactorily.

**Professional Qualifications**

1. A candidate must have completed an accredited residency program in colon and rectal surgery.
2. All candidates must have a currently *valid* registered full and unrestricted license to practice medicine in a state, territory, or possession of the United States or in a Canadian province, and must continue to be licensed throughout the certification process.
3. A candidate must successfully complete the Qualifying Examination of the American Board of Surgery before being admitted to the American Board of Colon and Rectal Surgery (ABCRS) Written Examination (Part I).
4. A candidate must achieve certification by the American Board of Surgery before being admitted to the American Board of Colon and Rectal Surgery Oral Examination (Part II).

**Application for Examination**

Each candidate for examination must complete and submit an Application for Examination, which may be obtained from the Secretary of the Board. Applications must be submitted before July 15 of each year.

The application must be accompanied by two unmounted, recent photographs of the applicant and the required application fee.

Within 2 weeks after conclusion of the training program, the applicant must submit to the Secretary of the Board a prescribed form, listing all operative procedures performed during the training period. This form is available from the Secretary of the Board and must be countersigned by the Program Director.

The acceptability of a candidate for examination depends not only upon completion of the requirements listed under "Qualifications for Candidates" but also upon information available to the Board regarding the candidate's professional maturity, surgical judgment, and technical competence.

### Examinations

To achieve certification by the ABCRS, a candidate must pass a Written Examination (Part I) and an Oral Examination (Part II). The Written Examination is offered in the spring of the year, and a candidate is required to pass this examination before being permitted to take the Oral Examination, which is given in the fall of the year.

Examinations are conducted at times and places determined by the Board, and this information may be obtained from the Board office. It is also published in *Diseases of the Colon and Rectum* and in the *Journal of the American Medical Association*. Examinations will be held in one designated city in the United States.

#### Part I—Written Examination

The Written Examination is an assessment of a candidate's knowledge of the theory and practice of colon and rectal surgery with separate examinations in pathology and radiology. The written portion of the examination is a 4-hour test of multiple-choice questions covering the spectrum of colon and rectal surgery and the body of basic science pertinent to it. The pathology and radiology portions of the examination are each 1 hour in length and consist of questions and slide presentations.

#### Part II—Oral Examination

The Oral Examination is conducted by members of the Board or its designated examiners. Its objective is to evaluate the candidate's clinical experience, problem-solving ability, and surgical judgment, and to ascertain the candidate's knowledge of current literature on colon and rectal diseases and surgery. Each candidate will undergo at least three 30-minute oral examinations by three two-member examining teams.

#### Examination Results

The Board makes every effort to be as prompt as possible in notifying candidates of their examination results, and letters of notification may be expected within 4 to 6 weeks following the examination.

### Reexaminations

A candidate who has failed either the written or oral part of the examination may be reexamined after 1 year has elapsed.

A candidate who fails to pass either the written or oral portion of the examination may repeat that part of the examination twice, thus offering the candidate three opportunities to pass each part of the examination.

A candidate who fails to pass either the written or oral portion of the examination three times may not repeat the examination without satisfactory completion of an approved colon and rectal surgery residency program and submission of a new application for examination.

### Status of Applicant

The Board does not use or sanction the terms "Board Eligible" or "Board Qualified." The status of an applicant with the Board is determined by and varies with the current status of his/her credentials.

A candidate must apply to the Board's certification process within 5 years after completion of approved colon and rectal surgery training.

The entire certification process with the Board must be successfully completed within 7 years following approval of the formal application. In addition, a candidate whose application for examination has been approved, but who does not take the examination within 3 years, must submit a new application.

In exceptional or unusual circumstances, the Board may, at its discretion, waive one or more of the limitations specified under "Status of Applicant."

### Fees

**Application fee:** A nonrefundable fee of \$300 shall accompany the application.

**Written Examination fee (Part I):** A fee of \$400 is due and payable when the candidate is notified of approval to take the Written Examination.

**Oral Examination fee (Part II):** A fee of \$500 is due and payable when the candidate is notified of approval to take the Oral Examination.

**Reexamination fee:** Fees for reexamination are the same as shown above for each examination.

**Withdrawal from examination:** A candidate who withdraws must notify the Board office at least 10 business days before a scheduled examination. A candidate who fails to appear for examination or who withdraws without giving at least 10 days' notice as defined above will forfeit \$100 of the designated examination fee and will have to resubmit the forfeited amount before being admitted to the next scheduled examination.

**Late applications:** Recognizing that a situation may arise that prevents an applicant from meeting the July 15 deadline, the Board has a provision for late applications. Late applications are those that are postmarked from July 16 through August 15 each year. There is a nonrefundable late application fee of \$100, bringing the total processing fee for a late application to \$400. No applications postmarked after August 15 will be accepted.

Fees are subject to change as directed by the Board.

### Reconsideration and Appeals

The Board has adopted a policy with regard to reconsideration and appeals of decisions adverse to applicants. A request for reconsideration, which is the first step, must be made in writing and received by the Board office within 60 days of the date of notice from the Board of the action in question. A copy of the Reconsideration and Appeals Policy may be obtained from the Board office upon request.

### Certification

A candidate who has met all the requirements and successfully completed the examinations of the ABCRS will be issued a certificate attesting to his/her qualifications in colon and rectal surgery. The certificate shall be signed by the President or Vice President and the Secretary, and shall bear the corporate seal of the Board.

The certificate granted by the Board does not confer privilege or license to practice colon and rectal surgery, but is evidence that a physician's qualifications for specialty practice are recognized by his/her peers. It is not intended to define the requirements for membership on hospital staffs, to gain special recognition or privileges for its diplomates, to define the scope of specialty practice, or to state who may or may not engage in the practice of the specialty.

Unless the candidate specifies otherwise, the Board forwards the names of candidates who have achieved certification to the American Board of Medical Specialties for publication in the *Official*

*American Board of Medical Specialties Directory of Board Certified Medical Specialists*, published jointly by the American Board of Medical Specialties (ABMS) and Marquis Who's Who.

### Time-Limited Certification

Beginning with those candidates who passed the certifying examination in 1990 and thereafter, the ABCRS will issue time-limited certificates. Certificates will be valid for 8 years from the date of certification, after which the certificates will no longer be valid.

(Note: Time-limited certification will not affect Diplomates holding certificates issued prior to 1990.)

### Recertification

The ABCRS offers recertification in the specialty. Certificates can be renewed prior to expiration by fulfilling the requirements for recertification specified by the Board. The recertification examination is offered annually, on a voluntary basis, to all certified colon and rectal surgeons who apply and meet the Board's requirements. A recertification information booklet, which outlines the requirements and procedures, is available by writing to the Board office.

### Revocation of Certificates

The filing of an application for examination, participating in examination, and accepting a certificate are voluntary acts. Therefore, the Board assumes no responsibility for any effect that certification or failure to obtain certification may have on the private or professional activities of candidates.

When an application is submitted, candidates are required to sign an agreement, a portion of which reads as follows: "I agree to disqualification from examination or from the issuance of a certificate, and I agree to the forfeiture and redelivery of such certificate in the event that any of the statements herein made by me at this time or at any time in the past or future in regard to my application for a certificate are false, or in the event that any of the rules and regulations of the Board governing such examinations and certificate are violated by me."

Certificates that have been issued are subject to the provisions of the Articles of Incorporation and the Constitution and Bylaws of the American Board of Colon and Rectal Surgery, Inc, and may be revoked for violation of any of these provisions.

### Examination of Candidates With Disabilities

The ABCRS supports the intent of the Americans with Disabilities Act. The Board will make a reasonable effort to provide Board applicants who have documented disabilities with modifications in its examination process that are appropriate for such disabilities but that do not alter the measurement of the skills or knowledge that the examination process is intended to test.

## American Board of Dermatology

Rex A Amonette, MD, Memphis, Tennessee  
 Diane R Baker, MD, Portland, Oregon  
 Ronald J Barr, MD, Orange, California  
 Mark Allen Everett, MD, Oklahoma City, Oklahoma

 Clarence S Livingood, MD, Executive Consultant, Detroit, Michigan

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Dermatology [ABD] to ascertain whether the information below is current.)*

### Requirements for Eligibility to Take the Examination

Each applicant must satisfy the following requirements before he or she is eligible to take the certifying examination of the Board.

#### General Qualifications

1. The candidate must have graduated from a medical school in the United States accredited by the Liaison Committee for Medical Education (LCME), an accredited medical school in Canada, or an accredited osteopathic school in the United States; if a graduate of a foreign medical school, the candidate must possess the standard certificate of the Educational Commission for Foreign Medical Graduates (ECFMG).
2. The candidate must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada.

#### Residency Training Requirements

1. Candidates for certification by the American Board of Dermatology are required to have a total of 4 years of postgraduate training, as described below in Sections a) and b).
  - a. The first year must consist of clinical training in one of the following types of broad-based programs in the United States accredited by the Accreditation Council for Graduate Medical Education (ACGME) or a similar program in Canada accredited by the Royal College of Physicians and Surgeons of Canada: transitional year (formerly called flexible first postgraduate year) or a first-year residency in internal medicine, general surgery, family practice, obstetrics and gynecology, or pediatrics.
  - b. Three years of full-time training as a resident in a dermatology residency training program in the United States accredited by the Accreditation Council for Graduate Medical Education (ACGME) or 3 years of full-time training as a resident in a dermatology residency training program in Canada accredited by the Royal College of Physicians and Surgeons of Canada. Accreditation of dermatology training programs in the United States is the responsibility of the Residency Review Committee (RRC) for Dermatology acting with authority delegated to it by the ACGME (accredited dermatology residency training

programs and clinical programs for first postgraduate year credit are listed in the *Graduate Medical Education Directory* published by the American Medical Association).

At least 75% of the resident's time throughout each year of dermatology residency training must be related to the direct care of dermatologic outpatients and inpatients; this includes clinical conferences directly related to patient care, consultations, and inpatient rounds.

Dermatopathology, microbiology, and other basic science lectures, seminars, and conferences are essential components of the resident's training (see the *Special Requirements for Residency Training in Dermatology*).

The Board also emphasizes the importance of basic and clinical investigation in the educational experience of trainees. Accordingly, all residents should participate in basic and/or clinical research during their training.

During or following the first year of dermatology training (PGY-2), which must conform to the requirements above (75% of time related to the direct care of patients), the training director may request prospective approval from the ABD for an academic career track during the second or third year of training for those trainees whose career plans involve a primary commitment to investigative dermatology or an academic career in dermatology. This special training track, which must ensure adequate clinical education and experience in accordance with the special requirements described above, must be submitted prospectively, at least 4 months prior to the beginning of such training. Usually this will be on or before March 1 of the PGY-2 year. By this time in the residency, the program director should have had an opportunity to judge the clinical potential of the trainee. The request for consideration of this investigative/academic track must include details of the scheduled program and time commitments during the entire training period of these candidates. It is incumbent upon program directors to select for this special training track candidates whose skills and learning capabilities permit the acquisition of clinical competence as well as the execution of their investigative or academic responsibilities. Moreover, the program director must continue to closely monitor the training of these residents and must validate their clinical experience at the completion of their residencies.

2. A preliminary registration form must be filed by the candidate and signed by his/her training director as soon as the resident begins residency training in dermatology.
3. It is mandatory that the training director submit a yearly report form for each resident to the Board office by August 1 after completion of the first and second year of training and by May 15 for residents who will complete their third year of training on June 30. In order for a candidate to take the certifying examination, the training director must certify that each year of training was completed in a satisfactory manner.
4. Training must be completed within 5 years after the beginning of dermatology residency, except when military service or other compelling circumstances intervene.
5. It is the responsibility of the residency program director to determine if a resident has satisfactorily completed the required 3 years of dermatology training and is therefore eligible to sit for the certifying examination of the ABD.

#### *Guidelines for Determining Adequacy of Clinical Training*

The following guidelines are designed to assist program directors in their determination of the adequacy of the clinical training of residents and to ensure satisfaction of the eligibility requirements for certification by the ABD. Of special concern are those residents on the special investigative/academic track or those residents whose

training experience differs from the standard 36 months of full-time clinical training, as approved for each program by the RRC of the ACGME:

- a. In general, high priority should be given to completing 36 continuous months of full-time dermatology training. For most residents, this will consist of full-time clinical training; for residents with a primary commitment to investigative or academic dermatology, this may be a special training track, as defined previously.
- b. Any departure from (a), as required, for example, for a medical leave of absence, should be documented and fully justified in the resident evaluation forms filed annually with the Board by the training program director.
- c. An absence exceeding 6 weeks in any one academic year or a total of 14 weeks over 3 years, including vacation, should be approved only under truly exceptional circumstances. In addition, any resident approved to sit for the certifying examination despite such an absence should have completed each year of training in an above-average or excellent manner, as recorded on the residency evaluation forms.
- d. Any resident who will have been absent more than 6 weeks in 1 year or 14 weeks over 3 years and whose performance has not been uniformly above average or excellent throughout residency training should be required to complete an additional period of training at least equal in length to the total period of absence in excess of routinely provided total vacation time. If the program director anticipates that this additional training will be completed in a satisfactory manner before September 1, the Director may approve the resident to sit for the certifying examination in that year, just as if training had been completed by July 1.

#### **Registration for the Examination of the Board**

Candidates who have completed the training requirements as outlined above are eligible to apply for examination by the Board. Candidates should request an Application for Certification Form from the office of the Executive Director of the Board. The completed application must be filed with the Board office before May 1 of the year in which the candidate plans to take the examination. Physicians who complete their residency training in dermatology by July 1 of a given year are eligible to apply to take the examination in the fall of that year. It is emphasized that it is the candidate's responsibility to send a completed application form to the Board if he or she plans to take the certifying examination of the Board.

A candidate is not considered an "active" candidate until his or her application has been received and approved by the Board. This approval includes a review of the application, letters of reference, and annual evaluation reports from the candidate's training director. After the application is approved, the candidate is required to take the examination within 3 years. Candidates who do not exercise the examination privilege within 3 years of the date they are declared eligible will be required to file a new application and have their eligibility for examination reviewed by the Requirements Committee. If the reapplication is approved by the Board, the candidate is again eligible to take the examination within another 3-year period.

The Board does not use the term "Board eligible" in correspondence with directors of hospitals or others who send inquiries to the Board office. On written request by a candidate, the Board will send the candidate a letter stating his or her status with the Board at any given time.

## Board Examination

The certifying examination in dermatology, which is administered over a period of 2 days, includes multiple-choice questions, each with one correct answer.

### 1. Comprehensive Multiple Choice Examination in Dermatology:

This is a 3-hour comprehensive examination, and was formerly referred to as the Written or Part I examination. It tests the candidate's knowledge of the basic science and clinical aspects of dermatology, including all the related disciplines. Among the topics included in this part of the examination are clinical dermatology, pediatric dermatology, preventive dermatology, entomology, epidemiology, dermatopathology, cutaneous allergy and immunology, dermatologic surgery, cutaneous oncology, sexually transmitted diseases, internal medicine as it pertains to dermatology, medical ethics, photobiology, and cutaneous microbiology, as well as anatomy, physiology, biochemistry, molecular biology, radiation physics, radiation therapy, physical therapy, pharmacology, genetics, and electron microscopy as related to dermatology. Considerable emphasis is placed on comprehensive knowledge of the literature.

### 2. Examination in Clinical and Laboratory Dermatology: Projected 2x2 slides are utilized in this part of the examination. Candidates must answer multiple-choice type questions about the projected pictorial material, which is drawn from all areas of clinical and laboratory dermatology. Examples of the types of slides used include photographs of patients, diagrams and illustrative drawings and pictures of dermatologic surgical procedures, histopathologic sections, fungal cultures, culture mounts, bacterial cultures, Tzanck preparations, skin scrapings and smears, roentgenograms, histochemical and fluorescent photomicrographs, electron micrographs, darkfield micrographs, and drawings or photographs of organisms, including viruses, rickettsiae, bacteria, and parasites that affect the skin.

### 3. Examination in Dermatopathology: In this section, candidates are questioned on histopathologic slides that they examine microscopically, utilizing personal or rented microscopes. This section of the examination encompasses the entire spectrum of dermatopathology.

For the purposes of scoring, the Examination in Clinical and Laboratory Dermatology is combined with the Examination in Dermatopathology, and candidates must pass this combined examination (formerly designated the Part II examination) as well as the Comprehensive Multiple Choice Examination in Dermatology (formerly designated the Part I examination) in order to be certified. If a candidate fails either the combined Examination in Clinical and Laboratory Dermatology/Examination in Dermatopathology or the Comprehensive Multiple Choice Examination in Dermatology, only the failed component must be repeated.

The examination is given annually in the fall over a 2-day period and lasts a total of approximately 10 hours. In 1996, it will be held on October 12 and 13 at the Holiday Inn O'Hare in Rosemont, Illinois, which is in the O'Hare International Airport area of Chicago.

## Reexamination

With their initial examination application, candidates have a 3-year period during which they may take the examination or any necessary reexamination on either a failed part (see above) or both parts of the examination. For a reexamination, they must notify the Board office by May 1 of the year they plan to retake the examination. A candidate who has not passed or does not take the examination during this 3-year period must reapply and complete the necessary forms, after which he/she will have another 3-year period of eligibility during which to take the examination or reexamination.

For further information concerning this as well as the appropriate fees required, the Board office should be contacted.

## Candidates with Disabilities

The ABD supports the intent of the Americans with Disabilities Act (ADA) and, therefore, will provide or allow the use of necessary auxiliary aids, services, or testing conditions that do not fundamentally alter the measurement of the skills or knowledge the Board assessment program is intended to test. In order to implement this policy, notification of the need for special testing circumstances must be given to the ABD by a candidate for certification at the time that he/she submits the application for any of the Board's certifying examinations. This deadline is necessary in order to allow the Board to request the necessary documentation, to review the records, and to verify the disability, if necessary. In addition, since this policy also applies to the In-Training Examination, which is under the jurisdiction of the ABD, appropriate advance notification of the need for special testing circumstances must be provided when the application for the In-Training Examination is submitted by the department.

Upon receipt of such request, the ABD will initiate the appropriate procedural steps, but it should be understood that all special arrangements must be made and agreed upon in advance; special arrangements cannot be made at the time the examination is given. Therefore, early notification of the need for special testing circumstances is encouraged.

## Chemical Dependency or Substance Abuse

A candidate with a chemical dependency or substance abuse problem will not be permitted to take the examination unless he/she can submit evidence, which must be verifiable, that the disorder is being treated and under control. Individuals with such problems or a history thereof must provide the necessary documentation at the time of application to take the examination. A confirmatory letter from a licensed physician within 1 month of the examination stating that the disorder no longer exists or is currently controlled is also necessary.

## Certification

After meeting the above requirements and passing the examination, the candidate will be awarded a certificate that acknowledges that he or she has completed the required course of graduate study and clinical training, has met other specific standards and qualifications, and has passed the examination conducted by the Board. The candidate is then referred to as a diplomate of the American Board of Dermatology, Inc. The names of diplomates of the Board appear in *The Official ABMS Directory of Certified Dermatologists* and *The Official ABMS Directory of Certified Medical Specialists*, published by Marquis Who's Who in cooperation with the American Board of Medical Specialties.

Each certificate is subject to revocation in the event that (a) the physician so certified shall not have been eligible to receive such certificate, whether or not the facts concerning his or her ineligibility were known or could have been ascertained by the Directors of the Board at the time of the issuance of the certificate; (b) the physician so certified shall have made any material misrepresentation or omission in the application for such certificate or in any other statement to the Board or its representatives; (c) the physician so certified shall have been convicted by a court of competent jurisdiction of a crime relating to or arising out of the practice of medicine.

## Appeals Procedure

The ABD recognizes a candidate's right of appeal following an adverse action at any stage of the certification process. Within the resi-

gency program, trainees must be accorded due process in compliance with provisions established by the parent institution and as stipulated in the "Essentials of Accredited Residencies in Graduate Medical Education" (July 1, 1982) of the ACGME.

Candidates whom the Board has declared ineligible to sit for the certifying examination on the basis of qualifications may appeal such decisions by written request within 90 days of the date of notification of the Board's ruling.

A candidate failing a certifying examination may request in writing that his or her examination be rescored by hand to verify the accuracy of the results as reported. Such requests must be received in the Board office within 90 days of the date the examination results are mailed to the candidates. A check in the amount of \$35 payable to the American Board of Dermatology must accompany this written request. There shall be no further appeal from failure of an examination.

### Recertification

The Board began issuing time-limited certificates, valid for 10 years, in 1991, and its process of voluntary recertification was approved by the American Board of Medical Specialties in 1994. The first recertification examination, which will be a clinically focused, take-home, open-book examination tailored to the candidate's practice profile, will be administered in 1998 and annually thereafter. There is no limit on the number of times diplomates may undertake the recertification process. If the candidate does not successfully complete the recertification process prior to expiration of his/her time-limited certificate, he/she will remain eligible to participate in the recertification process but will cease to be Board-certified until the process is successfully completed and a new time-limited certificate is issued. If the candidate successfully completes the recertification process before expiration of his/her certificate, eg, in year 8 or 9 of the 10 years, the new certificate will be issued for 10 years commencing on the expiration date of the prior certificate.

Diplomates with lifetime certification may elect to pursue voluntary recertification in any given year after the process has been implemented. Any questions or correspondence relating to the recertification process should be directed to the Executive Director of the ABD.

It is to be noted that at this time a recertification process has not been approved for Special Qualifications in Dermatopathology or Clinical and Laboratory Dermatological Immunology.

### Fees for Examination and Reexamination

The Directors of the Board serve without compensation. Fees are based on the actual expenses incurred in office administration and in conducting the examination.

The examination fee for the certifying examination in Dermatology is \$1,500, payable when the application is submitted. The fee for reexamination is \$1,400. All checks are to be made payable to the American Board of Dermatology, Inc.

The fee for the recertification examination, which will be administered for the first time in 1998, has not yet been established.

When a candidate's application for the certifying examination or a special qualification examination is disapproved or when the candidate withdraws, the Board retains an administrative fee of \$100. If the candidate withdraws from the examination after September 1 and up until 10 days before the examination, the Board will retain half of the examination fee (\$750 for the Certifying Examination in Dermatology, \$700 for reexamination, \$600 for the Special Qualification Examination in Dermatopathology, and \$500 for the Special Qualification Examination in Clinical and Laboratory Dermatological Immunology). If the candidate withdraws within 10 days of the examination or fails to appear for the examination and does not pro-

vide verifiable evidence of extenuating circumstances that prevented him or her from appearing for the examination, the Board will retain the entire examination fee. On reapplying, such candidates will be required to again submit the examination fee in effect at the time of the application.

### Publication

The ABD publishes a booklet of information, which may be obtained from the Board office.

All correspondence should be sent to:

Harry J Hurley, MD  
Executive Director  
The American Board of Dermatology, Inc  
Henry Ford Hospital  
1 Ford Pl  
Detroit, MI 48202-3450

### Certification for Special Qualification in Dermatopathology

Special Qualification certification in Dermatopathology is a joint and equal function of the ABD and the American Board of Pathology (ABP). Such function will relate to qualifications of candidates, standards of examination, and the form of the certificate.

#### Prerequisites

All candidates for this certification must satisfy the following requirements:

1. A currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada.
2. Primary certification by both the ABD and the ABP (anatomic pathology or anatomic and clinical pathology).
3. Primary certification by either the ABD or the ABP (anatomic pathology or anatomic and clinical pathology), and the satisfactory completion of 1 year of training in dermatopathology in a program accredited for such training (see below) by the ACGME. This additional training must be taken after the candidate has met the full training requirements for certification in dermatology or pathology. The dermatologist applicant must spend one-half of the required training time in pathology. The pathologist applicant must spend one-half of the required training time in clinical dermatology.

#### Training

Accredited institutional training programs in dermatopathology are an equal and joint function of the Departments of Dermatology and Pathology of that institution. Training programs in dermatopathology are reviewed and accredited by the Residency Review Subcommittee for Dermatopathology, which includes three members from the Residency Review Committee (RRC) for Dermatology and three members from the RRC for Pathology. Upon recommendation by this subcommittee, training programs in dermatopathology are accredited by conjoint action of the RRCs for Dermatology and Pathology acting with authority delegated by the ACGME. Information concerning accredited dermatopathology training programs may be found in this directory.

#### Examination: Deadline for Application and Date of Examination

Candidates who have satisfied the above requirements are eligible to apply to the Board to take the examination for Special Qualification in Dermatopathology, which is a comprehensive assessment of the candidates' knowledge of dermatopathology, including the related basic sciences, and laboratory and clinical areas pertaining to this discipline. Currently, this examination is administered every 2 years in the fall of the year.

Candidates planning to take the Special Qualification examination should request an application from the office of the Executive Director of the ABD. The deadline for receipt of applications is June 1 of the year in which the candidate plans to take the examination. The next examination will be given in 1997 (place and date to be determined at a later date).

#### Fee

The fee for the examination for Special Qualification in Dermatopathology is \$1,200, payable when the application is submitted.

### Certification for Special Qualification in Clinical and Laboratory Dermatological Immunology (CLDI)

#### Prerequisites

The requirements for Special Qualification certification in Clinical and Laboratory Dermatological Immunology (CLDI) are as follows:

1. A currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada.
2. Primary certification by the ABD and the satisfactory completion of at least 1 year of training in an accredited fellowship in CLDI. This additional training must be taken after the candidate has met the full training requirements for certification in dermatology.

#### Training

Information concerning accredited training programs in CLDI is available from the office of the ABD. As stated above, a minimum of 1 year of full-time training in a CLDI training program is required of all candidates.

#### Examination: Deadline for Application and Date of Examination

Candidates who have satisfied the above requirements are eligible to apply to the Board to take the Special Qualification Examination in CLDI. The date of the next examination will be announced later. The deadline for receipt of applications to take the examination for Special Qualification in CLDI is April 1 of the year in which the examination is given.

#### Fee

The fee for the CLDI Special Qualification Examination is \$1,000, payable when the application is submitted.

## American Board of Emergency Medicine

Douglas A Rund, MD, President, Columbus, Ohio  
 Gerald P Whelan, MD, President-Elect, Long Beach, California  
 G Richard Braen, MD, Immediate Past President, Buffalo, New York  
 Daniel F Danzl, MD, Secretary-Treasurer, Floyd's Knobs, Indiana  
 William G Barsan, MD, Member-at-Large, Ann Arbor, Michigan  
 Roy M Pitkin, MD, Member-at-Large, Los Angeles, California  
 Walter R Anyan, Jr, MD, New Haven, Connecticut  
 Michael D Bishop, MD, Bloomington, Indiana  
 Brooks F Bock, MD, West Bloomfield, Michigan  
 Dick D Briggs, Jr, MD, Birmingham, Alabama  
 E John Gallagher, MD, Riverdale, New York  
 William E Gotthold, MD, Wenatchee, Washington  
 Robert S Hockberger, MD, Torrance, California  
 Gwendolyn L Hoffman, MD, Twin Lake, Michigan  
 Vincent J Markovchick, MD, Denver, Colorado  
 J David Richardson, MD, Louisville, Kentucky  
 Earl Schwartz, MD, Pfafftown, North Carolina  
 Richard L Stennes, MD, San Diego, California  
 Benson S Munger, PhD, Executive Director, East Lansing, Michigan  
 Susan K Adsit, Associate Executive Director  
 Mary Ann Reinhart, PhD, Associate Executive Director

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Emergency Medicine [ABEM] to ascertain whether the information below is current.)*

### Requirements for Certification in Emergency Medicine

An applicant must satisfy all credential requirements at the time the application is submitted. Requirements fulfilled after the date of application will not be considered.

The applicant must have graduated from medical school.

1. Graduates of approved schools of osteopathic medicine in the United States are considered when they have satisfactorily met the credential requirements as outlined.
2. An applicant graduating from a medical school other than one in the United States, its territories, or Canada must provide the Board with a verified and translated diploma.

Throughout the certification process, applicants and candidates must hold a current, valid, unrestricted, and unqualified license to practice medicine in the jurisdiction(s) (within the United States, its territories, or Canada) in which they practice. A physician who is not currently practicing medicine must maintain at least one license that meets the above-stated criteria to fulfill the Board's licensure requirement.

The applicant must have successfully completed a total of 36 months of post-medical school training, under the control of an accredited emergency medicine residency program. Emergency medicine programs must be accredited by the Accreditation Council for Graduate Medical Education (ACGME) or the Royal College of Physicians and Surgeons of Canada for Canadian programs.

If the emergency medicine residency training program is structured so that it exceeds the length of training specified above, the resident must successfully complete the requirements of his/her residency program to apply under the emergency medicine residency category of application.

*(Note: For residents who began their emergency medicine training prior to July 1, 1987, the candidate must have successfully completed a total of 36 months of post-medical school training, at least*

24 months of which were under the control of an accredited emergency medicine residency program at the PGY-2 level and above.)

The applicant must submit evidence of 50 hours of continuing medical education in emergency medicine annually, acceptable to the Board, starting 1 year from the date of graduation from the emergency medicine residency program and continuing until the date of application. If a resident applies to the Board within 1 year of graduation, no continuing medical education is required.

### Combined Training Programs

A special agreement exists with the American Board of Pediatrics whereby an applicant may fulfill the training requirements of both Boards by completing joint training in 5 years. Training programs must be approved prospectively by both Boards. Guidelines for combined training have been approved by both Boards and are available by writing either Board office. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

A special agreement exists with the American Board of Internal Medicine whereby an applicant may fulfill the training requirements of both Boards by completing joint training in 5 years. Training programs must be approved prospectively by both Boards. Guidelines for combined training have been approved by both Boards and are available by writing to either Board office. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

### Applications

Applications are distributed in the spring of each year (mid-April) and are available from the Board office. Applications are accepted from May 1 through July 15 of each year. A mailing list is maintained throughout the year for requests received during times when applications are not available.

A nonrefundable processing fee must accompany the application at the time it is submitted.

Applicants wishing to be considered for examination must submit a fully completed application form to the Board. The Board will not be responsible for any opinion expressed concerning the individual's credentials for the examination unless it is in writing and over the signature of the president or secretary of the Board.

### Examination Information

The certification examination in emergency medicine is composed of two parts. The first part is a 6.5-hour comprehensive written examination, administered one time each year. It includes multiple-choice and pictorial multiple-choice items.

The oral certification examination includes seven simulated patient encounters: five single-patient encounters and two multiple-patient encounters.

A candidate must successfully complete the written examination to be scheduled for the oral examination.

The written examination is offered in the fall of each year, and oral examinations are held twice a year (spring and fall).

Examination fees are due upon assignment to an examination administration.

### Certification

All candidates who successfully complete both the written and the oral certification examinations shall be known as diplomates of the American Board of Emergency Medicine. Diplomates receive an appropriate certificate, which shall remain the property of the American Board of Emergency Medicine. Certification is for a period of 10 years.

Any certificate issued by the Board shall be subject to revocation at any time, should the Board determine, in its sole judgment, that

a candidate who has received a certificate was in some respect not properly qualified to receive or retain it.

### Recertification

ABEM diplomates will have three options for achieving recertification: passing either the written or the oral certification examination or the written recertification examination. Passing any one of these examinations will earn the diplomate an additional 10-year certificate.

## American Board of Family Practice

Michael D Hagen, MD, President, Lexington, Kentucky  
 James F Shetlar, MD, Vice President, Frankenmuth, Michigan  
 Donald Keith, MD, Treasurer, Seattle, Washington  
 Joseph Tollison, MD, Executive Committee Member at Large, Augusta, Georgia  
 Donald T Erwin, MD, New Orleans, Louisiana  
 Lonnie Fuller, Sr, MD, Atlanta, Georgia  
 Mary Kane Goldstein, MD, Stanford, California  
 John R Hayes, MD, Indianapolis, Indiana  
 Warren A Heffron, MD, Albuquerque, New Mexico  
 Cynda Johnson, MD, Kansas City, Kansas  
 James C Martin, MD, San Antonio, Texas  
 Kenneth L Noller, MD, Worcester, Massachusetts  
 Jack Pickleman, MD, Maywood, Illinois  
 Thomas L W Roe, MD, Eugene, Oregon  
 J Lewis Signmon, MD, Charlotte, North Carolina  
 Peter M Silberfarb, MD, Lebanon, New Hampshire  
 Paul R Young, MD, Executive Director, Lexington, Kentucky  
 Robert F Avant, MD, Deputy Executive Director, Lexington, Kentucky

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Family Practice [ABFP] to ascertain whether the information below is current.)*

### ABFP Official Definition of Family Practice

"Family practice is the medical specialty which is concerned with the total health care of the individual and the family. It is the specialty in breadth which integrates the biological, clinical, and behavioral sciences. The scope of family practice is not limited by age, sex, organ system, or disease entity."

### Board Eligibility

The ABFP does not recognize or use the term "Board eligible" and does not issue statements concerning "Board eligibility." The Board informs an applicant of admissibility to an examination to be given on a specified date after a formal application has been reviewed and approved.

### Certification Process

The ABFP administers the certification and recertification examinations in various centers throughout the United States annually, on the second Friday in July.

The ABFP certification and recertification examinations are written tests of cognitive knowledge and problem-solving abilities relevant to family practice. Appropriate subject areas of the following disciplines are included: internal medicine, pediatrics, surgery, obstetrics, gynecology, psychiatry and behavioral sciences, community medicine, and geriatrics. Elements of the examination include but

are not limited to diagnosis, management, and prevention of disease.

## Requirements for Certification

### A. General

1. All candidates for the ABFP certification examination must have satisfactorily completed 3 years of training (a full 36 calendar months with 12 months in each of the G-1, G-2, and G-3 years) in a family practice residency program accredited by the Accreditation Council for Graduate Medical Education (ACGME) subsequent to receipt of the MD or DO degree from an accredited institution and, when applicable, a Fifth Pathway year, or receipt of a standard certificate from the Educational Commission for Foreign Medical Graduates, or compliance with other ACGME requirements for entry into graduate medical training in the United States. If a physician does not meet the eligibility requirements of the ACGME for entry into resident training, his/her training will not be recognized by the Board.

Candidates who obtained their MD degree from medical schools in the United States or Canada must have attended a school accredited by the Liaison Committee on Medical Education or the Committee for Accreditation of Canadian Medical Schools. Candidates who obtained a DO degree must have graduated from a college of osteopathic medicine accredited by the American Osteopathic Association (AOA).

The Board prefers all 3 years of postgraduate training to be in the same ACGME-accredited family practice program; however, other training may be considered as equivalent (eg, flexible/transitional year, AOA osteopathic internship). In these cases, and for physicians who have had international training, each individual's training will be evaluated by the Board. Internationally trained physicians must provide all of the required documentation of education and training to receive any credit toward certification for prior training. The ABFP requires a residency program to submit prospective requests for advanced placement of residents. Program directors are responsible for notifying the Board prior to the entry of the transferring resident. If a program director fails to comply, the Board will determine the amount of transfer credit at the time of its discovery of the transfer. Consequently, the resident may receive less credit toward certification than anticipated and may be required to extend the duration of training.

The last 2 years of family practice residency training must be completed in the same accredited program. Transfers after the beginning of the G-2 year are approved only in extraordinary circumstances.

Verification of satisfactory completion of residency training must be stated in writing by the program director. All applicants for the certification examination are subject to the approval of the Board, and the final decision regarding any application rests solely with the ABFP.

2. All candidates' education and training experiences are subject to review and approval by the ABFP. Any variance from the above must have prior written approval of the Board. No credit may be given for any previous training as equivalent to family practice training without the written approval of the Board.
3. Candidates must complete all requirements of the Board no later than June 30 of the year of the examination. Complete documentation from the program director that the resident has or is expected to have satisfactorily completed the residency must be received by the Board by June 30. Applications, supplied to the residents directly through the program director, are made available only to residents expected to complete the required training by June 30 of the current year. Residents who complete their

training at an interim date must write to the Board for an application.

4. All candidates must hold a currently valid, full, and unrestricted license to practice medicine in the United States or Canada. Furthermore, every license to practice medicine held by the candidate in any state or territory of the United States or province of Canada must be currently valid, full, and unrestricted, whether or not the candidate in effect practices in such state, territory, or province. Candidates shall be required to maintain a full and unrestricted medical license in the United States or Canada even if they are out of the country for extended periods of time. Involuntary loss of a license will result in the simultaneous loss of diplomate status and/or the ability to make application for certification, recertification, or other examinations offered by the Board.

Any candidate whose license to practice medicine has been revoked, suspended, or restricted in any state or territory of the United States or province of Canada shall be ineligible for certification until such time as the encumbered license is reinstated in full. Should a license be revoked, suspended, or restricted following the submission of an application for certification but prior to the notification of examination results, the application and certification will be simultaneously invalidated. It is the responsibility of the candidate to inform the Board immediately upon a change in licensure status. If the candidate fails to notify the Board of any suspension, revocation, restriction, or probation within 60 days after the effective date, the candidate shall be ineligible to seek certification for up to 1 year following the reinstatement of full and unrestricted licensure. A restricted medical license is any adverse action by a state licensing agency that encumbers the ability of a physician to diagnose, manage, and/or treat patients. Questions about licensure should be presented to the Board in writing.

5. No candidate will be allowed to take the examination until all fees are paid and all of the above requirements have been satisfactorily met.

### B. Osteopathic Physicians

Osteopathic physicians who have graduated from an AOA-approved school of osteopathic medicine in the United States may qualify for certification if they meet all the same requirements as specified for allopathic medical school graduates. They may apply to ACGME-accredited family practice programs for entry into the first year (G-1). Osteopathic physicians who have documented satisfactory completion of an AOA-approved internship (G-1) year may receive credit for that portion of the G-1 year that meets the ABFP guidelines for advanced-level entry or interprogram transfers.

All candidates (MD or DO) must satisfactorily complete at least 36 calendar months of accredited graduate medical education. Only the G-1 year may be fulfilled by an AOA-approved internship year. Training beyond the G-1 year must be in continuity in an ACGME-accredited family practice residency program.

### C. Canadian Applicants

1. Physicians who have satisfactorily met the requirements of the College of Family Physicians of Canada (CFPC) by completion of 2 years of training in a program accredited by the CFPC must have a third year of accredited family practice residency. The third year of training must be satisfactorily completed in an ACGME-accredited family practice program or, if taken in Canada, must be approved by the CFPC and must have prior approval of the ABFP. The third year must bring the total experience into compliance with the ACGME "Special Requirements for Residency Education in Family Practice." The request must be accompanied by documentation of satisfactory performance of the first

2 years of training (including a description of the curriculum) signed by the Program Director.

2. Physicians who have been certified by examination by the CFPC (Certificants) may be permitted to apply for certification by the ABFP if they (a) are in good standing with the CFPC at the time of application; (b) have established a legal residence in the United States for not less than the immediate past 6 months at the time of application; (c) have accumulated a minimum of 50 hours per year of continuing medical education approved by the American Board of Family Practice since residing in the United States; and (d) are actively engaged full-time and exclusively in family practice (practice, teaching, and/or administration).

#### **D. Registrants of the Royal College of General Practitioners of Great Britain**

Physicians who have been certified by the Royal College of General Practitioners of Great Britain by examination following a prescribed program of residency/house officer training may be permitted to apply for certification by the ABFP if they 1) are members in good standing of the Royal College of General Practitioners; 2) reside in the United States; 3) hold a valid and unrestricted license to practice medicine in the United States; 4) are of acceptable ethical behavior; and 5) are active in the specialty of family practice.

#### **E. Members of the Royal New Zealand College of General Practitioners**

Physicians who are members of the Royal New Zealand College of General Practitioners may be permitted to apply for examination for certification by the ABFP if they 1) have completed a prescribed program of residency/house officer training; 2) are members in good standing of the Royal New Zealand College of General Practitioners; 3) reside in the United States; 4) hold a valid and unrestricted license to practice medicine in the United States; and 5) are actively involved in family practice in the United States.

#### **F. Fellows of the Royal Australian College of General Practitioners**

Physicians who are fellows of the Royal Australian College of General Practitioners may be permitted to apply for examination for certification by the ABFP if they 1) have completed a prescribed program of residency/house officer training; 2) are members in good standing of the Royal Australian College of General Practitioners; 3) reside in the United States; 4) hold a valid and unrestricted license to practice medicine in the United States; and 5) are actively involved in family practice in the United States.

### **Recertification Process**

The ABFP confers diplomate status for the specified period of time noted on the certificate, which is dated for a 7-year period. In order to maintain diplomate status, the diplomate must be recertified before the certificate expires. Although the certificate is dated for 7 years, the Board routinely administers the recertification process on a 6-year cycle. This allows a "reserve" year for those diplomates who for some reason are unable to participate in the sixth year, or in cases where the diplomate fails to receive a satisfactory score in the sixth year.

Should a diplomate not be recertified by the end of the seventh year, the certificate will expire, and the physician will lose diplomate status. However, the physician may reapply for the recertification process, but he/she must meet all criteria in effect at that time.

For diplomates who participate in the recertification process during the sixth year and pass, the new certificate of 7 years' duration is dated from the time of that examination.

### **Requirements for Recertification**

- A. Submission of a formal application.
- B. Documentation of 300 hours of approvable continuing medical education.
- C. Submission of statement of acknowledgment and compliance with Board policy regarding medical licensure.
- D. Satisfactory completion of the office record review portion of the recertification process.
- E. Satisfactory performance on the written test of cognitive knowledge.

Diplomates will be given advance notice of any changes in the recertification requirements.

### **Reexamination**

Candidates who fail the examination may apply for admission to the next annual examination. There is no limit to the number of times a qualified candidate may take the examination when it is offered, provided the qualifications are met with each reapplication. In addition to valid and unrestricted licensure status, 50 hours per year of continuing medical education since the last application are required for reexamination. Full fees are charged for each examination.

### **Certificates of Added Qualifications**

#### **A. Geriatric Medicine**

The ABFP and the American Board of Internal Medicine in a joint venture are offering a Certificate of Added Qualifications (CAQ) in Geriatric Medicine. This "added certificate" is designed to recognize excellence among those diplomates who provide care to the elderly. The Geriatric Examination will be given biennially in even-numbered years.

Family physicians must be certified by the ABFP at the time of the examination, hold a valid and unrestricted license to practice medicine in the United States or Canada, have satisfactorily completed 2 years of accredited geriatric fellowship training sponsored by an ACGME-accredited family practice or internal medicine residency program, and achieve a satisfactory score on a 1-day examination. The geriatric fellowship training must be subsequent to the family practice residency training, and no part of the family practice residency will be permitted as credit toward the 2-year geriatric fellowship requirement. The fellowship training must be completed by June 30 of the year of the examination.

#### **B. Sports Medicine**

The ABFP, in a joint venture with the American Board of Emergency Medicine, the American Board of Internal Medicine, and the American Board of Pediatrics, offers a CAQ in Sports Medicine. This examination is offered biennially in odd-numbered years.

Family physicians must be certified by the ABFP at the time of examination, hold a valid and unrestricted license to practice medicine in the United States or Canada, and achieve a satisfactory score on a 1/2-day examination for which they have qualified through one of the following plans:

Plan I (fellowship pathway): Candidates must have completed a minimum of 1 year in a sports medicine fellowship program associated with an ACGME-accredited residency in emergency medicine, family practice, internal medicine, or pediatrics.

Plan II (practice pathway) (*Note: Plan II will be available only through the 1999 examination. After 1999, a 1-year sports medicine fellowship will be required for eligibility.*): candidates must have 5 years of practice experience, consisting of at least 20% professional time devoted to sports medicine, defined as one or more of the following: (1) field supervision of athletes; (2) emergency assessment and care of acutely injured athletes; (3) diagnosis, treatment, man-

agement, and disposition of common sports injuries and illness; (4) management of medical problems in the athlete; (5) rehabilitation of ill and injured athletes; and (6) exercise as treatment. In addition, candidates must show evidence of participating in 30 hours of sports medicine-related AMA Category I (or its equivalent) continuing medical education during the past 5 years.

### C. Recognition of Successful Candidates

Successful candidates on the Geriatric or Sports Medicine CAQ examination will be awarded an ABFP certificate of added qualifications. The certificate will be valid for 10 years. Reassessment will be required for renewal of certification.

Loss or expiration of primary certification in family practice will automatically result in simultaneous loss of any and all certificates of added qualifications. In cases where a CAQ is lost due to loss of the primary certificate and the primary certificate is later reinstated, the CAQ will be reinstated for the remaining period of time, if any, as stated on the certificate.

## Revocation

### A. General

Each certificate issued by the Board of Directors of the ABFP shall be subject to revocation in any of the following circumstances:

1. The issuance of such certificate or its receipt by the person so certified shall have been contrary to, or in violation of, any provision of the Articles of Incorporation of the ABFP, Inc, or of the Bylaws of the ABFP.
2. The person so certified shall not have been eligible to receive such certificate, irrespective of whether the facts constituting such ineligibility were known to, or could have been ascertained by, the directors of the corporation or its representatives.
3. The person so certified shall have made a misstatement of fact in the application for such certificate or in any other statement or representation to the corporation or its representatives.
4. The person so certified shall at any time have neglected to maintain the degree of competency in the field of family practice as established by the Board.

### B. Licensure Status

A diplomate of the ABFP shall be required to hold a currently valid, full, and unrestricted license to practice medicine in the United States or Canada. Furthermore, every license to practice medicine held by a diplomate in any state or territory of the United States or province of Canada must be currently valid, full, and unrestricted, whether or not the diplomate in effect practices in such state. Diplomates shall be required to retain a full and unrestricted medical license in the United States or Canada, even if they are out of the country for extended periods of time. Failure to retain a license will result in loss of diplomate status and the ability to make application for certification, recertification, or other examinations offered by the Board.

In the event a diplomate's license to practice in any state or territory of the United States or province of Canada is revoked, restricted, or suspended, the diplomate's status with the ABFP is to be simultaneously rescinded at the time of the licensure revocation, restriction, or suspension. The physician must advise ABFP within 60 days and immediately cease identifying himself/herself in any way directly or indirectly as a diplomate of the ABFP.

If the physician fails to notify the ABFP of any revocation, restriction, or suspension within 60 days after the effective date, he/she shall be ineligible to seek reinstatement of diplomate status for up to 1 year following the reinstatement of full and unrestricted licensure. A restricted medical license is any adverse action by a state licensing agency that encumbers the ability of a physician to

diagnose, manage, and/or treat patients. Questions about licensure should be presented to the Board in writing.

If and when the physician's revoked or suspended license is reinstated in full (with no restrictions) and official written documentation of reinstatement is provided, the ABFP will honor the remainder of the current certificate and the diplomate will not be required to be reexamined. If the current certificate has expired prior to the reinstatement of the license, the physician may make application for the next annual examination. Successful compliance with all application requirements in effect at that time will be expected.

### C. Authority

The ABFP Board of Directors shall have sole power and authority to determine whether the evidence or information before it is sufficient to constitute grounds for revocation of any certificate issued by this corporation. The Board of Directors may, however, at its discretion, require any person so certified to appear before the Board of Directors, upon not less than 30 days' written notice by registered mail, and to show cause, at the time and place specified in such notice, why the certificate should not be revoked. The failure of any person so notified to appear as required in such notice shall, at the discretion of the Board of Directors, constitute cause for revocation of the certificate. The decision of the Board of Directors in all such matters shall be final.

## Applications and Additional Information

Applications and additional information may be obtained by writing to

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Internal Medicine [ABIM] to ascertain whether the information below is current.)*

## Preface

The Board's decision about a candidate's eligibility for certification is determined by the policies and procedures described in this document. This edition of policies and procedures supersedes all previous publications.

The Board reserves the right to make changes in its fees, examinations, policies, and procedures at any time without advance notice. The Board also reserves the right, under extraordinary circumstances, to waive certain of its requirements. Admission to the Board's examinations will be determined under policies in force at the time of application. This document is not to be construed as a contract between a candidate and the American Board of Internal Medicine.

## Introduction

The American Board of Internal Medicine (ABIM) was established in 1936 and is a private, nonprofit corporation that is not a part of or affiliated with any other organization. Its members are elected by the Board and serve 2-year terms. The Board receives no public funds and has no licensing authority or function.

The mission of the ABIM is to enhance the quality of health care available to the American public by maintaining high standards for certifying individual internists who possess the knowledge, skills, and attitudes essential for the provision of excellent care.

Certification by the ABIM recognizes excellence in the discipline of internal medicine, its subspecialties, and areas of added qualifications. Certification by the Board is not a requirement to practice in the field of internal medicine, nor does the Board confer privilege to practice. The Board does not intend either to interfere with or to restrict the professional activities of a licensed physician because the physician is not certified.

The Board administers the certification and recertification processes by (1) establishing training requirements for Board candidates; (2) assessing the credentials of candidates; (3) obtaining substantiation by appropriate authorities of the clinical competence and professional standing of candidates; and (4) developing and conducting examinations for certification and recertification.

The duration of the validity of all certificates issued by the Board in 1990 (1987 for Critical Care Medicine and 1988 for Geriatric Medicine) and thereafter is 10 years, and the dates of validity are noted on the certificates. Certificates issued before these dates will continue to be valid indefinitely. Diplomates with certificates that are valid indefinitely will be offered the same opportunity to recertify as those who hold time-limited certificates.

The Board currently offers its comprehensive recertification program, which includes an at-home, open-book, self-evaluation process; local evaluation of credentials; and a proctored final examination. Information about the Board's recertification program is available upon request.

## Training Requirements for Certification

### Internal Medicine

Physicians who are awarded a certificate in the specialty of internal medicine must have completed the required predoctoral medical education, met the postdoctoral training requirements, demonstrated clinical competence in the care of patients, and passed the Certification Examination in Internal Medicine.

### Predocctoral Medical Education

Candidates from medical schools in the United States or Canada must have attended a school accredited at the date of graduation by the Liaison Committee on Medical Education (LCME) or the Committee for Accreditation of Canadian Medical Schools. Candidates from osteopathic medical schools must have graduated from a college of osteopathic medicine accredited by the American Osteopathic Association.

Graduates of international medical schools are required to submit one of the following:

1. A permanent (valid indefinitely) certificate from the Educational Commission for Foreign Medical Graduates; or
2. Comparable credentials from the Medical Council of Canada; or
3. Documentation of training for those candidates who entered postdoctoral medical training in the United States via the Fifth Pathway, as proposed by the American Medical Association.

### Postdoctoral Training Requirements

To be admitted to an examination, physicians must have completed 3 years of accredited training before July 1 of the year of examination. Residency training or research experience taken before the date of completion of requirements for the MD or DO degree cannot be credited toward the Board's training requirements.

The 3 years of required training must satisfy all four of the following conditions:

1. The director of the accredited internal medicine training program must have had responsibility for the educational process during all of the 36 months of training. The program director may assign up to 6 months of training in specialties other than internal medicine.
2. The 36 months of training must have included a minimum of 24 months of meaningful patient responsibility. Of the 24 months of meaningful patient responsibility, at least 20 must occur in the following settings: (a) inpatient services in which disorders of general internal medicine or its subspecialties are managed; (b) emergency medicine, general medical, or subspecialty ambulatory settings; and (c) dermatology or neurology services. Four months of meaningful patient responsibility may be taken outside the above areas with the approval of the internal medicine program director.
3. The training must be completed in an internal medicine program accredited by the Accreditation Council for Graduate Medical Education (ACGME), the Royal College of Physicians and Surgeons of Canada, or the Professional Corporation of Physicians of Quebec.
4. The level of responsibility for patient care must increase in each year of training.

### Training Taken in Accredited Programs Other Than Categorical Internal Medicine

For residents transferring to the first or second year of internal medicine training from other ACGME-accredited residencies, the internal medicine program director may grant up to 12 months' credit to qualified individuals, according to the following guidelines:

1. Month-for-month credit for internal medicine rotations that occur in an institution that has an ACGME-accredited internal medicine program, and/or
2. Month-for-month credit for rotations on other specialties, not to exceed 2 months per specialty and 6 months in total.

The program director must inform the Board within 1 year of transfer of the amount of credit to be granted.

### Subspecialties and Added Qualifications

In addition to the primary certificate in internal medicine, the Board offers subspecialty certificates and certificates of added

qualifications. Subspecialty certificates are offered in the traditional subspecialties of cardiovascular disease; endocrinology, diabetes, and metabolism; gastroenterology; hematology; infectious disease; medical oncology; nephrology; pulmonary disease; and rheumatology.

Certificates of added qualifications recognize special expertise in areas that have a fundamental practice-oriented relationship to an underlying discipline, in internal medicine or a subspecialty. These certificates are offered in adolescent medicine, clinical cardiac electrophysiology, critical care medicine, clinical and laboratory immunology, geriatric medicine, and sports medicine. Information regarding certificates of added qualifications is available upon request.

For information and application forms for the Clinical and Laboratory Immunology Examination, please contact the American Board of Allergy and Immunology, 3624 Market St, Philadelphia, PA 19104-2675.

Physicians who are awarded a certificate in a subspecialty or an area of added qualifications of internal medicine must be certified in internal medicine by the ABIM. In addition, they must have completed the Board's training requirements, demonstrated clinical competence in the care of patients, and passed the subspecialty or added qualifications examination.

Subspecialty training initiated July 1, 1989, and thereafter must be accredited by the ACGME, the Royal College of Physicians and Surgeons of Canada, or the Professional Corporation of Physicians of Quebec. Subspecialty training completed prior to July 1, 1989, must have been completed in a program associated with an accredited residency in internal medicine in the United States or Canada.

Candidates for certification in the subspecialties must meet the Board's requirements for the total duration of training as well as for minimum clinical training requirements. Clinical training requirements may be met by aggregating clinical training that occurs throughout the entire fellowship training period; clinical training need not be completed in sequential months.

Fellowship training taken before the date of completion of the requirements for the MD or DO degree, and training as a chief medical resident, cannot be credited toward the requirements for subspecialty certification. Practice experience and attendance at postgraduate courses cannot be credited.

Educational experience in a subspecialty during a full-time junior faculty appointment in an accredited medical school in the United States or Canada may be applicable toward the requirements. Such clinical experience must be approved by the appropriate program director and must be reviewed prospectively by the Board.

To be admitted to an examination, candidates must have completed the required subspecialty training before July 1 of the year of examination.

### Training Requirements for Each Subspecialty

**Cardiovascular disease**—3 years of accredited training, of which a minimum of 24 months is clinical training, in the diagnosis and management of a broad spectrum of cardiovascular diseases.

**Endocrinology, diabetes, and metabolism; gastroenterology\*;** hematology; infectious disease; medical oncology; nephrology; pulmonary disease; and rheumatology—2 years of accredited training, of which a minimum of 12 months is clinical training, in the diagnosis and management of a broad spectrum of medical diseases. Additionally, the hematology and medical oncology examinations each require a minimum of 24 months of experience in an ambulatory care setting and a minimum of 1/2 day per week spent in a continuity outpatient clinic in the longitudinal care of patients.

*\*(Note: Three years of accredited gastroenterology training, of which a minimum of 18 months is clinical training, will be required for certification. This new policy is effective for fellows entering gastroenterology fellowship training programs in June 1996 and thereafter.)*

### Combined Training Leading to Dual Certification

#### Hematology and Medical Oncology

Dual certification in hematology and medical oncology requires 3 years of full-time combined fellowship training. Full-time clinical training is defined as at least 80% of the trainee's professional time and effort during a working week dedicated to clinical (patient care or educational) activities. The 3 years of combined training must include a minimum of 18 months of prospectively designed full-time clinical training with patient care responsibility. This full-time clinical training must include a minimum of 12 months in the diagnosis and management of a broad spectrum of neoplastic diseases, including hematological malignancies, and a minimum of 6 months of training in the diagnosis and management of a broad spectrum of non-neoplastic hematological disorders. During the entire 3 years the candidate must attend at least one outpatient clinic for a minimum of 1/2 day per week and have the responsibility for providing continuous care to a defined cohort of patients being managed for neoplastic disorders and specific hematological disorders.

The combined training must be taken in programs in the same institution, accredited both in hematology and medical oncology by the ACGME, the Royal College of Physicians and Surgeons of Canada, or the Professional Corporation of Physicians of Quebec.

Candidates desiring certification in both hematology and medical oncology based on combined training are required to notify the Board in writing of their intent before completion of their first year of fellowship. This letter of intent must be cosigned by the training program director(s). Candidates must complete all 3 years of required combined training before being admitted to an examination in either subspecialty.

Candidates who elect to undertake an examination in one subspecialty following only 2 years of fellowship training will be required to complete 4 years of accredited training for dual certification. They must meet the 2-year training requirement for the second subspecialty independent of the training that permitted admission to the initial subspecialty examination.

These policies pertain to trainees who entered subspecialty training in hematology and/or medical oncology on or after June 1, 1990.

#### Rheumatology and Allergy and Immunology

Dual certification in rheumatology and allergy and immunology requires a minimum of 3 years of full-time training. Of the total 3 years, at least 12 months must be full-time clinical rheumatology training supervised by the director of an accredited rheumatology training program.

Weekly attendance for 18 consecutive months in an ambulatory care program supervised by rheumatology faculty must be included in the 3-year combined program; this 18-month period must include continuity of patient care within ambulatory clinics.

At least 18 months must be devoted to full-time allergy and immunology training supervised by the training program director of an accredited training program in allergy and immunology.

Plans for combined training should be approved in writing by both the rheumatology and the allergy and immunology training program directors and by the ABIM Subspecialty Board on Rheumatology and the American Board of Allergy and Immunology before training begins. Admission to either examination requires certification in internal medicine, satisfactory clinical competence, and completion of the entire 3-year combined program.

Candidates who seek dual certification for other subspecialty combinations should write to the Board for information.

## Alternate Training Pathways

### Clinical Investigator Pathway

The Board has established a pathway for investigators trained in both clinical sciences and clinical or biomedical research which requires prospective approval by the Board. This pathway leads to certification in internal medicine with 4 years of training. A clinical investigator can achieve certification in internal medicine and a subspecialty with 6 years of training (7 years for cardiovascular disease and for dual certification in hematology and medical oncology). The clinical training and research may be taken in any sequence.

Candidates must complete 2 years of accredited residency training in internal medicine with at least 20 months of meaningful patient responsibility and an appropriately balanced curriculum. Candidates must demonstrate superior overall clinical competence in both years of internal medicine training. Candidates seeking certification in a subspecialty must meet the clinical training requirements for that subspecialty.

During research training, candidates are strongly encouraged to maintain a continuity clinic appropriate to their stage of clinical training (general internal medicine during residency and subspecialty clinic during fellowship).

Candidates must complete 2 years of full-time research (3 years for subspecialty certification) during which at least 80% of the candidate's professional time and effort is dedicated to investigative activities. The candidate's arrangements for research must be prospectively approved by the Board before completion of internal medicine clinical training. Only in rare instances, and by special approval, will credit be granted for research undertaken prior to the award of the MD degree or outside the United States or Canada.

The Certification Examination in Internal Medicine may be taken in the fall of PGY-4, as long as 2 years of accredited residency training in internal medicine precede admission to the examination. Candidates who are not in an accredited fellowship must provide documentation that they are in research training during PGY-4.

A subspecialty examination may be taken in the fall of PGY-6 (PGY-7 for cardiovascular disease and for dual certification in hematology and medical oncology). Candidates for a subspecialty examination must provide documentation in the final year of training that they are in full-time research training, or in a full-time faculty position with substantial (ie, 50% professional time and effort) research involvement. Candidates who are no longer in a research program in the final year of training will not be admitted routinely to a subspecialty examination. The credentials of such candidates must be reviewed by the Board to determine admissibility to the examination.

A proposal supporting a candidate for admission through the Clinical Investigator Pathway should be sent to the ABIM as early as possible and must be received no later than March 1 of PGY-2. It must include

1. A letter of recommendation and description of training from the residency program director, including documentation of a superior rating of clinical competence;
2. A letter of support from the sponsor of the research training describing the proposed program and documenting that it will be of the required duration;
3. A letter of support from the subspecialty program director, if the research training is to occur during fellowship training; and
4. The candidate's curriculum vitae.

## Combined Training Leading to Certification by Two Boards

Combined residency training has been developed with the American Board of Emergency Medicine, American Board of Family Practice, American Board of Pediatrics, American Board of Physical Medicine and Rehabilitation, American Board of Preventive Medicine, and the American Board of Psychiatry and Neurology. Credit will be given for training only in prospectively approved combined training programs. A list of programs offering approved training is available from the Board.

## Candidates for Special Consideration

Beginning with the administration of the 1997 Internal Medicine Examination, the Board will only review proposals on behalf of the candidates with nonstandard training who meet the following criteria:

1. At least 2 years of full-time formal training in internal medicine in accredited programs in the United States or Canada that have occurred after 3 or more years of verified foreign training in internal medicine; or after 3 or more years of accredited training in another specialty in the United States or Canada. Or
2. Full-time internal medicine faculty members in an LCME-accredited US medical school or an accredited Canadian medical school who have completed 3 or more years of training in internal medicine abroad; hold an appointment at the level of associate professor or higher; and have completed 8 years of experience after formal training as a full-time clinician-educator or a clinical investigator in internal medicine with an appointment on a medical school faculty.

Candidates must be proposed by the chairman of a department of internal medicine of an accredited medical school or the program director of an accredited internal medicine residency. Guidelines for proposing candidates for special consideration should be obtained prior to submitting a proposal.

No other exceptions to the Board's standard training requirements will be considered. Pre-1997 special candidate guidelines are available from the Board upon request.

Guidelines for proposing Candidates for Special Consideration for Subspecialty and Added Qualifications Examinations are available upon request.

## Substantiation of Clinical Competence

### Components of Clinical Competence

The Board requires substantiation that candidates for certification are competent in the following:

**Internal Medicine:** clinical judgment, medical knowledge, clinical skills (medical interviewing, physical examination, and procedural skills), humanistic qualities, professionalism, and provision of medical care.

**Subspecialties:** clinical judgment, medical knowledge, clinical skills (medical interviewing, physical examination, and procedural skills), humanistic qualities, professionalism, provision of medical care, and continuing scholarship.

All trainees must receive a satisfactory rating of overall clinical competence, humanistic qualities, and moral and ethical behavior in each of the required years of training. In addition, during the final year of required training they must receive satisfactory ratings in each of the components of competence.

The diagnostic and therapeutic procedures listed below are required for certification in internal medicine. Although the Board does not prescribe an absolute number of times a procedure must be done to ensure competence, it has developed guidelines (indicated in parentheses) for the minimum number of directly supervised, successfully performed procedures below which the

confirmation of proficiency is not credible: abdominal paracentesis (3), arterial puncture for blood gas analysis (5), arthrocentesis of the knee joint (3), central venous line placement (5), lumbar puncture (5), nasogastric intubation (3), thoracentesis (5), and critical life-saving procedures (this requirement can be met by documentation of successful training in advanced cardiac life support).

The diagnostic and therapeutic procedures required for certification in the subspecialties and added qualifications are as follows:

**Cardiovascular Disease:** advanced cardiac life support (ACLS), including cardioversion; electrocardiography, including ambulatory monitoring and exercise testing; echocardiography; arterial catheter insertion; and right-heart catheterization, including insertion and management of temporary pacemakers.

**Clinical Cardiac Electrophysiology:** electrophysiologic studies including mapping, both with a catheter and intraoperatively; surgical and other ablation procedures; and implantation of pacemakers, cardioverters, and defibrillators.

**Critical Care Medicine:** airway maintenance intubation, including fiberoptic bronchoscopy; ventilator management, including experience with various modes; insertion and management of chest tubes; ACLS; placement of arterial, central venous, and pulmonary artery balloon flotation catheters; and calibration and operation of hemodynamic recording systems.

**Endocrinology, Diabetes, and Metabolism:** thyroid aspiration biopsy.

**Gastroenterology:** proctoscopy and/or flexible sigmoidoscopy; diagnostic upper gastrointestinal endoscopy; colonoscopy, including biopsy and polypectomy; esophageal dilation; therapeutic upper and lower gastrointestinal endoscopy; and liver biopsy.

**Hematology:** bone marrow aspiration and biopsy, including preparation, staining, examination, and interpretation of blood smears, bone marrow aspirates, and touch preparations of bone marrow biopsies; measurement of complete blood count, including platelets and white cell differential, using automated or manual techniques with appropriate quality control; administration of chemotherapeutic agents and biological products through all therapeutic routes; management and care of indwelling venous access catheters; therapeutic phlebotomy; and therapeutic thoracentesis and paracentesis.

**Infectious Disease:** microscopic evaluation of diagnostic specimens, including preparation, staining, and interpretation; management, maintenance, and removal of indwelling venous access catheters; and administration of antimicrobial and biologic products via all routes.

**Medical Oncology:** bone marrow aspiration and biopsy; administration of chemotherapeutic agents and biological products through all therapeutic routes; and management and care of indwelling venous access catheters.

**Nephrology:** placement of temporary vascular access for hemodialysis and related procedures; acute and chronic hemodialysis; peritoneal dialysis; continuous arteriovenous hemofiltration; and percutaneous biopsy of both autologous and transplanted kidneys.

**Pulmonary Disease:** endotracheal intubation; fiberoptic bronchoscopy and accompanying procedures; ventilator management; thoracentesis and percutaneous pleural biopsy; arterial puncture; placement of arterial and pulmonary artery balloon flotation catheters; calibration and operation of hemodynamic recording systems; supervision of the technical aspects of pulmonary function testing; progressive exercise testing; and insertion and management of chest tubes.

**Rheumatology:** diagnostic aspiration of and analysis by light and polarized light microscopy of synovial fluid from diarthrodial joints, bursae, and tenosynovial structures; and therapeutic injection of diarthrodial joints, bursae, tenosynovial structures, and entheses.

### Annual Evaluation of Trainees

The Board requires program directors to annually complete evaluation forms assessing the clinical competence of internal medicine and subspecialty trainees.

For subspecialty trainees, verification of their clinical competence is sought from both the director of the subspecialty training program and the chair of the department of medicine.

Internal medicine trainees rated as marginal in their PGY-1 year will receive credit for that year of training. However, if they receive marginal ratings in both PGY-1 and PGY-2, an additional year of training will be required. Marginal ratings do not apply to subspecialty trainees.

For trainees with documented deficiencies in clinical competence, the Board believes that additional training is required for their correction. One additional year of accredited training (including satisfactory completion and performance) is required for each unsatisfactory year. It is the trainee's responsibility to arrange for this training. If additional training is taken in a different program, the Board requires that the trainee request that a written evaluation of past performance be transmitted from the previous training program to the new training program director. Upon written request, the Board will provide performance ratings from the unsatisfactory year and a summary of the total credits accumulated toward the training requirements to the new program director. The Board will also provide copies of the evaluation forms to trainees upon request.

Trainees demonstrating deficiencies solely in the areas of humanistic qualities or moral and ethical behavior may, at the discretion of the Board, be required to complete additional training and/or a specified period of close observation.

The responsibility for the evaluation of a trainee rests with the training program, not with the Board. The Board is not in a position to reexamine the facts and circumstances of the individual's training and evaluation. As required by the ACGME in its *Essentials of Accredited Residencies in Graduate Medical Education*, trainees must be provided due process at the educational institution. In the event that a trainee disagrees with the rating given, the appropriate course of redress is the due process procedure at that institution.

### Professional Standing of Practitioners

Every 4 years following formal training, the Board requires verification that candidates applying for certification are currently recognized as internal medicine specialists or subspecialists in good standing. Verification is sought from the chief of medical service at the institution where the candidate's principal staff appointment is held. Any challenge to good standing must be resolved locally to the Board's satisfaction before admission to the examination. For example, substance abuse, convictions for felonies related to medical practice, or substantial disciplinary action by the institution may lead to deferred admission or rejection.

### Licensure

A valid, unrestricted, and unchallenged license to practice medicine in a state, territory, commonwealth, possession, or province of the United States or Canada is required of all candidates who will have been out of formal training 1 or more years as of July 1 of the year of examination. Candidates with a restricted, suspended, or revoked license in any jurisdiction shall not be admitted to the examination or certified. Restrictions include but are not limited to conditions, contingencies, probation, and stipulated agreements.

### Special Policies

#### Board-eligible Status

Consistent with establishment of time-limited certification, the Board restricts the duration of eligibility for certification. Board eli-

gibility is defined as the status conferred by the ABIM at the time a candidate receives notice of admission to an examination. It indicates that the candidate has completed the required training, has demonstrated satisfactory clinical competence, and that other credentialing requirements have been met.

Should adverse information about a candidate come to the attention of the Board, the Board-eligible status may be revoked.

**Important Notice**

The Board has undertaken a complete review of its policies concerning Board-eligible status and anticipates that revised policies will be announced by December 31, 1996.

In the interim, all candidates with this status will continue to be regarded as Board eligible and therefore able to sit for the Certifying Examination in internal medicine, the subspecialties, or areas of added qualifications.

Candidates who have questions about their Board-eligible status should contact the Board office.

**Disclosure of Information**

The Board provides information to program directors each year regarding both the certification status of individuals who trained in their programs and took the examination and the program's overall candidate performance. This information is helpful to the program in evaluating its educational effectiveness. The Board also provides internal medicine program pass rate information to the Residency Review Committee for Internal Medicine. In addition, at its discretion, the Board may release examination results, examination scores, and other pertinent information concerning candidates to those whom it deems have a legitimate need for such information.

**Disabled Candidates**

The Board recognizes that some candidates may be unable to fulfill the requirement for proficiency in performing procedures because of disability. For such individuals, the procedural skills requirement may be waived. Program directors are urged to write to the Board for approval before the individual enters training.

The Board is also committed to offering its examinations in a place and manner that is accessible to individuals with disabilities; when necessary, alternative accessible arrangements under comparable conditions to those provided for nondisabled individuals are offered to disabled individuals. Candidates who need accommodation during the examination for a disability must provide a written request to the Board at the time of application for examination. Documentation must be received no later than 4 months prior to the date of examination.

**Substance Abuse**

If a history of substance abuse exists, candidates must provide documentation that they can safely and effectively perform the duties and responsibilities of a Board Diplomate. Evidence of successful completion of a treatment program and/or a documented period of abstinence is required. The Board treats such information as confidential.

**Leave of Absence**

Up to 1 month of credit may be granted in any 1 year for vacation time or illnesses. In addition, up to 6 weeks' credit can be granted for pregnancy, childbirth, adoption, and subsequent newborn care. Vacation time cannot be forfeited to meet training requirements.

**Reduced-Schedule Training**

In general, part-time training, even though continuous, is not acceptable. Interrupted full-time training, however, is acceptable, provided that no period of full-time training is shorter than 1 month. In any 12-month period, at least 6 months must be spent in training. The Board encourages trainees to maintain patient care responsi-

bilities in a continuity clinic during the nontraining component of the year. Individuals planning such training should seek the guidance of the Board before acting on their plans.

**Revocation of Certificates**

The Board may at its discretion revoke a certificate if (1) the Diplomate was not qualified to receive the certificate at the time it was issued, even if the certificate was issued as a result of a mistake on the part of the Board; (2) the Diplomate made any material misstatement of fact or omission of fact (a) to the Board in connection with application or otherwise or (b) to any third party concerning the Diplomate's certification or eligibility status; or (3) the Diplomate's license to practice medicine has been revoked in any jurisdiction.

**Late Applications**

Awareness of and meeting registration deadlines are the candidate's responsibility. There is a nonrefundable penalty fee of \$300 for any application postmarked between December 2, 1995, and February 1, 1996, for Internal Medicine; and April 2, 1996, and July 1, 1996, for the Clinical Cardiac Electrophysiology, Hematology, Infectious Disease, Nephrology, Pulmonary Disease, and Rheumatology Examinations.

**Additional Information and Inquiries**

Please address all inquiries concerning examination applications to American Board of Internal Medicine  
3624 Market St  
Philadelphia, PA 19104-2675  
215 243-1500 or 800 441-ABIM  
215 382-4702 Fax

### Examination Schedule

Certification examination in

#### Internal Medicine

Date: August 20-21, 1996  
Registration Period: September 1, 1995, to December 1, 1995  
Fee (US): \$790  
Cancellation Deadline: July 1, 1996  
Date: August 19-20, 1997  
Registration Period: September 1, 1996, to December 1, 1996  
Fee (US): Not determined  
Cancellation Deadline: July 1, 1997

#### Geriatric Medicine

Date: April 16, 1996  
Registration Period: July 1, 1995, to November 1, 1995  
Fee (US): \$980  
Cancellation Deadline: February 18, 1996

#### Clinical Cardiac Electrophysiology

Date: November 20, 1996  
Registration Period: January 1, 1996, to April 1, 1996  
Fee (US): \$1,000  
Cancellation Deadline: October 1, 1996

#### Hematology

Date: November 20, 1996  
Registration Period: January 1, 1996, to April 1, 1996  
Fee (US): \$1,000  
Cancellation Deadline: October 1, 1996

#### Infectious Disease

Date: November 20, 1996  
Registration Period: January 1, 1996, to April 1, 1996  
Fee (US): \$1,000  
Cancellation Deadline: October 1, 1996

#### Nephrology

Date: November 20, 1996  
Registration Period: January 1, 1996, to April 1, 1996  
Fee (US): \$1,000  
Cancellation Deadline: October 1, 1996

#### Pulmonary Disease

Date: November 20, 1996  
Registration Period: January 1, 1996, to April 1, 1996  
Fee (US): \$1,000  
Cancellation Deadline: October 1, 1996

#### Rheumatology

Date: November 20, 1996  
Registration Period: January 1, 1996, to April 1, 1996  
Fee (US): \$1,000  
Cancellation Deadline: October 1, 1996

#### Sports Medicine

Date: April 11, 1997  
Registration Period: July 1, 1996, to November 1, 1996  
Fee (US): Not Determined  
Cancellation Deadline: March 1, 1997

#### Cardiovascular Disease

Date: November 19-20, 1997  
Registration Period: January 1, 1997, to April 1, 1997  
Fee (US): Not Determined

Cancellation Deadline: October 1, 1997

#### Critical Care Medicine

Date: November 19, 1997  
Registration Period: January 1, 1997, to April 1, 1997  
Fee (US): Not Determined  
Cancellation Deadline: October 1, 1997

#### Endocrinology, Diabetes, and Metabolism

Date: November 19, 1997  
Registration Period: January 1, 1997, to April 1, 1997  
Fee (US): Not Determined  
Cancellation Deadline: October 1, 1997

#### Gastroenterology

Date: November 19, 1997  
Registration Period: January 1, 1997, to April 1, 1997  
Fee (US): Not Determined  
Cancellation Deadline: October 1, 1997

#### Medical Oncology

Date: November 19, 1997  
Registration Period: January 1, 1997, to April 1, 1997  
Fee (US): Not Determined  
Cancellation Deadline: October 1, 1997

Please see previous section for penalty fee for late applications.

## American Board of Medical Genetics

Edward R B McCabe, MD, PhD, President, Los Angeles, California  
Joann A Boughman, PhD, Vice President, Baltimore, Maryland  
H Eugene Hoyme, MD, Treasurer, Tucson, Arizona  
Daniel L VanDyke, PhD, Secretary, Detroit, Michigan  
Peter H Byers, MD, Seattle, Washington  
John C Carey, MD, Salt Lake City, Utah  
Cynthia Jane R Curry, MD, Fresno, California  
Robert J Desnick, PhD, MD, New York, New York  
Beverly S Emanuel, PhD, Philadelphia, Pennsylvania  
Haig H Kazazian, Jr, MD, Philadelphia, Pennsylvania  
Roger E Stevenson, MD, Greenwood, South Carolina

Address inquiries to

Sharon B Robinson, MS, Executive Secretary  
American Board of Medical Genetics  
9650 Rockville Pike  
Bethesda, MD 20814

*(These criteria and conditions apply to the 1996 examination cycle and are subject to change without notice. All applicants are advised to contact the American Board of Medical Genetics to ascertain whether the information below is current.)*

### General Information

The American Board of Medical Genetics, Inc (ABMG), incorporated in 1980 under the sponsorship of the American Society of Human Genetics, Inc, prepares and administers examinations to certify individuals who provide services in medical genetics and provides accreditation of medical genetics training programs. The certification program consists of a general (core) examination, taken by all examinees, and specialty examinations in the following areas: (1) Clinical Genetics, (2) PhD Medical Genetics, (3) Clinical Biochemical Genetics, (4) Clinical Cytogenetics, and (5) Clinical Molecular Genetics.

## First-time Applicants

Eligibility for the examination will require successful completion of an ABMG or Accreditation Council for Graduate Medical Education (ACGME) (clinical genetics only) accredited training program. All graduates of an accredited training program will be considered eligible to sit for the certification examinations, provided they submit supporting credentials that are listed for each specialty area.

The ABMG may grant eligibility to qualified individuals trained in other countries who complete their logbook under the auspices of an ABMG- or ACGME-accredited training program. These special circumstances should be evaluated early in the candidate's work in the US. The ABMG, therefore, reserves the right to grant eligibility to such candidates. Candidates should submit a formal application and information supplement form. The ABMG reserves the right to declare a candidate ineligible if training, background, or references are deemed inadequate.

All applicants must sit for the core (general) examination and at least one specialty examination.

## Applicants for Reexamination

Reexaminees are those individuals who failed the examination on their first try. Applicants who sit for the first time in 1996 and fail to achieve certification may resit during the following cycle and must retake all examinations. Applicants cannot carry over a passed examination to the next cycle.

Reexaminees should (1) submit a completed application form (information already on file need not be resubmitted, eg, diploma, certificate of training) and (2) pay for the examination(s) to be retaken.

If certification has not been achieved within two consecutive examination cycles, it is necessary to begin again as a new applicant. For example, an examinee who sat for the first time in 1990 and for the second time in 1993 and failed to achieve certification must submit supporting credentials as if he/she were a new applicant. All information must be resubmitted (including proof of completing an ABMG-accredited training program, new logbook, letters of reference, etc).

## Applicants for Certification in an Additional Specialty

Those who have been previously certified in a specialty and desire to take another specialty examination must submit new credentials including evidence of additional specialty training specific to the area for which certification is desired and include a new case log. Applicants must sit and pass the general examination and the new specialty examination in order to be certified in the new area.

## Fees for the 1996 Examination Cycle

### A. Application Fee

- \$450 for one specialty
- \$500 for two specialties
- \$550 for three specialties
- \$600 for four specialties

This is nonrefundable and must accompany your application.

### B. General Examination: \$400

### C. Specialty Examinations: (Each person must take at least one specialty examination.) Reexaminees must submit the examination fee with the application.

- Clinical Genetics \$500
- PhD Medical Genetics \$500
- Clinical Cytogenetics \$500
- Clinical Biochemical Genetics \$500
- Clinical Molecular Genetics \$500

First-time applicants, or applicants applying for certification in a new specialty, will be required to submit the appropriate examination fees once their application has been approved.

If an approved applicant withdraws from the examination, examination fees will be refunded at the applicant's request if he/she notifies the administrative office. However, \$100 of the examination fee will be retained to cover administrative costs. A candidate who fails to appear for examination will forfeit all examination fees.

## Deadline for Applications

Applications must be postmarked no later than December 31, 1995. Applications postmarked after this date will not be accepted. All information (including logbooks) must be received at this time. Applicants whose training does not end until June 30, 1996, must submit their entire application by December 31, 1995. Applicants in training must submit 100 cases by December 31, 1995, and the remainder by March 31, 1996. Applicants who have completed training must submit everything by December 31, 1995.

## When an Application Is Received

Upon receipt of the completed application and appropriate filing fee, all credentials will be evaluated. At its discretion, the ABMG will approve applications for the examination; each candidate will be notified in writing. Once an application has been approved, the individual will be considered eligible to sit for the examination and will be granted "Active Candidate Status." Accepted candidates will be asked at this time to remit fees for each examination for which they are eligible to sit. Final eligibility cannot be determined and admission to the examination cannot be ensured until all supporting documents and fees have been received in the ABMG administrative office. If the applicant's background is found to be deficient, the ABMG will require additional training and/or clinical experience before allowing the applicant to sit for the examination.

Applicants who will be completing training by June 30, 1996, may apply at this time for the 1996 examination. (See individual specialty entry for further instructions.)

## Admission of Candidates to the Examinations

When all fees and supporting documents have been received and the candidate has been determined eligible, the individual will be notified of the assigned examination center. An admission card will be mailed to the candidate approximately 3 weeks before the examination. Candidates will not be admitted to any examination without an admission card.

## Specific Requirements for Eligibility Listed by Specialty

The ABMG limits eligibility for certification opportunities to those who can demonstrate to the satisfaction of the ABMG that the specific criteria for certification have been met. Those practitioners working in the field of genetics who do not meet specific criteria, despite academic or clinical backgrounds, will not be permitted to sit for any examination.

To be eligible for certification by the ABMG, an individual must meet the criteria in the area of desired certification and provide the supporting documentation required. Certification is offered in these areas: clinical genetics, PhD medical genetics, clinical biochemical genetics, clinical cytogenetics, and clinical molecular genetics.

Beginning with the 1999 examination cycle, applicants requesting to sit for more than one examination will require a minimum of 3 years in an ABMG- or ACGME-accredited clinical genetics training program.

- A. Clinical geneticist: an individual who holds an MD or DO degree and can demonstrate competence to provide comprehensive diag-

nostic, management, and counseling services. Competence in this area implies that the individual

1. Has diagnostic and therapeutic skills in a wide range of genetic disorders;
2. Has an appreciation of heterogeneity, variability, and natural history of genetic disorders;
3. Is able to elicit and interpret individual and family histories;
4. Is able to integrate clinical and genetic information and appreciate the limitations, interpretation, and significance of specialized laboratory and clinical procedures;
5. Has expertise in genetic and mathematical principles to perform risk assessment;
6. Has the skills in interviewing and counseling techniques required to elicit from the patient or family the information necessary to reach an appropriate conclusion, anticipate areas of difficulty and conflict, help families and individuals recognize and cope with their emotional and psychological needs, recognize those situations requiring psychiatric referral, and transmit pertinent information effectively, ie, in a way that is meaningful to the individual or family; and
7. Has knowledge of available health care resources for appropriate referral.

First-time applicants seeking certification as clinical geneticists must submit the following items in support of the application:

1. One acknowledgment card.
2. Notarized application.
3. Notarized identification form with a recent photograph.
4. Copy of doctoral diploma.
5. Verification of satisfactory completion of at least 2 years in an accredited clinical residency program in any medical specialty-certificate of completion.
6. Verification of satisfactory completion of at least 2 years in an ABMG- or ACGME-accredited clinical genetics training program. Applicants who will be completing their training by June 30, 1996, may apply at this time and supply current training information. The ABMG will contact the program director at the conclusion of the training period for verification of successful completion of training.
7. Three letters of recommendation from ABMG-certified diplomates; one must be from the program director.
8. A logbook of 150 cases for which the applicant had professional responsibility during the clinical genetics training period. The cases should provide evidence of a well-rounded experience in clinical genetics with a diversity of genetic disorders and counseling issues. No more than 25% of the cases may be in any one category. If the applicant's training does not end until June 30, 1996, he/she must submit 100 cases at the time of application and the remainder by March 15, 1996, and
9. Documentation of license to practice medicine in the state where training took place.

Applicants for reexamination within one cycle must submit the following:

1. Completed application form including a photo identification form and
  2. The appropriate examination fee(s).
- B. PhD medical geneticist: an individual with a PhD degree who may work in association with a medical specialist, be affiliated with a clinical genetics program, serve as a consultant to medical and dental specialists, and/or serve in a supervisory capacity in a clinical genetics program. Competence in this area implies that the individual
1. Is able to elicit and interpret individual and family histories.
  2. Has an appreciation of the heterogeneity, variability, and natural history of the medical disorders in question.

3. Is able to integrate clinical and genetic information in order to appreciate the limitations, interpretation, and significance of specialized laboratory and clinical procedures.
4. Has expertise in genetic and mathematical principles to perform complex risk assessments, to interpret pedigree analysis (both segregation and linkage), and to understand the principles of genetic etiology.
5. Has the skills in interviewing and counseling techniques required to
  - a. elicit from the patient or family the information necessary to reach an appropriate conclusion,
  - b. anticipate areas of difficulty and conflict,
  - c. help families and individuals recognize and cope with their emotional and psychological needs,
  - d. recognize those situations requiring psychiatric referral, and
  - e. transmit pertinent information effectively, ie, in a way that is meaningful to the individual or family.

First-time applicants seeking certification as PhD medical geneticists must submit the following items in support of the application:

1. One acknowledgment card.
2. Notarized application.
3. Notarized identification form with a recent photograph.
4. Copy of doctoral diploma in genetics, human genetics, or a related field.
5. Verification of satisfactory completion of at least 2 years in a postgraduate ABMG-accredited medical genetics training program. Applicants who will be completing their training by June 30, 1996, may apply at this time and supply current training information. The ABMG will contact the program director at the conclusion of the training period for verification of successful completion of training.
6. Three letters of recommendation from ABMG-certified diplomates are required; one of these letters must be from the program director.
7. A logbook of 150 recent patients for whom genetic services were provided, with indication of the extent of the applicant's involvement. This log must be from an ABMG-accredited fellowship training program. The cases should provide evidence for a well-rounded experience in genetics with a diversity of genetic disorders and counseling issues. No more than 25% of the cases may be in any one disease. If the applicant's training does not end until June 30, 1996, he/she must submit 100 cases at the time of application and the remainder by March 15, 1996.

Applicants for reexamination within one cycle must submit the following:

1. Completed application form, including a photo identification form, and
  2. The appropriate examination fee(s).
- C. Clinical biochemical geneticist: an individual with a doctoral degree (MD, DO, PhD) who is competent to perform and interpret biochemical analyses relevant to the diagnosis and management of human genetic diseases and who can act as a consultant regarding laboratory diagnosis of a broad range of inherited disorders.

Competence in this field implies that the individual

1. Can supervise the operations of a clinical biochemical genetics diagnostic laboratory.
2. Has a broad knowledge of
  - a. basic biochemistry and biology,
  - b. the application of biochemical techniques to the diagnosis and management of genetic diseases, and
  - c. the etiology, pathogenesis, clinical manifestations, and management of human inherited biochemical disorders.

3. Is able to appropriately communicate biochemical laboratory results in the capacity of consultant to other clinicians or directly to patients in concert with other appropriate clinicians or genetic counselors.

First-time applicants seeking certification as clinical biochemical geneticists must submit the following in support of the application:

1. One acknowledgment card.
2. Notarized application.
3. Notarized identification form with a recent photograph.
4. Copy of doctoral diploma in a relevant discipline.
5. Verification of at least 2 years of postdoctoral training experience in an ABMG-accredited clinical biochemical genetics training program handling clinical material with a broad range of cases and techniques.
6. Three letters of recommendation from ABMG-certified diplomates; one must be from the director of the training laboratory, indicating that the applicant has had ongoing assessment during the training period and has had sufficient experience in specific techniques, management of cases, and as a consultant to take the certification examination.
7. A logbook of 150 recent clinical biochemical cases that demonstrate a broad range of genetic and laboratory disorders. These cases should also indicate contact with family, physicians, clinical geneticists, and/or PhD medical geneticists. Cases should illustrate a wide variety of disorders and should provide evidence for a well-rounded experience in clinical biochemical genetics with a diversity of genetic disorders, laboratory techniques, and counseling issues. No more than 25% of the cases may be in any one category. If the applicant's training does not end until June 30, 1996, he/she must submit 100 cases at the time of application and the remainder by March 15, 1996.
8. A completed Clinical Biochemical Genetics Analyte and Method Competency list. This list must be signed by the laboratory director.

Applicants for reexamination within one cycle must submit the following:

1. Completed application form, including a photo identification form.
  2. Any additional laboratory tests the applicant is competent to perform.
  3. The appropriate examination fee(s).
- D. Clinical cytogeneticist: an individual with a doctoral degree (MD, DO, PhD) who can demonstrate competence in providing cytogenetic laboratory diagnostic and clinical interpretive services. Competence in this area implies that the individual
1. Has diagnostic and interpretive skills in a wide range of cytogenetic problems;
  2. Has an appreciation of the heterogeneity, variability, and natural history of cytogenetic disorders;
  3. Is able to supervise the performance of cytogenetic laboratory studies for a wide range of applications with knowledge of their biological and statistical variability; and
  4. Is able to appropriately communicate cytogenetic laboratory results in the capacity of consultant to other clinicians or directly to patients in concert with other appropriate clinicians or genetic counselors.

First-time applicants seeking certification as clinical cytogeneticists must submit the following items in support of the application:

1. One acknowledgment card.
2. Notarized application.
3. Notarized identification form with a recent photograph.
4. Copy of doctoral diploma in a relevant discipline.

5. Verification of at least 2 years of postdoctoral experience in an ABMG-accredited cytogenetics training program.
6. Three letters of recommendation from ABMG-certified diplomates; one must be from the director of the laboratory, indicating that the applicant has had ongoing assessment during the training period and has had sufficient experience in specific techniques, management of cases, and as a consultant to take the certification examination.
7. A logbook of 150 recent clinical cytogenetic cases indicating professional interaction with family, physicians, clinical geneticists, or PhD medical geneticists. (These cases should illustrate exposure to a wide variety of laboratory samples and include the reason why the study was performed and the karyotype report.) Cases should illustrate a wide variety of disorders and should provide evidence for a well-rounded experience in genetics with a diversity of exposure to cytogenetically based disorders and counseling issues. No more than 25% of the cases may be in any one tissue type category. If the applicant's training does not end until June 30, 1996, he/she must submit 100 cases at the time of application and the remainder by March 15, 1996.
8. A completed Clinical Cytogenetics Competency List. This list must be signed by the laboratory director.

Applicants for reexamination within one cycle must submit the following:

1. Completed application form, including a photo identification form;
  2. A list of any additional relevant laboratory tests the applicant is competent to perform and interpret; and
  3. The appropriate examination fee(s).
- E. Clinical molecular geneticist: an individual with a doctoral degree (MD, DO, PhD) who is competent to perform and interpret molecular analyses relevant to the diagnosis and management of human genetic diseases, who is competent to direct or assist in the supervision and management of a molecular genetics diagnostic laboratory, and who can act as a consultant regarding laboratory diagnosis of a broad range of inherited disorders.
- Competence in this field implies that the individual
1. Can perform a variety of diagnostic assays;
  2. Can supervise and direct the operations of a clinical molecular genetics diagnostic laboratory;
  3. Has a broad knowledge of
    - a. basic molecular biology and genetics,
    - b. the application of recombinant DNA techniques and linkage analysis to the diagnosis of genetic diseases, and
    - c. the etiology, pathogenesis, clinical manifestations, and management of human genetic disorders; and
  4. Is able to appropriately interpret and communicate molecular diagnostic laboratory results in the capacity of a consultant to other clinicians or directly to patients in concert with other clinicians or genetic counselors.

First-time applicants seeking certification as clinical molecular geneticists must submit the following in support of the application

1. One acknowledgment card.
2. Notarized application.
3. Notarized identification form with a recent photograph.
4. Copy of doctoral diploma in a relevant discipline.
5. Verification of satisfactory completion of at least 2 years in an ABMG-accredited molecular genetics training program. At least half of the training period should be spent in laboratory benchwork in molecular genetics and molecular diagnostics, handling clinical material with a broad range of cases and techniques.

6. Three letters of recommendation from ABMG-certified diplomates; one must be from the program director.
7. A logbook of 150 clinical molecular cases (a case is defined as a proband or a family study). The logbook should provide evidence for a diverse experience in molecular diagnosis with a variety of genetic disorders; use of different but appropriate techniques; and interpretation of results and contact with the referring physician or counseling of the patient. No more than 25% of the cases may be in any one disease category. If the applicant's training does not end until June 30, 1996, he/she must submit 100 cases at the time of application and the remainder by March 15, 1996.
8. A completed Clinical Molecular Genetics Competency List. This list must be signed by the laboratory director.

Applicants for reexamination within one cycle must submit the following:

1. Completed application form including a photo identification form;
2. Any additional laboratory tests the applicant is competent to perform; and
3. The appropriate examination fee(s).

### Certificates

Candidates who pass the general examination and at least one specialty examination will become diplomates of the ABMG. This information becomes public information and diplomates will be listed in the *Official American Board of Medical Specialties Directory of Board Certified Medical Specialties*. Any certificate issued by the ABMG shall be subject to revocation at any time should the ABMG determine, in its sole judgment, that a candidate who has received a certificate was in some respect not properly qualified to receive or retain it.

### Time-limited Certification

Beginning in 1993, all certificates will be time-limited for a period of 10 years.

### Applicants With Special Disabilities

The ABMG offers examinations in a place and manner accessible to persons with disabilities or offers alternative accessible arrangements for such individuals. Candidates who need special accommodations during the examination for a physical disability should provide written details to the ABMG at the time of application for examination or soon after the disability takes place.

## American Board of Neurological Surgery

Howard M Eisenberg, MD, Chairman, Baltimore, Maryland  
 Burton M Onofrio, MD, Vice-Chairman, Rochester, Minnesota  
 Edward L Seljeskog, MD, Secretary-Treasurer, Rapid City, South Dakota

Donald P Becker, MD, Los Angeles, California  
 Stewart B Dunsker, MD, Cincinnati, Ohio  
 Eugene S Flamm, MD, Philadelphia, Pennsylvania  
 Steven L Giannotta, MD, Los Angeles, California  
 Robert L Grubb, Jr, MD, St Louis, Missouri  
 M Peter Heilbrun, MD, Salt Lake City, Utah  
 Donald O Quest, MD, New York, New York  
 John C Van Gilder, MD, Iowa City, Iowa  
 Robert H Wilkins, MD, Durham, North Carolina  
 H Richard Winn, MD, Seattle, Washington  
 Fremont P Wirth, MD, Savannah, Georgia  
 Mary Louise Sanderson, Administrator, Houston, Texas

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Neurological Surgery to ascertain whether the information below is current.)*

### Diplomates

A list of diplomates and the bylaws of the American Board of Neurological Surgery (ABNS) appear in the *Official American Board of Medical Specialties Directory of Board Certified Medical Specialists*, which can be obtained from Marquis Who's Who, Inc (121 Chanlon Rd, New Providence, NJ 07974). In addition, a list of new diplomates is published in the *Journal of Neurosurgery* shortly after each examination.

Information regarding training programs acceptable for certification can be found in the *Graduate Medical Education Directory*. This directory can be purchased from the American Medical Association (515 N State St, Chicago, IL 60610).

### Qualifications

The ABNS evaluates all qualified applicants for their proficiency in neurosurgery.

The minimum educational requirements of the Board should not be interpreted as restricting programs to these standards. If necessary, neurosurgical program directors may retain residents in their programs beyond the required 5 years of residency training in order to ensure satisfactory competence in neurosurgery.

It is the responsibility of the candidate to seek information concerning current requirements for certification by the ABNS. Even though directors of approved neurosurgical residency programs are well informed regarding requirements for certification, placement in an approved program does not guarantee adequate training for certification. The candidate must make sure he/she receives such training.

### Training Prior to Neurosurgery Residency

1. Graduation from a medical school that is acceptable to the Board.
2. Currently valid license to practice medicine in the state, province, or country of residence.
3. Twelve months devoted to acquiring adequate knowledge of fundamental clinical skills. This is known as postgraduate year one (PGY-1), general surgery year one, or internship; recommended for completion prior to beginning neurosurgical training, but must be completed prior to beginning the third year of that training. This may be achieved by

- a. one year of training in an approved general surgery program in the United States or Canada; or
  - b. one year of training in an accredited neurosurgical residency program, to include not less than 6 months in surgical disciplines other than neurosurgery; the remaining 6 months should include training in fundamental clinical skills considered appropriate by the program director, but may not include more than 6 weeks of neurosurgery; or
  - c. holding a certificate from the American Board of Surgery or a fellowship (in surgery, not neurosurgery) of the Royal College of Surgeons of England, Edinburgh, Canada, Ireland, Australasia, or Glasgow.
2. Transfers from one approved neurosurgical training program to another approved program
    - a. with the consent of the directors of both programs, or
    - b. without the consent of one of the program directors, but with the approval of the Board.

In the above cases, the director of the program from which the candidate transfers must indicate in writing to the new program director the credit for training, both in time and category, that he/she is prepared to certify that the candidate has successfully completed. A copy of such statement must be submitted to the Secretary of the Board. The new program director may or may not honor such credit, depending upon appraisal of the resident's professional and educational progress in the new program. A statement of how much training credit will be accepted must also be submitted to the Secretary of the Board.

Requests for training away from a parent institution or for transfer from one program to another should be submitted in writing to the Board prospectively, not retroactively.

Training by preceptorship is not considered as fulfilling certification requirements. No credit is given for time spent in such training.

Credit for elective training in foreign or other nonapproved centers may be granted by the Board on an individual basis when this training is carried out as an integral part of the training program and with the advice and approval of the candidate's program director. The Board must be informed of such a rotation prior to its occurrence.

The above provisions in no way alter the basic minimum requirement of 60 months of residency training in neurosurgery, including a minimum of 3 months of training in clinical neurology and 36 months of clinical neurosurgery in accredited institutions, 12 months of which must be as senior resident and 24 months in one institution.

### Primary Examination

Each applicant for the Board's oral examination must first pass for credit the primary examination, which is a written exam prepared by the Board with the assistance of a professional testing organization. The examination includes information on neuroanatomy, neurobiology, neurochemistry, neurology, neuropathology, neuropharmacology, neurophysiology, neuroradiology, neurosurgery, fundamental clinical skills, and material from other relevant disciplines deemed suitable and important by the Board.

The primary examination is given in March each year at training programs throughout the United States and Canada. Residents in accredited training programs may take it for self-assessment or credit at the discretion of their program directors, and diplomates may take the examination as often as desired, either for credit toward certification or self-assessment. It is open for all neurosurgeons who have successfully completed training at accredited programs.

An application must be filed to take the primary examination. The deadline for receipt of this application by the Board is the first of January. The form must be accompanied by the fee set by the Board. This fee will be refunded only if the candidate informs the secretary's office, prior to the deadline date for receipt of applications, that he/she is not going to sit for the examination. Examinees are required to sign a pledge that states that they agree to be bound by the Board's ruling regarding credentials, irrespective of scores on the examination. By signing the pledge, candidates also grant permission to the ABNS and its testing organization to release the results, either for credit or self-assessment, to the examinee's program director.

Candidates should keep in mind that they must be scheduled for oral examination by the Board within 5 years of either passing the

### Neurological Surgery Training Requirements

For residents beginning the neurosurgery portion of their training on or after July 1, 1979:

1. Completion of 5 years of training following PGY-1. Neurosurgery training must occur in residency programs accredited by the Residency Review Committee for Neurosurgery or its Canadian equivalent.
2. The 60 months of training must include at least 36 months of clinical neurosurgery in accredited programs; 12 months of this period must be served as a senior resident.
3. The training in clinical neurosurgery must be progressive and not obtained during repeated short intervals in a number of institutions. At least 24 months of training in clinical neurosurgery must be obtained in one institution.
4. At least 3 months must be devoted to training in clinical neurology. Six months is recommended. This training may be undertaken during PGY-1.
5. The unobligated 21 months may be devoted to neuropathology, neuroradiology, basic neurosciences, research, or other disciplines related to neurological surgery.
6. Exchange of residents between approved neurosurgical training centers in the United States and Canada may be arranged by the respective training program directors with the consent of the Board. In such instances, the Secretary of the Board must be notified of the rotation before the exchange begins. Such an exchange should in no way compromise any other training requirement. Training in any institution other than in the parent institution and its affiliated hospitals will not be considered as counting toward the requirements unless specified in advance by the program director and approved by the Board.
7. The program director must notify the Board of the appointment of each new neurosurgical resident and whether he/she is entering the program with intent to obtain certification and, if so, whether the director has informed the trainee of the requirements necessary to obtain such certification.
8. Residents in training after June 30, 1983, are required to record, in a fashion determined by the Board, their operative procedures.
9. Prior to acceptance for the certification process, the Board requires a statement from the candidate's program director to the effect that the candidate has met the minimum time requirements, has performed in training in a satisfactory manner, and, in the judgment of the program director, is well prepared to enter into the independent practice of neurosurgery.

### Exceptional Modifying Circumstances

Upon recommendation of the program director and ratification by the Board, credit may be given for previous training if a candidate

1. Before entering an approved neurosurgical training program, has had substantially more than the prerequisite training in general surgery, medical neurology, or the basic neurological sciences; such credit must be approved by the Board.

primary examination for credit or completing a formal training program, whichever occurs later. Compliance with this regulation requires early submission of applications for oral examination and certification after training. If a candidate cannot be scheduled within the 5-year limit due to late submission of an application, he/she must once again pass the primary examination for credit before being scheduled for oral examination within the succeeding 3-year period. Candidates should also keep in mind that usually 18 months are required between submission of an application and oral examination.

### Practice Requirements

After beginning practice, the candidate shall furnish to the Board the names of three physicians (two neurosurgeons, including one ABNS diplomate) who are knowledgeable about the quality of the candidate's practice. The Board will request reference letters from these physicians and other physicians in the community. It is the prerogative of the Board to send representatives to review the candidate's practice.

In addition, the candidate shall submit the names and addresses of either the medical director or chief of staff at each hospital where the candidate has privileges. Letters will be requested to advise the Board of the candidate's status regarding admitting and operating privileges in each hospital where he/she practices. Prior to oral examination, each candidate must be in possession of hospital staff privileges in all hospitals in which he/she cares for patients. Such privileges must be unrestricted in respect to the hospital's requirements for a neurosurgeon.

The candidate must also forward to the Board a typewritten, chronological list of all inpatients for whom he/she has been the responsible physician or surgeon for a current, 12-consecutive-month period. No minimum volume of operative procedures is required. The total experience must be tabulated by the candidate in a format defined by the Board. The case material must be accompanied by a summary form signed by the chief of staff, chief of service, president of the medical staff, or hospital administrator of the hospitals where the candidate practices, indicating the essential accuracy of the data. These data must be approved by the Board prior to scheduling for oral examination.

Candidates are responsible for retaining duplicate copies of these records.

### Certification of Those Training in Canadian Programs

Those satisfactorily completing approved Canadian training programs and holding a fellowship in neurosurgery from the Royal College of Surgeons (Canada) are eligible for certification through the same route as candidates training in the United States, as outlined above.

### Applications

Applications for oral examination and certification are automatically sent to residents in June of their last year of training. Additional applications and practice data forms are available from the Board's office. The application and accompanying information should be filled out and returned to the Board as soon as possible after beginning practice so that inquiries may be made from references and others in the community, the individual's training program faculty, and hospitals where the candidate practices.

A pledge is part of the application for oral examination. By signing the application, the applicant agrees to abide by all the terms and conditions of this pledge.

Upon receipt of an application, the Board takes such steps as deemed appropriate to verify the statements of facts made in the ap-

plication. Inquiries are made from references and others familiar with the candidate to obtain information relevant to the requirements for examination.

The Board makes the final decision regarding a candidate's eligibility for oral examination and potential certification after considering all available information pertaining to the entire process of certification.

Application fees, once received, will not be refunded.

### Oral Examination

The oral examination, a clinical problem-solving and patient-management exam, is given twice a year. Candidates are given case histories and, where appropriate, x-rays, scans, and other visual aids to augment the presentation and development of cases. The candidate must be able to explain verbally how he/she would proceed in evaluating and/or managing a case, and in planning and performing the proposed operation or operations, if indicated. One hour is devoted to neurological surgery—intracranial disease; 1 hour to neurological surgery—spinal and peripheral nerve disease; and 1 hour to a mixture. Neurosurgical neurology is included in all sections. Each of the 3 hours is conducted in an interview setting with two examiners.

A candidate who passes the oral examination will be forwarded the Board's certificate, once it has been suitably engrossed and signed by the officers of the Board.

### Reexamination Rules

A candidate failing the oral examination once may request reexamination within 3 years. A minimum of 1 year must elapse before taking the examination for the second time. The examination fee must be paid.

A candidate who has failed the oral examination on two or more occasions must pass the primary examination for credit again before becoming eligible to retake the oral exam. Two letters of reference certifying the nature and quality of the candidate's practice must be submitted to the Board, as well as hospital privilege letters and a year of new practice data. In addition, the candidate must pay the oral examination fee. Under these circumstances, candidates must take the oral exam within 3 years of repassing the primary examination. Should the candidate not apply for or fail to appear for oral examination within the 3-year period, the candidate must re-pass the primary examination before being eligible for oral exam once again.

### Payment of Fees

Fees for filing an application and for oral examination will be determined by the Board. They reflect costs that the Board incurs through obligations associated with the certification process. The application fee will not be returned even though the application for examination is denied.

### Revocation of Certification

Pursuant to the rules and regulations established by the ABNS, the Board has the authority to revoke any certificate issued by it for various reasons, including that the person to whom the certificate was issued is convicted of a felony, or that his/her license to practice medicine has been lost or encumbered. Should revocation be disputed, there is a hearing mechanism for such an action.

# American Board of Nuclear Medicine

James J Conway, MD, Chairman, Chicago, Illinois  
 Heinrich R Schelbert, MD, Vice Chairman, Los Angeles, California  
 James M Woolfenden, MD, Secretary, Tucson, Arizona  
 Stanley J Goldsmith, MD, Treasurer, New York, New York  
 Robert F Carretta, MD, Roseville, California  
 Eva V Dubovsky, MD, Birmingham, Alabama  
 Edward R Powsner, MD, Detroit, Michigan  
 Henry D Royal, MD, St Louis, Missouri  
 Edward B Silberstein, MD, Cincinnati, Ohio  
 Ronald L Van Heertum, MD, New York, New York  
 Richard L Wahl, MD, Ann Arbor, Michigan  
 Joseph F Ross, MD, President, Los Angeles, California  
 William H Bland, Vice President, Los Angeles, California

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Nuclear Medicine to ascertain whether the information below is current.)*

## Requirements for Certification

### General Requirements for Each Candidate

Assurance that the applicant represents himself/herself to be a specialist in nuclear medicine.

### General Professional Education

Graduation from a medical school approved by the Liaison Committee on Medical Education or from a school of osteopathy. If the applicant is a graduate of a medical school outside the United States or Canada, he/she must hold a currently valid ECFMG certificate issued by the Educational Commission for Foreign Medical Graduates (ECFMG), 3624 Market St, Philadelphia, PA 19104-2685; 215 386-5900.

### Preparatory Postdoctoral Training

Training required for admission to the certifying examination in nuclear medicine shall comprise 1 or more years of preparatory postdoctoral training and 2 or more years of residency training in nuclear medicine.

Preparatory postdoctoral training shall consist of 1 or more years of residency training in programs satisfactory to the American Board of Nuclear Medicine (ABNM). Such programs shall provide broad experience in clinical medicine in which the primary emphasis is on the patient and his/her clinical problems. Preparatory training may be in any specialty in a residency program in the United States approved by the Accreditation Council for Graduate Medical Education (ACGME) or in programs in Canada approved by the Royal College of Physicians and Surgeons of Canada (RCPSC) or the Professional Corporation of Physicians of Quebec (PCPQ). The Board strongly urges that 1 year of preparatory postdoctoral training precede training in nuclear medicine.

Each nuclear medicine residency training program director must ensure that for each resident entering his or her program the preparatory postdoctoral training has been in a United States program approved by the ACGME or in a Canadian program approved by the RCPSC or the PCPQ.

### Special Postdoctoral Training in Nuclear Medicine

1. After completion of the preparatory postdoctoral training programs, there shall be satisfactory completion of a 2-year formal residency training program in nuclear medicine in a nuclear medicine residency training program recognized and approved by the Residency Review Committee (RRC) for Nuclear Medicine

and the ACGME or in a Canadian program approved by the RCPSC or the PCPQ as competent to provide a satisfactory training in nuclear medicine.

2. The 2-year formal residency training program in nuclear medicine must include
  - a. A minimum of 18 months of training in clinical nuclear medicine, which will include, but not be limited to, radiobioassay, in vitro and in vivo measurements, nuclear imaging, positron emission tomography, nuclear magnetic resonance imaging, therapy with unsealed radionuclides, medical management of individuals exposed to ionizing radiation, the safe management and disposal of radioactive substances, and the direction of radiation safety programs.
  - b. Six months of training in allied sciences, which must include medical nuclear physics, radiation biology, radiation protection, instrumentation, radiopharmaceutical chemistry, statistics, and computer sciences; and may also include pathology, physiology, and other basic sciences associated with nuclear medicine. The time spent in training in allied science may be spaced throughout the period of training in nuclear medicine and in a manner that does not exceed 6 complete months of training.
  - c. For candidates who have completed residency training programs in clinical disciplines closely related to nuclear medicine in residency programs approved by the ACGME, the RCPSC, or the PCPQ, credit may be given for some of that training. Candidates desiring credit toward the nuclear medicine requirement should write to the Board requesting such credit.
3. The Board considers demonstration of clinical competence in the management of the nuclear medicine patient of paramount importance in its qualification of the applicant to take the certifying examination. The Board designates the directors of nuclear medicine residency programs and their supporting evaluation committees as the authorities who most appropriately can provide to the Board the necessary documentation of competence in clinical nuclear medicine, and requires that all program directors certify to the Board that each applicant from their programs is competent in clinical nuclear medicine. These reports will be reviewed by the Board before accepting an applicant to take the certifying examination.

If a residency program director's evaluation indicates that a candidate's competence in clinical nuclear medicine is unsatisfactory, the applicant will not be admitted to the examination unless the Board finds that the applicant's overall performance meets its standards. An applicant not admitted to an examination on the basis of these findings may appeal in writing to the Board for a special evaluation of competence in clinical nuclear medicine within 45 days of receipt of notification. The appeal should state that a request is made for review of the decision not to admit to the examination and why the candidate considers the decision to be in error. Applicants whose clinical competence is judged satisfactory in this evaluation will be admitted to the next examination for which they apply. Candidates judged not satisfactory in this evaluation are advised to spend an additional year training before applying again for special evaluation of competence.

Applicants submitting false credentials are subject to disqualification from examination or revocation of certification.

### Patient Care Responsibility

Candidates for certification in nuclear medicine will have the equivalent of at least 2 years' training in which the primary emphasis is on the patient and his/her clinical problems. This minimum period may be spaced throughout the entire postdoctoral training but should be of sufficient duration for the trainee to become knowl-

edgeable in the aspects of clinical medicine relevant to nuclear medicine, including patient care.

### Canadian Training

Physicians who satisfactorily complete training in Canadian nuclear medicine programs approved by the RCPSC or the PCPQ are eligible for admission to the ABNM certifying examinations.

### Completion of Training

All preliminary and nuclear medicine residency training must be completed prior to September 1 of the year the candidate takes the certifying examination.

### Approved Residency Training Programs

Residency training programs in nuclear medicine accredited by the ACGME may be found in this directory, published annually by the American Medical Association, or may be obtained by contacting: Secretary, Residency Review Committee for Nuclear Medicine, ACGME, 515 N State St/Ste 2000, Chicago, IL 60610.

### Examination

An objective type examination is administered in a morning and an afternoon session. The examination evaluates the applicant's knowledge of and competence in the management of patients in the area of clinical nuclear medicine, including, but not limited to, radioassay/radiobioassay, in vitro and in vivo measurements, nuclear imaging, the principles of nuclear magnetic resonance imaging, therapy with unsealed radionuclides, the medical effects of exposure to ionizing radiation, the medical management of persons exposed to ionizing radiation, radiation safety, and the safe management and disposal of radioactive substances. Also included is an evaluation of the candidate's knowledge in the related sciences of medical nuclear physics, radiation biology, radiation protection, instrumentation, radiopharmaceutical chemistry, computer sciences, and statistics; the examination may also include pathology, physiology, and other basic sciences associated with nuclear medicine.

### Applications

Applicants who wish to be examined by the Board must complete, sign, and file with the Board office an application on the official form together with the supporting data required by the application. The applicant must enclose a check to cover the examination fee and a self-addressed postcard, which will be returned to the applicant when all application materials have been received by the ABNM. It is the responsibility of the applicant to make certain that the required evaluation forms have been completed by his/her program director and sent to and received by the ABNM.

As soon as determination is made concerning admission or non-admission to the examination, the candidate will be notified by mail, and if admitted, assignment of the candidate number and notification of the examination site will be given.

Before the final action on applications, officers, members, and employees of the Board are not authorized to estimate the eligibility of applicants. Applicants are requested not to discuss or write for opinions regarding the status of their applications. The Board decides on eligibility to take the examination only by approving or disapproving individual applications, and accordingly has no "Board-eligible" category.

Inquiries concerning the applicability of previous training and experience should be sent with complete documentation of all education and training to the Board office. A copy of the Board's response to these inquiries should be forwarded with any subsequent examination application.

### Release of Information

Candidates will receive the results of their examinations (pass/fail letter) approximately 4 months after the examination.

A list of diplomates of the ABNM will be found in the *Official American Board of Medical Specialties Directory of Board Certified Medical Specialists*, published by the American Board of Medical Specialties and Marquis Who's Who.

Upon request and with the approval of the Board Chairman, the Board releases information on diplomates to federal and state licensing bodies and to educational and professional organizations for specific, limited, and appropriate professional use. An authorization for release of this information is a part of the examination application form.

### Policy on Reexamination

Applicants who fail the examination are eligible for reexamination. An examination fee must accompany each completed application for reexamination. If an applicant is disqualified from the examination by reason of dishonesty in the application or in taking the examination and his/her examination is invalidated by the Board, reexamination shall be at the Board's discretion.

### Recertification

The ABNM offers its diplomates voluntary recertification based upon fulfillment of certain requirements, including passing an objective cognitive examination. The ABNM will not rescind initial certification granted prior to 1992. Beginning in 1992 certification will be valid for a period of 10 years and may be revalidated by recertification.

### Journals Publishing Information on Application and Examination Schedules

*Annals of Internal Medicine* (Medical News Section)  
*Journal of the American Medical Association* (Examinations and Licensure Monthly Section)  
*Journal of Nuclear Medicine*  
*Radiology*  
*Journal of Clinical Pathology*

### Changes in Policies and Procedures

The Board reserves the right to make changes in its fees, policies, and procedures at any time, and cannot assume responsibility for giving advance notice thereof. The provisions of this publication are not to be construed as a contract between any candidate and the ABNM.

### Fees

The examination fee must accompany the application. If the applicant is rejected by the Board or withdraws prior to August 1, the application processing fee will be retained by the Board. If the applicant withdraws after August 1, the entire examination fee will be retained by the Board.

# American Board of Obstetrics and Gynecology

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Obstetrics and Gynecology to ascertain whether the information below is current.)*

## Types of Board Status

### Residency Graduate

An individual for certification is registered with the Board when, upon application, the Board rules that he/she has fulfilled the requirements to take the written examination (see "Requirements" for the written examination).

### Active Candidate

1. An individual may achieve active candidate status by passing the written examination.
2. To maintain active candidate status, the candidate must not have exceeded the *limitations* to admissibility for the oral examination (see "Limitations").
3. Active candidate status that has expired may be regained by repeating and passing the Board's examination.

### Diplomate

1. An individual becomes a diplomate of the Board when he/she has fulfilled all requirements, has satisfactorily completed the written and the oral examinations, and has been awarded the Board's certifying diploma.
2. Certificates have limited duration of validity. Certificates will bear a limiting date of 10 years, after which they are no longer valid. Each diplomate must be evaluated again to receive a new certificate.

### Certification Process

Certification as a specialist in obstetrics and gynecology is the end of a process lasting many years. The required minimum duration of graduate education is 4 years.

During the final year of graduate training, it is necessary to initiate certain measures. Because most graduate training programs begin on July 1 and end on June 30, the following summary of the certification process is based on these dates. However, applicants who complete residency training at unusual times will have an extended time in the certification process.

Between September 1 and November 30 of the final year of residency, the candidate should request and complete the application for the written examination. If he/she is ruled admissible to take the examination, he/she will do so in June of the final year of residency.

If the candidate passes the written examination, he/she enters a 2-year period of practice in the specialty. The candidate is required to provide a list of patients under his/her care for a 12-month period beginning on July 1 of his/her second year of practice. Between January 1 and February 28 of his/her second year of practice, the candidate should request and complete the application for the oral examination.

The candidate may enter a 2-year Board-approved postresidency fellowship. Upon completion, this candidate will then enter a 1-year period of practice in the specialty. This candidate is required to provide a list of patients under his/her care during this year of practice (January 1 to December 31). Between January 1 and April 30 of this year of practice, the candidate should request and complete the application for the subspecialty oral examination.

The candidate's list of patients must be mailed to the Board of office between January 1 and February 1, following the completion of the 12-month period of patient care. If ruled admissible, the candidate thus takes the subspecialty oral examination in March or April.

## Important Dates in the Certification Process

### A. Final Year of Residency

July 1—Commence  
 September 1 to November 30—Apply for written examination  
 June—Take written examination

### B. Practice

1. First year of practice  
 No Board activities necessary
2. Second year of practice  
 July 1 to June 30—Patient list  
 November 1 to February 28—Apply for oral examination
3. Third year of practice  
 August 15—Deadline for submission of patient list  
 November—Take oral examination

### C. Fellowship in Subspecialty

1. First year (fellowship)  
 No Board activities
2. Second year (fellowship)  
 No basic Board activities

(September 1 to November 30—Apply for subspecialty written examination)

3. Third year—First year of practice  
January 1 to February 28—Apply for the oral examination  
January 1 to December 31—Patient list
4. Fourth year—Second year of practice  
February 1—Deadline for submission of patient list  
March or April—Take oral examination

### Responsibility of a Candidate

It is the responsibility of the candidate to seek information concerning the current requirements for certification as an obstetrician and gynecologist. The Board does not assume responsibility for notifying a candidate of changing requirements or the impending loss of his/her admissibility to an examination.

### Written Examination

The written examination is a 3 hour and 20 minute examination consisting of questions of the objective (multiple-choice) type. Questions will be chosen from each of the following areas of knowledge:

1. Basic science
2. Endocrinology, fertility
3. Primary/preventive medicine
4. Clinical gynecology
5. Clinical obstetrics
6. Medical, surgical, and psychiatric diseases in the non-pregnant woman, and medical, surgical and psychiatric diseases in pregnancy and complications of pregnancy
7. Oncology and pathology

The candidate will be expected to demonstrate skills necessary to apply basic knowledge to the management of clinical problems. These skills include

1. Obtaining needed information
2. Interpretation and use of data obtained
3. Selecting, instituting, and implementing care
4. Management of complications
5. Following and continuing care

The areas of information and skills examined are further outlined in *Educational Objectives for Resident Education in Obstetrics and Gynecology*, published by the Council on Resident Education in Obstetrics and Gynecology.

### Requirements

1. Degree of doctor of medicine, or an equivalent degree, and unrestricted license (an educational or institutional license will suffice) to practice medicine in one of the states or territories of the United States or a province of Canada.

The requirement of unrestricted license must have been met prior to the time that the application is submitted. An educational or institutional license is satisfactory.

Candidates with a DO degree must have graduated from a school of osteopathy accredited by the American Osteopathic Association.

2. The candidate will be required to have completed or be near completion (see "Application for Examination in 1997") of no less than 4 years in clinical programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) or the Council of the Royal College of Physicians and Surgeons of Canada. This must include at least 36 months of obstetrics and gynecology, including the usual time as chief (senior) resident in the program. Completion of a year of "PGY-1" plus a 3-year residency program or a 4-year residency program will fulfill this requirement, but if the program consists of more than 4 years, the entire program must be completed.

Time spent in an osteopathic hospital or in any program not accredited by the ACGME will not fulfill this requirement.

3. A statement signed by the program director certifying that the candidate has
  - A. followed satisfactorily the course of instruction designed for this program;
  - B. taken leaves of absence and vacation not exceeding 8 weeks in any of the first 3 years, 6 weeks in the final year, or 20 weeks total for the overall 4-year period;
  - C. completed and submitted to the program director a satisfactory resident experience log;
  - D. achieved the appropriate knowledge, ability, and judgment in order to provide competent clinical care in obstetrics and gynecology, as documented by ongoing evaluation during the entire resident program; and
  - E. demonstrated the necessary technical skills to competently perform
    1. major abdominal and vaginal surgical procedures upon the female pelvis and related structures;
    2. spontaneous and operative obstetric deliveries;
    3. surgical exploration of the abdomen;
    4. endoscopic procedures of proven value in the pelvis;
    5. diagnostic evaluation, including electronic monitoring, ultrasound, colposcopy, and amniocentesis;
    6. diagnosis and treatment of complications of the above; and
    7. demonstrated good moral and ethical character.

### Application for Examination in 1997

A candidate who has completed an accredited residency program and a candidate scheduled to complete an accredited residency program on or before September 30, 1997, may apply on or before November 30, 1996, to write the examination on June 30, 1997.

The requirement of unrestricted license must have been met prior to the time that the application is submitted. An educational or institutional license is satisfactory.

The form on which to apply to write the examination on June 30, 1997, may be obtained by writing to the Board office after September 1, 1996. Each applicant must meet the requirements effective in the year he/she requests admission to the examination. As a part of the application form, endorsement and verification of the resident's experience, competence, satisfactory performance, and confirmation of the scheduled date for completion of the candidate's residency are requested of the director of the obstetric and gynecologic residency program.

The Board will make the final decision concerning the applicant's admission to the examination after considering all circumstances affecting his/her situation.

A candidate's application to write the examination on June 30, 1997, completed in all details, together with payment of the application fee of \$300, must be received in the Board office before November 30, 1996. A copy of the candidate's current license registration also is required.

The requirement of unrestricted license must have been met prior to the time that the application is submitted. An educational or institutional license is satisfactory.

When the candidate is ruled admissible to the examination, he/she will be notified in April (1) that the \$400 examination fee is payable and (2) the date the fee must be paid (see "Fees"), if the candidate is to be scheduled to write the examination in June.

If a candidate is found to be involved in litigation or investigation regarding ethical or moral issues, he/she will not be scheduled for examination and the application will be reexamined. Typically, the Credentials Committee will defer such a decision for 1 year to gain further information.

Falsification of data (including case lists) or evidence of other egregious ethical, moral, or professional misbehavior may result in a deferral of consideration of a candidate's application for at least 3 years, and the candidate must meet all eligibility requirements in effect at the end of the deferred period.

When the Credentials Committee rules an applicant not admissible to the written examination, a new application and fee may be submitted at a later date, but the candidate must then have fulfilled the requirements effective in the year of the new application.

#### Admission to the Written Examination

The candidate ruled admissible to the examination will be sent an authorization for admission form, which must be presented to the proctor at the time and place of examination. When a candidate is scheduled to complete his/her residency program after submission of the application (but before September of that year), verification of the currently satisfactory manner in which the candidate is completing his/her residency must be reaffirmed by the signature of the director of the residency program on the authorization for admission form, dated within the month the candidate is scheduled to write the examination.

#### Results of the Examination

The results of the examination written in late June will usually be reported to each candidate in approximately 9 weeks.

A passing grade on the written examination does not establish a candidate's admissibility to the oral examination for certification. (See "Requirements" for the oral examination.)

#### Requests for Reexamination

A candidate previously scheduled to write the examination who fails to do so, as well as a candidate who writes but fails to pass a previous examination, must write the Board office after September 1 to request reapplication materials for the following year's examination. It is necessary for each applicant to meet the requirements effective in the year he/she requests admission to the examination. The reapplicant must have submitted completed reapplication materials, a copy of current license registration, and the reapplication fee of \$300 prior to the November 30 deadline.

The application fee and examination fee (see "Fees") must be paid each year a candidate is to be scheduled to write the examination.

#### Oral Examination

All correspondence, applications, and information directed to the Board must be in English.

All fees must be paid in United States currency.

The oral examination is designed to evaluate the candidate's knowledge and skills in solving clinical problems in obstetrics and gynecology, and to evaluate actual behavior in independent practice. It is emphasized that candidates will be examined in all areas of obstetrics and gynecology. More than half of the examination will consist of questions concerning patient management problems. The candidate's list of patients will be used freely by the examiners for this purpose, but additional basic clinical problems will be included. The remainder of the examination will include recall of basic knowledge in obstetrics and gynecology and interpretation of gross and microscopic pathology, x-ray films, sonograms, and related material from photographic slides.

Microscopes and slide projectors will be used. The knowledge and skills required for the oral examination are the same as those listed in regard to the written examination.

Recording devices will not be permitted during the oral examination.

Candidates will be expected to demonstrate that they have acquired the capability to perform, independently, major gynecologic

operations and spontaneous and operative obstetric deliveries, to manage the complications thereof, and to perform the essential diagnostic procedures required of a consultant in obstetrics and gynecology.

Candidates will be expected to demonstrate a level of competence that allows them to serve as consultants to physicians who are not obstetricians-gynecologists in their community.

The report of the examining team will be reviewed by the Board of Directors, and each candidate is passed or failed by vote of the Board.

The candidate can expect the examination to be completed within a half day.

At the completion of the oral examination, if a candidate believes his/her examination has not been conducted in a fair and unprejudiced manner, the candidate may report within the hour to the Board office staff and ask for a second examination. The request must be made within 1 hour. If the appeal is granted

1. A second examination will be provided at the next regularly scheduled annual oral examination at no additional charge;
2. The repeat examination will be conducted by an entirely different team of examiners, no one of whom shall have previously participated in an examination of the candidate;
3. Neither the questions nor the candidate's answers on the first examination will be known to or taken into account by the second group of examiners; and
4. The decision of the examiners conducting the second examination shall determine the results of the candidate's oral examination.

#### Requirements

1. Passing grade on the written examination.
2. Good moral and ethical character.
3. Unrestricted license to practice medicine in one of the states or territories of the United States or a province of Canada, since at least February 28, 1996.
4. Actively engaged in (private or nonprivate) unsupervised practice.
  - a. Independent unsupervised patient care limited to obstetrics and gynecology
    1. for at least the time from February 28, 1996, through June 30, 1997 (time spent in a critical care fellowship does not meet this requirement), or
    2. for at least the time from July 1, 1996, through June 30, 1997, for candidates who have successfully completed a Board-approved fellowship (this includes critical care fellowship only if taken in continuity with a Board-approved specialty fellowship).
  - b. Unrestricted hospital privileges to practice as an obstetrician-gynecologist since at least July 1, 1996. Such privileges must be granted in each of the hospitals in which the candidate has been responsible for patient care during this time. If the candidate is under investigation or on probation, the examination will be deferred until the investigation is completed, the probation is lifted, and full and unrestricted privileges are granted.
5. Submission of typewritten lists (four copies), on or before August 15 preceding the examination, of all patients dismissed from care in all hospitals during the 12 months ending June 30 prior to the scheduled examination, and a list of 40 patients from office practice.

The candidate is personally responsible for the proper preparation, accuracy, and completeness of the case lists, which will reflect the unsupervised practice (private or nonprivate) activity following residency and fellowship.

6. On the day of the examination, the candidate will be expected to sign the following statement: "There have been no restrictions in my hospital privileges since the date of my application." Candidates who are unable to sign this statement will not be admitted

to the examination until and unless they present evidence that full and unrestricted privileges have been restored.

7. Practice that consists of ambulatory care exclusively will not be considered adequate to fulfill these requirements.

Additional requirement for candidates practicing in a country other than the United States or Canada:

8. Submission with the application of a letter(s) from a senior responsible officer in the hospital(s) where the candidate practices, verifying the candidate's responsibility for independent, unsupervised care of obstetric and gynecologic patients.

#### Limitations

Duration of active candidate status is limited. Candidates must pass the oral examination within 6 years following passing the written examination and may take the oral examination only three times. If they fail the oral examination three times, or fail to pass the oral examination within 6 years, they become ineligible to repeat the examination at that time. They must repeat and pass the written examination to become admissible to the oral examination again.

#### Determination of Qualifications

The Board will require, by confidential inquiry, documented evidence concerning a candidate's professional reputation, moral and ethical character, and in-hospital practice privileges from administrative officers of organizations and institutions to whom the candidate and his/her conduct of practice is known.

Time as a "resident" or "house officer" in excess of that necessary to fulfill the requirements to take the written examination, or time in a "student" or a teaching or research appointment that does not involve appointment to the staff of an approved hospital with unrestricted privileges to practice as an obstetrician and gynecologist, will not be acceptable evidence of a degree of responsibility for patient care that is acceptable fulfillment of the required "independent practice."

Each candidate will be required to furnish the Board with certain prescribed information concerning his/her performance in practice (maternal mortality rate, perinatal mortality rate, cesarean section rate, etc).

If a candidate is found to be involved in litigation or investigation regarding ethical or moral issues, he/she will not be scheduled for examination and the application will be reexamined. Typically, the Credentials Committee will defer such a decision for 1 year to gain further information.

Falsification of data (including case lists) or evidence of other egregious ethical, moral, or professional misbehavior may result in deferral of consideration of a candidate's application for at least 3 years, and the candidate must meet all requirements in effect at the end of the deferred period.

Patient lists (a) not providing the information requested; (b) not prepared in accordance with the format requested; or (c) that do not have sufficient numbers of patients, or do not include sufficient breadth and depth of clinical problems, may disqualify the candidate for admission to the oral examination.

#### Application for Examination in 1997

Application to take the oral examination on November 3-7, 1997, must be made on the "application for the 1997 examination" form. The application, complete in all details, with payment of the application fee of \$450, must be received in the Board office during January or February 1997. The deadline date for receipt of applications in the Board office is February 28, 1997. Requests for the appropriate form must be made in writing.

The Board will make the final decision concerning the applicant's admission to the oral examination after considering all circumstances affecting his/her situation.

A candidate ruled admissible to the oral examination in November 1997 will be so notified on or before July 15, 1997. He/she must then submit, on or before August 15, 1997:

1. Four typewritten and verified lists of all patients dismissed from his/her care in all hospitals during the 12 months preceding June 30, 1997, and a list of 40 patients from his/her office practice.

The candidate's lists of patients will be used as a basis for questions during the oral examination and will not be returned to the candidate.

2. Payment of the examination fee by personal check or money order of \$500 (in US funds).

#### Patient Lists for the Oral Examination

Each candidate for the oral examination must prepare the required patient lists for review by his/her examiners at the time of examination. The candidate's list of patients will be freely used as a basis for questions that will be patient-management oriented. Questions will be developed that test the ability of the candidate to

1. Develop a diagnosis. This includes the necessary clinical, laboratory, and diagnostic procedures;
2. Select and apply proper treatment under elective and emergency conditions;
3. Manage complications. This includes prevention, recognition, and treatment; and
4. Plan and direct follow-up and continuing care.

Carelessly prepared or incomplete case lists may contribute to failure to pass the oral examination.

The candidate should bring a duplicate patient list to the oral examination for personal reference. Do not include any information on this duplicate list that did not appear on the case lists sent to the Board office.

The case lists must have sufficient numbers and sufficient breadth and depth of clinical difficulty. They must include 40 office practice patients and a minimum of 50 patients with significant problems. The clinical problems will vary according to the nature of the candidates' practices. However, the problems must be of sufficient variety and severity to permit the evaluation of a candidate's ability to function as a consultant. Ordinarily, these lists will include patients having obstetric management and a variety of major abdominal and vaginal surgical procedures. Candidates who have successfully completed a Board-approved fellowship, and who are active candidates for certification of special qualification, may submit cases in a single specialty within obstetrics and gynecology, if they represent the breadth and depth of that specialty.

The candidate's list must include 40 office practice patients and all hospitalized patients discharged or transferred from the candidate's care during the 12 months ending June 30 of the current year, and must be mailed to the Board office on or before August 15 preceding the November examinations.

The patients listed must be only those for whom the candidate has had personal responsibility for professional management and care. Recording such professional responsibility implies that the candidate has personally controlled the medical and/or surgical management of each patient listed. In the case of partnership or group practice, the patients listed should be only those managed by the candidate.

A patient list should be accurately typed across unbound sheets of white paper 8½ by 11 inches in size. Separate lists are required for each hospital. The headings must conform in all details to and provide the information indicated by the format of the forms enclosed with the oral application. Four copies of the complete list must be submitted.

Standard nomenclature should be used. Abbreviations are not acceptable. Only English language will be acceptable.

The duplicate lists of patients will not be returned to the candidate after the examination. The candidate should bring a duplicate list to the examination.

### 1. Office Practice Patients

A list of 40 patients from the candidate's office practice should be prepared in the format accompanying the application. List separately patients who have presented with any of the following problems. List no more than four patients from any one category. Do not include any patients who appear on the hospital lists.

Preventive care and health maintenance  
 Obesity  
 Sexual dysfunction  
 Contraceptive complications  
 Psychosomatic problems  
 Genetic problems  
 Primary and secondary amenorrhea  
 Infertility  
 Endometriosis  
 Menopausal problems  
 Office surgery  
 Abnormal uterine bleeding  
 Abnormal cervical cytology  
 Pelvic pain  
 Vaginal discharge  
 Vulvar skin disease  
 Breast diseases  
 Urinary incontinence/pelvic relaxation  
 Urinary tract infections  
 Sexually transmitted diseases  
 Medical complications of pregnancy  
 Preconceptual counseling  
 Immunizations  
 Pediatric gynecology  
 Rape  
 Spousal abuse  
 Dysmenorrhea  
 Premenstrual syndrome  
 Benign pelvic masses  
 Abnormal vaginal ultrasonography  
 Abnormal fetal growth  
 Substance abuse

List each patient separately and include the problem (one of the listed categories), diagnostic procedures, treatment, results, and number of office visits during the 12-month period. Group patients together under each separate category.

### 2. Gynecology

A list of all gynecologic patients—hospitalized, ambulatory, or short-stay surgery—should be prepared in the format accompanying the application and listed in order as follows

#### I. Hospitalized patients

- a. Major operative procedures
- b. Minor operative procedures
- c. Nonsurgical admissions

#### II. Ambulatory or short-stay surgery

The preoperative diagnosis should appear for all major and minor surgical procedures. The size of ovarian cysts must be recorded. For nonsurgical conditions, the admission diagnosis should be recorded. The treatment recorded should include all surgical procedures, as well as primary nonsurgical therapy. Surgical diagnosis refers to the pathology diagnosis. For hysterectomy specimens, the uterine weight in grams must be recorded. In cases without tissue for histologic diagnosis, the final clinical diagnosis should be listed.

Days in hospital on this listing of patients, as well as on all other lists, is the arithmetic difference between date of discharge and date of admission.

The total number of uncomplicated, induced abortions of 12 or less weeks' duration should be reported simply as a total number.

Induced abortions of more than 12 weeks' (menstrual age) duration should be listed separately, indicating the duration of pregnancy and the technique employed.

Also list separately, as individual patients, all patients with complications following induced abortions, either observed or reported to you, regardless of the duration of the pregnancy when abortion was induced.

### 3. Obstetrics

A list of obstetric patients should be prepared in the format accompanying the application. List separately each patient with a complication or abnormality, as well as medical and surgical intervention during pregnancy, labor, delivery, and the puerperium. In addition, a total of the number of normal, uncomplicated obstetric patients, managed during the same 12-month period, should appear at the end of the obstetric list.

Interpretation of "normal obstetric patients" for this listing implies that

- a. Pregnancy, labor, delivery, and the puerperium were uncomplicated, and labor began spontaneously between the 37th and 42nd weeks of gestation
- b. The membranes ruptured or were ruptured after labor began
- c. Presentation was vertex, position was occiput anterior or transverse, and labor was less than 24 hours in duration
- d. Delivery was spontaneous or by outlet forceps, with or without episiotomy, from an anterior position
- e. The infant was not asphyxiated (Apgar 6 or more), of normal size, and healthy, and
- f. The placental stage was normal and blood loss was not excessive.

Deliveries not fulfilling these criteria must be listed individually. Include gestational age at admission.

### 4. Cover Sheets

Each list of patients, both gynecologic and obstetric from each hospital, should be verified as illustrated by the form accompanying the application. Note that the records librarian or other hospital official must attest that (a) the patients listed were cared for by the candidate, and (b) that all of the hospitalized patients dismissed from the candidate's care have been separately listed or reported in the totals reported for the period indicated.

### 5. Summary Sheet

Using the form provided for this purpose, prepare a summary of all cases for all hospitals combined.

#### Admission to the Oral Examination

If the examination fee has been paid and the four copies of patient lists have been submitted by August 15, 1997, the candidate will receive an authorization for admission form and a reservation card for the hotel at least 1 month prior to the examination, indicating the day, time, and place to report for the examination. Please keep us informed of your current mailing address.

#### Ruling Not Admissible

A candidate not admitted to an oral examination may subsequently reapply, but must then submit a new application, pay the application fee, and meet the requirements applicable at the time he/she reapplies.

If the candidate was disqualified because the case lists were judged insufficient for a fair examination, the new case lists will be added to those already submitted. Thus the requirement of suffi-

cient numbers, breadth, and depth in the case list makes time in practice the variable and experience the constant.

### Reexaminations

A candidate who is disqualified or who fails to pass the oral examination must reapply in order to take the examination another year by submission of a new application during January or February, with payment of the reapplication fee of \$450.

A candidate reapplying for examination will again be asked to provide verification of his/her responsibilities for patient care and will again be notified, early in July, in regard to his/her admissibility to the next examination.

A candidate accepted for reexamination must submit, on or before the August 15 prior to the examination, new case lists of patients for the 12 months preceding the June 30 prior to the oral examination.

The examination fee of \$500 is due each time a candidate receives notice that he/she can be scheduled to take the oral examination. Each reexamination will be conducted by examiners who have no knowledge of the fact or circumstances of a candidate's previous failure.

### Postponement of Oral Examination

A candidate failing to take an oral examination for which he/she had been scheduled must submit a new application during January or February of the following year, when his/her admissibility to the next examination will be determined on the basis of the candidate's professional activities as reported during the current year. Payment of the \$450 reapplication fee must accompany each reapplication.

If notified of his/her admissibility to the next oral examination, he/she must again submit, before August 15, a listing of all patients dismissed from his/her care in all hospitals during the 12 months ending June 30 prior to the oral examination, and a list of 40 patients from office practice.

### Fees

Since the fees have been computed to cover the costs of examination and administrative expense, they will not be refunded or credited. All fees must be paid in US currency. The candidate's canceled check is to be considered the receipt.

#### A. Written Examination

The application fee of \$300 must be enclosed with each application or reapplication to write the examination. The candidate will usually be notified early in April that his/her application or request has been approved, at which time the \$400 examination fee will be due. If payment of the examination fee has not been received in the Board office before May 1, the candidate will not be scheduled to write the examination in June.

No application fees will be either credited against a future application or refunded.

Examination fees may be refunded, provided candidates inform the Board office in writing prior to May 15 of their inability to write the examination.

#### B. Oral Examination

The application fee of \$450 must be enclosed with each application to take the oral examination. A candidate notified in mid-July of his/her admissibility to the oral examination in November is required to pay the \$500 examination fee before he/she will be scheduled to take the oral examination. If the examination fee has not been received in the Board office before August 15, the candidate will not be scheduled to take the examination the following November.

No application fees will be either credited against a future application or refunded.

Examination fees may be refunded, provided candidates inform the Board office in writing prior to September 30 of their inability to write the examination.

### Certificate Renewal/Voluntary Recertification

Voluntary recertification applies *only* to those diplomates whose certification occurred prior to 1986. Certificate renewal applies to those diplomates with time-limited certificates (certificates issued since 1986).

Commencing in 1996, certificate renewal/voluntary recertification will be offered in February and August. The similarity between these examinations ends, at this point. The February examination will consist of certificate renewal/voluntary recertification in obstetrics and gynecology, as well as the three subspecialties. The August examination will be certificate renewal/voluntary recertification in general obstetrics and gynecology only. Certificate renewal/voluntary recertification in the subspecialties will not be offered on the August date. An additional difference will be that the examination given in February will be offered at approximately 30 sites throughout the United States. The August examination will be administered at only one site in Dallas, TX.

Diplomates whose time-limited certificates are expiring may take the recertification exam within 2 years of the expiration date of their current certificate.

Diplomates meeting the requirements who wish to be considered for certificate renewal or voluntary recertification *must* request an application via mail or fax (214 871-1943) by September 1.

### Listings of Certified Diplomates

Each year the Board office notifies the American College of Obstetricians and Gynecologists of the names and addresses of the diplomates certified in that year. A list of the names of the most recently certified diplomates is sent also to the American Medical Association and to the American Board of Medical Specialties with the request that they be included in the next issues of (1) the *Directory of Physicians in the United States* and (2) in the *Directory of Certified Obstetrician-Gynecologists*.

After this effort to ensure initial listings of the newly certified diplomate, the Board assumes no responsibility for a diplomate's listing in subsequent issues of any directory.

### Revocation of Diploma or Certificate

Each candidate, when making application, signs an agreement regarding disqualification or revocation of his/her diploma, certificate, or other evidence of qualification for cause. Revocation may occur whenever

1. The physician shall not in fact have been eligible to receive the diploma or certificate, irrespective of whether the facts constituting such ineligibility were known to or could have been ascertained by this Board, its members, directors, examiners, officers, or agents at or before the time of issuance of such diploma or certificate.
2. Any rule governing examination for a diploma or certificate shall have been violated by the physician, but the fact of such violation shall not have been ascertained until after the issuance of his/her diploma or certificate.
3. The physician shall have violated the moral or ethical standards of the practice of medicine then accepted by organized medicine in the locality in which he/she shall be practicing and, without limitation of the foregoing, the forfeiture, revocation, or suspension of his/her license to practice medicine, or the expulsion from, or suspension from, the rights and privileges of membership in a local, regional, or national organization of his/her profes-

sional peers shall be evidence of a violation of such standards of the ethical practice of medicine.

4. The physician shall fail to comply with the rules and regulations of this Board.
5. The issuance of, or receipt by, him/her of such diploma, certificate, or other evidence of qualification shall have been contrary to or in violation of the Certificate of Incorporation or the Bylaws of this Board.
6. The physician shall have violated any of *The Ethical Considerations in the Practice of Obstetrics and Gynecology* currently published by the American College of Obstetricians and Gynecologists and adhered to by the Board.

Upon revocation of any diploma or certificate by this Board as aforesaid, the holder shall return his/her diploma or certificate and other evidence of qualification to the executive director of the Board and his/her name shall be removed from the list of certified specialists.

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Ophthalmology to ascertain whether the information below is current.)*

### Preface

Around the turn of the century the question of adequate training and testing of the qualifications of specialists was raised by a number of leaders in American ophthalmology. These discussions culminated in 1914 with the formation of a joint committee of the American Academy of Ophthalmology and Otolaryngology, the American Ophthalmological Society, and the Section on Ophthalmology of the American Medical Association to consider ophthalmic education. The report of this committee in 1915 led to the establishment of the American Board for Ophthalmic Examinations on May 8, 1916. Following the annual Academy meeting in Memphis, the Board examined eleven candidates December 13 and 14, 1916, at the University of Tennessee Medical School. The Board was incorporated May 3, 1917. The name was changed from the American Board for Ophthalmic Examinations to the American Board of Ophthalmology in 1933. This was the first American specialty board to be established, with the American Board of Otolaryngology follow-

ing in 1924 and the American Board of Obstetrics and Gynecology in 1930.

The directors of the American Board of Ophthalmology are chosen for a 4-year term. One additional 4-year term is permitted. The individuals include clinicians and academicians with specific ophthalmologic skills and a broad geographic distribution. The founding organizations, the American Academy of Ophthalmology, the American Ophthalmological Society and the American Medical Association, continue to serve as members of the corporation in an advisory capacity. The directors of the American Board of Ophthalmology are listed in *The Official American Board of Medical Specialties Directory of Board Certified Medical Specialists*, published by Marquis Who's Who. This is the authorized publication of the 24 recognized specialty Boards that certify physicians in medical and surgical specialties.

Up to January 1, 1995, the Board had conducted 185 examinations and issued its certificate to 19,717 ophthalmologists.

### Mission Statement

The mission of the American Board of Ophthalmology is to serve the public by improving the quality of ophthalmic practice through a certification process that fosters excellence and encourages continuous learning.

The intent of the certification process of the American Board of Ophthalmology is to provide assurance to the public and to the medical profession that a certified physician has successfully completed an accredited course of education in ophthalmology and an evaluation including an examination. The evaluation is designed to assess the knowledge, experience, and skills requisite to the delivery of high standards of quality patient care in ophthalmology.

It has never been the purpose of the Board to define the requirements for membership to hospital staffs or to gain special recognition or privileges for its diplomates in the practice of ophthalmology. Neither is its purpose to state who may or may not practice ophthalmology or to define the scope of ophthalmic practice. The Board does not seek to obtain special privileges for its diplomates over other qualified physicians. The certificate of the Board does not confer any academic degree, legal qualifications, privilege, or license to practice ophthalmology.

### Governing Rules and Regulations

The Board's rules and regulations, which are subject to change from time to time without notice, contain specific provisions concerning eligibility for the examinations administered by the Board; an admission appeals process, which is available under certain circumstances; the application process; the examination processes; a description of the circumstances under which an applicant will be required to reactivate an existing application, or submit a new application, or repeat part or all of an examination; a list of occurrences that could lead the Board to revoke a certificate previously issued by it to a diplomate or to place the diplomate on probation; and other matters relating to the Board's examination and certification processes. Many, but not all, of those provisions are summarized or described in this publication. In the event of any inconsistency between the Board's rules and regulations and this publication, or any omission from this publication of any provision of the rules and regulations, the rules and regulations shall govern. Copies of the rules and regulations are available upon request from the Board's executive office.

### Requirements

Many physicians write to the Board outlining their training and asking for an estimate of their qualifications and whether further training is required. The Board's requirements, as published herewith,

provide this information, and any potential applicant should be able to determine his/her status after studying these requirements. Individual officers or directors of the Board cannot and will not make such determinations. All evaluations of an applicant's status will be made by the Committee on Admissions in accordance with the Rules and Regulations of the Board, after submission of an application for examination and payment of the registration fee, which must accompany the application. Personal interviews with officers and directors of the Board should not be requested at any time.

It is the responsibility of the candidate to seek information concerning the current requirements for certification as an ophthalmologist. The Board does not assume responsibility for notifying a candidate of changing requirements or the impending loss of his/her eligibility to take an examination.

### **Educational**

All applicants must have graduated from a medical school or from a school of osteopathy.

All applicants entering ophthalmology training programs must have taken a postgraduate clinical year (PG-1) in a program in the United States accredited by the Accreditation Council for Graduate Medical Education (ACGME) or in Canada accredited by the Royal College of Physicians and Surgeons of Canada (RCPSC). The PG-1 year must comprise training in which the resident has primary responsibility for patient care in fields such as internal medicine, neurology, pediatrics, surgery, family practice, or emergency medicine. As a minimum, 6 months of this year must consist of a broad experience in direct patient care.

In addition to a PG-1 year, all applicants must have satisfactorily completed an entire formal graduated residency training program in ophthalmology of at least 36 months' duration (PG-4 or better) in either the United States accredited by the ACGME, or in Canada approved by the RCPSC. No other training, including any form of fellowship, is acceptable.

The applicant's chairman is required to verify satisfactory completion of an entire formal, graduated ophthalmology residency training program of at least 36 months' duration. When a resident's graduate education and clinical experience have been gained in more than one residency program, each chairman will be required to complete a satisfactory completion form. Less than 6 months' service in an accredited program is not acceptable as a part of the required training in ophthalmology. The chairman's verification form(s) cannot be submitted to the Board until the applicant has completed the entire residency training program.

If a program is disapproved or withdrawn during the course of a resident's training, he/she must complete the remaining required number of months of training in another accredited program.

Only those applicants who have completed their PGY-1 and entire ophthalmology training program, PGY-4 or beyond, by August 1 are eligible to apply for the written qualifying examination given in April of the following year.

### **Licensure**

#### *Graduates of United States and Canadian Medical Schools*

A person shall be eligible to apply for and to take any examination administered by the Board only if, as of the date of application and at all times thereafter through and including the date of administration of each examination of the Board taken by the person, the person has a valid and unrestricted license to practice medicine in the place or places in which the person's practice of medicine is regularly conducted in the United States, or any of its territories, or Canada, and in each other place in which the person practices or has practiced medicine and has an unexpired license. Individuals in the military will meet the valid and unrestricted licensing condition if they are on full-time active duty as a physician at a military installa-

tion in any branch of the United States armed services and submit a valid and unrestricted military medical license. Accompanying this military license must be a signed document from the individual's commanding officer stating that he/she provides medical care and treatment on the military installation solely to members of the United States services and their dependents. Information concerning the Board's rules and regulations with respect to definitions of an invalid or restricted license is available upon request from the Board's executive office.

#### *Other Medical Graduates*

An applicant may have graduated from a medical school of a country other than the United States or Canada. Graduates of foreign medical schools must have a valid and unrestricted license to practice medicine (as defined above and in the Rules and Regulations of the Board); they are also required to have a certificate from the Educational Commission for Foreign Medical Graduates (ECFMG).

#### *Applicant Disclosure Obligations*

At the time a person submits an application to the Board and at all times thereafter, the person shall have a continuing obligation to disclose promptly to the Board the existence or occurrence of any circumstances causing the person to fail to satisfy the foregoing condition of eligibility to apply for and take any examination administered by the Board. A person submitting an application to the Board shall inform the Board on, or in a written submission accompanying, the person's application or in a written submission to the Board before taking any examination administered by the Board, as the case may be, if the person's license to practice medicine in the United States, any of its territories, or Canada has previously been surrendered or not renewed upon its expiration or if the person's practice of medicine or license to practice medicine in the United States, any of its territories, or Canada has previously been revoked, restricted, conditioned, suspended, limited, qualified, or subject to the terms of probation.

### **Applications**

An applicant who wishes to be examined by the Board shall complete, sign, and file with the executive director an application on the official form then in use by the Board. The application shall be considered complete only when all supporting data required by the application, including the chairman's verification form, are also filed with the executive director. Applications can be obtained from the chairmen of accredited residency programs or from the office of the Board.

### **Written Examination Deadline**

If an applicant wishes to be considered for a written qualifying examination to be conducted in a particular year, his or her application and all supporting data, including supporting data furnished directly by others with respect to the applicant, must be postmarked between March 1 and August 1—except for the chairman's verification form, which must be postmarked on or before October 1—of the calendar year immediately preceding the calendar year in which the written qualifying examination is to be conducted. By paying a late fee, the deadline for postmarking the completed application may be extended from August 1 to September 1. No other exceptions to, or extensions of, these requirements will be made for any reason. The dates of future examinations will be announced in *Ophthalmology* and the *Journal of the American Medical Association*.

An applicant who does not receive notification from the Board of file by January 15 of the acceptance or rejection of his or her application must contact the Board office in writing to inquire about the status of the application. Failure to contact the Board office in writ-

ing by February 15 will result in such applicant's removal from the examination roster.

If a completed application and all required supporting data are not timely postmarked the application will not be valid, and the application fee shall be returned. It is best not to mail application materials just before the postmark deadline because packets are sometimes postmarked a day or two after mailing. If there is a discrepancy between a metered postmark and an official US Postal Service postmark, the latter will be considered official.

The application shall be accompanied by a check payable to the Board for the application fee. No application will be considered to be complete until the fee and all required supporting data, including a copy of your current registration to practice medicine and two recent photographs for identification at the written qualifying examination and the oral examination, have been received by the executive director.

The application form contains a pledge that explains the prohibitions regarding improper conduct before, during, and after examinations. Candidates must certify that the information they provide in their applications is true and accurate. If (1) any misrepresentation is discovered in the application, in any other information submitted to the Board, or in the identity of a person applying to take or taking the examinations; (2) any financial or other benefit is offered by a candidate to any director, officer, employee, proctor, or other agent or representative of the Board in order to obtain a right, privilege, or benefit not usually granted by the Board to similarly situated candidates; or (3) any irregular behavior during the examination, such as copying answers, sharing information, using notes, or otherwise giving or receiving aid, is discovered by observation, statistical analysis of answer sheets, or otherwise, the candidate in question shall be given written notice of the charges and an opportunity to respond in accordance with the procedures set forth in the Rules and Regulations of the Board. If the Board determines that a violation has occurred, the Board may permanently bar the person(s) involved in the violation from all future examinations, invalidate the results of prior examinations taken by the person(s), withhold or revoke the certificate of the person(s), or take other appropriate action. If sanctions are imposed pursuant to the Rules and Regulations of the Board, the Board may notify legitimately interested third parties of its action.

When the Board determines that irregular behavior has occurred during an examination, the Board will make every effort to withhold the scores of only those candidates directly implicated in the irregularity. Nevertheless, in some instances the evidence of irregularity, though sufficiently strong to cast doubt on the validity of scores, may not enable the Board to identify the specific candidates involved in the irregularity. In such circumstances, the Board may withhold the scores of candidates not directly implicated in the irregularity and, if necessary, may require those candidates to take an additional examination at a later date to ensure the validity of all scores.

The examination booklets used in the written qualifying examination and the illustrative materials and questions asked in the oral examination are copyrighted as the sole property of the Board and must not be removed by the candidate from the test area or reproduced in any way. Any reproduction, in whole or in part, of the written examination test booklet or oral examination materials and questions is a federal offense and also may subject the applicant to the sanctions listed above. No notes, textbooks, other reference materials, scratch paper, or recording devices may be taken into either the written or the oral examinations.

## Disabilities

The American Board of Ophthalmology supports the intent of the Americans with Disabilities Act (ADA) to mitigate the effects of the disability on the testing activity. To accommodate individuals with disabilities, the Board will make reasonable modifications to its examinations that do not fundamentally alter the requirements of the examination or the measurement of the skills or knowledge the Board examinations are intended to test.

A candidate for Board certification who believes that he or she is disabled within the meaning of the ADA, and who requests an examination under nonstandard conditions, shall specify on (or in a supplement submitted with) the application form the existence, the specific nature, and the extent of the disability and the specific modification requested. The candidate shall also submit, either with the timely filed application or no later than 30 days after the deadline for applying for a particular examination, all independent documentary evidence substantiating the individual's disabilities.

Documentation includes, but is not limited to

- Name, address, telephone number, and qualifications of each expert who provides a report documenting the individual's disabilities.
- Dates and locations of all assessments performed and included in the documentation.
- Copies of evaluation reports with scores or ratings for each standard instrument or assessment method used. The Board requires that this documentation be no more than 3 years old.
- A list of nonstandard instruments and assessment methods used to determine the disabilities and diagnoses.
- Any diagnoses of the individual's disabilities using standard nomenclature; ie, *International Classification of Diseases (ICD)*; American Psychiatric Association *Diagnostic and Statistical Manual (DSM)*.
- A description of the individual's functional limitations due to any disabilities.
- Reports of any past accommodations on examinations the individuals received because of the disabilities.

The Board will verify the documentation of the disability and reserves the right to have the individual independently evaluated at its own expense.

## Fees

### Written Examination

Review of application and registration for written qualifying examination, \$855, payable with application.

Review of late application and registration (after August 1 to September 1 postmark), \$1,085.

Repeat registration fee, \$620.

Late repeat registration fee (after August 1 to September 1 postmark), \$755.

### Oral Examination

Due to time constraints, there is no late filing period for oral candidates.

Registration fee, \$690, payable on successful completion of the written qualifying examination.

Repeat entire oral examination, \$690.

Repeat one subject, \$310.

Repeat two subjects, \$470.

### Cancellations

To cover administrative expenses, an additional charge equal to 50% of the original application and registration fee (or repeat registration fee) for that particular written qualifying examination or oral examination will be imposed on any applicant who cancels or fails

to keep an examination assignment, regardless of the reason. This fee is due at the time of cancellation.

Fees for accepted candidates for the written qualifying examination and the oral examination are not refundable.

The fees for examinations shall be established annually by the Board of Directors on the basis of the actual and anticipated costs of the Board in the examination of applicants and the administration of its business. The Directors of the Board serve without compensation except for reimbursement of expenses.

### Time Limit

#### New Applicants

An applicant must successfully complete the written qualifying examination and the entire oral examination by December 31 of the sixth year following completion of accredited training in ophthalmology. An applicant who has not become certified within such period and who does not currently have an approved active or inactive application on file with the Board shall have until January 23, 1999, to submit a completed application and to complete certification. Candidates failing to achieve certification within the initial 6-year period may reenter the process for one additional 6-year period by sitting for and passing a reentry examination. This reentry examination will be given in April of each year, and the first reentry examination is planned for 1997. A candidate may take this examination each year until successful. During the period when an individual is attempting to pass a reentry examination, he/she will not be considered to be scheduled for a certification examination. If a candidate passes the reentry examination but does not complete the entire certification process within the second 6-year period, the individual will not be given an opportunity to reenter the process unless he/she satisfactorily completes an accredited residency program.

#### Active/Inactive Applicants

All individuals who currently have an approved active application and all who have an approved inactive application on file with the American Board of Ophthalmology will be given 6 years from January 23, 1993, to complete certification. Candidates failing to achieve certification within the initial 6-year period may reenter the process for one additional 6-year period by sitting for and passing a reentry examination. This reentry examination will be given in April of each year, and the first reentry examination is planned for 1997. A candidate may take this examination each year until successful. During the period when an individual is attempting to pass a reentry examination, he/she will not be considered to be scheduled for a certification examination. If a candidate passes the reentry examination but does not complete the entire certification process within the second 6-year period, the individual will not be given an opportunity to reenter the process unless he/she satisfactorily completes an accredited residency program.

### Written Qualifying Examination

In order to qualify for an oral examination, each applicant must pass a written qualifying examination. The written qualifying examination consists of 250 multiple-choice questions. The purpose of the written qualifying examination is to evaluate the breadth and depth of the basic science and clinical knowledge of candidates who have satisfactorily completed an accredited program of education in ophthalmology. Candidates who successfully complete the written qualifying examination will be further evaluated in an oral examination.

The following describes aspects of the candidate's ability that are tested:

1. Recall of information
2. Understanding and application of basic knowledge
3. Relation of pathogenesis to disease process

4. Evaluation of clinical data
5. Utilization of diagnostic and therapeutic procedures
6. Anticipation and recognition of complications
7. Ethics of ophthalmic practice

Topics covered include:

1. Optics, refraction, and contact lenses
2. Retina, vitreous, and uvea
3. Neuro-ophthalmology
4. Pediatric ophthalmology
5. External disease and cornea
6. Glaucoma, cataract, and anterior segment
7. Plastic surgery and orbital diseases
8. Ophthalmic pathology

The examination has also been described in the Board's booklet entitled "Written Qualifying Examination."

The written qualifying examination is given simultaneously in designated cities in the United States in April of each year.

### Oral Examination

Upon successful completion of the written qualifying examination, applicants will be sent specific instructions for registration for the oral examination. A check payable to the Board for the amount then in effect for the oral examination must accompany the completed registration form and be forwarded to the Board office within the appropriate time frame.

#### Oral Examination Schedule

It has been the custom of the Board to hold two oral examinations a year, with candidates who have passed the April written qualifying examination assigned either to a group taking the oral examinations in the fall of that year or to a group taking the oral examinations in the spring of the following year. Candidates who pass the April 1995 written will be assigned to either the fall of 1995 oral or the spring of 1996 oral. The Board reserves the right to limit the number of candidates admitted to any scheduled examination and to designate the candidates to be examined.

#### Oral Examination Subjects

The oral examination will be divided into the subjects listed and described in the following paragraphs. All subjects are given by appointment within a half-day period utilizing a panel system. Information about the examination procedures and scheduling is sent to all candidates after they have been registered for the oral examination.

1. Optics, refraction, and visual physiology
2. Pediatric ophthalmology and strabismus
3. Neuro-ophthalmology and orbit
4. External eye and adnexa
5. Anterior segment of the eye
6. Posterior segment of the eye

In each of the oral examinations emphasis will be placed upon the following:

#### Data Acquisition

Recognition by the candidate of depicted abnormalities and diseases that affect the eye, ocular adnexa, and visual pathways. Candidates will be asked for historical information and examination data that might be obtained on a patient with a particular condition depicted or described.

#### Diagnosis

The ability of candidates to synthesize historical and physical evaluation information, along with the appropriate laboratory data to arrive at correct diagnoses and differential diagnoses.

#### Treatment

Candidates will be expected to provide a reasonable and appropriate plan for medical and/or surgical management of patients with

the conditions depicted or described and be able to discuss the prognosis and/or therapeutic complications for the particular condition.

These examinations will include developmental, dystrophic, degenerative, inflammatory, infectious, toxic, traumatic, neoplastic, and vascular diseases affecting the eye and its surrounding structures.

#### 1. Optics, Refraction, and Visual Physiology

Candidates should be familiar with the basic principles of physical and geometrical optics and the operation of standard optical instruments. They should understand the essentials of visual physiology, including visual acuity, light and dark adaptation, accommodation, and color vision. They should know the various forms of ametropia, principles and techniques of refraction, principles of lens design, and methods of correction of ametropia, including spectacles, contact lenses, intraocular lenses, and keratorefractive surgery. Candidates should be familiar with the methods for prescribing protective lenses, absorptive lenses, and aids for low vision.

#### 2. Pediatric Ophthalmology and Strabismus

Candidates should be familiar with diseases affecting the eyes of infants and children and associated systemic abnormalities. Candidates should understand the anatomy, pathology, and physiology of the neuromuscular mechanisms subserving ocular motility and binocular vision. Candidates should be familiar with the methods of examination for detection and assessment of sensory and ocular motor disorders. They should also know the clinical features, differential diagnosis, natural course, and management of the various types of comitant and noncomitant deviations. They should be familiar with the principles and complications of surgery on the extraocular muscles.

#### 3. Neuro-ophthalmology and Orbit

Candidates should know the anatomy of the orbit and the neuroanatomy of the afferent and efferent visual systems. They should understand the principles and techniques of various diagnostic procedures and be able to interpret visual field testing, visually evoked responses, ultrasonography, conventional x-ray imaging, CT scanning, and magnetic resonance imaging. Candidates should be familiar with the clinical features, pathology, differential diagnosis, and management of disorders of the orbit, visual pathways, oculomotor system, and pupillomotor pathways, including the indications for, principles of, and complications of orbital surgery.

#### 4. External Eye and Adnexa

Candidates should understand the anatomy, embryology, physiology, and pathology of the structures comprising the lacrimal system, lids, cornea, conjunctiva, and sclera. They will be expected to discuss conditions affecting these structures and provide an appropriate differential diagnosis. Candidates should also be able to describe and discuss medical and surgical treatment for diseases and abnormalities involving these tissues, including indications for and complications of surgery.

#### 5. Anterior Segment of the Eye

This examination concerns the anatomy, embryology, physiology, and pathology of abnormalities and diseases of the cornea, anterior chamber angle, iris, ciliary body, and lens.

Candidates will be expected to discuss conditions affecting these structures and those to be considered in their differential diagnosis. They should also be able to describe and provide indications for medical and surgical therapy directed toward alleviating or curing these conditions.

#### 6. Posterior Segment of the Eye

This examination concerns the anatomy, embryology, physiology, and pathology of abnormalities and diseases of the vitreous, retina, choroid, and posterior sclera.

Candidates will be expected to discuss conditions affecting these structures and those to be considered in their differential diagnosis. They should also be able to describe and provide indications for medical and surgical therapy directed toward alleviating or curing these conditions.

### Reactivation

#### Written Qualifying Examination

An applicant shall be required to reactivate his/her application for approval, and submit an additional application fee under the following circumstances, which relate to the written qualifying examination:

1. If a candidate fails to take the written qualifying examination within 24 months after notice has been sent to him/her that his/her application has been accepted
2. If a candidate does not repeat the written qualifying examination within 24 months after failing
3. If a candidate receives two consecutive failures on a written qualifying examination on the same application.

#### Oral Examination

An applicant who fails one or two subjects in an oral examination will be required to repeat these subjects. An applicant who fails three or more subjects will be required to repeat all subjects of the oral examination. An applicant who fails three or more subjects on the first repeat examination will be required to pass another written qualifying examination before being permitted to repeat the oral examination. Additional information on grading is specified in the "Rules for Grading," which is sent to all applicants at the time of their oral examination registration.

An applicant shall be required to reactivate his/her application for approval, submit an additional application fee, and pass another written qualifying examination before being admitted to the oral examination under the following circumstances:

1. If a candidate does not take the oral examination within 24 months after notice has been sent to the applicant that he/she has passed the written qualifying examination
2. If a candidate who is eligible to do so fails to repeat the oral examination within 24 months after failing all or part of such examination
3. If the candidate does not pass all subjects covered therein in three or fewer partial or complete examinations.

#### Reactivation Procedure

In order to reactivate an application, the following criteria must be met by the postmarked August 1 registration deadline:

1. File a new application
2. Submit current fee
3. Submit a copy of a current valid and unrestricted license to practice medicine in the United States, its territories, or a province of Canada (see "Licensure")
4. Submit a letter of endorsement from two certified ophthalmologists in the community.

#### Inactive Applications

When an application has not been reactivated, it is considered by the Board to have lapsed. Inquiries to the Board by outside agencies about the certification status of a physician with an inactive application will be answered by stating that said physician is not certified and is not scheduled for an examination.

## Results of Examinations

Within a reasonable time after completion of the written and/or oral examinations, the applicant shall be notified by the executive director as to the results thereof. The decision of the Board as to these results shall be final and conclusive. Grades are not subject to appeal. Because such is the case, individual directors of the Board or associate examiners should not be contacted about specific examination results. To preserve confidentiality, results of an examination will not be given over the telephone or by fax.

## Certification

An applicant who successfully passes both the written qualifying and oral examinations within the required time limitations hereinabove set forth, as determined by the Board in its sole discretion, shall be entitled to receive a certificate without further consideration of his/her qualifications by the Board. Physicians who have received the certificate are diplomates of the Board.

## Duration of Certification

Certificates issued by the Board after July 1, 1992, will be valid for a period of 10 years. Thereafter, a diplomate will be required to satisfactorily complete a designated renewal program every 10 years in order to extend the validity of his/her certificate. Certificates issued prior to July 1, 1992, are valid during the diplomate's lifetime.

## Certificate Renewal by the American Board of Ophthalmology

### Part I: Background

When certification by specialty Boards was first introduced, the purpose was to identify members of the profession who had sufficient education and knowledge that they should be equipped to practice the specialty with acceptable competence.

Recently, there has been a move toward periodic recertification. It is meant to identify members of the profession who have continued their education, keeping current in information and skills, so that they remain equipped to practice in a contemporary manner.

### Guiding Principles

1. **Primary purpose.** The primary purpose of the certificate renewal process is to promote optimum delivery of competent care by certified members of the ophthalmic profession. The process is intended to set a goal that will guide all members of the profession as they strive to keep up to date in knowledge and skills and to practice competently. Another function is to identify any who are severely wanting in professional capabilities or behavior and provide incentive and opportunity to improve. The Board is not to be viewed as responsible for discovering, correcting, and disciplining all who are unacceptable practitioners. Licensing Boards, professional societies, quality assurance committees of medical care facilities, and the legal system share in this responsibility.

The process is primarily to act as an incentive to all in the profession to do the best they can. It is thus not a competition in which an arbitrary percentage at the bottom of the scale are un-renewed. The goal is that all who are willing and able will achieve renewal. It is assumed that all who once established a rightful place in the profession by virtue of certification should be able to achieve the certificate renewal standard comfortably by simply maintaining the qualities needed to continue in the profession. The exceptions are those who have become infirm and are therefore unable to maintain certain required qualities and those who are simply unwilling to participate in the process of continued growth in the professional capabilities that they once demonstrated. Opportunity for remediation rather than exclusion from renewal certification is the mechanism for elevating

the few who have slipped below the standard of their peers. Non-renewal is the action designed to remove the rare individual who is uncorrectably wanting.

2. **Flexibility by practice.** The process is intended to take into account that individual practitioners may have developed differently in the types of patients they serve, diagnostic problems that present to them, and the therapeutic methods required by the population they serve. The process therefore will contain flexible requirements that can be modified to suit the nature of individual practices.
3. **Flexibility by individual preference.** Alternate pathways or components will also be provided to permit selection according to individual preference. For example, individual practitioners may have different means for maintaining their knowledge, or may have preference with regard to how they might like to have their continued abilities evaluated.
4. **Sequential process.** It is desirable that the process of maintaining intellectual and professional qualities be a continual process. It may therefore be appropriate, as well as most acceptable, that certificate renewal be achieved by an ongoing process. The educational and the assessment requirements of the plan would be capable of being satisfied over a period of time, with completed items accumulated until the requirement is satisfied and opportunity to repeat and strive for improvement in any element that is not accomplished satisfactorily at first.
5. **Time for remediation.** Standards need to be sufficiently high that they are meaningful, and thus sometimes might not be met on first attempt. For elements that are judged unsatisfactory, timely opportunities need to be provided for satisfactory performance. This approach is intended to make the process both palatable (no element of last-minute, one-time "pass" or "fail") and effective in its purpose (bring all up to a certain high standard, through additional work as necessary). The result should be a higher level for the profession as a whole than might have occurred without time-limited certificates and the renewal process. This is, in fact, the primary purpose.
6. **Assess certain ingredients of competence, not competence itself.** Competence is difficult to define, much less evaluate, and judgments may differ concerning an acceptable manner of delivering care. It is not intended to establish an arbitrary standard of what might or might not be judged adequate competence as an ophthalmic specialist, or to decide among various outlooks on different manners of ethically conducting a practice. It is intended only to set standards with reference to certain ingredients that are necessary for competence.

Thus the process will expect continued update of relevant knowledge and require participation in educational experience. It will expect that the educational experience has been assimilated and will document the assimilation by testing. It will expect the updated knowledge to be applied in practice. As is feasible, it may also assess whether the practice reflects a caring attitude toward patients and ethical behavior appropriate to a profession, or at least ascertain a commitment to these goals.

In the end, it is not possible to ensure that every certified individual is fully competent. The process of renewal therefore simply seeks to encourage competence and to document that the certified practitioner has exhibited some of the verifiable essential ingredients of competence. Certificate renewal does not necessarily mean that a diplomate has all the ingredients or that he or she is indeed fully competent.

We hope that the process developed from these guiding principles will not be feared by the diplomates who face a time of renewal but will be embraced by all members of the profession as a

means to dedicate themselves to the goal of maintaining the highest standards of patient care for a lifetime.

### Part II: Requirements

Certificates issued by the American Board of Ophthalmology in 1992 and thereafter will be time-limited, expiring in 10 years, and are subject to renewal. Although the first certificate renewal will not be required until the year 2002, the Board has planned the renewal process.

#### Eligibility

1. The individual must hold a time-limited certificate issued by the American Board of Ophthalmology in 1992 or thereafter. Certificate renewal can be achieved before or after the expiration date of the time-limited certificate. Renewal will be for 10 years from the date of completing the requirements or 10 years from the expiration of the previous certificate, whichever is later. (An identical or similar process to reaffirm the certification of those with lifetime certificates issued before 1992 will be made available only if the holder is required by law to be recertified and the law provides that its recertifying requirement is satisfied by such reaffirmation of certification by a specialty board.)
2. The applicant must pay an annual assessment to the American Board of Ophthalmology each year after the time-limited certificate is issued, with a delinquency fee for each annual assessment not paid on time. These annual assessments are applied toward the renewal fee due at the time of certificate renewal.
3. The applicant must hold a valid, unrestricted license to practice medicine in the United States or Canada in every jurisdiction in which the applicant practices medicine, in keeping with the American Board of Ophthalmology requirements for certification. This valid, unrestricted licensure requirement applies to the time at which knowledge assessment and review of practice requirements are conducted and also to the date on which certificate renewal is issued. Loss of valid, unrestricted licensure after certification or certificate renewal may result in loss of certification.
4. During the renewal process, the applicant must sign a statement affirming commitment to practice in an ethical manner.

#### Educational Requirements

Although exposure to an educational experience does not ensure assimilation or utilization of knowledge, a high standard of ophthalmic care cannot be rendered without an ongoing educational experience that is relevant to the individual's practice. Therefore, it is required that the candidate have an average of 50 hours per year of CME credits granted by an Accreditation Council for Continuing Medical Education (ACCME)-approved institution since the date of time-limited certification. At least 60% of the hours must be met from among category I CME activity, and the remaining 40% may be met by programs composed of category II or category I credits. (These requirements are subject to change based on revisions of ACCME classifications.) A listing of the approved educational experience will be required. The educational experience should be of a type and content appropriate to the practice of the applicant. It should include educational programs in general ophthalmology, in any subspecialty interest of the applicant, in general medicine, and in ethics and humanism. At least 250 hours of the required CME must be obtained in the 5 years prior to the date of issue of the renewed certificate.

#### Knowledge Assessment

As an encouragement to utilize continuing education resources of quality, as an encouragement for self-study, and as a verification of the effectiveness of these educational endeavors, an evaluation of knowledge is required. This requirement can be satisfied by any one of three methods:

1. Certificate Renewal Written Examination: The examination is directed toward clinically relevant new information disseminated in clinical journals and educational media during the preceding decade. The examination will consist of several parts: a general examination required of all candidates choosing this pathway and a spectrum of modules dealing with different categories of disease from which the candidate will select a specified number most relevant to his or her practice. The general and modular tests will be offered annually. They will be multiple-choice questions in an "open book" test mailed to the candidate, to be returned within a specified time. The candidate must take both the general and modular tests in any year during the 5 years prior to the date of certificate renewal. The general and modular tests may be taken annually as often as may be needed, until the required general examination and the required modular tests are passed. Or
2. Certificate Renewal Oral Examination: This will consist of Patient Management Problems (PMP), some dealing with common general ophthalmic topics and others selected to coincide with the nature of the candidate's practice. Emphasis will be on management of patients, including utilization of advances in medical knowledge within the preceding decade. Or
3. The oral examination currently being used for candidates undergoing initial certification.

To satisfy this requirement, the applicant must satisfactorily pass any one of these three examination methods during the 5 years preceding the date of certificate renewal. If a candidate fails in any one of the three examinations, the examination may be repeated as often as required, or a different option may be selected.

#### Review of Practice

All applicants will be asked to complete scan sheets from representative office records with regard to such questions as whether the exact visual disability (symptom) of a cataract patient is recorded, whether ophthalmoscopy was performed postoperatively, etc. This information will be used not only to judge the individual applicant but, importantly, also to document the frequency of certain practice habits within the profession generally. This survey will form the basis for discussion and education within the profession.

The American Board of Ophthalmology reserves the right to make office site visits to a limited number of candidates to verify the validity of the scan sheet method of reviewing office practice.

#### Identification of Practice-Type

No sooner than 5 years before the date of certificate renewal, just preceding the time when the applicant undertakes to complete the knowledge assessment and review of practice requirements, the candidate will complete an application form that includes identification of categories of patients that are seen in the applicant's practice commonly, are seen only occasionally, or are seen rarely (if ever). This information will help in the selection of modules to include in the written certificate renewal examination, in the selection of PMP modules for an oral examination relevant to the practice of the individual, and in the selection of patient types for office record review. Additionally, the applicant will submit representative patient records (with patient identification masked for confidentiality), from which will be selected cases for office record review by scan sheets.

Certain categories of clinical problems are thus excluded from assessment by virtue of being seen infrequently by the individual candidate. However, the renewal certificate will not indicate a limitation of the scope of certification by virtue of the fact that certain disease categories were excluded. Neither will the certificate indicate subspecialization by virtue of a limited type of practice. The renewal certificate for all successful applicants will be identi-

cal, and the characterization of practice in the application is only for the purpose of guiding the mechanism for certificate renewal.

### Synopsis of Certificate Renewal

Along with eligibility requirements, completion of requirements in each of four areas is necessary:

1. **Licensure:** A candidate must possess and maintain a valid and unrestricted license to participate in the renewal process. During periods of discontinuity of unrestricted licensure, no participation in knowledge assessment or practice review is permitted or credited.
2. **Continuing Medical Education:** An average of 50 ACCME-approved credit hours per year relevant to the diplomate's practice is required, with a minimum of 60% in category I. A minimum of 50% of the 500 hours must be achieved in the 5 years prior to the renewal date.
3. **Knowledge Assessment:** Any one of the following three methods satisfies this requirement: certificate renewal written examination ("take home"); certificate renewal patient management problem (PMP) oral examination; certification oral examination.
4. **Practice Assessment:** An office record scan review will be required.  
Licensure + CME + office record review + one of these 3 alternatives:  
Certificate renewal written exam (or)  
Certificate renewal PMP oral exam (or)  
Certifying oral exam.

All diplomates holding a time-limited certificate will be required to pay an annual nonrefundable assessment of \$100 to the American Board of Ophthalmology. These annual assessments are applied toward the renewal fee due at the time of certificate renewal and will be used to offset the cost of developing and administering time-limited certification. A 10% per annum penalty will be assessed on unpaid fees.

### Disciplinary Sanctions

The Board shall have the authority to impose disciplinary sanctions upon a candidate or a diplomate for any of the following reasons:

1. Violation of Rules and Regulations of the Board relating to the written qualifying and oral examinations and applications to take the examinations
2. Issuance of a certificate contrary to or in violation of the Rules and Regulations of the Board
3. Ineligibility of the person to whom the certificate was issued to receive the certificate
4. Substantial misstatement or omission of a material fact to the Board in an application or in any other information submitted to the Board
5. Presenting or distributing, or aiding or assisting another person(s) to present or distribute, a forged document or other written instrument purporting to have been issued by or under the authority of the Board to evidence that a candidate, diplomate, or any other person(s) is currently or was previously certified by the Board, when that is not the case, or claiming orally or in writing, or assisting another person(s) to claim, that a candidate, diplomate, or any other person(s) is currently or was previously certified by the Board, when that is not the case
6. Revocation of the licenses to practice of a person to whom a certificate was issued.

### Statements of Eligibility

The Board does not issue statements of "eligibility" for its examinations. The only information the Board will divulge is whether a physician is or is not certified or is or is not scheduled for an examination.

### American Board of Medical Specialties

The American Board of Medical Specialties (ABMS) was established in 1933 to serve in an advisory capacity to the American specialty boards and to cooperate with organizations that seek its advice concerning the certification of medical specialists. The American Board of Ophthalmology is officially recognized by the ABMS, and contributes an annual fee of \$2,000, in addition to a per capita fee for each diplomate certified, to the American Board of Medical Specialties, as do all other medical specialty boards in support of the activities of the ABMS.

The American Board of Ophthalmology provides an annual listing of new diplomates for inclusion in the *Official American Board of Medical Specialties Directory of Board Certified Medical Specialists* and in the *Official ABMS Directory of Board Certified Ophthalmologists*. Both are published by Marquis Who's Who. Each diplomate will be contacted directly for biographical information and to update information every year.

### Associate Examiners

All associate examiners are informed by the Board that they shall not promote, or permit others to promote, their participation in commercial or educational activities under circumstances that exploit, or might be perceived to exploit, their familiarity with examinations administered by the American Board of Ophthalmology or otherwise compromise the integrity of those examinations.

## American Board of Orthopaedic Surgery

Neil E Green, MD, President, Nashville, Tennessee  
Joseph A Buckwalter, MD, President-Elect, Iowa City, Iowa  
Donald C Ferlic, MD, Secretary, Denver, Colorado  
Harold M Dick, MD, Treasurer, New York, New York

### Directors

Richard I Burton, MD, Rochester, New York  
Robert H Cofield, MD, Rochester, Minnesota

Robert Poss, MD, Boston, Massachusetts  
Michael A Simon, MD, Chicago, Illinois  
James H Van Olst, MD, Corvallis, Oregon  
Andrew J Weiland, MD, New York, New York

### Senior Directors

James H Herndon, MD, Pittsburgh, Pennsylvania  
Robert E Leach, MD, Waltham, Massachusetts  
Gordon B McFarland, Jr, MD, New Orleans, Louisiana  
John A Murray, MD, Houston, Texas  
Dan M Spengler, MD, Nashville, Tennessee  
G Paul DeRosa, MD, Executive Director, Chapel Hill, North Carolina

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Orthopaedic Surgery [ABOS] to ascertain whether the information below is current.)*

### I. Introduction

#### A. Definition

Orthopaedic surgery is the medical specialty that includes the preservation, investigation, and restoration of the form and function of the extremities, spine, and associated structures by medical, surgical, and physical methods.

**B. Purpose**

The American Board of Orthopaedic Surgery, Inc, was founded in 1934 as a private, voluntary, nonprofit, autonomous organization. It exists to serve the best interest of the public and of the medical profession by establishing educational standards for orthopaedic residents and by evaluating the initial and continuing qualifications and competence of orthopaedic surgeons. For this purpose, the Board reviews the credentials and practices of voluntary candidates and issues certificates as appropriate. It defines minimum educational requirements in the specialty, stimulates graduate medical education and continuing medical education, and aids in the evaluation of educational facilities and programs.

The Board does not confer any rights on its diplomates, nor does it purport to direct licensed physicians in any way in the conduct of their professional duties or lives. It is neither the intent nor the purpose of the Board to define requirements for membership in any organization or for staff privileges at any hospital.

**C. Directors**

The directors of the ABOS are elected from diplomates of the Board who are nominated by the American Orthopaedic Association, the American Medical Association, and the American Academy of Orthopaedic Surgeons. They serve without salary.

**D. Organization**

Directors of the Board elect a president, president-elect, secretary, and treasurer annually. An executive director, who is a diplomate, serves as an ex officio director of the Board. The president appoints directors to serve on standing committees on credentials, examinations, finance, graduate education, and research. Other committees may be formed as deemed necessary. The Board holds regularly scheduled meetings yearly.

**E. Directory**

A current directory of certified orthopaedic surgeons is maintained and published by the Board. The names of diplomates also appear in the *Official ABMS Directory of Board Certified Medical Specialists*.

**II. General Statement of Educational Goal for Orthopaedic Surgery**

The goal of orthopaedic education is to prepare orthopaedic residents to be competent and ethical practitioners of orthopaedic surgery. In fulfillment of this goal, applicants for certification must have received through orthopaedic residency

- A. Education in the entire field of orthopaedic surgery, including inpatient and outpatient diagnosis and care as well as operative and nonoperative management and rehabilitation.
- B. The opportunity to develop, through experience, the necessary cognitive, technical, interpersonal, teaching, and research skills.
- C. The opportunity to create new knowledge and to become skilled in the critical evaluation of information.
- D. Education in the recognition and management of basic medical and surgical problems.
- E. An evaluation of ethical performance.

**III. Minimum Educational Requirements for Board Certification**

The Board has established the following minimum educational requirements for certification. These requirements should not be interpreted as restricting programs to minimum standards.

Throughout these rules, the term "accredited" denotes accredited by the Accreditation Council for Graduate Medical Education (ACGME).

**A. Exception to Requirements**

These educational requirements shall apply to all residents who began their first year of accredited orthopaedic surgery residency on or after January 1, 1985, with the following exception:

1. Residents in programs providing only 3 years of orthopaedic education may receive credit for 2 years of accredited nonorthopaedic clinical education if they entered the orthopaedic program before January 1, 1989.
2. This exception is available only to residents enrolled in a 3-year orthopaedic program that has specifically requested the Board to make its residents eligible for this exception and has presented the Board with a plan for implementing a 4-year program. The deadline for receiving such a plan was December 31, 1985.
3. Residents entering orthopaedic residency programs structured for 4 or 5 years may receive credit for 1 but not 2 years of accredited nonorthopaedic clinical education.

**B. Time Requirements**

1. Five years (60 months) of accredited postdoctoral residency are required.
2. Four of these years (48 months) must be served in a program with a curriculum that is determined by the director of an accredited orthopaedic surgery residency.
  - a. Three of these years (36 months) must be served in an accredited orthopaedic surgery residency program.
  - b. One year (12 months) may be served in an accredited graduate medical educational program with educational content determined by the director of an accredited orthopaedic surgery residency program.
3. Each program may develop individual sick and vacation times for the resident in accordance with overall institutional policy. However, 1 year of credit must include at least 46 weeks in full-time orthopaedic education. Vacation or leave time may not be accumulated to reduce the 5-year requirement.
4. Program directors may retain a resident for as long as needed beyond the minimum required time to ensure the necessary degree of competence in orthopaedic surgery. According to the current Special Requirements of the Residency Review Committee (RRC) for Orthopaedic Surgery, the committee must be notified of such retention. This information must also be provided to the Board on the Record of Residency Assignment form.

**C. Content Requirements**

1. General Requirements
 

A minimum of 9 months during the first year of graduate medical education must be broadly based in clinical services other than orthopaedics. This requirement may be fulfilled by a year of accredited residency in any broadly based program involving patient care.
2. Orthopaedic Requirements
  - a. Minimum distribution. Orthopaedic education must be broadly representative of the entire field of orthopaedic surgery. The minimum distribution of educational experience must include
    1. Twelve months of adult orthopaedics
    2. Twelve months of fractures/trauma
    3. Six months of children's orthopaedics
    4. Six months of basic science and/or clinical specialties

Experience may be received in two or more subject areas concurrently. Concurrent or integrated programs may allocate time by proportion of experience.
  - b. Scope. Orthopaedic education must provide experience with all of the following:
    1. Children's orthopaedics. The educational experience in children's orthopaedics must be obtained in an accredited position in the specific residency program in which the resident

is enrolled or in a children's hospital in an assigned accredited residency position.

2. Anatomic areas. All aspects of diagnosis and care of disorders affecting the bones, joints, and soft tissues of the upper and lower extremities, including the hand and foot; the entire spine, specifically including intervertebral discs; and the bony pelvis.
  3. Acute and chronic care. Diagnosis and care, both operative and nonoperative, of acute trauma (including athletic injuries), infectious disease, neurovascular impairment, and chronic orthopaedic problems including reconstructive surgery, neuromuscular disease, metabolic bone disease, benign and malignant tumors, and rehabilitation.
  4. Related clinical subjects. Musculoskeletal imaging procedures, use and interpretation of clinical laboratory tests, prosthetics, orthotics, physical modalities and exercises, and neurological and rheumatological disorders.
  5. Research. Exposure to clinical and/or laboratory research.
  6. Basic science. Instruction in anatomy, biochemistry, biomaterials, biomechanics, microbiology, pathology, pharmacology, physiology, and other basic sciences related to orthopaedic surgery. The resident must have the opportunity to apply these basic sciences to all phases of orthopaedic surgery.
- c. Options. Twelve months of the 4 required years under the direction of the orthopaedic surgery residency program director may be spent on services consisting partially or entirely of
1. Additional experience in general adult or children's orthopaedics or fractures/trauma
  2. An orthopaedic clinical specialty
  3. Orthopaedics-related research
  4. Experience in an accredited graduate medical educational program with educational content preapproved by the director of the orthopaedic surgery residency program.

#### D. Accreditation Requirements

1. The educational experience in orthopaedic surgery obtained in the United States must be in an approved position in programs accredited by the RRC for Orthopaedic Surgery and by the ACGME.  
All other clinical education obtained in the United States must be in programs accredited by the ACGME and the appropriate RRC. The *Graduate Medical Education Directory* of graduate medical education programs accredited by the ACGME, published annually by the American Medical Association, 515 N State St, Chicago, IL 60610, lists accredited rotations of 6 months or longer.
2. During the 5 years of accredited residency, a total period of no more than 6 months may be served in unaccredited institutions.
3. Credit for time spent in residency education will be granted only for the period during which the residency program is accredited, and only for time served in an approved position within an accredited program.
4. If an orthopaedic residency program has its accreditation withdrawn by the RRC for Orthopaedic Surgery and the ACGME, no educational credit will be granted past the effective date of withdrawal of accreditation.
5. Educational credit may be granted for clinical experience in the United States military and/or public health services if the experience is accepted by the director of the orthopaedic surgery residency program that the applicant enters. Up to 1 month of credit may be granted for 2 months of clinical experience, not to exceed 12 months of credit. Credit earned in this manner is subject to approval by the Board's Credentials Committee. This approval should be sought prior to entry into the program.

6. Educational experience obtained in Canada must be on services approved by the Royal College of Physicians and Surgeons of Canada and must extend over a minimum of 5 years. The content requirements outlined in III.C must be met.
7. The Board does not grant credit for foreign educational experience, other than as permitted in III.D.2 and III.D.6.
8. The term "fellow" is not synonymous with the term "resident" for the purpose of obtaining Board credit for educational experience. A resident is an individual enrolled in an approved position in an accredited educational program.

#### E. Achievement Requirements

1. The director of the program providing general graduate medical education must certify the satisfactory completion of that segment of education.
2. In orthopaedic surgery residency programs, the program director must certify the satisfactory completion of each rotation for which credit is awarded. (See III.G.)
3. The program director responsible for the final year of the resident's education must certify that the resident has achieved a satisfactory level of competence and is qualified for the certifying process.
4. The certification referred to in 2 and 3 above must be made on the appropriate Record of Residency Assignments form and must be countersigned by the resident.
5. Medical practice activity outside of residency duties must not be allowed to interfere with the educational experience. Residents may not engage in such activities without the specific prior approval of the program director. Approval must be based on the judgment that rotations are being completed without compromise and that the circumstances of the resident warrant such activity.

#### F. Continuity Requirements

The resident should have progressively increasing patient care responsibility. A part-time or piecemeal approach to residency requirements is discouraged. The final 24 months of orthopaedic residency education must be obtained in a single orthopaedic residency program unless prior approval of the Credentials Committee is obtained.

#### G. Documentation Requirements

1. For orthopaedic education obtained in the United States, the program director must provide the Board with yearly documentation during the residency. Each June, directors will receive two computer diskettes containing Record of Residency Assignment forms on which the required information will be recorded. The appropriate forms are to be printed after the data have been entered, then signed by the program director and the resident. The printed, signed forms and the diskettes are to be returned to the Board office within 30 days of the end of the academic year.
2. The Record of Residency Assignment forms are to be completed for each resident as follows:
  - a. Form 1 will be submitted the year the resident enters the program.
  - b. Form 1-A must be provided for residents receiving educational credit in a nonorthopaedic ACGME-accredited program and for nonorthopaedic education received within the ACGME-accredited orthopaedic residency.
  - c. Form 2-A must be completed yearly for each resident in the orthopaedic program. It must indicate the content and time spent on rotations, information on any unaccredited rotations, and whether credit was granted for a full year.
  - d. Form 3 is the final evaluation form.
3. The computer diskettes and printed, signed forms are due in the Board office within 30 days of completion of the academic year.

Part I examination results for candidates who take the examination in the same year they complete their residencies will not be mailed either to the candidates or to the program directors until the diskettes and forms have been received in the Board office.

4. When a resident leaves a program prematurely, the program director must notify the Board office in writing within 30 days. The letter must record the reasons for leaving and confirm credit granted for rotations during the academic year in which the resident left. At the end of the academic year, Form 2-A and Form 3 must be completed.
5. Before a resident enters a new program, the new program director must obtain copies of the resident's Record of Residency Assignments forms from the Board office and review them thoroughly in order to develop an appropriate individual program that will meet the minimum educational requirements and include progressively increasing responsibility.

#### IV. Requirements for Taking the Certifying Examination

The certifying examination is divided into two parts. Part I is a written examination that may be taken at any time after the completion of the educational requirements. Part II is an oral examination that may be taken after passing Part I, completion of the practice requirement, evaluation of the applicant's practice, and admission to the examination. A candidate must pass both parts of the certifying examination to be certified.

After taking and passing the written examination, candidates have 5 years to take or retake the oral examination. Candidates who do not pass the oral examination within those 5 years must retake and re-pass the written examination before applying to take the oral examination. Time spent in fellowship education after passing Part I will not count as a part of the 5-year time limit.

An applicant seeking certification by the ABOS must satisfy the educational requirements that were in effect when he or she first enrolled in an accredited orthopaedic residency. For all other requirements, an applicant must meet the specifications in effect at the time of application.

##### A. Educational Requirements

1. An applicant must satisfactorily complete and document the minimum educational requirements in effect when he or she first enrolled in an accredited orthopaedic residency.
2. Upon successful completion of 54 months of the 60 months of required education and upon the recommendation of the program director, a candidate may apply to take Part I of the examination.
3. In order to be admitted to the examination, the candidate must complete the full 60 months of required education.
4. An applicant who has received orthopaedic surgery residency education in Canada must have fulfilled the requirements of the ABOS and must have passed the qualifying examination in orthopaedic surgery of the Royal College of Physicians and Surgeons of Canada before applying for either part of the Board's certifying examination.

##### B. License Requirement

Applicants who are in practice at the time they apply for Part I and all applicants for Part II must either possess a full and unrestricted license to practice medicine in the United States or Canada or be engaged in full-time practice in the US federal government, for which licensure is not required. An applicant will be rendered ineligible for any part of the certifying examination by limitation, suspension, or termination of any right associated with the practice of medicine in any state, province, or country due to a violation of a medical practice act or other statute or governmental regulation; to

disciplinary action by any medical licensing authority; or to voluntary surrender while under investigation.

##### C. Practice Requirements

1. The applicant must be continuously and actively engaged in the practice of operative orthopaedic surgery other than as a resident or fellow (or equivalent) for at least 22 full months immediately prior to the Part II examination. An applicant who interrupts the 22 months of practice with a fellowship can count the months of practice that preceded the fellowship as part of the 22-month requirement.
2. The applicant must be in one practice location for a minimum of 12 consecutive months during the required 22-month period. A change in location, type of hospital practice, or practice association may result in deferral. The practice must be located in the United States or its territories, Canada, or a US service installation.
3. The practice must include hospital admitting and surgical privileges in effect at the time of application for the examination and at the time of examination.
4. The applicant must demonstrate professional competence and adherence to acceptable ethical and professional standards. The practice must allow independent decision making in matters of patient care.
5. A reduction, restriction, suspension, termination, or resignation at the request of a hospital of all or any portion of an applicant's surgical staff privileges, or pending action to do so, will normally result in a deferral until such action is finally resolved and the applicant's practice has stabilized sufficiently for it to be evaluated.
6. An applicant in the US uniformed services may satisfy the practice requirement if assigned as an orthopaedic surgeon for at least 22 full months prior to the date of the Part II examination. The applicant must submit a letter from his or her immediate supervisor evaluating his or her capability in the practice of orthopaedic surgery, as well as any other documentation the Credentials Committee may require to demonstrate professional competence and adherence to acceptable ethical and professional standards.

##### D. Evaluation of Applicant

1. Individuals who do not engage in traditional orthopaedic surgery cannot be adequately evaluated for the Part II examination and will not be certified.
2. Qualifications for taking the Part II examination will be determined by the Credentials Committee after review of the application, letters of recommendation, and other relevant information.
3. It is the responsibility of the applicant to provide the information on which the Credentials Committee bases its evaluation of the qualifications of the applicant. This responsibility extends to information that the Credentials Committee requests from other persons. If the Credentials Committee does not receive requested information from the applicant, a program director, a reference, a hospital representative, or another source by February 1, the Board will notify the applicant and defer the decision on admission to the examination until the information is received.
4. Representatives of the Board may visit the site of an applicant's practice if the Credentials Committee believes that this is necessary for adequate evaluation of the applicant's work.

##### V. Impaired Physicians

###### A. Chemical Dependency

Applicants who have a history of chemical dependency will not be admitted to either Part I or Part II of the certifying examination unless they present evidence from the appropriate agencies, hospitals, and physicians demonstrating to the Board that they both (1) have

satisfactorily completed the program of treatment prescribed for their condition and (2) have been drug-free for a period sufficient to indicate recovery (normally, at least 3 years). This documentation must accompany the completed application form. The maintenance of any such applicant's certification may be conditional upon periodic drug testing. In addition, any such applicants for Part II of the examination may be site-visited at their practices by representatives of the Board, as described in IV.D.4.

### B. Mental and Physical Impairment

Applicants who have a mental or physical impairment that could affect their ability to practice orthopaedic surgery will not be admitted to either Part I or Part II of the certifying examination unless they present medical evidence from the appropriate physicians, treatment centers, and hospitals demonstrating to the Board that the impairment does not compromise their ability to render safe and effective care to their patients. This documentation must accompany the completed application form. In addition, any such applicants for Part II of the examination may be site-visited at their practices by representatives of the Board, as described in IV.D.4.

## VI. Procedure for Application for Part I and Part II of the Certifying Examination

### A. Application Dates and Requests

1. The dates, locations, and application deadlines for Part I and Part II of the certifying examination are announced in the *Journal of Bone and Joint Surgery*. Examination dates may be changed at the discretion of the Board. Confirmation of published examination dates can be obtained from the Board's office.
2. All applications must be requested in writing.

### B. Application Deadlines

1. Part I. A completed application on an original form provided by the Board for Part I must be postmarked by registered mail on or before March 1 of the year of the examination. The application must be accompanied by a nonrefundable examination fee of \$750.
2. Part II. A completed application on an original form provided by the Board for Part II must be postmarked by registered mail on or before October 31 of the year preceding the examination. The application must be accompanied by a nonrefundable application and credentialing fee of \$875.
3. Late or incomplete applications. Applications postmarked after the deadlines for Part I or Part II of the certifying examination and applications received incomplete will be returned to the applicant together with the fee check.
  - a. If a Part I applicant wishes to resubmit the Part I application by registered mail postmarked on or before March 31, the nonrefundable examination fee of \$750 and a nonrefundable late fee of \$250 must be enclosed.
  - b. If a Part II applicant wishes to resubmit the Part II application by registered mail postmarked on or before November 30, the nonrefundable application and credentialing fee of \$875 and a nonrefundable late fee of \$250 must be enclosed.
  - c. No applications will be accepted after the final deadlines.

### C. Notifying the Board of Application Changes

1. It is the responsibility of all applicants to notify the Board office of any change of address, practice association, or hospital affiliation.
2. If a Part II applicant changes practice location or practice association or acquires new hospital staff affiliations, new references will be solicited by the Board.
3. An applicant is also required to notify the Board of the denial of any request for hospital privileges; of any action to restrict, sus-

pend, or terminate all or any portion of surgical staff privileges; of any request by a hospital to resign all or any portion of surgical staff privileges; and of any action by a governmental agency that would result in the restriction, suspension, or probation of the applicant's license or any right associated with the practice of medicine.

### D. Notifying the Applicant of Examination Admission

1. For Part I, the applicant will receive examination information, an assigned examination number, and an admission card not later than 30 days prior to the examination date.
2. For Part II, the decision of the Credentials Committee is mailed to the applicant not later than 60 days prior to the examination date.

### E. Fees

1. For Part I, the nonrefundable examination fee of \$750 must be submitted with the application form.
2. For Part II:
  - a. The nonrefundable application and credentialing fee of \$875 must be submitted with the application form.
  - b. The candidate must also submit an examination fee of \$750 on or before the April date specified in the letter of notification of admission to the examination. This fee will be forfeited if the candidate fails to appear for the examination or cancels after being scheduled.
3. There will be a \$50 charge levied for any application or examination fee check that is returned not paid by the Board's bank.
4. The fees paid to the American Board of Orthopaedic Surgery, Inc, are not tax-deductible as charitable contributions, but may be deductible under some other provision of the Internal Revenue Service code.

### Fees

Part I examination fee—\$750

Part II application and credentialing fee—\$875

Part II examination fee—\$750

Late fee—\$250

Returned check service charge—\$50

### F. Practice-Based Oral Requirements

The Part II examination includes a standardized portion and a practice-based portion. The purpose of the practice-based portion is to evaluate a candidate's own practice as broadly as possible. This exercise will be conducted much as rounds or conferences are during residency, with the candidate presenting his or her cases and responding to the examiner's questions and comments.

1. Case selection process: The Board will select 15 cases from the applicant's 6-month case list(s) from which the applicant will then select ten cases to bring to the examination for detailed presentation.
 

The case selection process involves the following steps. Applicants are urged to attend to details and follow procedures carefully and exactly in order to ensure admission to the examination.

  - a. Case collection: The applicant is to collect all operative cases, including same-day surgery, for which he or she was the responsible operating surgeon for 6 consecutive months beginning July 1 of the year before the Part II examination. If time is taken off during those 6 months, the starting point for the collection period must be backed up by the amount of time missed. For example, case collection for an applicant who took a 2-week vacation in August would begin mid-June.
 

All cases must be collected from each hospital or surgery center at which the applicant has operated during the 6-month period.
  - b. Case lists: Once all cases have been collected, a separate list must be prepared for each hospital or surgery center using

forms provided by the Board. Use only these forms. All information must be typed.

1. Cases are to be grouped according to the ten general categories listed in F.1.c and recorded chronologically within each category. A separate, complete list containing a minimum of ten pages, one for each category, must be prepared for each hospital or surgery center.
  2. For each case, information provided must include patient name or initials, unit or hospital number, sex, age, diagnosis, treatment or surgical procedure, length of follow-up, and outcome, including complications.
  3. The first pages of each category for each case list must be certified by the hospital administrator or director of medical records. This means a total of 10 certifications for each location. If no cases are reported for a category, indicate "No cases in this category" on the category sheet, complete the certifications, and include the sheet with the case list.
  4. Again, it is imperative that all cases be listed, each under the single most appropriate category, and that each case list contain at least one page for each category.
- c. Case categories: Regardless of how specialized or general an individual's practice may be, it should be possible for all applicants to use these general categories to group their surgical cases:
1. Incision. Includes such procedures as arthrotomy with exploration, soft tissue biopsy, superficial abscess drainage, removal of calcific deposits, etc.
  2. Excision. Includes such procedures as synovectomy, meniscectomy, sequestrectomy, excision of tumors of bone and soft tissue, etc.
  3. Introduction or Removal. Foreign body removal, injections of steroids, antibiotics, etc.
  4. Repair, Revision, or Reconstruction. Includes arthroplasty, osteotomy, tenodesis, capsulorrhaphy, repair of nonunion with or without bone graft, etc.
  5. Fracture and/or dislocation. Includes open reduction and/or internal fixation of fractures and dislocations, closed reductions of fractures and dislocations, etc.
  6. Manipulation of a knee or shoulder, etc, under anesthesia.
  7. Arthrodesis. All techniques.
  8. Amputation. Any level.
  9. Miscellaneous. Any surgical procedure that does not fit into any of the categories listed.
  10. Complications. Systemic complications occurring in the perioperative period up to 6 weeks postoperatively, such as pulmonary embolus, cardiac abnormalities, abdominal problems such as ileus, stress ulcer, cerebrovascular accident, and urinary difficulties. Local complications, such as wound infection, failure of fixation, dislocation of a total joint arthroplasty, skin slough, compartment syndrome, neurologic and/or vascular impairment, etc, related to a surgical procedure.
- d. Common categorization questions
1. If a case listed in one of the first nine categories incurs a complication, indicate that the case also appears in the complications category by making a notation in the "Length of Follow-up and Outcome" column. Then list the complication in category 10.
  2. Arthroscopic procedures that do not fit into categories one through eight should be listed in category nine.
- e. Submission and selection of cases
1. The applicant must send the original and one copy of his or her complete case lists to the Board by registered mail on or before January 31 of the year of the examination. Remem-

ber that these must be on the forms provided by the Board, and that each list must contain a minimum of 10 pages, one for each category.

Before mailing, the applicant should make an additional copy of all lists for his or her files. Copies must also be brought to the exam. (See 2.a.2. below.)

2. The Board will select 15 cases, a list of which will be sent to the applicant. The applicant will then choose any 10 of these 15 cases to present in detail at the examination.
2. Examination materials: Once the candidate has received the Board's list of 15 cases, he or she must gather all of the following to bring to the examination:
- a. Lists
    1. Three copies of the list of 15 cases selected by the Board.
    2. Three copies of the complete 6-month case lists, one for each hospital or surgery center. All of the 10 cases selected by the candidate for presentation should be circled in red or highlighted wherever they appear on the case lists.
  - b. Documentation for the 10 cases selected by the candidate for presentation, including
    1. Images. The pertinent preoperative, intraoperative, or immediate postoperative and most recent follow-up x-rays for each case selected by the candidate for presentation. Before the examination begins, x-rays should be arranged in order of presentation and clearly marked in terms of date pre- and postoperative. Pertinent images in CT and MRI panels must also be marked.
    2. Notes. Copies of admission and discharge notes, operative notes, office notes, and any other patient chart material that will aid in case presentation.
    3. Video prints or photographic prints for arthroscopy cases selected, showing the initial lesion(s) and the lesion(s) after treatment.
    4. For any selected case that is a complication, copies of consultations and x-rays pertinent to the complication and its treatment.
  - c. Because the examination is to be anonymous, the candidate should obliterate his or her name wherever it appears on any material brought to the examination, including the 6-month case list(s) and the Board's list of 15 selected cases.
3. Although the examiners will concentrate on cases brought for presentation, they may ask questions pertaining to a candidate's case lists or practice. The candidate should not be concerned if all material brought to the examination is not covered. Discussion may focus on one area, or candidate and examiners may become involved in a few cases in such detail that time will not allow presentation of all patients. The candidate will not be penalized for this during the grading.
4. Applicants who have questions about materials and procedure for the practice-based oral portion of the Part II examination should call or write the Board office well before the exam. Failure to comply with the steps outlined may invalidate an examination.

## VII. Falsified Information and Irregular Behavior

- A. If it is determined that an applicant has falsified information on the application form or failed to provide material information, the applicant will not be considered for either part of the examination not already passed and must wait 3 years before being allowed to file a new application. The applicant will not be considered for admission to either part of the examination during this 3-year period.
- B. Examination applicants should understand that the following may be sufficient cause to bar them from future examinations, to terminate participation in the examination, to invalidate the re-

sults of an examination, to withhold or revoke scores or certificates, or to take other appropriate action:

1. The giving or receiving of aid in the examination, as evidenced either by observation or by statistical analysis of incorrect answers of one or more participants in the examination.
  2. The unauthorized possession, reproduction, or disclosure of any materials, including, but not limited to, examination questions or answers, before, during, or after the examination.
  3. The offering of any benefit to any agent of the Board in return for any right, privilege, or benefit that is not usually granted by the Board to other similarly situated candidates or persons.
- C. The following are examples of behavior considered to be irregular and cause for invalidation of the examination or imposition of a penalty:
1. Referring to books, notes, or other devices at any time during the examination. This prohibited material includes written information or information transferred by electronic, acoustical, or other means.
  2. Any transfer of information or signals between candidates during the test. This prohibition includes any transfer of information between the candidate and any other person at any time during the testing period, including bathroom breaks.
  3. Any appearance of looking at the answer sheet or the examination booklet of another candidate during the examination.
  4. Allowing another candidate to view one's answer sheet or examination booklet or otherwise assisting another candidate in the examination.
  5. Taking any examination material outside the examination room. All examination materials are the property of the Board and must be left in the room at the end of the examination.
- D. Applicants should also understand that the Board may or may not require a candidate to retake one or more portions of the examination if presented with sufficient evidence that the security of the examination has been compromised, notwithstanding the absence of any evidence of a candidate's personal involvement in such activities.

## VIII. Credentials Decisions

### A. Determining Admission to Examinations

1. The Credentials Committee meets at least once each year to consider applications for the examinations. At this meeting, a decision about each applicant will be made to approve admission to the next examination, to deny admission, or to defer decision pending further evaluation.
2. A decision approving admission to an examination applies only until the next available examination and does not carry over from one examination until the next. A new application is required for each examination.

### B. Deferral of Admission Decision

A decision on an applicant's admission to either Part I or Part II of the examination may be deferred if information is insufficient for the Credentials Committee to make a judgment.

Typically, the committee will defer such a decision for 1 year to gain further information. If information is still insufficient, the decision will be deferred for a second year to enable representatives of the Board to conduct a site visit as described in IV.D.4. A deferral of not more than 2 consecutive years is not viewed by the Board as an adverse action; thus, no appeal from a decision of the Credentials Committee is permitted unless an applicant has been denied admission or has been deferred for more than 2 consecutive years.

### C. Appeal of Admission Decision

An applicant denied admission to the examination will be informed of the basis for such action and may request a hearing by an appeals committee of the ABOS. (See XII.)

## IX. Certification and Recertification by the American Board of Orthopaedic Surgery

### A. Awarding Certificates

The ABOS awards a certificate to a candidate who specializes in orthopaedic surgery, has met the educational requirements of the Board, has demonstrated competence in orthopaedic surgery and adherence to ethical and professional standards, and has passed both parts of the certifying examination. Certificates awarded after 1985 are valid for 10 years. This portion of the Board's responsibility is discharged by issuance of a certificate to an individual found qualified as of the date of certification.

### B. Certificate Revocation

A certificate may be revoked prior to its expiration date because of intentional and substantive misrepresentation to the Board of the applicant's education and other requirements for admission to either part of the examination. Early revocation may also occur because of limitation, suspension, or termination of the right to practice medicine in any state, province, or country due to a violation of a medical practice act, statute, or governmental regulation; disciplinary action by any medical licensing authority; or voluntary surrender while under investigation. Before a certificate is revoked, the diplomate will be informed of the basis of such action and will be afforded a hearing according to procedures formulated by the ABOS.

### C. Certificate Reinstatement

Should the circumstances that justified revocation or surrender of the diplomate's certificate be corrected, the Board may reinstate the certificate after appropriate review of the individual's qualifications and performance, using the same standard applied to other applicants for certification.

### D. Recertification Process

Diplomates are encouraged to renew their credentials periodically through the Board's recertification process. Information about recertification options can be obtained from the Board office.

## X. Unsuccessful Candidates

Unsuccessful Part I candidates may repeat the examination by submitting a new application form for the examination and again being found admissible. (See VI.B.1.)

Unsuccessful Part II candidates may repeat the examination by submitting a new application form for the examination and again being found admissible. (See VI.B.2 and VIII.) Candidates who do not pass Part II within 5 years after passing Part I must retake and re-pass Part I before applying to take Part II, except as noted in IV.

## XI. Program Accreditation

Institutions offering orthopaedic education must meet the General and Special Requirements of the ACGME and the RRC for Orthopaedic Surgery as stated in the *Graduate Medical Education Directory*. (See III.D.)

### A. Residency Review Committee for Orthopaedic Surgery

Program accreditation is issued by the RRC for Orthopaedic Surgery, an autonomous committee composed of three representatives from each of the three sponsoring organizations: the ABOS, the Council on Medical Education of the American Medical Association, and the American Academy of Orthopaedic Surgeons. In evaluating orthopaedic residency programs, the RRC considers the number of residents, training period, program organization, educational experi-

ence, and institutional responsibility. The committee meets twice yearly.

### B. Changes in Accreditation

Programs seeking changes in accredited positions or institutional affiliations can obtain information and application forms from the secretary of the RRC for Orthopaedic Surgery at the Accreditation Council for Graduate Medical Education, 515 N State St, Chicago, IL 60610.

Completed forms are to be returned to the secretary at the above address.

### C. Program Surveys

Programs applying for accreditation or changes in accreditation will be surveyed at the earliest feasible date by a specialist site visitor or by a field representative for the ACGME. A report of the survey is submitted to the RRC for Orthopaedic Surgery for evaluation and official action. The RRC makes a determination regarding the accreditation of the program under authority delegated by the ACGME, and it notifies the program director and the hospital.

### D. Number of Residents

The total number of residents assigned to any orthopaedic residency program and the number at each level of education must have prior approval by the RRC for Orthopaedic Surgery.

## XII. Appeals Procedure

- A. An individual who has received an unfavorable ruling from a committee of the Board may appeal such determination by mailing a notice of appeal to the office of the ABOS within 60 days of the date such ruling was mailed to him or her. Exception: The decisions by the Examinations Committee that a candidate has failed either part of the certifying examination may be appealed only in the manner and to the extent provided in paragraphs G and H below.
- B. Upon receipt of a notice of appeal, the concerned Board committee shall consider any information submitted therewith by the individual in support of his or her appeal and make such further investigation as it deems appropriate. If the committee then decides in a manner favorable to the individual, it shall so notify the individual. If the committee does not so determine, it shall notify the individual and the president of the ABOS.
- C. The individual shall then have the right to an appeals hearing to decide whether the determination of the concerned Board committee shall be confirmed, modified, or overruled in accordance with the hearing process described in this appeals procedure.
  1. The president of the ABOS shall appoint an ad hoc appeals committee consisting of three directors of the Board who did not participate in making the determination being appealed, one of whom shall be designated by the president as chairman of the appeals committee.
  2. In the event that the subject matter of the appeal involves complex issues of fact or issues not solely dependent upon medical, surgical, or professional standards, the president of the ABOS, at his/her sole discretion, may appoint a hearing officer to conduct the appeals hearing and to submit a full written report and a recommended decision to the ad hoc appeals committee. The hearing officer appointed at the discretion of the president shall be an impartial physician, lawyer, or other professional.
  3. The chairman of the appeals committee shall convene a hearing before the appeals committee or the hearing officer, if one is appointed, within a reasonable time after their respective appointments, but not less than 60 days after the appointment of the appeals committee and the hearing officer, whichever is later.
- D. Prior to the hearing:
  1. The concerned Board committee shall provide the executive director with such written information concerning its decision as it deems appropriate; a list of witnesses, if any, whom it expects to call to testify; copies of any written material that it considered in making the determination appealed (but only if it intends to present such material at the hearing); and a list of information and documents that the individual is required to produce at the hearing. This material, together with written notice stating the time and place of the hearing, shall be sent to the individual by the executive director not less than 30 days prior to the hearing. Not less than 7 days prior to the hearing, the concerned Board committee shall provide the executive director and the individual with copies of any written reports, affidavits, or statements of experts that the concerned Board committee intends to present at the hearing.
  2. Not less than 7 days prior to the hearing, the individual shall provide the executive director and the concerned Board committee with such written information concerning his or her position as he or she deems appropriate; a list of witnesses, if any, whom he or she expects to call to testify; and copies of any written reports, affidavits, or statements of experts that he or she intends to present at the hearing.
  3. The executive director shall submit the written material referred to in this section D to the members of the appeals committee or the hearing officer, if one has been appointed, prior to the hearing. Copies of this material must also be submitted to the individual and to the concerned Board committee no later than the time when submitted to the appeals committee or the hearing officer.
- E. The hearing, whether conducted before the appeals committee or a hearing officer, shall be a hearing de novo. The concerned Board committee and the individual shall have the right to present all relevant information and evidence in support of their respective positions, and neither the concerned Board committee nor the individual shall be limited to the information and evidence considered by the concerned Board committee in making its original determination or its reconsideration of the original decision.
  1. The concerned Board committee shall have the burden of proving at the hearing that the determination being appealed should be confirmed. The standard of proof to be applied by the appeals committee and the hearing officer in deciding whether the information and evidence presented at the hearing is sufficient to warrant confirmation of the determination being appealed is by the preponderance or greater weight of the evidence.
  2. At the hearing, the concerned Board committee and its legal or other representatives shall present such relevant information and evidence as it deems appropriate to support its previously made determination. However, the committee shall not have the right to present any information or evidence not previously provided as required in D.1. The committee may call, examine, and cross-examine witnesses.
  3. The individual shall have the right to be represented at the hearing by legal counsel or any person of his or her choice. He or she may present such relevant information and evidence as he or she deems appropriate in support of his or her position. However, the individual shall not have the right to present any information or evidence if not previously provided as required in D.2. The failure of the individual to produce information or documents requested by the concerned Board committee as required in D.2 shall be grounds for upholding and confirming

the determinations of the concerned Board committee. The individual may call, examine, and cross-examine witnesses.

4. The individual and the concerned Board committee may submit written statements at the close of the hearing. A written record of the hearing shall be made available to the individual at one-half the cost of its preparation.
- F. After the conclusion of the hearing:
1. If the hearing has been conducted before a hearing officer, the hearing officer shall prepare a written report based upon the information and evidence presented, including the findings of fact determined by the hearing officer and a recommended decision as to whether the determination being appealed should be confirmed, modified, or overruled. The hearing officer shall submit the written report of the appeals committee and send copies to the individual and the concerned Board committee. The individual and/or the concerned Board committee may file objections to the report and recommendations of the hearing officer with the appeals committee within 10 days after receipt of the report. The opposing party shall then have 10 days to file its response to such objections with the appeals committee.
  2. The appeals committee shall make its decisions following the hearing. If the hearing has been conducted before a hearing officer, the appeals committee will first receive the written report and recommendations of the hearing officer and the objections and responses filed thereto by the parties. If a majority of the members of the appeals committee determine, on the basis of the information and evidence presented, including, when applicable, the report and recommendations of the hearing officer, that the determination of the concerned Board committee should be confirmed or modified, the appeals committee shall so declare. If a majority determines that the concerned Board committee's determination should be overruled, the appeals committee shall so declare. The appeals committee shall inform the individual and the concerned Board committee of its decision in writing within a reasonable time following the hearing, explaining the basis for its judgment. The decision of the appeals committee shall be final and binding.
- G. A candidate who believes that the Part II examination was administered in an unfair or inaccurate manner or that one or more of his or her oral examiners was acquainted with him or her or was not impartial may immediately, upon completion of the examination, request that he or she be reexamined. The request shall be made to the chairman of the Oral Examinations Committee and reviewed by the president and the secretary. If, after discussing the matter with the candidate and making such other investigation as they may deem appropriate, a majority of the president, the secretary, and the chairman of the Oral Examinations Committee determine that reasonable grounds exist for the candidate's request, he or she shall be immediately reexamined by another panel of oral examiners. In such event, the first oral examination will be disregarded and only the candidate's performance on the reexamination shall be considered in determining his or her score on the examination.
- H. A candidate who fails the Part I examination may request in writing that his or her examination be rescored by hand to verify the accuracy of the results as reported to him or her. Such a request is to be made within 60 days of his or her being notified of the results of the examination. The request must be accompanied by a check for \$100 payable to the ABOS to cover the cost of hand scoring. There shall be no further appeal of a failure on the Part I examination.

## American Board of Otolaryngology

M Eugene Tardy, Jr, MD, President, Chicago, Illinois  
 Eugene N Myers, MD, President Elect, Pittsburgh, Pennsylvania  
 D Thane Cody, MD, Treasurer, Ponte Vedra Beach, Florida  
 Warren Y Adkins, MD, Charleston, South Carolina  
 Roger L Crumley, MD, Irvine, California  
 Charles W Cummings, MD, Baltimore, Maryland  
 Willard E Fee, Jr, MD, Stanford, California  
 John M Fredrickson, MD, St Louis, Missouri  
 Jerome C Goldstein, MD, Washington, DC  
 Gerald B Healy, MD, Boston, Massachusetts  
 Michael E Johns, MD, Baltimore, Maryland  
 Herbert C Jones, MD, Atlanta, Georgia  
 Jack D Kerth, MD, Chicago, Illinois  
 Robert I Kohut, MD, Winston-Salem, North Carolina  
 Charles J Krause, MD, Ann Arbor, Michigan  
 Robert H Miller, MD, New Orleans, Louisiana  
 H Bryan Neel III, MD, Rochester, Minnesota  
 Robert H Ossoff, MD, Nashville, Tennessee  
 Harold C Pillsbury III, MD, Chapel Hill, North Carolina  
 Robert J Ruben, MD, Bronx, New York  
 Alexander J Schleuning II, MD, Portland, Oregon  
 David E Schuller, MD, Columbus, Ohio  
 Neil O Ward, MD, Phoenix, Arizona  
 Gayle E Woodson, MD, Memphis, Tennessee  
 Robert W Cantrell, MD, Executive Vice President, Houston, Texas

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Otolaryngology [ABO] to ascertain whether the information below is current.)*

### Examination

The ABO certification process consists of two phases: a written qualifying examination and an oral certifying examination.

All candidates must take a written examination, which is offered in the fall of each year. Candidates who do not achieve the qualifying score fail the exam, and are not eligible to take the oral examination. They may retake the written exam in a subsequent year.

Candidates who meet or exceed the qualifying score must then successfully complete an oral examination, which is offered in the spring of each year, in order to become certified. Qualified candidates are given three consecutive opportunities to take the oral exam. If a passing score is not achieved after three exam cycles, the candidate must reapply to take the written exam, and must again achieve a qualifying score in order to be permitted to retake the oral exam.

Written and oral examination scores are not combined. An individual must successfully complete both the written and the oral exam in order to be certified. A certificate is granted by the ABO to a candidate who has met all the requirements and has satisfactorily passed its exams.

### Prerequisite Requirements

#### Resident Registry

All residents must be registered with the ABO during the first year of otolaryngology training in order to subsequently apply to take the certification examination.

A preliminary Resident Registry Form must be filed for each new resident by the Program Director by July 15 of the first year of oto-

laryngology-head and neck surgery training. The form must be signed by both the Program Director and the resident.

The Program Director subsequently submits a Resident Registry Evaluation Form for each returning resident by July 15 of each year. It must be noted whether the previous year was successfully completed, and the form must be signed by both the Program Director and the resident.

Evaluation Forms become part of the individual's ABO file, and are a prerequisite for application for the certification examination.

Credit may not be granted by the ABO for any year of training for which an Evaluation Form is not received.

### Operative Experience Report (OER)

All residents maintain a log of their surgical procedures on a computer diskette during otolaryngology-head and neck surgery training.

A disk is prepared at the ABO office for each new resident and is sent to the resident in early September.

Throughout the year, each resident maintains a record of his or her surgical procedures on the computer disk.

All residents return their disks to the ABO by July 15 of each year. A printout, signed by the resident and the Program Director, is also submitted by July 15.

Residents who complete a full year of research between years of otolaryngology training and who perform no surgical cases during that year need not submit a disk for that year. However, a letter must be submitted by July 15 explaining this.

Data from the disk is transferred to a master database for review by the Credentials Committee. Disks are then returned to residents in early September.

A fee of \$25 is charged for lost disks. A fee of \$200 is charged for disks and/or printouts not received by the July 15 deadline.

Completion and return of OER data annually is a prerequisite for application for the certification examination. Credit may not be granted by the ABO for any year of training for which OER data is not recorded.

### Transfers

A resident wishing to transfer from one residency program to another must notify the ABO in writing, and explain the circumstances of the proposed transfer.

Letters from the current and prospective directors of training must also be submitted.

The letter from the current program director must verify the exact amount of training successfully completed in the program.

The letter from the prospective Program Director must verify that sufficient residency positions, accredited by the Residency Review Committee (RRC) for Otolaryngology of the Accreditation Council for Graduate Medical Education (ACGME), exist in the program to provide the transferring resident with the training necessary to meet the requirements of this Board for certification.

### General Requirements

There is no required time interval between completion of the residency program and making application for examination. However, all residency training must be successfully completed before the date of the examination in any given year.

The applicant must possess high moral, ethical, and professional qualifications as determined by, and in the sole discretion of, the Board.

The applicant must be a graduate of an approved school of medicine or osteopathy.

The applicant must submit verification of a valid, nonrestricted license to practice medicine.

### Training Requirements

Training programs in otolaryngology-head and neck surgery in the United States are evaluated by the RRC for Otolaryngology, which consists of representatives from the American Medical Association, the American College of Surgeons, and the ABO, and are accredited by the ACGME. Information concerning approved educational programs is contained in the *Graduate Medical Education Directory* published by the American Medical Association.

All training specified below must be successfully completed in ACGME-approved programs, or in programs in Canada accredited by the Royal College of Physicians and Surgeons of Canada.

The applicant whose residency training began July 1, 1981, or thereafter must have satisfactorily completed a minimum of 5 years of residency training as follows:

1. At least 1 year of general surgical training. It is preferred that the general surgical residency be taken prior to otolaryngologic training, but it may not be taken following otolaryngologic training.
2. At least 3 years of residency training in otolaryngology-head and neck surgery. This training must involve increasing responsibility each year and must include a final year of senior experience. This final year must be spent within the accredited program in which the previous year of training was spent, unless prior approval is obtained from the ABO.
3. An additional year of residency training, which may be in otolaryngology, general surgery, or other residencies or internships. If this year of training is not in otolaryngology, it must be taken prior to the final year of otolaryngology residency.

All residency training must be completed in a manner acceptable to the head of that residency program.

The applicant whose residency training begins July 1, 1997 or thereafter will be required to complete 1 year of general surgical training and 4 years of otolaryngologic training, for a total of 5 years of residency training.

Beginning in 1997, the ABO will examine only the number of resident graduates from a program in any given year that is the RRC (ACGME) approved number of graduates for that year.

### Foreign Training

An applicant who completed otolaryngologic training in the United Kingdom or the Republic of Ireland in a program accredited by the Specialist Advisory Committee, and who has received a certificate of accreditation in otolaryngology from the Joint Committee on Higher Surgical Training in the United Kingdom and the Republic of Ireland, may be considered for examination.

An applicant who completed otolaryngologic training under the New Zealand program after January 1, 1984 and who has passed the examination leading to Fellowship in the Royal Australasian College of Surgeons may be considered for examination.

An applicant who completed training under the Australian program after January 1, 1986 and who has passed the examination leading to Fellowship in the Royal Australasian College of Surgeons may be considered for examination.

### Application for Examination

Application materials for the written examination in any given year become available January 2 and must be completed and returned by May 1 of that year. The application consists of the following:

1. Application, signed by the Program Director and another ABO diplomate. A current photograph, signed on the front, must be attached to the application. A duplicate photograph, also signed on the front, must be attached to a signature card provided with the application.
2. Verification of medical degree (official transcript or letter from Dean).

3. Verification of Otolaryngology Residency Form, signed by the Program Director, attesting to satisfactory completion of the training program.
4. Verification of Surgery Residency Form, signed by the Chief of Surgery, attesting to satisfactory completion of the training program.
5. Verification of Additional Residency Form, signed by the appropriate Program Director, attesting to satisfactory completion of the training program or internship.
6. Credentials Questionnaire, regarding practice privileges, licensure actions, etc.
7. Candidate Authorization, for release of information from the Federation of State Medical Boards.
8. Verification of all licenses to practice medicine, showing non-restricted status and date of expiration.

Individuals who have completed residency training but who will enter a fellowship program utilizing an institutional license must submit a statement from the Program Director as evidence of this fact.

Individuals who have completed residency training but who will go on to practice medicine in a foreign country not requiring licensure must make a written request to be accepted for the examination without medical license. Such requests should be submitted with the application.

9. Operative Experience Report (diskette and printout), which lists procedures assisted in and performed by the applicant during otolaryngology residency.

Additional information may be requested by the Board from the following: local medical society, board-certified otolaryngologists from the geographical area in which the applicant practices, the director of the applicant's training program, hospital chiefs of staff, and/or other individuals and entities who may have knowledge of the applicant's moral and ethical standing, qualifications, or abilities.

Applications are approved by the Credentials Committee in June, and applicants are then notified if they have been approved for examination. The Board reserves the right to reject any application.

Applications are valid for one written exam and three oral exams. At the conclusion of this period, or upon failure of the written exam, the application expires, and individuals are required to submit new forms.

### Leaves of Absence

Leaves of absence and vacation may be granted to residents at the discretion of the Program Director in accordance with local rules. The total of such leaves and vacation may not exceed 6 weeks in any one year. If a longer leave of absence is granted in any year, the required period of graduate medical education may be extended accordingly.

### Applicants With Special Disabilities

The ABO offers examinations in a place and manner accessible to persons with disabilities, or offers alternative accessible arrangements for such individuals. Requests for such accommodations should be submitted with the application prior to May 1 of any given year.

### Fees

#### General Information

1. Fees are not refundable, nor can they be "held over" to a subsequent exam.
2. All fees must be paid in US funds. Applicants residing outside the United States must submit payment by International Money Order.

3. Fees must be paid in full by the stated deadlines. Applications without payment will not be processed.
4. A fee of \$200 will be charged for any application or portion thereof postmarked between May 1 and May 15. Applications are not accepted after May 15.
5. A fee of \$25 will be charged for any check returned by the bank for insufficient funds.
6. Fees are subject to change at the discretion of the Board.

#### New Applicants

1. The examination fee is \$1,800. First-time applicants submit \$900 with the application by May 1. The additional \$900 is due by July 15.
2. Individuals who become candidates for the oral examination (by achieving the qualifying score on the written exam) take their first oral examination at no additional cost.
3. Candidates are given three consecutive opportunities to take the oral examination. A fee of \$1,000 will be charged for the second and/or third oral examination.

#### Reapplicants

1. If an individual fails the written examination, or if a passing score is not achieved after three oral exams, the individual must reapply to take the written exam and \$1,800 must accompany the reapplication form.
2. Individuals who again become oral candidates follow the same procedure and pay the same fees as outlined in paragraph 3 of the new applicants section above.

### Board Eligibility and Status Inquiries

The ABO does not recognize or use the term "board eligible." The Board states whether an individual is certified, is not certified, or is in the process of being examined (ie, between written and oral examinations).

### Purpose of Examination

The purpose of the examination is to determine the candidate's knowledge, skill, and understanding in the following categories:

1. Morphology, physiology, pharmacology, pathology, microbiology, biochemistry, genetics, and immunology relevant to the head and neck; the respiratory and upper alimentary systems; the communication sciences, including knowledge of audiology and speech-language pathology; and the chemical senses and allergy, endocrinology, and neurology as they relate to the head and neck.
2. Diagnosis and diagnostic methods including audiologic and vestibular assessments, electrophysiologic techniques, and other related laboratory procedures for diseases and disorders of the ears, the respiratory and upper alimentary systems, and the head and neck.
3. Therapeutic and diagnostic radiology, including the interpretation of medical imaging techniques relevant to the head, neck, and thorax, including the temporal bone, skull, nose, paranasal sinuses, salivary and thyroid glands, larynx, neck, lungs, and esophagus.
4. Diagnostic evaluation and management of congenital anomalies, allergy, trauma, and other diseases in the regions and systems mentioned above.
5. The cognitive management, including operative intervention with its preoperative and postoperative care, of congenital, inflammatory, endocrine, neoplastic, degenerative, and traumatic states, including
  - a. Temporal bone surgery
  - b. Paranasal sinus and nasal surgery
  - c. Skull-base surgery

- d. Maxillofacial surgery including the orbits, jaws, and facial skeleton
  - e. Esthetic, plastic, and reconstructive surgery of the face, head, and neck
  - f. Surgery of the thyroid, parathyroid, pituitary, and salivary glands
  - g. Head and neck reconstructive surgery relating to the restoration of form and function in congenital anomalies and head and neck trauma, and associated with ablative operations
  - h. Endoscopy, both diagnostic and therapeutic
  - i. Surgery of the lymphatic tissues of the head and neck.
6. The habilitation and rehabilitation techniques and procedures pertaining to respiration, deglutition, chemoreception, balance, speech, and hearing.
  7. The current literature, especially pertaining to the areas listed above.
  8. Research methodology.

In order to assist otolaryngology Program Directors in evaluating their programs, the Board reports each applicant's examination results to the director of the program in which the applicant completed his/her senior resident year.

**Examination Procedure**

The Board vigorously enforces the highest standards of honesty and integrity in its examination process. Accordingly, the following are considered a breach of ABO policy and are forbidden, and may be sufficient cause for the ABO to terminate an applicant's participation in the examination, to invalidate the results of the examination, to withhold an applicant's score or certificate, to bar an applicant permanently from all future examinations, to revoke a certificate, or to take other appropriate action:

1. Falsification of the application or the submission of any falsified documents to the ABO;
2. The giving or receiving of aid in the examination, including, but not limited to, copying answers from another candidate or permitting one's answers to be copied, as evidenced by observation at the time of the examination or by statistical analysis afterward;
3. The offer of any financial or other benefit to any director, officer, employee, proctor, or other agent or representative of the ABO in return for any right, privilege, or benefit that is not usually granted by the ABO to other similarly situated candidates or persons;
4. The unauthorized possession, reproduction, recording, discussion, or disclosure of any material, including, but not limited to, written or oral examination questions or answers before, during, or after the examination.

Proctors are required to report any suspected irregularity during an examination. A candidate may be moved to a more isolated area, or his/her participation in the examination may be terminated. Additionally, the ABO's educational consultants may undertake statistical studies of a candidate's answers compared with the answers of other participants in the examination to provide evidence that would support or fail to support a suspected irregularity. If, in the opinion of the ABO, there exists a probability that an irregularity occurred, the ABO will afford the suspected individual(s) procedural due process in order to assure fairness in the determination as to whether an irregularity has occurred.

The ABO will not report scores or grant certification on the basis of scores that it has determined to be invalid, and reserves the right to take whatever legal action is indicated with regard to violation of ABO copyright or examination violations.

**Certification, Rejection and Revocation (from the Bylaws, Article VI)**

The Board shall issue an appropriate certificate of qualification in otolaryngology (or in a subdivision thereof) to those who show themselves worthy of such certification according to the requirements of training, experience, and demonstrated competence as stated in the current ABO Booklet of Information.

No certificate shall be issued, and any certificate issued by the Board shall be subject to revocation at any time by the Board, if it shall determine that the person involved

1. Did not possess the required qualifications and requirements for examination, whether or not such deficiency was known to the Board or any director thereof, or could have been ascertained by the Board prior to examination or at the time of the issuance of a certificate as the case may be.
2. Made a material misstatement or withheld information in his/her application or any other representation to the Board or any Committee thereof, whether intentional or unintentional.
3. Has been convicted by a court of competent jurisdiction of any felony or misdemeanor involving moral turpitude and, in the opinion of the Board, having a material relationship to the practice of medicine.
4. Had a license to practice medicine revoked, or shall have been disciplined or censured by any court or other body having proper jurisdiction and authority because of any act or omission arising from the practice of medicine.

If the Board determines to withhold or revoke any certificate for any reason, the person affected thereby shall be given written notice of the reasons therefor. Such actions by the Board shall be regarded as final unless such person requests a review of such action within 30 days after notice thereof has been mailed by the Board.

**American Board of Pathology**

- John D Milam, MD, President, Houston, Texas
- Peter A Ward, MD, Vice President, Ann Arbor, Michigan
- Frederick R Davey, MD, Secretary, Syracuse, New York
- Barbara F Atkinson, MD, Treasurer, Philadelphia, Pennsylvania
- Merle W Delmer, MD, Immediate Past President, San Antonio, Texas
- Stephen D Allen, MD, Indianapolis, Indiana
- Ramzi S Cotran, MD, Boston, Massachusetts (on leave of absence)
- Dwight K Oxley, MD, Wichita, Kansas
- Deborah E Powell, MD, Lexington, Kentucky
- Howard M Rawnsley, MD, Hanover, New Hampshire
- David B Troxel, MD, Concord, California
- Kay Herrin Woodruff, MD, San Pablo, California
- Ross E Zumwalt, MD, Albuquerque, New Mexico
- William H Hartmann, MD, Executive Vice President, Tampa, Florida

*(These criteria and conditions are subject to change without notice. The new certification requirements of the American Board of Pathology were not available at the time of this publication. Please contact the Board for current requirements.)*

**Qualification Requirements for Examination**

All applications for certification are evaluated by the Credentials Committee of the American Board of Pathology (ABP). The evaluation process requires the consideration of the following four requirements:

- I. Professional Education
- II. Medical Licensure
- III. Pathology Training Requirements
  - A. Primary Certification

- B. Special Qualification Certification
- C. Added Qualification Certification
- D. Combined Primary and Subspecialty Certification

#### IV. The Credentialing Year

An applicant who has satisfactorily fulfilled these four requirements is declared qualified for examination by the Credentials Committee for a period not to exceed 3 years.

### I. Professional Education

A candidate must have graduated from a medical school in the United States or Canada accredited by the Liaison Committee on Medical Education, graduated from an osteopathic college of medicine accredited by the Bureau of Professional Education of the American Osteopathic Association, or graduated from a medical school acceptable to the ABP in another country.

Graduates of medical schools other than in the US or Canada must submit with their application a notarized copy of their medical school diploma, in English, showing the medical degree and the date that it was awarded. A certificate showing that the applicant has passed a final examination is not acceptable.

### II. Medical Licensure

The candidate must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in one of the states or territories of the United States or one of the provinces of Canada.

### III. Pathology Training Requirements

To acknowledge the diverse activities in the practice of pathology and to accommodate the interests of individuals wishing to enter the field, the ABP offers primary certification through one of the following three routes: combined anatomic and clinical pathology, anatomic pathology only, and clinical pathology only. A variety of special and added qualification certificates are offered for certified pathologists who wish to demonstrate expertise in one facet of anatomic or clinical pathology. Under certain circumstances, primary certification in anatomic or clinical pathology can be combined with one of the special or added qualifications.

Only pathology training taken in the United States or Canada is acceptable toward meeting the ABP requirements. The training must be in programs that have been inspected and accredited by the Accreditation Council for Graduate Medical Education (ACGME) or specifically approved by the ABP.

#### A. Primary Certification

In addition to accredited pathology training, all applicants for primary certification must meet the credentialing requirement of 1 full year as defined in Section IV, The Credentialing Year.

1. Training. The candidate must satisfactorily complete pathology training in a program accredited by the ACGME as outlined.
  - a. Combined Anatomic and Clinical Pathology (AP/CP) Certification
 

Four full years of full-time, approved training in an accredited APCP-4 program that includes at least 18 months of formal (structured) training in anatomic pathology and 18 months of formal (structured) training in clinical pathology, and either an additional 12 months of full-time, continued formal (structured) training in anatomic and/or clinical pathology or 12 months of full-time approved flexible training in a specialty facet of pathology as part of the defined 4-year accredited APCP training program.
  - b. Anatomic Pathology (AP) Certification
    1. Three full years of full-time, approved training in anatomic pathology in an accredited APCP-4 or AP-3 program that includes at least 24 months of formal (structured) training in anatomic pathology and either an additional 12 months of full-time, continued formal (structured) training in anatomic pathology or 12 months of full-time approved flex-

ible training in a specialty facet of pathology as part of the defined accredited training program.

2. Applicants who hold a primary certificate in clinical pathology: Two full years of full-time, approved training in anatomic pathology in an accredited APCP-4 or AP-3 program, with at least 18 months being formal (structured) training in anatomic pathology. Six months may be full-time approved training in a specialty facet of pathology as part of the defined accredited training program.
- c. Clinical Pathology (CP) Certification
  1. Three full years of full-time, approved training in clinical pathology in an accredited APCP-4 or CP-3 program that includes at least 24 months of formal (structured) training in clinical pathology and either an additional 12 months of full-time, continued formal (structured) training in clinical pathology or 12 months of full-time approved flexible training in a specialty facet of pathology as part of the defined accredited training program.
  2. Applicants who hold a primary certification in anatomic pathology: Two full years of full-time, approved training in clinical pathology in an accredited APCP-4 or CP-3 program, with at least 18 months being formal (structured) training in clinical pathology. Six months may be full-time approved training in a specialty facet of pathology as part of the defined accredited training program.
2. Experience. Only under special circumstances will experience credit be given toward the pathology training requirements for primary certification. Two months of full-time practice experience in pathology acceptable to the ABP is equivalent to 1 month of accredited pathology training. The substitution of experience credit for a portion of accredited pathology training requires the assessment and approval of the director of the pathology training program to ensure that such will permit the continuation of an adequate broad experience of good quality in anatomic and/or clinical pathology.
 

Under exceptional circumstances, credit for extensive full-time pathology practice experience in a country other than the United States or Canada may be granted toward the requirements for primary certification, provided that the candidate has had a total of 8 years of full-time practice experience in pathology acceptable to the ABP with at least 4 years having been in the United States or Canada. For AP qualification, the experience must have been in the actual practice of AP; for CP, in the actual practice of CP; and for combined AP/CP, 4 years in AP and 4 years in CP.
3. Advanced Pathology Training Credit Mechanisms. Under special circumstances, advanced credit will be given by the mechanisms described. The acceptance of advanced credits as substitutes for accredited pathology training toward primary certification is not automatic and is evaluated on an individual basis. Credit is given only for activities that have occurred in either the United States or Canada. The total combined period of advanced pathology training credit allowed for paragraphs a, b, and c in this section will not exceed 1 year (12 months) and can only be applied to the flexible year of required pathology training necessary for certification in AP/CP, AP, or CP.
 

To avoid any misunderstanding, potential applicants should communicate with the office of the ABP early in the training period to ascertain if credit may be acceptable.

The training program director will be asked to assess the proposal and to provide a recommendation as to the amount of credit that the director believes the candidate should receive. The Board will notify the director of the pathology training program of such potential credit. Prior to admission to the certifying

examination, the director of the final year of training must certify that the candidate is fully qualified to sit for the examination.

- a. Student fellowship training during medical school. Credit toward the pathology training requirements for primary certification may be granted for medical student fellowship training or research taken after successful completion of the medical school course in pathology, provided that the candidate did not receive credit for such toward graduation from medical school, that the training was full-time and is validated by the director of the student fellowship program, and that it is approved as an acceptable experience by the director of the accredited pathology training program in which the candidate is registered. The training or research must take place in a department of pathology that has an accredited training program. No credit is given for electives or for courses that are part of the medical school curriculum.
- b. Candidates holding a PhD degree in a special discipline of pathology or a basic science related to pathology may, under certain circumstances, obtain pathology training credit. The evaluation and granting of the amount of training credit will depend on an assessment by the ABP regarding relevance of the subjects to anatomic or clinical pathology.
- c. Research with a direct application to the practice of anatomic or clinical pathology and not leading to an advanced degree may be considered for credit not to exceed 1 year (12 months) in combination with other advanced credits. The research must be full-time. No credit is given for research employment as a technician or technologist. The ABP encourages research and believes that all candidates should carry on investigation, teaching, and the publication of scientific papers during primary training.
4. Post-Pathology Course Fellowship (criteria for acceptance). Under certain circumstances, candidates may receive advanced pathology training credit toward the primary certification requirements for post-pathology course fellowship training in pathology. Such credit is NOT given toward the requirements for special or added qualification certification. The credit is assessed on an individual basis. Granted credit will only be assigned to the flexible year of required primary training. Credit will not be given toward the required 18 months of formal (structured) anatomic pathology training or the required 18 months of formal (structured) clinical pathology training necessary to qualify for combined anatomic and clinical pathology certification.

Advanced credit toward single certification in anatomic pathology or single certification in clinical pathology will be given toward the flexible year of required pathology training and not toward the 24 months of required formal (structured) training.

The guidelines for acceptable post-pathology course fellowship training for credit are

- a. Fellow must have fully and satisfactorily completed the medical school year in which pathology course is given.
- b. Fellow must not receive credit for fellowship activities toward the requirements for graduation from medical school.
- c. Training must be full-time in a department of pathology that has a fully accredited pathology training program.
- d. Training must be under the direction of the director of the pathology training program or the chairman of the department of pathology.
- e. A description of proposed activities, responsibilities, and assignments for anatomic pathology, clinical pathology, and research must be available and on file prior to beginning of the fellowship. If a formal institutional program exists, a copy should be filed with the ABP.

- f. A validation and evaluation report must be submitted on completion of the fellowship by the program director or chairman of the department of pathology if the fellow wishes credit toward certification requirements.
5. Additional Training or Experience. A candidate for primary certification who has completed the required pathology training 5 years or more prior to the date of submission of an application for examination must have either 1 year of additional training in pathology in a program accredited for such training by the ACGME or 2 full years of additional practice experience in pathology in the United States or Canada in a situation acceptable to the Board. This additional requirement must be met during the 5-year period immediately preceding the date of submission of an application.

*B. Special Qualification Certification*

All candidates applying for special qualification certification must hold a primary certificate from the ABP or, where permissible, from another primary medical specialty Board of the American Board of Medical Specialties (ABMS).

Credit is not given for pathology training taken outside the United States. Also, credit is not given for training in areas of special qualification that was part of the training program leading to the requirements necessary to qualify to sit for the primary examination in AP and/or CP.

No advanced credit will be given toward the requirements for special qualification certification by the mechanisms described in Section III.A.3, "Advanced Pathology Training Credit Mechanisms."

1. Blood Banking/Transfusion Medicine (BB/TM)
  - a. Applicants who hold a certificate in anatomic and clinical pathology, clinical pathology only, or a primary certificate plus a special qualification certificate in hematology from another primary medical specialty Board of ABMS:
    1. One full year of additional training in blood banking/transfusion medicine in a program accredited for such training by the ACGME or approved for such training by the ABP or
    2. Two additional years of full-time experience or its equivalence in blood banking/transfusion medicine under circumstances acceptable to the ABP.
  - b. Applicants who are certified by The American Board of Anesthesiology:
    1. One full year of additional training in blood banking/transfusion medicine in a program accredited for such training by the ACGME or approved for such training by the ABP.
  - c. Applicants, other than those described in 1.b, who hold a primary certificate from a primary medical specialty Board of ABMS: 2 full years of full-time training in blood banking/transfusion medicine in a program accredited for such training by the ACGME.
  - d. Applicants seeking combined certification in clinical pathology and blood banking/transfusion medicine (CP/BB/TM): see Section III.D, "Combined Primary and Subspecialty Certification."
2. Chemical Pathology (Chem P)
  - a. Applicants who hold a certificate in anatomic and clinical pathology or clinical pathology only:
    1. One full year of additional training in chemical pathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
    2. Two additional years of full-time experience or its equivalence in chemical pathology under circumstances acceptable to the ABP.
  - b. Applicants, other than those described in 2.a, who hold a primary certificate from a primary medical specialty board of

ABMS: 2 full years of full-time training in chemical pathology in a program accredited for such training by the ACGME.

- c. Applicants seeking combined certification in clinical pathology and chemical pathology (CP/Chem P): see Section III.D, "Combined Primary and Subspecialty Certification."

### 3. Dermatopathology (DP)

Certification in dermatopathology is a joint and equal function of the ABP and the American Board of Dermatology (ABD). Such function relates to qualifications of candidates, standards of examinations, and the form of the certificate.

All candidates applying for examination must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada.

#### a. Prerequisites

The ABP and the ABD will admit candidates to examination for certificates of special qualification in dermatopathology who are otherwise qualified and who have met one of the following requirements:

1. Applicants who are diplomates of the ABP and the ABD, or
2. Applicants already holding a primary certificate from the ABP (anatomic pathology, or combined anatomic and clinical pathology) or the ABD and the addition of at least 1 year of training in dermatopathology in a program accredited for such training by the ACGME. This additional training must be taken after the candidate has met the full training requirements for certification in pathology or dermatology.

#### b. Training

Training programs in dermatopathology are a joint and equal function of the departments of pathology and dermatology. The pathologist applicant must spend one-half of the required training time in clinical dermatology.

#### *Committee for Dermatopathology*

Ronald J Barr, MD, Orange, California  
 Mark A Everett, MD, Oklahoma City, Oklahoma  
 Loren E Golitz, MD, Denver, Colorado  
 David B Troxel, Concord, California  
 Kay Herrin Woodruff, MD, San Pablo, California  
 Ross E Zumwalt, MD, Albuquerque, New Mexico

Candidates may obtain an application as follows:

#### *Pathologists*

William H Hartmann, MD  
 Executive Vice President  
 American Board of Pathology  
 PO Box 25915  
 Tampa, FL 33622-5915

#### *Dermatologists*

Harry J Hurley, MD  
 Executive Director  
 American Board of Dermatology, Inc  
 Henry Ford Hospital  
 1 Ford Place  
 Detroit, MI 48202-3450

### 4. Forensic Pathology (FP)

- a. Applicants who hold a certificate in anatomic and clinical pathology, anatomic pathology only, or in special instances, clinical pathology only:

1. One full year of additional supervised training in forensic pathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
2. Two additional years of full-time experience in forensic pathology or its equivalence in a situation comparable to that of a program accredited for such training by the ACGME.

- b. Applicants seeking combined certification in anatomic pathology and forensic pathology (AP/FP): see Section III.D, "Combined Primary and Subspecialty Certification."

### 5. Hematology (HEM)

- a. Applicants who hold a certificate in anatomic and clinical pathology, clinical pathology only, or a primary certificate plus a special qualification certificate in hematology from another primary medical specialty board of ABMS:

1. One full year of additional supervised training in hematology (pathology) in a program accredited for such training by the ACGME or approved for such training by the ABP or
2. Two additional years of full-time experience or its equivalence in clinical laboratory hematology under circumstances acceptable to the ABP.

- b. Applicants, other than those described in 5a, who hold a primary certificate from a primary medical specialty board of ABMS: 2 full years of full-time training in hematology (pathology) in a program accredited for such training by the ACGME.

- c. Applicants seeking combined certification in clinical or anatomic pathology and hematology (CP/HEM, AP/HEM): see Section III.D, "Combined Primary and Subspecialty Certification."

### 6. Immunopathology (IP)

- a. Applicants who hold a certificate in anatomic and clinical pathology:

1. One full year of additional supervised training in immunopathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
2. Two additional years of full-time experience in immunopathology or its equivalence under circumstances acceptable to the ABP.

- b. Applicants who hold a certificate in anatomic pathology only or clinical pathology only:

1. Two full years of additional supervised training in immunopathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
2. Four additional years of full-time experience in immunopathology or its equivalence under circumstances acceptable to the ABP.

- c. Applicants who hold a certificate in anatomic pathology only or clinical pathology only plus a certificate of Special Qualification in Blood Banking/Transfusion Medicine, Hematology, Medical Microbiology, or Chemical Pathology:

1. One full year of additional supervised training in immunopathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
2. Two additional years of full-time experience in immunopathology or its equivalence under circumstances acceptable to the ABP.

- d. Applicants seeking combined certification in anatomic pathology or clinical pathology and immunopathology (AP/IP, CP/IP): see Section III.D, "Combined Primary and Subspecialty Certification."

### 7. Medical Microbiology (MMB)

- a. Applicants who hold a certificate in anatomic and clinical pathology, clinical pathology only, or a primary certificate plus a special qualification certificate in infectious disease from another primary medical specialty board of ABMS:

1. One full year of additional training in medical microbiology in a program accredited for such training by the ACGME or approved for such training by the ABP or
2. Two additional years of full-time experience or its equivalence in clinical laboratory medical microbiology under circumstances acceptable to the ABP.

- b. Applicants, other than those described in 7.a, who hold a primary certificate from a primary medical specialty board of ABMS: 2 full years of full-time training in medical microbiology in a program accredited for such training by the ACGME.
  - c. Applicants seeking combined certification in clinical pathology and medical microbiology (CP/MMB): see Section III.D, "Combined Primary and Subspecialty Certification."
8. Neuropathology (NP)
- a. Applicants who hold a certificate in anatomic and clinical pathology, or anatomic pathology only: 2 full years of additional supervised training in neuropathology in a program accredited for such training by the ACGME or approved for such training by the ABP.
  - b. Applicants who hold a certificate in clinical pathology or a primary certificate from another primary medical specialty board of ABMS:
    - 1. One full year of approved training in anatomic pathology in a program accredited for such training by the ACGME or approved for such training by the ABP, plus
    - 2. Two full years of additional supervised training in neuropathology in a program accredited for such training by the ACGME or approved for such training by the ABP.
  - c. Applicants seeking combined certification in anatomic pathology and neuropathology (AP/NP): see Section III.D, "Combined Primary and Subspecialty Certification."
9. Pediatric Pathology (PP)
- a. Applicants who hold a certificate in anatomic and clinical pathology or anatomic pathology only from the ABP or anatomic pathology or general pathology from the Royal College of Physicians and Surgeons of Canada:
    - 1. One full year of additional supervised training in pediatric pathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
    - 2. Two additional years of full-time practice experience in pediatric pathology or its equivalence in a situation offering experience opportunities comparable to those of an accredited or approved training program in pediatric pathology and acceptable to the ABP.
  - b. The pediatric pathology training or experience should occur after the completion of the full training requirements necessary to qualify for certification in AP/CP or AP.

**C. Added Qualification Certification**

All candidates applying for added qualification certification must hold a primary certificate from the ABP.

Credit is not given for training or experience occurring outside the United States and Canada. Also, credit is not given for training in an area of added qualification that was part of the training program leading to the requirements necessary to qualify to sit for the primary examination in AP or AP/CP.

No advanced credit will be given toward the requirements for added qualification certification by the mechanisms described in Section III.A.3, "Advanced Pathology Training Credit Mechanisms."

**1. Cytopathology (CYP)**

- a. Applicants who hold a certificate in anatomic pathology or combined anatomic and clinical pathology:
  - 1. One full year of full-time supervised training in cytopathology in a program accredited for such training by the ACGME or approved for such training by the ABP, or
  - 2. Two years of full-time experience in cytopathology or its equivalence under circumstances acceptable to the ABP until the 1997 examination.
- b. Applicants seeking combined certification in anatomic pathology and cytopathology (AP/CYP): see Section III.D, "Combined Primary and Subspecialty Certification."

**D. Combined Primary and Subspecialty Certification**

Under certain circumstances, special qualification or added qualification training may be arranged in conjunction with the primary training requirements, permitting a candidate to qualify for a combined certificate. All applicants for combined certification must also meet the additional credentialing requirement. (See Section IV, "The Credentialing Year.")

Advanced credit will not be given toward the requirements for combined certification (involving primary training and special or added qualification training) by the mechanisms described in Section III.A.3, "Advanced Pathology Training Credit Mechanisms."

The acceptable combinations of certification and the required training are

1. Anatomic pathology and forensic pathology (AP/FP)—2 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 1 full year of approved training in forensic pathology in a program accredited for such training by the ACGME and 1 additional year of approved training in anatomic pathology or in one of the specialty areas of pathology such as neuropathology, toxicology, or chemical pathology.
2. Anatomic pathology and neuropathology (AP/NP)—2 full years of approved training in anatomic pathology and 2 full years of approved training in neuropathology in a program accredited for such training by the ACGME with adequate experience in diagnostic neuropathology.
3. Anatomic pathology and hematology (AP/HEM)—2 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 2 full years of approved training in hematology in a program accredited for such training by the ACGME.
4. Anatomic pathology and immunopathology (AP/IP)—2 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 2 full years of approved training in immunopathology in a program accredited for such training by the ACGME.
5. Clinical pathology (CP) plus special qualification—3 full years of approved training in clinical pathology in a program accredited for such training by the ACGME plus 1 full year of approved special qualification training in blood banking/transfusion medicine, chemical pathology, hematology, or medical microbiology in a program accredited for such training by the ACGME as defined in Section III.B, "Special Qualification Certification"; or 2 full years of approved training in clinical pathology plus 2 full years of approved special qualification training in blood banking/transfusion medicine, chemical pathology, hematology, immunopathology, or medical microbiology in a program accredited for such training by the ACGME as defined in Section III.B, "Special Qualification Certification."
6. Anatomic pathology and cytopathology (AP/CYP)—3 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 1 full year of approved training in cytopathology in a program accredited for such training by the ACGME or approved for such training by the ABP.

**IV. The Credentialing Year**

The credentialing year requirement of 1 full year is in addition to the required pathology training in an accredited program. It must be taken after having obtained the medical degree.

The ABP considers the most appropriate and, for applicants, the most beneficial approach to meeting this requirement to be 1 full year of full-time, approved clinical training in the United States or Canada (Pathway A). The Board recognizes that such is not always possible and thus offers alternate pathways to meeting the requirement.

The requirement can be met by

- A. One full year of full-time, approved graduate medical education in a transitional year training program or in a clinical area of medicine such as internal medicine, surgery, obstetrics and gynecology, pediatrics, emergency medicine, or family practice, or
- B. One full year of full-time research in pathology or in another clinical discipline, provided that the research was done in the United States or Canada and has clearly defined clinical implications. The guidelines for acceptance of research activity are
1. Research activity must have taken place after the candidate has obtained a recognized medical degree.
  2. The candidate must have a clearly defined investigator role in the research program.
  3. The research must involve patients directly, or materials obtained from patients, or techniques that can be applied directly to the diagnosis of human disease or to the understanding of the basic mechanisms of disease.
  4. Prospective approval of a research program for credentialing credit must be given in writing by the director of the pathology training program.
  5. Credit for research activity prior to entering a pathology training program must be approved by the director of the pathology training program and the ABP. Such research must have occurred in an institution in the United States or Canada, or
- C. One year of training in one of the recognized specialty fields of pathology that includes clinical correlation and patient contact. (This year cannot be used to meet the requirements for both the credentialing year and special or added qualification certification), or
- D. The satisfactory completion of 1 full year of a combination of clinical training, clinical research, or subspecialty pathology training in addition to the required pathology training necessary to qualify for certification in anatomic and clinical pathology, anatomic pathology, or clinical pathology. The training director is responsible for defining and justifying this year of clinical activity to the ABP. In meeting the credentialing year requirement by combinations of pathways A, B, and C, the ABP recommends that the periods of activity be at least 4 months in duration wherever possible. Under certain circumstances, credit toward the credentialing year may be given for a pathology experience if the applicant holds a primary certificate in pathology issued by the independent national certifying body in a country other than the United States or Canada, provided that the certification was by national examination following 4 full years of approved training in pathology.

### Clinical Training Outside the United States and Canada

Under certain circumstances, clinical training taken in countries other than the United States and Canada may be acceptable toward meeting the ABP credentialing year, provided that the following criteria are fully met and validated:

1. The clinical training was taken after obtaining a medical degree acceptable to the ABP.
2. Satisfactory completion of 1 full year of full-time training in clinical medicine in a multidisciplinary training program (internship) or in a training program in internal medicine, pediatric medicine, general surgery, or obstetrics and gynecology.
3. Documentation from the training institution that the program in question has been inspected and approved for graduate medical education.
4. Indication from the director of the clinical training program that the candidate was registered in the program, completed the training satisfactorily, and was the physician of record in the diagnosis and treatment of patients throughout the full 12 months.

5. Recommendation from the pathology program director in regard to the person's request.

The acceptability of clinical training toward meeting the ABP requirements is assessed on an individual basis, and it is imperative that an opinion be obtained from the ABP well in advance of the submission of an application for certification. The amount of advanced credit for clinical training outside the United States and Canada toward the ABP requirements for certification cannot exceed a total of 12 months.

It is the responsibility of the person seeking credit to ensure that all validating items for these criteria are submitted to the ABP for consideration. No assessment of possible credit will be given until all validating and reference information has been received.

### Application for Examination

Requests for application forms must be made in writing to the office of the ABP. Completed original forms should be returned with the required credentials and the application-examination fee. An application cannot be given consideration unless it is accompanied by the application-examination fee.

### Fees

The application-examination fee schedule for 1995 is as follows

Anatomic pathology only	\$1,000
Clinical pathology only	\$1,000
Anatomic pathology portion of combined AP/CP	\$1,000
Clinical pathology portion of combined AP/CP	\$1,000
Combined anatomic and clinical pathology	\$1,200
Special qualification	\$1,200
Added qualification	\$1,200
Anatomic or clinical pathology combined with special qualification or added qualification (both parts taken at one sitting)	\$1,400

The application-examination fee includes a nonrefundable processing fee of \$100. If the different divisions of the AP/CP and the combined primary and special or added qualification examinations are taken at separate sittings, there is a separate examination fee for each sitting. If the candidate fails in the examination, admission to a repeat examination is permitted, but any reexamination must occur within the 3-year period of qualification described under "Qualification Period for Examination." The applicant must pay the examination fee according to the current fee schedule before another examination will be given. If, after having applied for a specific examination, the candidate requests a transfer in writing to a future examination prior to the final filing date, there is a transfer fee of \$100.

In the event of the candidate's illness at the time of the examination, validated by the candidate's attending physician, a major portion of the application-examination fee will be either transferred to the next examination or refunded.

### Vacation, Maternity, and Other Leave

Each institution sponsoring a pathology training program may develop individual sick, vacation, and other leave policies for the resident. However, 1 year of approved training credit toward ABP certification requirements must be 52 weeks in duration and must include at least 48 weeks of full-time pathology training. Furthermore, unused vacation and other leave time may not be accumulated to reduce the overall duration of training.

### Irregular Behavior

In the interest of protecting the integrity of the ABP and its certification examinations, the following irregular behaviors may be sufficient to bar a person from future examinations, to terminate one's

participation in the examination, to invalidate the results of one's examination, to cause the withholding or revocation of one's scores or certificate, or to merit other appropriate action by the Board:

1. The giving or receiving of aid in the examination, as evidenced either by observation or by statistical analysis of the candidate's answers;
2. The unauthorized possession, reproduction, or disclosure of any ABP examination-related materials, including, but not limited to, examination questions or answers, before, during, or after the examination; and/or
3. The offering of any benefit to any agent of the Board in return for any right, privilege, or benefit that is not usually granted by the Board to other similarly situated candidates or persons.

In addition, the Board may withhold a candidate's scores and require that the candidate retake one or more portions of the examination if presented with sufficient evidence that the security of the examination has been compromised, notwithstanding the absence of any evidence of the candidate's personal involvement in such activities.

### Chemical Dependency

Applications for certification from persons who have had a history of chemical dependency as reported to the Board will not be accepted unless the applicant submits documented evidence acceptable to the Board that the applicant (1) has satisfactorily completed the program of treatment prescribed for the applicant's condition and (2) has been drug-free for a period sufficient to indicate recovery. The Board would normally expect this period to be 3 years.

Candidates who have been declared qualified to sit for a certifying examination and who have a current problem of chemical dependency as reported to the Board will not be admitted to examination. Denial of admission to examination may result in the loss of opportunities for examination and, ultimately, in the decision to declare the candidate's application void for failure to complete the requirements for certification within the qualification time period allotted to every candidate.

### Qualification Period for Examination

The ABP does not recognize or use the term "Board eligible" and does not issue statements concerning "Board eligibility." An applicant is declared qualified for examination only after a formal application has been received and approved by the Credentials Committee.

The ABP will permit a candidate who has qualified for examination on the basis of approved training and/or experience to sit for the examination during a period not to exceed 3 years after having been declared qualified to take the examination. When this period has expired, additional periods of qualification for examination will be permitted upon submission of documented evidence that the candidate has obtained further training or experience subsequent to the termination of the period of qualification. This must be in the form of an additional year of approved training in an accredited program or 2 years of experience acceptable to the ABP. The additional training or experience must be in the area of pathology in which the candidate was unsuccessful.

At any time after declaring a candidate qualified for examination, the Credentials Committee, at its discretion, may withdraw such qualification or, as a condition, may require satisfaction by the candidate of specified conditions. In the exercise of its discretion under this regulation, the Credentials Committee shall be entitled to act without reason assigned.

If it is determined that an applicant has falsified information in the application form, the applicant will not be approved for the cer-

tifying examination and must wait a period of 3 years before being permitted to file a new application. The applicant will not be considered qualified to sit for the certifying examination during the 3-year interim.

### Examination Dates and Sites

Examinations are held at the discretion of the Board. The tentative schedules for forthcoming examinations are

#### Anatomic and Clinical Pathology Examinations

May 21, 22, 23, 1996—Chicago, Illinois  
 November 11, 12, 13, 1996—San Diego, California  
 June 9, 10, 11, 1997—Indianapolis, Indiana

#### Examinations for Special and Added Qualification

The examinations for special qualification in chemical pathology, immunopathology, neuropathology, pediatric pathology, and medical microbiology will be given every 2 years; all examinations will take place in Tampa, Florida.

July 8, 1996—CYP  
 July 15, 1996—BB/TM  
 August 19, 1996—Hem  
 September 30, 1996—FP  
 July 7, 1997—IP  
 July 14, 1997—CYP  
 July 28, 1997—BB/TM  
 August 11, 1997—Hem  
 August 18, 1997—PP  
 August 25, 1997—ChP  
 September 8, 1997—FP  
 September 15, 1997—MMB  
 September 22, 1997—NP

#### Dermatopathology Examination

The dermatopathology examination is scheduled separately at a time and place mutually agreed upon by the ABP and the ABD.

The examination in dermatopathology will be given every 2 years. An examination will be given in 1995 and every other year thereafter.

#### Final Filing and Cutoff Dates

The final filing dates for receipt of applications or registrations are as follows:

February 1 for spring examinations  
 April 1 for summer examinations  
 August 1 for fall examinations  
 June 1 for dermatopathology examinations

If the candidate cancels an appearance for the examination after these dates or does not appear for the examination, the entire application-examination fee is forfeited.

### Issuance of Certificate

Upon satisfactorily passing the appropriate examination(s), a candidate will be issued a certificate by the ABP in those fields of pathology for which the ABP accepted the credentials. Thus, a candidate who is qualified for the combined examination in anatomic and clinical pathology, having fulfilled the minimum pathology requirement of 48 months and the credentialing clinical requirement of 12 months, will receive a certificate only after both parts (anatomic and clinical pathology) of the examination have been passed.

Candidates qualified for examination in anatomic or clinical pathology and a specialty area of pathology, and claiming qualification on the basis of the required training in each area, will receive a certificate only after each of the examinations has been passed.

A candidate who has fulfilled all the prerequisites, including the minimal requirement of 36 months of approved training in

anatomic pathology only or clinical pathology only, plus the 12 credential months of activity, will receive a certificate after passing the examination in anatomic pathology or in clinical pathology. Candidates qualified for combined AP/CP and who pass only the AP portion or the CP portion of the examination may request an application for the consideration of the awarding of a single certificate. Consideration will be given only to candidates who meet the requirements for the single certificate.

If a candidate's certificate is lost or destroyed, the ABP will issue a duplicate certificate upon written request and justification, together with the necessary engraving and handling charge of \$50.

### Revocation of Certificate

In its discretion, the ABP may revoke a certificate for due cause, including, but not limited to, the following causes:

1. The diplomate did not possess the required qualifications and requirements for examination, whether or not such deficiency was known to the ABP or any committee thereof prior to examination or at the time of the issuance of the certificate, as the case may be;
2. The diplomate made a material misstatement or withheld information in his or her application or in any other representation to the ABP or any committee thereof, whether intentional or unintentional;
3. The diplomate engaged in irregular behavior in connection with an examination of the ABP (as described under "Irregular Behavior"), whether or not such practices had an effect on the performance of the candidate on an examination;
4. The diplomate was convicted by a court of competent jurisdiction of any felony or misdemeanor involving moral turpitude and, in the opinion of the ABP, having a material relationship to the practice of medicine; or
5. There has been a limitation or termination of any right of the diplomate associated with the practice of medicine in any state, province, or country, including the imposition of any requirement of surveillance, supervision, or review by reason of violation of a medical practice act or other statute or governmental regulation, disciplinary action by any medical licensing authority, entry into a consent order, or voluntary surrender of license.

Revocation of certificates shall be governed by procedures set forth in the ABP Bylaws as amended from time to time.

### Update of ABP Certificate

The ABP will permit diplomates of the Board to retake the examination in the area of pathology in which they are already certified for the purpose of updating their certificate(s). The application-examination fee and the passing requirements are the same as for initial candidates. Successful candidates will be issued new, currently dated certificates.

### Limitation of SQ/AQ Certificates

As a condition of admission to an examination for special or added qualification in pathology, an individual holding two or more certificates of special competence, special qualification, and/or added qualification shall surrender a sufficient number of certificates to reduce their number to one. In the event that the individual fails the examination and the period of Board qualification terminates, the surrendered certificate(s) shall be restored. This action does not include certificates of Special Competence (Qualification) in Radioisotopic Pathology or in Dermatopathology.

### Candidates With Disabilities

1. Policy. The ABP supports the intent of the Americans with Disabilities Act. The Board will endeavor to provide qualified Board

candidates who have documented disabilities with the necessary auxiliary aids and services that do not fundamentally alter the measurement of the skills or knowledge the Board examination is intended to test or result in an undue burden.

2. Documentation of Disability. Board candidates requesting an accommodation due to a disability must provide documentation of the disability. Such documentation should include a specific diagnosis of the disability and include medical records or other documentation of the diagnosis of the disability by an appropriate medical professional. The ABP reserves the right to verify the disability and to request additional documentation as necessary. All required documentation acceptable to the Board must be received in the Board office no later than the application deadline.
3. Type of Accommodation. Board candidates requesting an accommodation must identify the type of accommodation requested. The Board, however, will determine the type of accommodation to be made for a candidate with a verified disability. Accommodations that fundamentally alter the measurement of skills or knowledge that the examination is intended to test will not be offered.
4. Application Deadline. Candidates requesting accommodations are urged to contact the Board as far in advance of the examination as possible. Requests for accommodation and documentation of disability must be received no later than the application deadline.

### Appeals Procedure

An individual who has received an unfavorable ruling regarding qualification to take the examination may initiate an appeal of such determination by making a written request for reconsideration to the ABP office within 90 days of the date such ruling was mailed.

A candidate who fails a certifying examination may request that the examination be rescored to verify the accuracy of the results as reported. Such request must be made in writing within 90 days of the date of mailing of the examination results to the candidate and must be accompanied by the fee of \$50 per certifying examination or part thereof. There shall be no further appeal of failure of an examination.

# American Board of Pediatrics

Catherine D DeAngelis, MD, Chairman, Baltimore, Maryland  
 Herbert T Abelson, MD, Chairman-Elect, Seattle, Washington  
 William L London, MD, Secretary-Treasurer, Durham, North Carolina  
 James A Stockman III, MD, President, Chapel Hill, North Carolina  
 Walter W Tunnessen, Jr, MD, Senior Vice President, Chapel Hill, North Carolina  
 William F Balistreri, MD, Cincinnati, Ohio  
 John G Brooks III, MD, Lebanon, New Hampshire  
 Harlan R Gephart, MD, Kirkland, Washington  
 M Douglas Jones, Jr, MD, Denver, Colorado  
 Robert P Kelch, MD, Iowa City, Iowa  
 Sarah S Long, MD, Philadelphia, Pennsylvania  
 Julia A McMillan, MD, Baltimore, Maryland  
 Paul V Miles, MD, Twin Falls, Idaho  
 Warren W Quillian II, MD, Coral Gables, Florida  
 Sara Rosenbaum, JD, Washington, District of Columbia  
 Jon B Tingelstad, MD, Greenville, North Carolina  
 Grace S Wolff, MD, Miami, Florida

*(These criteria are subject to change. All applicants are advised to consult the American Board of Pediatrics [ABP] to ascertain any changes that may have been made, especially before undertaking any variations in the training program.)*

## Requirements for Admission to Examination

An applicant (*Note:* The term candidate will be synonymous with applicant throughout the document) for examination for certification must meet the following general requirements:

- The applicant must be a graduate of an accredited medical school in the United States or Canada or of a foreign medical school that is listed by the World Health Organization (WHO).
- For a new applicant, a valid (current), unrestricted license to practice medicine in one of the states, districts, or territories of the United States or a province of Canada is a requirement for admission to the examination, but it may be submitted separately from the initial application.

For an applicant who is re-registering, a copy of the license must be on file in the ABP office before re-registration material is sent unless a waiver of the requirement has been granted.

If an applicant has any action pending regarding the right to have an unrestricted license to practice medicine, admission to the examination may be denied.

- The applicant must complete 3 years of pediatric training in programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) on the advice of the Residency Review Committee for Pediatrics (RRC) (*Note:* Hereafter, accreditation will refer to accreditation by the RRC) or in programs in Canada accredited by the Royal College of Physicians and Surgeons of Canada (RCPSC).
- The ABP requires program directors to verify satisfactory completion of training and to evaluate the acceptability of the applicant as a practitioner of pediatrics.

## Graduation from Medical School

The applicant must be a graduate of a medical school that has been accredited by the Liaison Committee on Medical Education (LCME) in the United States, the RCPSC in Canada, or the American Osteopathic Association (AOA) in the United States.

An applicant who is a graduate of a medical school that has not been accredited by the LCME, RCPSC, or AOA, but is listed by WHO, may apply for examination if he or she has a standard certificate either from the Educational Commission for Foreign Medical Graduates (ECFMG) or the Medical Council of Canada.

The graduate of a foreign medical school must submit a photocopy of the medical school diploma showing the medical degree and the date it was awarded. A certificate showing that the applicant has passed a final examination is not acceptable.

## License Requirement

The ABP awards certificates to those individuals who have met the eligibility requirements, have passed the examination, and have met the following license requirement:

The applicant must have a valid, unrestricted license to practice medicine in one of the states, districts, or territories of the United States or a province of Canada or unrestricted privileges to practice medicine in the United States armed forces. A copy of the valid license must be received by October 4, 1996.

Foreign nationals practicing abroad may be exempted from this policy upon presentation of proof of licensure equivalency in the country in which they reside. This proof must be received by October 4, 1996.

The license requirement may be waived if, during the academic year 1996-1997, the applicant is in pediatric subspecialty training, non-pediatric specialty training, or is serving as a chief resident (PL-4) in a state, province, or district in which the medical licensing board does not require an unrestricted license. In order to obtain a waiver, the program director must submit written confirmation of the applicant's training to the ABP by October 4, 1996.

An applicant who takes the certifying examination, but who does not meet the October 4, 1996, deadline for licensure, will have the examination invalidated, and he/she will be disapproved, will not be board eligible, and will not receive a refund of the examination fee.

## Training Requirements

An applicant must complete 3 years of postgraduate pediatric training in programs accredited by the RRC or, in Canada, by the RCPSC. (*Note:* The training requirements for individuals who graduated from medical school before July 1, 1978, are different from these requirements. Such applicants should contact the ABP for details.) The training curriculum must be compatible with the Special Requirements for program accreditation, which are published annually in the *Graduate Medical Education Directory*. During this period of training, the applicant is expected to assume progressive responsibility for the care of patients. Credit will not be given for training completed before the medical degree is awarded.

A year of supervisory experience must be an integral part of the total 3-year program; this year must include 6 months of direct supervisory responsibility in general pediatrics.

The ABP recognizes four levels of pediatric training (PL-1 through PL-4) and defines these levels as follows:

PL-1: The first postgraduate year in general comprehensive pediatric training in an accredited program.

PL-2: The second postgraduate year in general comprehensive pediatric training in an accredited program following PL-1, but with increased responsibility for patient care and for the supervision of junior house staff and medical students.

PL-3: The third postgraduate year in general comprehensive pediatric training in an accredited program, but with increasing responsibility for patient care and supervision of junior house staff and medical students.

PL-4: The fourth postgraduate year in general pediatric training in an accredited program, when the applicant is designated as a chief resident.

## Credit for Training in Accredited Programs Other Than Pediatrics

A physician transferring to pediatric residency training from another accredited residency, eg, family practice, internal medicine, transitional year, must correspond with the ABP to determine whether partial credit may be awarded for this training. Requests for credit must be submitted either by the candidate or the pediatric residency program director before the candidate enters pediatric residency training.

## Credit for Pediatric Training in Non-Accredited Programs

The ABP has established requirements for a physician who has had at least 3 years of pediatric training in programs not accredited by the RRC or RCPSC, ie, foreign training or training in accredited osteopathic programs in the United States. The interested physician or the department chairman/program director must write to the ABP before training begins to be sure that the physician meets the requirements.

## Special Alternative Pathway

The ABP recognizes that occasionally there will be an exceptional candidate who should be given special consideration to begin subspecialty training after the completion of the PL-2 year of general comprehensive pediatrics. Before the start of the PL-2 year, the department chairman or program director must petition that a resident be considered for the Special Alternative Pathway (SAP), indicating that the candidate has superior overall competence. The subspecialty program director must also provide a letter outlining the clinical and research training. In addition, such candidates will be required to take a screening examination. The application material and the score on the screening examination will be reviewed by the Credentials Committee. An applicant who is approved for the SAP may not take the certifying examination until all training (no less than 5 years) is completed.

## Special Programs

### Medicine/Pediatrics (Med/Ped) Program

A special agreement exists with the American Board of Internal Medicine (ABIM) whereby an applicant may fulfill the training requirements of both the ABP and ABIM by completing 2 years of accredited training in general comprehensive pediatrics and 2 years of accredited training in general comprehensive internal medicine. The 4 years should be completed in the same combined training program. Exceptions must be approved by both the ABP and the ABIM. Continuity clinics in each specialty must be provided throughout the 4 years. Guidelines for combined training have been approved by both the ABP and ABIM and are available by contacting either office. A list of institutions offering combined programs is published in the *Graduate Medical Education Directory*. An applicant may not take the certifying examination of the ABP until all training has been completed.

### Pediatrics/Neurology Program

A special agreement exists with the American Board of Psychiatry and Neurology (ABPN) whereby an applicant who completes at least 2 years of accredited training in general comprehensive pediatrics and the neurology training necessary to meet the requirements for certification in neurology with special qualifications in child neurology fulfills the training requirements of both the ABP and the ABPN. An applicant may not take the certifying examination of the ABP until all training has been completed.

### Pediatrics/Physical Medicine and Rehabilitation Program

A special agreement exists with the American Board of Physical Medicine and Rehabilitation (ABPMR) whereby a physician interested in pediatric rehabilitation can qualify for admission to the certifying examinations of both the ABP and ABPMR. The residency training can be completed in 5 years in programs accredited by the RRCs of the ABP and the ABPMR. Proposed programs must be submitted to the ABP and ABPMR for approval before a candidate can be accepted into the joint training program. All training should be completed at one academic institution; any deviation must be approved prospectively by both the ABP and the ABPMR. Guidelines for combined training have been approved by both the ABP and the ABPMR, and are available by contacting either office. An applicant may not take the certifying examination of the ABP until all training has been completed.

### Pediatrics/Emergency Medicine Program

A special agreement exists with the American Board of Emergency Medicine (ABEM) whereby an applicant may fulfill the training requirements of both the ABP and the ABEM by completing joint training in 5 years. All 5 years should be completed in the same combined training program. Exceptions must be approved by both the ABP and the ABEM. Training programs must be approved prospectively by both the ABP and the ABEM. Guidelines for combined training have been approved by both the ABP and the ABEM and are available by contacting either office. They were published in *Annals of Emergency Medicine*. 1991; 20:98-100. An applicant may not take the certifying examination of the ABP until all training has been completed.

### Pediatrics/Psychiatry/Child and Adolescent Psychiatry Program

The ABP, the American Board of Psychiatry and Neurology (ABPN), and the Committee on Certification in Child and Adolescent Psychiatry have formed a committee to accredit programs that will satisfy the training requirements for certification in all three areas. Training includes 24 months of general comprehensive pediatrics, 18 months of child and adolescent psychiatry, and 18 months of adult psychiatry. Physicians pursuing training in these programs may take the certifying examination of the ABP in the fall of the fifth year of training, provided that all pediatric training (except continuity clinics) is completed by the date of the examination. Credit for training via this route may be obtained only by training in one of these programs. Further information concerning these combined training programs may be obtained by contacting the ABPN, 500 Lake Cook Rd/Ste 335, Deerfield, IL 60015, 708 945-7900.

## Training Programs

The ABP approves applicants for admission to its certifying process. The ABP does not accredit training programs. Information regarding accreditation should be addressed to Executive Secretary, Residency Review Committee for Pediatrics, 515 North State St, Chicago, IL 60610.

## Graduate School Courses

A fundamental concept of the ABP is that a residency training program should provide for properly organized, progressive responsibility for the care of children. The ABP believes that this can be accomplished through continuity of clinical experience under the supervision of attending physicians who are responsible for the care of these children. The substitution of a formal graduate or post-graduate school course that does not carry the essential ingredient of responsibility for patient care is inconsistent with this principle. Accordingly, the ABP will not accept such courses in fulfillment of its training requirements.

## Military Service

Military assignments will not be accepted in lieu of required training unless served as a resident in a military hospital that is accredited by the RRC.

## Special Situations

The ABP recognizes that situations may arise that are not explained by the preceding information. A physician may have worked in a pediatric field for many years yet be deficient in the formal training requirements for examination, or a physician may have completed specialized training not explained in the above requirements. In such cases, the individual should present his/her credentials to the ABP, who may ask the Credentials Committee to review them and to decide whether permission should be given to enter the certification process.

## Tracking and Evaluation

The ABP regards the evaluation of trainee competency as a continuum that begins during training and concludes with the certifying examination following formal training. The ABP believes that the program director(s) and faculty play significant roles in the certification process and are the keys to a responsible system of determining which applicants should be admitted to the certifying examination. The program director is able to provide a meaningful overview of the resident's professional competence, especially in skills such as clinical judgment, moral and ethical behavior, professional attitudes and behavior, procedural skills, and humanistic qualities.

The ABP resident tracking and evaluation program is part of the certifying process of the ABP. The program director is required to indicate annually whether each resident's performance is satisfactory, marginal, or unsatisfactory. If a resident's performance is unsatisfactory, the resident will not receive credit for that period of training. A marginal evaluation indicates a need for remediation. If a resident receives a marginal rating for 2 consecutive years of training (eg, PL-1 and PL-2), he or she will not receive credit for the second marginal year and will have to repeat that entire year of training. If a resident receives a marginal rating for 1 year (eg, PL-1) and receives a satisfactory rating for the following year (eg, PL-2), then both the marginal year and the satisfactory year will be considered to be satisfactory. The resident who receives a marginal rating in the final year of training (eg, PL-3) will be reviewed by the ABP Credentials Committee before being allowed to take the certifying examination in general pediatrics.

The tracking system also identifies residents who transfer from one program to another or to a new specialty and ensures that the new program director recognizes those residents who need remediation.

## Verification of Training by Directors of Pediatric Training Programs

Program directors will be sent Verification of Clinical Competence Forms for residents in their last year of training. (*Note:* The form will be sent to the program directors of pediatrics/psychiatry/child and adolescent psychiatry programs for residents in their fourth year of training.) The ABP requires the program director to verify completion of training and to sign either Statement A or Statement B on the Verification of Clinical Competence Form. Statement A is as follows: "I certify that the above-named applicant has demonstrated the necessary attitudes, knowledge, clinical judgment, technical skills, and interpersonal skills and is judged to be fully prepared for independent responsibility as a general pediatrician; to my knowledge he or she has moral and ethical integrity. The applicant is recommended for examination."

In recommending an applicant for the certifying examination, a program director should keep in mind the definition of a qualified applicant as determined by the ABP:

An applicant shall demonstrate the following abilities as they pertain to infants, children, and adolescents:

1. Assessment of the clinical issues and formulation of a management plan for any medical or health maintenance problem;
2. Execution of the management plan with the patient and family, without further medical consultation, for all common problems of disease and health maintenance and for all medically life-threatening situations;
3. Consultation, when appropriate, with physicians and other professionals regarding common problems and life-threatening situations; and
4. Arrangement for help for the patient and knowledge of what to anticipate from the consultant, being prepared personally to guide further management with assistance, when appropriate, for unusual problems requiring subspecialty, surgical, or other specialized skills.

Each applicant must have verification of training and verification of clinical competence on file in the ABP office to be admitted to the certifying examination. The applicant is responsible for ensuring that the program director submits all the required documents by the appropriate deadline.

When an applicant has not attained the appropriate knowledge and skills, the program director should sign Statement B on the Verification of Clinical Competence Form. By signing this statement, the program director is recommending that the applicant not be admitted to the certifying examination.

If an applicant's training is not verified and/or he or she is not recommended for admission to the certifying examination, the applicant will be required to complete an additional period of training in general comprehensive pediatrics in an accredited program in the United States or Canada before reapplying to the ABP. The director of the program where the additional training occurred *must* complete a separate Verification of Clinical Competence Form. Alternatively, the applicant may appeal to the Credentials Committee of the ABP. The Credentials Committee will gather additional information about the applicant and decide if permission to take the examination should be given. If the applicant appeals the decision, he or she will be asked to submit copies of certificates of satisfactory completion of training. If the applicant has been denied such certificates, then admission will be refused on the basis of incomplete training. However, possession of such certificates will not automatically admit the person to the ABP's certification process. Most training certificates attest to the achievement of a minimal level of competence or to the fulfillment of an employment contract. Therefore, the program director's statement on the Verification of Clinical Competence Form will take precedence over the certificate from the hospital. The ABP must have the program director's assurance that an applicant meets the standards expected of a certified pediatrician. Program directors are urged not to issue certificates of successful completion of training when the resident is deemed not to have met those standards.

The duration of training is 36 months. Absences in excess of 3 months, eg, vacation, sick leave, maternity leave, must be made up unless the program director believes that an absence of more than 3 months is justified, in which case a letter of explanation must be sent for review by the Credentials Committee.

The program director is required to provide further information about the applicant. The program director is asked to evaluate the applicant on a nine-point scale in the following areas: gathering data by history, by physical examination, and by laboratory studies; assessing data and arriving at a diagnosis; managing problems and

maintaining health; interpersonal relationships with patients and families; interpersonal relationships with other members of the health team; and work habits and personal qualities.

The program director is asked to rate the applicant's overall clinical competency by indicating which of the following phrases best describes the applicant's ability to care for children in the United States or Canada. In these phrases, the word "manage" is defined as identifying the nature of the problem, determining methods of resolving or alleviating the problem, and carrying out management plans, including the appropriate and timely use of consultants.

- 1 Unable to manage many pediatric problems, including the most routine ones
- 2
- 3 Able to manage only the most routine problems of pediatrics
- 4
- 5 Able to manage the common problems of pediatrics adequately
- 6
- 7 Able to manage most pediatric problems in an effective way
- 8
- 9 Able to manage almost any pediatric problem in a highly effective manner

If the program director signs Statement A but gives a rating of 3 or less in any single area or a rating of 4 or less for overall clinical competency, the Credentials Committee requires that the program director submit documentation with the completed Verification of Clinical Competence Form. If the Credentials Committee concludes that the low ratings are substantiated, the applicant must complete an additional period of training in general comprehensive pediatrics in an accredited program either in the United States or Canada before reapplying to the ABP. The director of the program where the additional training occurred must complete a separate Verification of Clinical Competence Form. Alternatively, the applicant may appeal to the Credentials Committee.

Program directors are encouraged to have all residents in their programs take the In-training Examination (ITE). The results of the ITE can provide valuable information for both the resident and the program.

To be compliant with the general requirements for program accreditation established by the ACGME, the program director and the faculty must develop evaluation procedures for assessment of physician performance. Examples are medical record audits, rating scales for assessment of work habits, observational checklists for assessment of technical skills, oral examinations, and consumer questionnaires.

### The Certifying Examination

The certifying examination is given once a year in the fall in a number of locations throughout the United States.

The examination is a 2-day examination. Each day there are two sessions, each of 3 hours' duration, with a luncheon break between sessions. The 1996 certifying examination will be administered October 8-9. Applicants for the certifying examination must complete their training by the date of the examination.

The ABP does not sponsor or maintain records about any courses that claim to be review courses in preparation for its certifying examinations, nor does the ABP track CME credits.

The content of the examination for certification is appropriate for the practice of general comprehensive pediatrics. Emphasis is placed on practical aspects; however, good practice is founded on sound scientific knowledge, and the candidate should be prepared to demonstrate an understanding of basic science.

The examination consists of multiple-choice questions. Examples of the types of questions to be used are mailed to registered candidates before the administration of each examination. Some ques-

tions included in the examination are for experimental purposes only. These questions will not contribute to the score.

The validity of the performance of candidates on the certifying examination of the ABP is secured by every means available. The ABP should be contacted in the event of irregular behavior such as giving or obtaining unauthorized information or aid before, during, or after the examination or offering financial or other benefit to a proctor, employee, or agent of the ABP.

Each candidate's examination score will be reported to his/her general pediatric program director. Periodically, the ABP conducts research utilizing data it has compiled; the candidate's anonymity is guaranteed in all such cases.

For failing candidates who are concerned that their answer sheets were not scored correctly, hand scoring is available for a fee of \$60. However, candidates are not encouraged to request this service since neither mechanical nor computer errors have ever been found. Requests should be made in writing accompanied by check or money order. Hand scoring is available for 11 months following the date of the examination.

### Application, Registration, and Fees

Application material for admission to the certifying examination of the ABP may be obtained by contacting the ABP office. Residents in their last year of training are sent an application through their residency programs in early December; residents should contact the ABP office if the application is not received by December 20. (*Note:* Residents in a pediatrics/psychiatry/child and adolescent psychiatry program will be sent the material in December of the fourth year of training.)

For new applicants, the regular registration period begins December 1, 1995, and extends through February 29, 1996. An application postmarked by February 29 must be accompanied by the application fee of \$1,155. Late registration for new applicants begins March 1 and extends through April 30, 1996. It is the applicant's responsibility to be aware of and to meet registration deadlines. A non-refundable penalty fee of \$225 is required for an application postmarked between March 1 and April 30; thus, the late registration fee is \$1,380. New applications that are postmarked after April 30, 1996, will not be accepted.

Regular re-registration begins February 15 and extends through April 30, 1996. Re-registration material postmarked by April 30 must be accompanied by the re-registration fee of \$1,055. Late re-registration will begin May 1 and extend through May 31, 1996. A non-refundable penalty fee of \$225 is required for all re-registration material postmarked between May 1 and May 31, 1996; thus, the late registration fee is \$1,280. Re-registration material that is postmarked after May 31, 1996, will not be accepted.

Many deadlines set by the ABP are postmark deadlines. If there is a discrepancy between a metered postmark and an official US Postal Service postmark, the latter will be considered official.

Acknowledgment of receipt of the application will be sent promptly. The ABP should be contacted if acknowledgment of receipt is not received within 30 days of submission of the application. Applications received by the deadlines will be processed and evaluated, and the ABP will request directors of general pediatric training programs to verify successful completion of training. Applicants who meet the training requirements of the ABP and who are recommended by their program director(s) will be accepted and registered for the certifying examination. An applicant who does not receive notification of the acceptance or rejection of his/her application by August 10 should contact the ABP to inquire about the status of the application.

The cost of certification includes the following fees, payable only in United States (US) dollars:

**Fees for New Applicants**

Processing and Evaluation	\$330
Examination	\$825
Total New Candidate Fees	\$1,155
Late Registration	\$1,380

**Fees for Re-registrants**

Processing and Evaluation	\$230
Examination	\$825
Total Re-registrant Fees	\$1,055
Late Registration	\$1,280

Applicants can pay the total application fee by credit card using either Visa or MasterCard.

For applicants not using US banks, the fee must be paid in US dollars using one of the following vehicles: (1) money order, (2) cashier's check, or (3) certified check. To be accepted for payment, these vehicles must be payable through a US bank.

Applicants should retain their acknowledgment letters and cancelled checks as proof of payment. No other receipts will be issued.

If an applicant is not approved to take the ABP certifying examination, the \$825 examination fee will be refunded. Neither the processing and evaluation fee nor the penalty fee are refundable. If the applicant wishes to pursue certification in the future, he or she will be required to complete a new application and submit the full fee again.

After the ABP has accepted an application, the applicant is expected to take the next certifying examination offered. However, an applicant may withdraw by submitting a written notice postmarked no later than August 15, 1996. The applicant will be issued a refund of the examination fee (\$825). An applicant whose withdrawal letter is postmarked after August 15 or who does not appear for the examination will forfeit all fees paid and will be required to submit a re-registration fee before being admitted to a future examination. Re-registration material will be sent to approved applicants during the re-registration period for the next examination.

The names of certified pediatricians, but not their scores, will be sent to appropriate organizations, directories, and journals. The certificate will reflect the candidate's degree at the time of graduation from medical school, eg, MD, MB, BS, or DO. Degrees awarded either before or after graduation from medical school will not be included on the certificate.

The ABP reserves the right to withhold permission for applicants to take its examinations and/or certification in the event of circumstances demonstrating that an applicant is not capable of performing the role of physician and advocate for infants, children, and adolescents. In such instances, the applicant will be notified; the applicant may appeal the decision to the Credentials Committee of the ABP.

**Certification in the Pediatric Subspecialties**

**Subspecialty Certificates**

The ABP issues a Certificate of Special Qualifications in the following subspecialties: adolescent medicine, pediatric cardiology, pediatric critical care medicine, pediatric emergency medicine, pediatric endocrinology, pediatric gastroenterology, pediatric hematology-oncology, pediatric infectious diseases, neonatal-perinatal medicine, pediatric nephrology, pediatric pulmonology, and pediatric rheumatology.

The ABP, in conjunction with the ABIM and their Conjoint Board, the American Board of Allergy and Immunology (ABAI), offers a Certificate of Added Qualifications in clinical and laboratory immunology. Further information may be obtained by contacting the ABAI, University City Science Center, 3624 Market St, Philadelphia, PA 19104.

A Certificate of Added Qualifications in sports medicine is offered by the American Board of Family Practice (ABFP), the ABEM, the ABIM, and the ABP. Further information may be obtained by contacting the ABP.

A Certificate of Added Qualifications in medical toxicology is offered by the ABEM, the ABP, and the American Board of Preventive Medicine. Further information may be obtained by contacting the ABP.

 Daniel B Magilav, MD, Cambridge, Massachusetts  
 Carol A Wallace, MD, Seattle, Washington  
 Peter B Dent, MD, Medical Editor, Hamilton, Ontario, Canada

The RRC currently reviews and accredits pediatric subspecialty programs in all the certified subspecialties except adolescent medicine, pediatric emergency medicine, pediatric infectious diseases, and pediatric rheumatology. When the Special Requirements for Training Programs in these latter subspecialties have been ap-

proved, the RRC will accredit training programs in these fields. A list of accredited programs is published in the *Graduate Medical Education Directory*.

### **General Criteria for Certification in Pediatric Subspecialties**

In addition to the training requirements, which are specific to each of the pediatric subspecialties, the following are required of candidates seeking certification in the pediatric subspecialties of adolescent medicine, cardiology, critical care medicine, emergency medicine, endocrinology, gastroenterology, hematology-oncology, infectious diseases, neonatal-perinatal medicine, nephrology, pulmonology, and rheumatology. Each candidate must be familiar with specific subspecialty training requirements as well as the policies stated in the current Booklet of Information.

#### **I. General Eligibility Criteria**

##### *A. Certification by the American Board of Pediatrics (ABP)*

An applicant must take and pass the certifying examination in general pediatrics and must maintain a valid certificate before being permitted to take a pediatric subspecialty certifying examination.

##### *B. Licensure*

An applicant must have a valid, unrestricted license to practice medicine in any of the states, districts, or territories of the United States or provinces of Canada in which he/she practices or have unrestricted privileges to practice medicine in the US armed forces. A copy of the unrestricted license must accompany the application material. Foreign nationals practicing abroad may be exempted from this policy upon presentation of proof of licensure equivalency in the country in which they reside.

##### *C. Verification of Training*

An applicant will be asked to list the program(s) where fellowship residency training occurred as well as the name(s) of the program director(s). The ABP will send a Verification of Competence Form to the program director(s) for completion. (*Note:* For new subspecialties, alternatives to the usual training requirements, such as practice experience, will be acceptable for a limited period as criteria for admission to the examination. Candidates should refer to the specific subspecialty eligibility criteria for details.) The role of the program director in the certification process is to verify completion of training and to sign the following statement on the Verification of Competence Form:

"I certify that the above-named applicant has demonstrated the necessary attitudes, knowledge, clinical judgment, research abilities, technical skills, and interpersonal skills and is judged to be fully prepared for independent responsibility as a pediatric subspecialist; to my knowledge, he/she has moral and ethical integrity. The applicant is recommended for examination."

An applicant must have the Verification Form(s) on file at the ABP in order to be admitted to the pediatric subspecialty examination. If an applicant's training is not verified and/or he/she is not recommended for admission, the applicant will be required to complete additional subspecialty residency training before reapplying. Alternatively, the applicant may appeal to the Credentials Committee of the Subboard. The Credentials Committee will gather additional information about the applicant and decide if he/she should be approved to take the examination. For an appeal, the applicant will be asked to submit copies of certificates of satisfactory completion of training. If the applicant has been denied such a certificate, then admission will be refused on the basis of incomplete training. A certificate of completion of training, as a basis for appeal, will be superseded by the program director's statement on the Verification of Competence Form because the certificate usually attests to the

fulfillment of an employment contract or to the achievement of a minimal level of competence.

No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the general pediatric residency years (PL-1, 2, 3) or as a chief resident (PL-4).

An applicant seeking certification in another pediatric subspecialty or a non-ABP specialty (eg, allergy/immunology) on the basis of practice and/or training may not apply the same period toward fulfillment of these requirements.

#### *D. Principles Regarding the Assessment of Meaningful Accomplishment in Research*

1. Research experience is an essential part of the training of subspecialists. The general requirements for research in pediatric subspecialties approved by the ACGME for program accreditation must be met as evidence of research experience. These are as follows: "Within the institution, the subspecialty trainee must be exposed to, and take part in, research projects that are conducive to a questioning attitude, to protocol development, and to critical analysis of new therapies and of medical literature. Research experience should begin in the first year and continue for the entire period of training in order to allow adequate time for the development of research skills and to bring a project to completion. The trainees must help design, conduct, evaluate, and prepare for publication a clinical or laboratory research project in the subspecialty area. They should also be required to conduct research seminars and prepare a written report of their research activities. Instruction in related basic sciences and associated disciplines, such as research design, biostatistics, and epidemiology, must be offered through courses, workshops, and seminars."
2. Additional evidence of meaningful accomplishment in research must be submitted, including one or more of the following:
  - a. First author of a research paper accepted for publication in a peer-reviewed journal deemed acceptable by the Subboard.
  - b. A research progress report (signed by both the applicant and mentor) no more than five pages in length to include (a) a statement of hypothesis, (b) delineation of methodology, (c) results and analysis, and (d) significance of the research. An explanation must be provided by the program director/mentor if a research paper has not been submitted for publication within 2 years of completion of fellowship training.
  - c. Submission of a research grant proposal that has been approved by an extramural organization with a critical review process acceptable to the Subboard. Include a copy of the approval letter.
  - d. A PhD degree in a field of science.
  - e. A thesis accepted as partial fulfillment of the requirements for a postgraduate degree in a field relevant to the subspecialty. The thesis or a research progress report as in 2(b) must be submitted for review.
  - f. A first-authored research paper that has been submitted but not yet accepted for publication in a peer-reviewed journal deemed acceptable by the Subboard. A letter confirming the submission must be included as well as a research progress report summarizing the findings.
3. The program director is responsible for notifying all residents of the research requirements necessary for certification upon entry to the subspecialty training program. Furthermore, in the description of the candidate's research performance on the Verification of Competence Form, the program director must provide a detailed description of the experiences based on the acceptable evidence.
4. Subspecialty certifying examinations will include questions on research design, analysis, and interpretation.

5. The research should be performed in a laboratory that best suits the candidate's interests. For example, the ABP is strongly supportive of the Pediatric Scientist Development Program, which has been initiated by Association of Medical School Pediatric Department Chairmen (AMSPDC).

#### **II. Special Requirements for Training Programs**

Special Requirements for Training Programs in pediatric cardiology, pediatric critical care medicine, pediatric endocrinology, pediatric gastroenterology, pediatric hematology-oncology, neonatal-perinatal medicine, pediatric nephrology, pediatric pulmonology, and pediatric rheumatology have been approved by the ACGME or by the RCPSC. Special Requirements for Training Programs in adolescent medicine, pediatric emergency medicine, and pediatric infectious diseases have not yet been approved by the ACGME. Copies of the Special Requirements and lists of accredited programs are available from the office of the Residency Review Committee for Pediatrics, 515 N State St, Chicago, IL 60610 or the Office of Training and Evaluation, the Royal College of Physicians and Surgeons of Canada, 74 Stanley, Ottawa, Ontario, K1M 1P4. This information is published in the *Graduate Medical Education Directory* or in the RCPSC booklets of general information.

#### **III. Training Leading to Dual Pediatric Subspecialty Certification**

If an individual is certified in one subspecialty, he/she can become eligible to take another subspecialty examination with 2 years of training, at least 1 year of which must be broad-based clinical training.

#### **IV. Subspecialty "Fast Tracking"**

A subspecialty fellow who is believed to have demonstrated meaningful accomplishment in research, either before or during residency, may have a part of the training waived. Examples might include a PhD degree or being first author of a research paper in a peer-reviewed journal. The subspecialty program director may ask the Subboard to waive the research requirements and to reduce the time of subspecialty training by as much as 1 year. This petition must be made either before the beginning of training or during the first year of training. A candidate for this pathway must have completed 3 core years of pediatrics in an accredited program in the United States or Canada and would not have the option of the Special Alternative Pathway. Furthermore, a subspecialty fellow who receives a waiver by the Subboard must complete at least 2 years of training in the subspecialty with at least 1 year of broad-based clinical training. Shortening of training by as much as 1 year may be approved by the credentials committee for a candidate with extensive clinical experience. The candidate must meet the research requirements.

#### **Eligibility Criteria for Certification in Adolescent Medicine**

The ABP has established a procedure for certification in adolescent medicine. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

##### **I. Admission Requirements**

For admission to the examination, an applicant must have completed one of the following to qualify:

##### *A. Training*

A subspecialty fellow entering adolescent medicine training before January 1, 1995, may apply for admission on the basis of completion of 2 years of subspecialty fellowship training in adolescent medicine.

Three years of full-time broad-based fellowship training in adolescent medicine is required of a fellow entering training on or after

January 1, 1995. The period of training must be at least 33 months. Extended absences, whether for vacation, maternity leave, illness, etc, must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow beginning adolescent medicine training on or after January 1, 1995, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. Verification of meaningful accomplishment in research will not be required for individuals who began training before January 1, 1995.

A fellow beginning part-time training after January 1, 1995, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those adolescent medicine training programs that are operated in association with general comprehensive residency programs in pediatrics or internal medicine accredited by the ACGME (hereafter, the RRC) or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

For an individual using the adolescent medicine fellowship training route (A), Verification of Competence Form(s) will be required from the director(s) of the fellow's adolescent medicine training program(s).

#### *B. Practice Experience*

Five years of broad-based practice experience in adolescent medicine is required. A minimum of 50% of full-time professional activity (and a minimum of 20 hours a week) must have been spent in the practice of adolescent medicine to receive credit. It is assumed that night and weekend time would be distributed in the same manner as regular time. These 5 years should be of such type and quality that they substitute for the clinical exposure one might have encountered during subspecialty residency training. All adolescent medicine experience must be accrued before December 31, 1998. No foreign adolescent medicine experience will be accepted by the Credentials Committee in fulfillment of the requirements.

For an individual utilizing the adolescent medicine practice experience route (B), Evaluation Form(s) will be required from the adolescent medicine program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing adolescent medicine.

#### *C. Partial Subspecialty Training and Practice*

A combination of subspecialty fellowship training and practice experience equal to 5 years as outlined below may be utilized:

1. A fellow completing less than 12 months of fellowship training in adolescent medicine may receive practice credit on a month-for-month basis. For example, a 9-month subspecialty fellowship would be credited for 9 months of experience; this, added to 4 years and 3 months of adolescent medicine experience, would total 60 months or 5 years. These 5 years must be accrued before December 31, 1998.

2. A fellow completing 12 to 23 months of subspecialty fellowship training in adolescent medicine may receive credit on a two-for-one basis. For example, an 18-month subspecialty fellowship would be credited for 36 months of experience; this, added to 24 months of adolescent medicine experience, would total 60 months or 5 years. These 5 years must be accrued before December 31, 1998. No credit for partial training will be given for a fellowship training that began on or after January 1, 1995.

For an individual utilizing the combination of training and practice experience route (C), Verification Form(s) will be required from the director(s) of the applicant's adolescent medicine training program(s), and Evaluation Form(s) will be required from the adolescent medicine program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing adolescent medicine.

The completed Verification and Evaluation Form(s) should be sent directly to the ABP.

### **II. Dual Subcertification in Adolescent Medicine (Internal Medicine and Pediatrics)**

Two years of training in adolescent medicine are required for individuals who have completed joint training in internal medicine/pediatric (med/ped) programs and who are dually certified. Graduates from med/ped programs can choose the training track offered by either Board. Candidates who apply to the ABP must meet the requirements of clinical competence and meaningful accomplishment in research. An applicant may not take the certifying examination of the ABP until all training has been completed.

### **III. Accredited Training**

At the present time, the RRC has not begun the process of accrediting training programs in adolescent medicine. A fellow entering subspecialty training in adolescent medicine before completion of the accreditation process by the RRC is advised to enter those programs in which the director or senior faculty of the program is certified in adolescent medicine or possesses equivalent credentials.

It should be noted that these criteria are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

### **Eligibility Criteria for Certification in Pediatric Cardiology**

The ABP has established a procedure for certification in pediatric cardiology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

#### **I. Admission Requirements**

Physicians who entered training in pediatric cardiology on or after January 1, 1965, are required to complete their training in a program accredited for training in pediatric cardiology by the RRC for Pediatrics or the RCPSC.

A subspecialty fellow who entered pediatric cardiology training before January 1, 1988, may apply for admission on the basis of completion of 2 years of subspecialty fellowship training in pediatric cardiology.

Three years of full-time broad-based subspecialty fellowship training in pediatric cardiology is required of a fellow entering training on or after January 1, 1988. The period of training must be at least 33 months. Extended absences, whether for vacation, maternity leave, illness, etc, must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric cardiology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric cardiology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada, unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

## II. Dual Subcertification in Cardiology (Internal Medicine and Pediatrics)

There is no change in the usual training requirements in pediatric cardiology for graduates of combined Medicine/Pediatric programs.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

## Eligibility Criteria for Certification in Pediatric Critical Care Medicine

The ABP has established a procedure for certification in pediatric critical care medicine. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

### I. Admission Requirements

Physicians who entered training in pediatric critical care medicine on or after January 1, 1992, are required to complete their training in a program accredited for training in pediatric critical care medicine by the RRC for Pediatrics or the RCPSC.

A subspecialty fellow who entered pediatric critical care medicine training before January 1, 1988, may apply for admission on the basis of completion of 2 years of subspecialty fellowship training in pediatric critical care medicine.

Three years of full-time broad-based subspecialty fellowship training in pediatric critical care medicine is required of a fellow entering training on or after January 1, 1988. The period of training must be at least 33 months. Extended absences, whether for vacation, maternity leave, illness, etc, must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric critical care medicine training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplish-

ment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric critical care medicine training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

## II. Dual Subcertification in Critical Care Medicine (Internal Medicine and Pediatrics)

The Subboard of Pediatric Critical Care Medicine has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics.

1. The applicant must have at least 1 year of broad-based clinical pediatric critical care medicine training.
2. The applicant must have a minimum of 1 year of research training related to pediatric critical care medicine. The setting for the research training should be one that is most suitable for the applicant's interest.
3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty fellow: a Verification of Competence Form must be completed by the program directors in pediatrics and internal medicine; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual residency years (R-1, 2, 3, 4).
4. An applicant interested in certification in critical care medicine in internal medicine should contact the American Board of Internal Medicine.
5. The total length of training leading to dual subcertification must be at least 4 years in duration.
6. An applicant may not take the subspecialty certifying examination of the ABP until all training has been completed.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

## Eligibility Criteria for Certification in Pediatric Emergency Medicine

The ABP and the American Board of Emergency Medicine (ABEM) have established a procedure for certification in pediatric emergency medicine. To be eligible for this subspecialty examination, a physician must be certified in either pediatrics by the ABP or emergency medicine by the ABEM. In addition to the specific admission requirements listed below, there are general eligibility criteria for all ABP subspecialties that must be fulfilled to be eligible for certification (a copy is available upon request to the ABP). The ABEM also has general requirements that must be fulfilled which are available from the ABEM office.

### I. Admission Requirements

For admission to the examination, an applicant must have completed one of the following to qualify:

**A. Training**

A subspecialty fellow entering pediatric emergency medicine training before January 1, 1995, may apply for admission on the basis of completion of 2 years of subspecialty fellowship training in pediatric emergency medicine. The program and the training must conform to the Special Requirements for Training Programs of the Subboard of Pediatric Emergency Medicine.

**1. Requirements for candidates applying to the ABP for certification**

Three years of broad-based fellowship training in pediatric emergency medicine is required of a fellow entering training on or after January 1, 1995. The period of training must be at least 33 months. Extended absences, whether for vacation, maternity leave, illness, etc, must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow beginning pediatric emergency medicine training on or after January 1, 1995, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. Verification of meaningful accomplishment in research will not be required for individuals who began training before January 1, 1995.

A fellow beginning training after January 1, 1995, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

**2. Requirements for candidates applying to the ABEM for certification**

The present requirement of 2 years of full-time broad-based fellowship training in pediatric emergency medicine will continue for a fellow entering training on or after January 1, 1995. The following must be accomplished to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training; and the fellow must pass the subspecialty certifying examination. A fellow beginning training after January 1, 1995, may complete the required training on a part-time basis not to exceed 4 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric emergency medicine training programs that are operated in association with general comprehensive pediatric or emergency medicine residency programs accredited by the ACGME (hereafter, the RRC) or the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP or the ABEM.

No credit will be given for subspecialty training during the core residency.

An applicant may not apply for the same training period toward fulfillment of requirements of two different certifying Subboards.

**B. Dual Certification**

A candidate who is certified by ABP and ABEM may apply via this pathway. A candidate who has completed training to meet the certification requirements of ABP and ABEM before January 1, 1999, may apply via this pathway.

**C. Pediatric Emergency Medicine Practice**

A candidate who has had broad-based and clearly focused experience in pediatric emergency medicine may apply via the practice pathway. The applicant must fulfill all of the following:

1. Professional activities spent in the practice of pediatric emergency medicine for a period of 60 months, and totaling a minimum of 6,000 hours, clearly focused on the care of patients in the pediatric age group ( $\leq 21$  years of age) in the emergency department (ED). A clear professional and clinical commitment to the practice of pediatric emergency medicine must be demonstrated.
2. Of the 6,000 hours, 2,800 hours must have been accrued in a 24-month (maximum) consecutive period of time to demonstrate a clear professional focus and intensity exclusively in the practice of pediatric emergency medicine.
3. A minimum of 4,000 of the 6,000 hours must have been spent in the clinical practice of pediatric emergency medicine. If the candidate practices in a general ED, only time spent exclusively in pediatric care can be used for credit.
4. The remaining 2,000 hours may be spent in either clinical care or a mixture of related nonclinical activities clearly focused on pediatric emergency medicine including administration, teaching, pre-hospital care, quality assurance or quality improvement, research, or other academic activities.
5. Practice time shall have occurred in a hospital-based ED, with the following characteristics:
  - a. The ED must provide a patient mix of minor-major medical and traumatic conditions.
  - b. The ED must be a formal component of the Emergency Medical Services system for pediatric patients.
  - c. The ED must provide triage and initial stabilization of all presenting conditions.
  - d. The ED must provide 24-hour-a-day full-time physician coverage.
  - e. The ED should have a minimum of 15,000 nonscheduled pediatric patient visits per year.
6. The physician must be physically present in the ED, and available and responsible for clinical patient care. Hours spent in an "on-call" arrangement are not acceptable.
7. Practice time must have occurred in the United States or its territories or in Canada. Military practice time must have occurred in accredited US military hospitals. Practices occurring outside these locations will not be accepted. Specifically, practice time at a freestanding emergency facility will not be accepted for fulfillment of the eligibility requirements.
8. For nonclinical practice pathway credit, the candidate may count nonclinical time devoted to pediatric emergency medicine. Specific documentation of the actual nature of the nonclinical time will be required.
9. Applicants seeking certification in more than one subspecialty, on the basis of practice alone, may not apply the same practice period toward fulfillment of the requirements of two different certifying subboards.
10. Practice time need not be continuous. However, all practice time shall have occurred in the 7-year interval before application for certification and before July 1, 1996.

**D. Partial Subspecialty Training Plus Practice**

A combination of training and practice experience may be utilized to fulfill eligibility requirements. The combination must equal 60 months and 6,000 hours. Credit for partial training will be given as follows:

1. An applicant who has completed 1-11 months of subspecialty fellowship training in pediatric emergency medicine will receive practice credit on a month-to-month basis. Each month of sub-

specialty training in pediatric emergency medicine credited toward practice will be counted as 100 hours toward the 6,000 hours minimal requirement.

2. An applicant who has completed 12-23 months of subspecialty fellowship training in pediatric emergency medicine will receive practice credit on a two-for-one basis. Each month of subspecialty training in pediatric emergency medicine credited toward practice will be counted as 200 hours toward the 6,000 hours minimal requirement.
3. No credit for partial training will be given for training beginning on or after January 1, 1995.
4. The 60 months of combination training and practice credit must be accrued during a 7-year interval before application for certification and before July 1, 1996.

## II. Verification of Training and Practice

1. For a candidate utilizing the subspecialty fellowship training route, a Verification of Competence Form(s) from the director(s) of the applicant's pediatric emergency medicine training program(s) is required.
2. For a candidate utilizing the dual certification pathway, the certificate number and year of certification for each board must be provided.
3. For a candidate utilizing the practice pathway, an Evaluation Form will be required from the pediatric emergency medicine program director, the pediatric department chairman or the chief of pediatrics, or the emergency department chairman or chief of emergency medicine in the hospital where the practice experience occurred.
4. For a candidate utilizing the subspecialty training plus practice pathway, both a Verification of Competence Form(s) from the pediatric emergency medicine program and an Evaluation Form(s) will be required.

Certification shall be time-limited for the length of years that the primary board currently grants certification, 7 years for ABP and 10 years for ABEM.

## III. Description of the Institution/Emergency Department and Procedures Experience

1. The individual(s) responsible for completion of the Verification of Competence Form(s) or the Evaluation Form(s) must provide a description of the institution and the ED.
2. The applicant must complete a "Procedures for Pediatric Emergency Medicine" Form with the application.

## IV. Accredited Training

At the present time, the RRC has not begun the process of accrediting training programs in pediatric emergency medicine. A fellow entering fellowship in pediatric emergency medicine before completion of the accreditation process by the RRC is advised to enter those programs in which the director or senior faculty of the program is certified in pediatric emergency medicine by the ABP and/or ABEM or possesses equivalent credentials.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP and the ABEM to ascertain whether the information they have is current.

## Eligibility Criteria for Certification in Pediatric Endocrinology

The ABP has established a procedure for certification in pediatric endocrinology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

## I. Admission Requirements

Physicians who entered training in pediatric endocrinology on or after January 1, 1987, are required to complete their training in a program accredited for training in pediatric endocrinology by the RRC for Pediatrics or the RCPSC.

A subspecialty fellow who entered pediatric endocrinology before January 1, 1988, may apply for admission on the basis of completion of 2 years of subspecialty fellowship training in pediatric endocrinology.

Three years of full-time broad-based fellowship training in pediatric endocrinology is required of a fellow entering training on or after January 1, 1988. The period of training must be at least 33 months. Extended absences, whether for vacation, maternity leave, illness, etc, must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric endocrinology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric endocrinology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

## II. Dual Subcertification in Endocrinology (Internal Medicine and Pediatrics)

The Subboard of Pediatric Endocrinology has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics.

1. The applicant must have at least 1 year of broad-based clinical pediatric endocrinology training.
2. The applicant must have a minimum of 1 year of research training related to pediatric endocrinology. The setting for the research training should be one that is most suitable for the applicant's interest.
3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a Verification of Competence Form must be completed by the program directors in pediatrics and internal medicine; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual residency years (R-1, 2, 3, 4).
4. An applicant interested in certification in endocrinology in internal medicine should contact the American Board of Internal Medicine.

5. The total length of training leading to dual subcertification must be at least 4 years in duration.
6. An applicant may not take the certifying examination of the ABP until all training has been completed.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

### Eligibility Criteria for Certification in Pediatric Gastroenterology

The ABP has established a procedure for certification in pediatric gastroenterology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

#### I. Admission Requirements

Physicians who enter training in pediatric gastroenterology on or after January 1, 1996, are required to complete their training in a program accredited for training in pediatric gastroenterology by the RRC for Pediatrics or the RCPSC.

For admission to the examination, an applicant must have completed one of the following to qualify:

##### A. Training

A subspecialty fellow who entered pediatric gastroenterology training before January 1, 1990, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric gastroenterology.

Three years of full-time broad-based fellowship training in pediatric gastroenterology is required of a fellow entering training on or after January 1, 1990. The period of training must be at least 33 months. Extended absences, whether for vacation, maternity leave, illness, etc, must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric gastroenterology training on or after January 1, 1990, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1990, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric gastroenterology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

For an individual using the pediatric gastroenterology fellowship training route (A), Verification of Competence Form(s) will be required from the director(s) of the fellow's pediatric gastroenterology training program(s).

##### B. Practice Experience

Five years of broad-based practice experience in pediatric gastroenterology is required. Broad-based pediatric gastroenterology is defined as encompassing the majority of the clinical components, which are a modification of the guidelines for subspecialty training in gastroenterology, published in 1980 by the Committee on Training and Education of the American Gastroenterological Association (Winship DH, Grand RJ, Gray G, et al: Guidelines for subspecialty training in gastroenterology, *Gastroenterology* 1980; 79:955-957). This modification was published in *Gastroenterology* 1987; 93:432-433 (Motil KJ, et al). A minimum of 50% of full-time professional activity must be spent in the practice of pediatric gastroenterology to receive credit. It is assumed that night and weekend time would be distributed in the same manner as regular time. These 5 years should be of such type and quality that they substitute for the clinical exposure one might have encountered during subspecialty residency training. All pediatric gastroenterology experience must have been accrued before December 31, 1994. No foreign pediatric gastroenterology experience will be accepted by the Credentials Committee in fulfillment of the requirements.

For an individual utilizing the pediatric gastroenterology practice experience route (B), an Evaluation Form(s) will be required from the pediatric gastroenterology program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing pediatric gastroenterology.

##### C. Partial Subspecialty Training and Practice

A combination of subspecialty training and practice in pediatric gastroenterology equal to 5 years as outlined below may be utilized:

1. A fellow completing less than 12 months of fellowship training in pediatric gastroenterology may receive practice credit on a month-for-month basis. For example, a 9-month fellowship would be credited for 9 months of experience; this, added to 4 years and 3 months of pediatric gastroenterology experience, would total 60 months or 5 years. These 5 years must have been accrued before December 31, 1994.
2. A fellow completing 12 to 23 months of fellowship training in pediatric gastroenterology may receive credit on a two-for-one basis. For example, an 18-month fellowship would be credited for 36 months of experience; this, added to 24 months of pediatric gastroenterology experience, would total 60 months or 5 years. These 5 years must have been accrued before December 31, 1994. No credit for partial training will be given for a subspecialty fellow who began training on or after January 1, 1990.

For an individual utilizing the combination fellowship training and practice experience route (C), a Verification Form(s) will be required from the director(s) of the applicant's pediatric gastroenterology training program(s) and an Evaluation Form(s) will be required from the pediatric gastroenterology program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing pediatric gastroenterology.

The completed Verification and Evaluation Form(s) should be sent directly to the ABP.

#### II. Dual Subcertification in Gastroenterology (Internal Medicine and Pediatrics)

The Subboard of Pediatric Gastroenterology has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics.

1. The applicant must have at least 1 year of broad-based clinical pediatric gastroenterology training.

2. The applicant must have a minimum of 1 year of research training related to pediatric gastroenterology. The setting for the research training should be one that is most suitable for the applicant's interest.
3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a Verification of Competence Form must be completed by the program director(s) in pediatrics and internal medicine; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual residency years (R-1, 2, 3, 4).
4. An applicant interested in certification in gastroenterology in internal medicine should contact the American Board of Internal Medicine.
5. The total length of training leading to dual subcertification must be at least 4 years in duration.
6. An applicant may not take the subspecialty certifying examination of the ABP until all training has been completed.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

### Eligibility Criteria for Certification in Pediatric Hematology-Oncology

The ABP has established a procedure for certification in pediatric hematology-oncology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

#### I. Admission Requirements

Physicians who entered training in pediatric hematology-oncology on or after January 1, 1987, are required to complete their training in a program accredited for training in pediatric hematology-oncology by the RRC for Pediatrics or the RCPSC.

A subspecialty fellow who entered pediatric hematology-oncology training before January 1, 1986, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric hematology-oncology.

Three years of full-time broad-based fellowship training in pediatric hematology-oncology is required of a fellow entering training on or after January 1, 1986. The period of training must be at least 33 months. Extended absences, whether for vacation, maternity leave, illness, etc, must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric hematology-oncology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric hematology-oncology training programs that are operated in association with general comprehensive pediatric

residency programs accredited by the RRC or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

#### II. Dual Subcertification in Hematology-Oncology (Internal Medicine and Pediatrics)

There is no change in the usual training requirements in pediatric hematology-oncology for graduates of combined Medicine/Pediatric programs.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

### Eligibility Criteria for Certification in Pediatric Infectious Diseases

The ABP has established a procedure for certification in pediatric infectious diseases. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

#### I. Admission Requirements

For admission to the examination, an applicant must have completed one of the following to qualify:

##### A. Training

A subspecialty fellow entering pediatric infectious diseases training before January 1, 1995, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric infectious diseases.

Three years of full-time broad-based fellowship training in pediatric infectious diseases is required of a fellow entering training on or after January 1, 1995. The period of training must be at least 33 months. Extended absences, whether for vacation, maternity leave, illness, etc, must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow beginning pediatric infectious diseases training on or after January 1, 1995, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. Verification of meaningful accomplishment in research will not be required for individuals who began training before January 1, 1995.

A fellow beginning part-time training after January 1, 1995, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric infectious diseases training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

For an individual using the pediatric infectious diseases fellowship training route (A), a Verification of Competence Form(s) will be required from the director(s) of the fellow's pediatric infectious diseases training program(s).

#### **B. Practice Experience**

Five years of broad-based practice experience in pediatric infectious diseases is required. A minimum of 50% of full-time professional activity must have been spent in the practice of pediatric infectious diseases to receive credit. It is assumed that night and weekend time would be distributed in the same manner as regular time. These 5 years should be of such type and quality that they substitute for the clinical exposure one might have encountered during subspecialty residency training. All pediatric infectious diseases experience must be accrued by December 31, 1998. No foreign pediatric infectious diseases experience will be accepted by the Credentials Committee in fulfillment of the requirements.

For an individual utilizing the pediatric infectious diseases practice experience route (B), an Evaluation Form(s) will be required from the pediatric infectious diseases program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing pediatric infectious diseases.

#### **C. Partial Subspecialty Training and Practice**

A combination of training and practice in pediatric infectious diseases equal to 5 years as outlined below may be utilized:

1. A fellow completing less than 12 months of fellowship training in pediatric infectious diseases may receive practice credit on a month-for-month basis. For example, a 9-month fellowship would be credited for 9 months of experience; this, added to 4 years and 3 months of pediatric infectious diseases experience, would total 60 months or 5 years. These 5 years must be accrued before December 31, 1998.
2. A fellow completing 12 to 23 months of fellowship training in pediatric infectious diseases may receive credit on a two-for-one basis. For example, an 18-month fellowship would be credited for 36 months of experience; this, added to 24 months of pediatric infectious diseases experience, would total 60 months or 5 years. These 5 years must be accrued before December 31, 1998. No credit for partial training will be given for a subspecialty fellow who begins training on or after January 1, 1995.

For an individual utilizing the combination subspecialty fellowship training and practice experience route (C), a Verification Form(s) will be required from the director(s) of the applicant's pediatric infectious diseases training program(s) and an Evaluation Form(s) will be required from the pediatric infectious diseases program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing pediatric infectious diseases.

The completed Verification and Evaluation Form(s) should be sent directly to the ABP.

#### **II. Dual Subcertification in Infectious Diseases (Internal Medicine and Pediatrics)**

The Subboard of Pediatric Infectious Diseases has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics.

1. The applicant must have at least 1 year of broad-based clinical pediatric infectious diseases training.
2. The applicant must have a minimum of 1 year of research training related to pediatric infectious diseases. The setting for the re-

search training should be one that is most suitable for the applicant's interest.

3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a Verification of Competence Form must be completed by the program directors in pediatrics and internal medicine; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual residency years (R-1, 2, 3, 4).
4. An applicant interested in certification in infectious diseases in internal medicine should contact the American Board of Internal Medicine.
5. The total length of training leading to dual subcertification must be at least 4 years in duration.
6. An applicant may not take the subspecialty certifying examination of the ABP until all training has been completed.

The same requirements are necessary for a fellow who began pediatric infectious diseases training before January 1, 1995, except for the following: (a) meaningful accomplishment in research is not acquired; or (b) the total length of training leading to dual certification must be at least 3 years in duration.

#### **III. Accredited Training**

At the present time, the RRC has not begun the process of accrediting training programs in pediatric infectious diseases. A fellow entering subspecialty training in pediatric infectious diseases before completion of the accreditation process by the RRC is advised to enter those programs in which the director or senior faculty of the program is certified in pediatric infectious diseases by the ABP or possesses equivalent credentials.

It should be noted that these criteria are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

#### **Eligibility Criteria for Certification in Medical Toxicology**

The ABP in collaboration with the American Boards of Emergency Medicine and Preventive Medicine will offer a certification of added qualification in Medical Toxicology. This document provides the requirements of the ABP. (*Note:* A candidate who has a primary certificate from one of the other two Boards should contact that Board office for its eligibility criteria.)

##### **I. Admission Requirements**

###### **A. Certification by the ABP**

An applicant must take and pass the certifying examination and possess a valid certificate in general pediatrics before being permitted to take a pediatric subspecialty certifying examination. However, the application for the subspecialty certifying examination may be submitted before taking the certifying examination in general pediatrics.

###### **B. Licensure**

An applicant must have a valid, unrestricted license to practice medicine in any of the states, districts, or territories of the United States or provinces of Canada in which he/she practices or have unrestricted privileges to practice medicine in the US armed forces. A copy of the unrestricted license must accompany the application material.

###### **C. Pathways**

For admission to the certification examination in medical toxicology, the applicant must have completed one of four eligibility path-

ways. The pathways are: 1) Medical Toxicology Training; 2) Diplomate of American Board of Medical Toxicology (ABMT); 3) Medical Toxicology Practice; 4) Medical Toxicology Training Plus Practice.

#### 1. Medical Toxicology Subspecialty Training Pathway

An applicant must complete a fellowship in medical toxicology of 24 months' duration. The training program should be sponsored by and be based within a reasonable geographical proximity of an accredited residency program in emergency medicine, pediatrics, preventive medicine, or any combination of these programs. An institution is discouraged from sponsoring more than one accredited medical toxicology program.

The applicant must satisfactorily complete the subspecialty training by the date of the examination.

Applicants seeking certification in more than one subspecialty on the basis of training may not apply the same training period toward fulfillment of requirements of more than one specialty or subspecialty.

The ABP will request verification of subspecialty training directly from the program director.

#### 2. Diplomate of ABMT Pathway

ABMT diplomates who are also diplomates of an ABMS board may apply.

On June 30, 1999, the ABMT pathway will expire. To apply under the ABMT pathway an applicant must have fulfilled the requirements of this pathway by that date.

#### 3. Medical Toxicology Practice Pathway

The practice pathway is available to physicians who, through study and focused practice experience, have developed qualifications in medical toxicology. The criteria for this category consist of all of the following:

- a. During a minimum of 60 months, which must have occurred during the most recent 7 years prior to the date the application is submitted, the applicant (a) must show a demonstrated commitment to teaching, scholarly activities, research, or administration and patient care in the specialty of medical toxicology, and (b) must accumulate a minimum of 2,500 hours of direct patient care activities.

Direct patient care activities include primary or consultative care, exposure evaluation, screening and preventive services, and epidemiologic and health investigations. Telephone consultations are not considered a direct patient care activity.

- b. Documented affiliation and activity with a poison center certified by the American Association of Poison Control Centers (AAPCC) or the Canadian Association of Poison Control Centers (CAPCC), or its equivalent.

Applicants seeking certification in more than one specialty or subspecialty may not apply the same practice hours toward fulfillment of the requirements of more than one certifying specialty or subspecialty.

On June 30, 1999, the practice pathway will expire. To apply under the practice pathway an applicant must have fulfilled the requirements of the practice pathway by that date.

For each medical toxicology activity submitted to fulfill the eligibility criteria, a verification form must be completed. The verification forms are included with the application material, and it is the applicant's responsibility to provide the form to the appropriate individual for completion and return it to the ABP office.

#### 4. Partial Medical Toxicology Training Plus Practice Pathway

A combination of partial training and practice experience may be utilized to fulfill the eligibility requirements. This pathway will be utilized by physicians who have completed less than 2 years in a medical toxicology training program, and/or have preceptorship training in medical toxicology and who have maintained a medical toxicology practice as outlined in Pathway 3 above.

Practice credit may be granted for partially completed subspecialty training or preceptorship training. The combination for training credit and medical toxicology practice must equal the requirements of the practice category of application (see Section C, items 1 and 2).

An applicant who has completed 1-11 months of subspecialty training in medical toxicology will receive practice credit toward the 60-month requirement on a month-for-month basis. An applicant who has completed 12-23 months of acceptable subspecialty training in medical toxicology will receive practice credit toward the 60-month requirement on a two-for-one basis for each month of training completed.

Preceptorship training will be reviewed for possible practice credit toward the 60-month requirement on a month-for-month basis, up to a maximum of 24 months credit.

Patient care hours accumulated during the subspecialty training and/or preceptorship will be reviewed for credit on an hour-for-hour basis toward fulfilling the minimum 2,500-hour direct patient care requirement.

On June 30, 1999, the medical toxicology training plus practice pathway will expire. To apply under this pathway, an applicant must have fulfilled the requirements of the practice pathway by that date.

### Eligibility Criteria for Certification in Neonatal-Perinatal Medicine

The ABP has established a procedure for certification in neonatal-perinatal medicine. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

#### Admission Requirements

Physicians who entered training in neonatal-perinatal medicine on or after January 1, 1986, are required to complete their training in a program accredited for training in neonatal-perinatal medicine by the RRC for Pediatrics or the RCPSC. Only those programs that are a part of an institution that offers residency or fellowship training in obstetrics and gynecology and include experience in fetal-maternal-perinatal medicine will be considered.

A subspecialty fellow who entered neonatal-perinatal medicine training before January 1, 1989, may apply for admission on the basis of completion of 2 years of fellowship training in neonatal-perinatal medicine.

Three years of full-time broad-based fellowship training in neonatal-perinatal medicine is required of a fellow entering training on or after January 1, 1989. The period of training must be at least 33 months. Extended absences, whether for vacation, maternity leave, illness, etc, must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began neonatal-perinatal medicine training on or after January 1, 1989, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1989, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those neonatal-perinatal medicine training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

### Eligibility Criteria for Certification in Pediatric Nephrology

The ABP has established a procedure for certification in pediatric nephrology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

#### I. Admission Requirements

Physicians who entered training in pediatric nephrology on or after January 1, 1987, are required to complete their training in a program accredited for training in pediatric nephrology by the RRC for Pediatrics or the RCPSC.

A subspecialty fellow who entered pediatric nephrology training before January 1, 1987, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric nephrology.

Three years of full-time broad-based fellowship training in pediatric nephrology is required of a fellow entering training on or after January 1, 1987. The period of training must be at least 33 months. Extended absences, whether for vacation, maternity leave, illness, etc, must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric nephrology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric nephrology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

### II. Dual Subcertification in Nephrology (Internal Medicine and Pediatrics)

The Subboard of Pediatric Nephrology has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics.

1. The applicant must have at least 1 year of broad-based clinical pediatric nephrology training.
2. The applicant must have a minimum of 1 year of research training related to pediatric nephrology. The setting for the research training should be one that is most suitable for the applicant's interest.
3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a Verification of Competence Form must be completed by the program directors in pediatrics and internal medicine; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual residency years (R-1, 2, 3, 4).
4. An applicant interested in certification in nephrology in internal medicine should contact the American Board of Internal Medicine.
5. The total length of training leading to dual subcertification must be at least 4 years in duration.
6. An applicant may not take the certifying examination of the ABP until all training has been completed.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

### Eligibility Criteria for Certification in Pediatric Pulmonology

The ABP has established a procedure for certification in pediatric pulmonology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

#### I. Admission Requirements

Physicians who entered training in pediatric pulmonology on or after January 1, 1992, are required to complete their training in a program accredited for training in pediatric pulmonology by the RRC for Pediatrics or the RCPSC.

A subspecialty fellow who entered pediatric pulmonology training before January 1, 1986, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric pulmonology.

Three years of full-time broad-based fellowship training in pediatric pulmonology is required of a fellow entering training on or after January 1, 1986. The period of training must be at least 33 months. Extended absences, whether for vacation, maternity leave, illness, etc, must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric pulmonology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Re-

search"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric pulmonology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPCSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

### II. Dual Subcertification in Pulmonology (Internal Medicine and Pediatrics)

The Subboard of Pediatric Pulmonology has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics.

1. The applicant must have at least 1 year of broad-based clinical pediatric pulmonology training.
2. The applicant must have a minimum of 1 year of research training related to pediatric pulmonology. The setting for the research training should be one that is most suitable for the applicant's interest.
3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a Verification of Competence Form must be completed by the program directors in pediatrics and internal medicine; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual residency years (R-1, 2, 3, 4).
4. An applicant interested in certification in pulmonology in internal medicine should contact the American Board of Internal Medicine.
5. The total length of training leading to dual subcertification must be at least 4 years in duration.
6. An applicant may not take the certifying examination of the ABP until all training has been completed.

### III. Subcertification in Pediatric Pulmonology and Allergy/Immunology

The intent of this route is to outline a mechanism whereby residents already certified in pediatrics may qualify for subcertification in both pediatric pulmonology and allergy/immunology in a shorter total period of time than that presently required (3 years pediatric pulmonology plus 2 years allergy/immunology). This can be accomplished by successfully completing research training relating to the requirements of both the Subboard of Pediatric Pulmonology and the Conjoint Board of Allergy/Immunology.

The total training program would require no less than 4 years (48 months) with at least 1 year spent in clinical pulmonology training and 1 year in clinical training for allergy/immunology. The minimal research requirement is 12 months in an environment and project relevant to both pulmonology and allergy/immunology. The fourth year would be spent in training acceptable to the Subboard of Pediatric Pulmonology and may be in clinical training or relevant additional research training.

1. Training in pediatric pulmonology may precede or follow training in allergy/immunology.
2. The candidate must train in pediatric pulmonology and allergy/immunology programs accredited by the RRC; the two programs do not necessarily have to be at the same institution. The research project selected by the trainee must be discussed with and approved by both training program directors.
3. The trainee must supply written details of any research project for which he/she plans to seek joint approval of both the Subboard of Pediatric Pulmonology and the Conjoint Board of Allergy/Immunology before or early in the course of his/her first year in a subspecialty program. The Subboard and Conjoint Board, in turn, will provide a preliminary written opinion to the trainee concerning the acceptability of the research project. This early approval is no guarantee of acceptance of the final research product.
4. The trainee is required to satisfy the General and Special Requirements for the Subboard and Conjoint Board as listed in the *Graduate Medical Education Directory*. Final admission to either certification examination is granted by the Credentials Committees after completion of training, fulfillment of the research competence requirements, and review of all application materials submitted by the candidate.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

### Eligibility Criteria for Certification in Pediatric Rheumatology

The ABP has established a procedure for certification in pediatric rheumatology. In addition to the specific admission requirements listed below, there are general eligibility criteria that must be fulfilled to be eligible for certification. A copy of the general eligibility criteria is available upon request to the ABP.

#### I. Admission Requirements

For admission to the examination, an applicant must have completed one of the following to qualify:

##### A. Training

A subspecialty fellow who entered pediatric rheumatology training before January 1, 1992, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric rheumatology.

Three years of full-time broad-based fellowship training in pediatric rheumatology is required of a fellow entering training on or after January 1, 1992. The period of training must be at least 33 months. Extended absences, whether for vacation, maternity leave, illness, etc, must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric rheumatology training on or after January 1, 1992, the following must be accomplished in order to become certified in the subspecialty: a Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1992, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric rheumatology training programs that are operated in association with general comprehensive pediatric resi-

gency programs accredited by the ACGME (hereafter, the RRC) or the RCPCSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

For an individual using the pediatric rheumatology fellowship training route (A), a Verification of Competence Form(s) will be required from the director(s) of the fellow's pediatric rheumatology training program(s).

#### **B. Practice Experience**

Five years of broad-based practice experience in pediatric rheumatology is required. A minimum of 50% of full-time professional activity must be spent in the practice of pediatric rheumatology to receive credit. It is assumed that night and weekend time would be distributed in the same manner as regular time. These 5 years should be of such type and quality that they substitute for the clinical exposure one might have encountered during subspecialty residency training. All pediatric rheumatology experience must be accrued before December 31, 1996. No foreign pediatric rheumatology experience will be accepted by the Credentials Committee in fulfillment of the requirements.

For an individual utilizing the pediatric rheumatology practice experience route (B), an Evaluation Form(s) will be required from the pediatric rheumatology program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing pediatric rheumatology.

#### **C. Partial Subspecialty Training and Practice**

A combination of partial subspecialty fellowship training and practice experience in pediatric rheumatology equal to 5 years as outlined below may be utilized:

1. A fellow completing less than 12 months of fellowship training in pediatric rheumatology may receive practice credit on a month-for-month basis. For example, a 9-month fellowship would be credited for 9 months of experience; this, added to 4 years and 3 months of pediatric rheumatology experience, would total 60 months or 5 years. These 5 years must be accrued before December 31, 1996.
2. A fellow completing 12 to 23 months of fellowship training in pediatric rheumatology may receive credit on a two-for-one basis. For example, an 18-month fellowship would be credited for 36 months of experience; this, added to 24 months of pediatric rheumatology experience, would total 60 months or 5 years. These 5 years must be accrued before December 31, 1996. No credit for partial training will be given for a subspecialty fellow who began training on or after January 1, 1992.

For an individual utilizing the combination partial subspecialty fellowship training and practice experience route (C), a Verification Form(s) will be required from the director(s) of the applicant's pediatric rheumatology training program(s) and an Evaluation Form(s) will be required from the pediatric rheumatology program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing pediatric rheumatology.

The completed Verification and Evaluation Form(s) should be sent directly to the ABP.

## **II. Dual Subcertification in Rheumatology (Internal Medicine and Pediatrics)**

The Subboard of Pediatric Rheumatology has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics.

1. The applicant must have at least 1 year of broad-based clinical pediatric rheumatology training.
2. The applicant must have a minimum of 1 year of research training related to pediatric rheumatology. The setting for the research training should be one that is most suitable for the applicant's interest.
3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a Verification of Competence Form must be completed by the program director(s) in pediatrics and internal medicine; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual residency years (R-1, 2, 3, 4).
4. An applicant interested in certification in rheumatology in internal medicine should contact the American Board of Internal Medicine.
5. The total length of training leading to dual subcertification must be at least 4 years in duration.
6. An applicant may not take the subspecialty certifying examination of the ABP until all training has been completed.

## **III. Accredited Training**

At the present time, the RRC has not begun the process of accrediting training programs in pediatric rheumatology, although the ACGME has approved the special requirements for training. The process should begin in 1996. A fellow entering subspecialty training in pediatric rheumatology before completion of the accreditation process by the RRC is advised to enter those programs in which the director or senior faculty of the program is certified in pediatric rheumatology or possesses equivalent credentials.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

## **Eligibility Criteria for Certification in Sports Medicine**

The ABP in collaboration with the American Boards of Family Practice, Internal Medicine, and Emergency Medicine will offer a certificate of added qualification in Sports Medicine. This document provides the requirements of the ABP. (*Note:* A candidate who has a primary certificate from one of the other three Boards should contact that Board office for its eligibility criteria.)

## **Admission Requirements**

### **A. Certification by the American Board of Pediatrics (ABP)**

An applicant must take and pass the certifying examination and possess a valid certificate in general pediatrics before being permitted to take a pediatric subspecialty certifying examination. However, the application for the subspecialty certifying examination may be submitted before taking the certifying examination in general pediatrics.

### **B. Licensure**

An applicant must have a valid, unrestricted license to practice medicine in any of the states, districts, or territories of the United States or provinces of Canada or have unrestricted privileges to

practice medicine in the US armed forces. A copy of the unrestricted license must accompany the application material.

**C. Training or Practice Experience**

For admission to the examination, an applicant must have completed one of the following to qualify:

**1. Training**

An applicant must have completed a minimum of 1 year in a sports medicine training program that is associated with an accredited residency program in Family Practice, Emergency Medicine, Internal Medicine, or Pediatrics.

A Verification of Competence Form must be completed by the program director stating satisfactory completion of the required training as well as verification of clinical competence. The ABP will send this form to the program director for completion.

**2. Practice Experience**

Five years of practice experience in sports medicine is required. This experience must consist of at least 20% of total professional time devoted to sports medicine. The activities that qualify a candidate are one or more of the following (*Note: Further description of these activities will be included in the application material*):

- Field supervision of athletes
- Emergency assessment and care of acutely injured athletes
- Diagnosis, treatment, management, and disposition of common sports injuries and illnesses
- Management of medical problems in the athlete
- Rehabilitation of the ill or injured athlete
- Exercise as treatment

Partial training in sports medicine, ie, less than 12 months, will be credited on a month-by-month basis as practice experience.

An Evaluation Form must be completed by an individual to verify that at least 20% of professional time is devoted to sports medicine in one or more of the six activities cited above. The form must be completed by a physician who is knowledgeable about the applicant's practice, such as the pediatric department chairman, the chief of pediatrics, chief of staff, or the medical director of a hospital where the applicant has admitting privileges. A partner or practice associate is not acceptable.

Practice experience accrued before 1987 will not be considered. All sports medicine experience must be accrued by June 30, 1999.

It should be noted that these criteria are subject to change without notice. All applicants are advised to contact the American Board of Pediatrics to ascertain whether the information they have is current.

**1996 Subspecialty Certifying Examinations**

Subspecialty examinations will be given on August 13 in cardiology, critical care medicine, and pulmonology, and on November 12 in emergency medicine, hematology-oncology, and rheumatology. In addition, a certifying examination in medical toxicology will be given on November 2. It is the applicant's responsibility to be aware of and to meet registration deadlines. A nonrefundable penalty fee of \$225 is required for late registration.

The fees (in US dollars) for all subspecialty examinations are:

**Fees for New Applicants**

Regular Registration	\$1,345
Late Registration	\$1,570

**Fees for Re-registrants**

Regular Registration	\$1,245
Late Registration	\$1,470

Applicants for the November examinations can pay the total application fee by credit card using either Visa or MasterCard.

For applicants not using US banks, the fee must be paid in US dollars using one of the following vehicles: (1) money order, (2) cashier's check, or (3) certified check. To be accepted for payment, these vehicles must be payable through a US bank.

**Registration Dates**

For subspecialty examinations given on August 13:

*New Applicants*

Regular	October 16–December 16, 1995
Late	December 17, 1995–January 16, 1996

*Re-registrants*

Regular	January 16–March 15, 1996
Late	March 16–April 15, 1996

For subspecialty examinations given on November 2 and November 12:

*New Applicants*

Regular	February 1–April 1, 1996
Late	April 2–April 30, 1996

*Re-registrants*

Regular	March 15–May 15, 1996
Late	May 16–June 15, 1996

No application will be accepted after the appropriate post-marked date.

**General Pediatric Recertification**

In November 1985, the ABP established a policy of time-limited certification. This policy became effective for those individuals certified in general pediatrics and in the pediatric subspecialties after May 2, 1988. Initial certificates will expire after 7 years.

The Program for Renewal of Certification in Pediatrics (PRCP) is the process by which the ABP recertifies diplomates in general pediatrics. Diplomates who wish to be issued a new certificate after the 7-year period must successfully complete PRCP for renewal of certification in pediatrics.

Diplomates certified before May 1, 1988, will not be affected by the policy of time-limited certification; however, those who choose to achieve certification renewal on a voluntary basis may do so by completing PRCP. Their certification will not be affected if they are not successful in completing PRCP.

**Subspecialty Recertification**

The Program for Renewal of Certification in Pediatric Subspecialties (PRCP-S) is the process by which the ABP recertifies diplomates in the pediatric subspecialties. Diplomates who wish to be issued a new Certificate of Special Qualifications or Added Qualifications in a subspecialty of pediatrics after the 7-year period must successfully complete PRCP-S.

A diplomate who holds a Certificate of Special Qualifications does not have to be recertified in general pediatrics in order to recertify in the subspecialty. However, a subspecialist who has been certified or recertified within the previous 7 years in the subspecialty may become recertified in general pediatrics by successfully completing a modified version of PRCP called PRCP-MS (Program for Renewal of Certification in Pediatrics Modified for Subspecialists).

Since Certificates of Added Qualifications are based upon a continuing working knowledge of the broad discipline of general comprehensive pediatrics, candidates will be required to hold a permanent or unexpired time-limited certificate in general pediatrics to be recertified in an ABP subspecialty in which a Certificate of Added Qualifications (eg, sports medicine) has been given.

Diplomates certified in a pediatric subspecialty before May 2, 1988, will not be affected by the policy of time-limited certification; however, those who choose to achieve certification renewal on a voluntary basis may do so by completing PRCP-S. Their certification will not be affected if they are not successful in completing PRCP-S.

## Policies

### Board Eligibility

A candidate who applies to take the certifying examination and whose credentials are approved will be considered to be board eligible. The ABP will verify that a physician is certified, not certified, or eligible to take the certifying examination. The credentials of an applicant who does not meet the licensure requirement will be disapproved, and he or she will not be board eligible. The allegation by an applicant that he or she has completed the required training (and, therefore, is board eligible) without review and approval by the ABP is not acceptable.

Beginning in 1990, a candidate must achieve certification within 7 years of initial application. Candidates who were admitted to the certification process in 1986-1989 have 10 years to complete the certification process. A candidate who was admitted to the certification process before 1986 and is considered to have active status will have until December 31, 1995, to complete the certification process. A candidate who has not been certified within the time limit will be considered to be inactive and no longer will be board eligible. To regain active (and eligibility) status, a candidate must pass a reentry examination before being readmitted to the certification process. Details of the reentry process will be supplied on request to the ABP.

### Disability

An applicant who wishes to request special accommodations to take a certifying examination due to a disability is urged to notify the Board in writing of the need for accommodations as early as possible during the application period. The applicant will be sent the ABP policy on disabilities. The deadline for notifying the ABP is the registration deadline (postmarked).

### Chemical Use and Dependency

An applicant who has a history of chemical dependency, as reported to the ABP, and who submits documentation acceptable to the ABP that the disease is known to be under control for at least 2 years, may apply to take a certifying examination provided he/she meets the admission requirements. This policy also pertains to individuals who wish to participate in recertification programs. A candidate may appeal to the Credentials Committee for waiver of the 2-year policy.

An applicant who has a history of chemical dependency, as reported to the ABP, who cannot submit documentation acceptable to the ABP that the disease is under control will not be allowed to take the certifying examination or to participate in recertification programs.

### Revocation of Certificates

All certificates issued by the ABP are subject to the provisions of the articles of incorporation and the bylaws of the ABP. Each certificate is subject to possible revocation in the event that

1. the issuance of such certificate or its receipt by the physician so certified shall have been contrary to or in violation of any of the provisions of the ABP's articles of incorporation or bylaws; or
2. the physician so certified shall not have been eligible to receive such certificate, irrespective of whether the facts constituting him/her so ineligible were known to any or all of the members of the ABP at the time of the issuance of such certificate; or
3. the physician so certified shall have made any misstatement of fact in his/her application for such certificate or in any other

statement or representation to the ABP, its members, representatives, or agents; or

4. the physician so certified shall have been convicted by a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the Board of Directors, moral turpitude in connection with his/her practice of medicine; or
5. the physician so certified shall have had one or more of his/her licenses to practice medicine revoked or shall have been placed on probation by any court or other body having proper jurisdiction and authority or if the physician surrendered his/her license to avoid disciplinary action; or
6. the physician so certified has repeatedly made statements contrary to sound medical science and practice, raising fundamental questions about his/her competency.

If the ABP obtains probable cause to believe that a certificate should be revoked for any of the reasons set forth above, it may institute proceedings for revocation thereof by mailing written notice to the holder of such certificate that a hearing will be held to determine whether the certificate should be revoked. The steps to be taken are outlined in the Rules of Appellate Procedure of the ABP, which may be obtained by writing to the ABP.

### Reinstatement of Certificates

When a certificate issued by the ABP has been revoked, the certificate may be restored once the physician has submitted a request for reinstatement and the Credentials Committee's recommendation for reinstatement is approved by the Board of Directors.

### Additional Information and Inquiries

Please address all inquiries concerning examination applications to

## American Board of Physical Medicine and Rehabilitation

Joel A DeLisa, MD, Chairman, Newark, New Jersey  
 Robert P Christopher, MD, Vice Chairman, Memphis, Tennessee  
 Bruce M Gans, MD, Treasurer, Detroit, Michigan  
 Nicolas E Walsh, MD, Secretary, San Antonio, Texas  
 Murray E Brandstater, MD, Loma Linda, California  
 Gerald Felsenthal, MD, Baltimore, Maryland  
 Margaret C Hammond, MD, Seattle, Washington  
 Phala A Helm, MD, Dallas, Texas  
 Joseph C Honet, MD, Detroit, Michigan  
 F Patrick Maloney, MD, North Little Rock, Arkansas  
 Malcolm C McPhee, MD, Scottsdale, Arizona  
 William E Staas Jr, MD, Philadelphia, Pennsylvania  
 James R Swenson, MD, Salt Lake City, Utah

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Physical Medicine and Rehabilitation [ABPM&R] to ascertain whether the information below is current.)*

### General Requirements

- A. Requirements for graduates of educational institutions in the United States or Canada:
  1. Graduation from a medical school approved by the Liaison Committee on Medical Education (LCME), graduation from a Cana-

dian medical school approved by the Canadian Medical Association, or graduation from an osteopathic medical school approved by the American Osteopathic Association (AOA).

2. Possession of a valid and unrestricted license to practice medicine or osteopathy in one or more of the 50 United States or Puerto Rico or licensure in Canada. Evidence of licensure or an acceptable equivalent must be submitted with application for certification examinations.
  3. Satisfactory completion of the requirements of the Board for graduate education and experience in physical medicine and rehabilitation as set forth below. A resident is expected to complete training in physical medicine and rehabilitation (PM&R) in a single program except when significant extenuating circumstances make a change advisable.
  4. Satisfactory compliance with rules and regulations of the Board pertaining to the completion and filing of the application for examination and payment of required fees.
- B. Requirements for graduates of educational institutions not in the United States or Canada:
1. Possession of a valid certificate from the Educational Council of Foreign Medical Graduates (ECFMG) or evidence of acceptable equivalent, such as a certificate from the Federation Licensing Examination (FLEX); the Fifth Pathway; Foreign Medical Graduate Examination in Medical Science (FMGEMS), including basic and clinical examinations; the NBME Parts I, II; the USMLE I, II; and, when indicated, the English proficiency examination. This is required by the Accreditation Council for Graduate Medical Education (ACGME) before a physician can enter accredited graduate medical education programs in the United States.
  2. Possession of a valid and unrestricted license to practice medicine or osteopathy in one or more of the 50 United States or Puerto Rico or licensure in Canada, or an acceptable equivalent. Evidence of licensure must be submitted with application for certification examinations.
  3. Satisfactory completion of the Board's requirements for graduate education and experience in PM&R as set forth below. A resident is expected to complete training in a single program except when significant extenuating circumstances make a change advisable.
  4. Satisfactory compliance with rules and regulations of the Board pertaining to the completion and filing of the application for examination and the payment of required fees.

### Residency Training Requirements

Applicants for the certifying examinations must have satisfactorily completed 48 months (4 years) of training in a physical medicine and rehabilitation (PM&R) residency approved by the ACGME. Twelve of the 48 months of training should consist of a coordinated program of experience in fundamental clinical skills that includes at least 6 months in family practice, internal medicine, pediatrics, surgery, or a combination of these. The other 6 months of the year of experience in fundamental skills may include no less than 1 month in any of the following more specific categories: cardiology, radiology, neurology, urology, rheumatology, nephrology, vascular medicine, pediatrics, pulmonary medicine, neurosurgery, orthopedic surgery, family practice, general surgery, general internal medicine, emergency medicine, psychiatry, oncology, critical care medicine, and anesthesiology. Training in the fundamental skills should be accomplished during the first half of the residency training program. The program director and the Credentials Committee of the Board, at the beginning of the residency, will make the decision regarding the acceptability for credit of the 12 months of ACGME-, Royal College of Physicians and Surgeons of Canada-, or

AOA-approved training in fundamental clinical skills, as described above. The program must include 36 months of training in PM&R.

This format is mandatory for all residents who entered training in 1985 or subsequently. In some instances, 36 months of physical medicine and rehabilitation residency may be acceptable on recommendation of the program director, with 1 year of credit being granted on the basis of prior residency training.

The training programs require that a significant amount of each resident's time be scheduled to provide for progressively increasing responsibilities in the direct clinical care of inpatients and outpatients. At least one-third, and not more than two-thirds, of a resident's experiences should be devoted to clinical care and management of rehabilitation of hospitalized patients. Electively the resident may spend up to 6 months in pertinent supervised clinical or basic research.

Adequate training to achieve basic qualifications in electromyography and electrodiagnosis is essential. This includes achieving the ability to perform and interpret electromyographic and other electrodiagnostic evaluations such as nerve conduction studies and somatosensory evoked potentials. Experience with inpatient and outpatient pediatric rehabilitation is required.

Opportunities to achieve understanding of special aspects of rehabilitation of patients in geriatric age groups should be included. Comprehensive management of spinal cord-injured patients is fundamental. Also, achieving abilities to evaluate, predict outcome in, and manage rehabilitation of patients with brain lesions is part of the basic residency. A wide variety of patients with musculoskeletal and neuromuscular problems, both acute and chronic, should be encountered. Principles involved in cardiac rehabilitation and sports medicine should be included. Psychosocial aspects of patients with disabilities require in-depth understanding. Details of PM&R residency requirements (clinical, didactic, and elective) are described in the "Essentials of Accredited Residencies in Graduate Medical Education" section on PM&R of the current *Graduate Medical Education Directory*. The directory is published annually by the American Medical Association. Specific programming for each residency is provided by the individual residency and its institutional base.

### Credit for Other Specialty Training

Physicians who have had 1 or more years of training (up to and including certification) in a program approved by the ACGME, the Royal College of Physicians and Surgeons of Canada, or the AOA in related relevant specialties including internal medicine, neurology, orthopedics, pediatrics, family practice, and surgery may receive up to 12 months of non-PM&R training credit on recommendation of the program director and at the discretion of the Board, but completion of 36 months of physical medicine and rehabilitation training requirement in an ACGME-approved residency is mandatory. A resident is expected to complete training in a single program except when significant extenuating circumstances make a change advisable. The maximum of 12 months of training credit will be considered for approval by the Board only upon recommendation of the residency training program director. Alternatively, the Board, upon the recommendation of the residency program director, may accept a noncoordinated ACGME-approved "transitional" year or an ACGME-approved year of training in family practice, internal medicine, pediatrics, neurology, orthopedics, or general surgery.

No credit will be given toward shortening the basic required 4-year program for non-ACGME-approved residencies, fellowships, or internships; for Fifth Pathway in a United States AMA-designated training institution; or for hospital house physician experience. No credit will be allowed for fellowships prior to or during residency training. *All of the required training and experience as stated above must have been taken in the United States or Canada.*

### Absence From Training

The Board stipulates that a resident should not be absent from the residency training for more than 6 weeks (30 working days) yearly. Any leave time or absence beyond 6 weeks would need to be made up by arrangement with the program director. "Leave time" includes sick leave, vacation, maternity leave, leave for locum tenens, or work in another institution that is not an ACGME-accredited residency. Leave time or vacation may not be accumulated to reduce the overall duration of training. Institutional policies regarding absences will be respected.

### Dual Specialty Certification

For those desiring to pursue integrated training and dual specialty certification, the Board currently participates with the American Board of Pediatrics (ABP), the American Board of Internal Medicine (ABIM), and the American Board of Psychiatry and Neurology (ABPN), provided there is completion of 36 months of accredited training in general comprehensive PM&R. The proposed program agreed to by the respective training program directors should be submitted by the program directors to both Boards for approval. Admissibility to Part I of the certification examinations may be sought during the last year of training.

A full year of clinical practice, fellowship, research, or a combination of these activities consisting of at least 6 months of practice in PM&R is required for admissibility to the Part II certifying examination in PM&R. These activities relate to 6 months of practice of PM&R and practice in the other specialty.

Guidelines for residency training program directors interested in considering developing such a program are available through the ABPM&R office.

### Special Agreement Between the American Board of Pediatrics and the ABPM&R

There exists a special agreement between the American Board of Pediatrics (ABP) and the ABPM&R whereby a physician interested in dual specialty certification in pediatrics and in PM&R can qualify for admission to the certifying examinations of both Boards. The individual residency curriculum must be submitted prospectively by the program directors to both Boards at the latest at the end of the R-2 year of the combined program and may be designed to be completed in a minimum of 60 months. The non-PM&R 12-month segment of the 4-year PM&R residency will be credited on the basis of satisfactory completion of the regular first year of pediatric residency.

The ABP requires a minimum of 36 months of general comprehensive pediatric training with 6 months' credit for pediatric rehabilitation within the PM&R training. The ABPM&R requires a minimum of 36 months' accredited PM&R residency with 6 months' credit for related rotations during the pediatric training, such as in developmental pediatrics, neonatology, pediatric neurology, pediatric neurosurgery, or pediatric orthopedics. Six months full-time equivalent (FTE) of pediatric rehabilitation is required. Twenty-four months of the 36 months of PM&R training must be in adult physical medicine and rehabilitation.

It is recommended that all training be completed at one academic institution; any deviation will require prospective approval by both Boards. When two separate institutions are involved, there should be evidence of adequate coordination to provide an appropriate educational experience. Before the end of the R-2 year of training in either specialty, the ABPM&R must approve the training plan for the given resident, submitted and signed by both program directors. Vacation is shared pro rata between the training time spent in pediatrics and that spent in PM&R.

### Special Agreement Between the American Board of Internal Medicine and the ABPM&R

There exists a special agreement between the American Board of Internal Medicine (ABIM) and the ABPM&R whereby a prospective resident interested in dual specialty certification in internal medicine and in PM&R can qualify to apply for admission to the certifying examination of each Board by satisfactory completion of a preplanned combined, integrated program, which could be designed to be completed in a minimum of 60 months.

The non-PM&R 12-month segment of the 48 months of PM&R residency concerned with basic fundamental clinical skills will be credited on the basis of satisfactory completion of the regular first year of internal medicine residency. In addition, the ABPM&R requires a minimum of 36 months of accredited PM&R residency with 6 months' credit for internal medicine rotations in such areas as rheumatology, endocrinology, cardiovascular, or pulmonary subspecialties of internal medicine.

During the 30 months in PM&R, the resident must satisfactorily complete 24 months of hospital and outpatient clinical management of patients receiving PM&R services. PM&R training includes basic and advanced knowledge of musculoskeletal and neuromuscular anatomy and physiology as related to kinesiology, exercise, and functional activities, as well as to immobilization and inactivity. Applications and prescription of therapeutic exercise, orthotics, prosthetics, and assistive and supportive devices for ambulation and mobility are essential. The following segments of training in PM&R are also required: experience with inpatient or outpatient pediatric rehabilitation, adequate training to achieve basic qualifications in electromyography and electrodiagnosis, and opportunities to achieve understanding of special aspects of rehabilitation of patients in geriatric age groups.

The requirement for 12 months of clinical practice, fellowship, research, or a combination of these activities for admissibility to Part II of the Board examination can be met by documented evidence that at least 50% of the time is devoted to PM&R.

The 3-year internal medicine residency requirements are in part met by ABIM's recognizing 6 months' credit for PM&R residency training involving PM&R management of patients with internal medicine-related problems such as those occurring in patients with rheumatologic, cardiovascular, pulmonary, stroke, and oncologic conditions.

It is recommended that all training be completed at one academic institution; if two separate institutions are involved, there should be evidence of adequate coordination to provide an appropriate educational experience. Any deviation requires prospective approval by both boards. Before the end of the R-2 level of training in either specialty, the ABPM&R prospectively requires approval of a detailed curricular plan for a given resident signed by the two program directors. Vacation is shared pro rata between the training time spent in internal medicine and in PM&R.

### Special Agreement Between the American Board of Psychiatry and Neurology and the ABPM&R

The American Board of Psychiatry and Neurology (ABPN) and the ABPM&R have approved the proposal that residents interested in dual certification in neurology and PM&R can qualify to apply for admission to the certifying examinations of each Board by satisfactory completion of an integrated program planned and approved by both Boards prior to the end of the R-3 year, designed to be completed in a minimum of 72 months.

For purposes of this dual certification, both specialty Boards require a 12-month basic clinical skills segment in internal medicine.

The ABPM&R requires a minimum of 36 months of accredited PM&R residency, and ABPN requires 36 months of accredited neurology residency. In order to decrease the total training time by 1

year, to a total of 72 months, 12 months of training in areas that satisfy the special requirements in neurology and PM&R include 6 months of training in PM&R acceptable to the program director in neurology and 6 months of training in neurology acceptable to the program director in PM&R.

It is recommended that all training be completed at one academic institution; if two institutions are involved, adequate coordination should provide an appropriate educational experience that meets the requirements and approval of each Board. Before the end of the R-3 year of training in either specialty, the ABPM&R must approve the training plan for a given resident, submitted and signed by both program directors. Vacation is shared pro rata between the two training programs.

#### **Requirements for Admissibility to Part I of the Board Examination**

To be admissible to Part I of the Board examination, candidates are required to complete satisfactorily at least 48 months of postgraduate residency training, of which at least 36 months should be spent in supervised education and clinical practice in PM&R in an ACGME-accredited training program. In line with the guidelines of the Board for clinical investigator training, 60 months of integrated PM&R and research training qualifies for admissibility to Part I of the certifying examinations.

Satisfactory completion of educational and training requirements in force at the beginning of the resident's training in an accredited program will be considered acceptable for application for admissibility to the certifying examinations. Residents in approved PM&R programs in Canada, on satisfactory completion of all the requirements for certification in that country, may apply for admissibility to Part I of the American Board examination.

Final admissibility is contingent upon receipt of the final-year evaluation by the program director by May 1 in the examination year.

If a resident is placed on probationary status during the final year of his or her residency program, this status must be rescinded by the program director before May 1 for the resident to be admissible.

#### **Requirements for Admissibility to Part II of the Board Examination**

At least a full year of clinical practice, fellowship, research, or a combination of these activities is required. The clinical practice must provide evidence of acceptable professional, ethical, and humanistic conduct attested to by two board-certified physiatrists in the local or regional area. In rare instances in which a physiatrist is not geographically available, two licensed physicians in the area may support the candidate's application for Part II.

Alternatively, a candidate may take Parts I and II together if all residency training and the practice time requirement have been completed. However, if the candidate fails Part I, Part II will not count or be recognized in any way.

An optional fifth year in a PM&R residency that includes at least 6 months of advanced clinical practice of PM&R with essentially full patient responsibility and also includes teaching experience, plus time in research or relevant clinical or basic science electives, or fellowship acceptable to the Board, may qualify such a resident for admissibility to Part II of the certifying examinations upon the recommendation of the training program director. An optional fifth year may be valuable for those anticipating a full-time or part-time academic or research career.

Also required is the possession of a valid and unrestricted license to practice medicine or osteopathy in one or more of the 50 United States or Puerto Rico or licensure in Canada. Evidence of licensure

or an acceptable equivalent must be submitted with application for certification examinations.

#### **Application Requirements and Fees**

The application form that should be submitted by an applicant for the examination leading to certification can be obtained only by writing to the Executive Director of the Board. The completed application must contain a record of the applicant's undergraduate and graduate training and a copy of the medical degree diploma or certificate plus the program director's statement that the applicant has or is anticipated to have satisfactorily completed an approved graduate program. Other information the resident deems relevant to the determination of his or her admissibility to the examination may be included, such as records of other graduate study, hospital staff appointments, or teaching positions; length of time in a practice that has been limited to PM&R; and/or medical papers published.

In addition, the applicant must submit with the application the names of three or more physiatrists or other physicians to whom the Board can write for professional and character references. At the option of the applicant, he or she may include the names of any additional physicians. The applicant must submit to the residency training program director a form received from the Board requesting the rating of the professional ability of the applicant. The program director should promptly return the completed form to the Board office. No decision regarding admissibility to the examinations will be made until the physicians from whom references are requested have replied.

All information submitted to the Board by a physician from whom a reference has been requested will remain confidential and will not be disclosed to the applicant without the permission of the said physician. Strict confidentiality of references submitted is required to ensure that the Board will receive complete and accurate evaluations of all applicants.

An applicant who plans to take Part I only must submit a fee of \$800; \$200 of this amount is a processing fee and is not refundable. The fees must accompany the application.

Applicants applying for Part II must describe in a letter the professional time spent during his or her 1 year of clinical practice, fellowship, research, or a combination of these, and send an examination fee of \$700. The applicant must also submit statements from two physicians (from the local or regional area), preferably Board-certified physiatrists, verifying the applicant's 1 year in clinical practice, fellowship, research, or a combination of these according to acceptable professional, ethical, and humanistic standards. Applicants will need to submit evidence of possession of a valid and unrestricted license to practice medicine or osteopathy in one or more of the 50 United States, Puerto Rico, or Canada, or evidence of possession of an acceptable equivalent.

An applicant who plans to take both Part I and Part II, initially in the same year, must send with the application the fee of \$1,500; \$200, as heretofore mentioned, is a processing fee and is not refundable.

Physicians who have failed Part I or Part II (or both) can apply for admissibility for reexamination during any subsequent examination period. Fees for reexamination are \$600 for Part I or \$700 for Part II; if both Parts I and II are retaken the same year, the fee is \$1,300. In addition, a \$100 nonrefundable processing fee will be required for each Part I or Part II application for reexamination.

The completed application form for admissibility to Part I or Parts I and II of the examination, or the letter of application for Part II only, or for reexamination, and the appropriate fees, must be submitted by November 15 of the year before the scheduled examination. A penalty fee of \$200 will be required for consideration of ap-

plications postmarked after November 15 and before December 15. Once an applicant has been declared admissible, fees are forfeited if the candidate withdraws for any reason or does not appear for the examination.

The applicant must be scheduled to complete the graduate education or the clinical practice requirements on or before August 31 following the scheduled examination date for which he or she has applied in order to have his or her application considered for the examination of that year. Except as hereafter provided, no fees paid hereunder will be refunded. Only in the event that an applicant withdraws the application prior to the meeting of the Board to act thereon or in the event that an applicant is declared not admissible to the examination will the Board return the refundable portion of the fee. Currently there is no limit to the number of times a physician may apply for repeat examinations.

The Board is a nonprofit organization, and the fees of the candidates are used solely for defraying the actual expenses of the Board. The directors of the Board serve without remuneration. The Board reserves the right to change the fees when necessary.

### Designation of Admissibility

"Board admissible" is a term used by the Board to define the status of an applicant who has been accepted by the Board as a candidate to take the examination for which he or she applied; designation of "Board admissible" does not continue beyond the date such examination is given, regardless of results. The Board does not accept any use of the term "Board eligible" in lieu of documented admissibility.

A. For applicants who have not previously applied or who have previously applied and have withdrawn their application or who have previously applied and have been declared not admissible.

The procedures required for applicants toward becoming admissible to Board Examination are as follows:

1. Timely filing of the completed application form, license, and educational credentials with the Executive Director of the Board by the applicant.
2. Payment of the fees for the examination by the applicant.
3. Submittal of requested references.
4. Receipt of confirmation from the Executive Director of the Board verifying Board action regarding their admissibility status.

B. For applicants who are reapplying for Part I, having failed Part I; or who are applying for Part II, having successfully completed Part I; or who are reapplying for Part II, having failed Part II but having successfully completed Part I.

The procedures required for applicants toward being designated Board admissible are as follows:

1. Submittal of a letter of application for the examination by the applicant to the Executive Director of the Board or, if required, the resubmittal of an application form. The letter should contain a statement describing the required clinical practice, fellowship, research, or a combination of these.
2. Payment of the fees for the examination by the applicant.
3. Receipt of copy of license and completed forms verifying 1 year of clinical practice, fellowship, research, or a combination of these, from two preferably Board-certified physiatrists.
4. Applicants will receive confirmation from the Executive Director of the Board verifying Board action regarding their admissibility status.

C. Following the establishment of Board admissibility, the candidate will be notified of the time and place for the examination.

A candidate who fails Part I or Part II or both parts of the examination may reapply for admissibility for reexamination. This must be done before November 15 of the year before the scheduled exami-

nation. Currently there is no limit to the number of times a physician may apply for repeat examinations.

### Forfeiture of Fees

Once an applicant has been declared admissible and is a candidate, the fees will be forfeited if the candidate withdraws for any reason or does not appear for the examination.

### Examinations

As part of the requirements for certification by the ABPM&R, candidates must demonstrate satisfactory performance in an examination conducted by the Board covering the field of PM&R.

The examination for certification is given in two parts. Part I is written, Part II is oral.

Part I (written) may be taken after the satisfactory completion of the specialized graduate education required by the Board outlined above.

Part II (oral) may be taken only after 1 year of clinical practice, fellowship, research, or a combination of these containing at least 6 months of PM&R practice following residency training.

In the event a candidate taking both Part I and Part II in the same year fails Part I of the examination, results of Part II will not be considered or disclosed.

Both the written and the oral examinations will cover certain aspects of the basic sciences as well as clinical PM&R.

Basic sciences aspects of the examination will include

1. Anatomy: kinesiology and functional anatomy, biomechanics, neuroanatomy, musculoskeletal anatomy.
2. Physics: electricity, mechanics, biophysics of physical agents.
3. Physiology: physiology and pathophysiology of nerve, muscle, and bone, and of the cardiovascular and pulmonary, genitourinary, and central nervous systems; physiologic effects of the various physical agents used in PM&R; and physiology of exercise and of inactivity.
4. Pathology: pathology of muscles, nerves, bones, joints, soft tissues, and the central nervous system.
5. Other fundamental sciences: the applicant may be examined concerning his or her knowledge of other subjects related to PM&R including related pharmacology, as well as methods of assessing psychosocial and vocational needs of patients.

The clinical aspects will include

1. Diseases and conditions of all ages that come within the field of PM&R. These include various rheumatic diseases; neuromuscular diseases; cerebral and spinal cord injuries and diseases (eg, cerebrovascular accidents, postoperative conditions of the brain and spinal cord, cerebral palsy, multiple sclerosis, etc); and musculoskeletal diseases, including the large group of traumatic and orthopedic conditions.
2. The clinical use of such physical agents or methods as heat, water, electricity, ultraviolet radiation, massage, exercise, and rehabilitation techniques.
3. Diagnostic procedures, including electromyography and electrodiagnosis.
4. A knowledge of the roles of other health professionals within or associated with the field of PM&R, such as the physical therapist, occupational therapist, recreational therapist, clinical psychologist, speech pathologist, medical social worker, and vocational counselors; and the ability to coordinate the services of such professionals.
5. An understanding of the basic principles of PM&R, and the ability to prescribe, manage, and supervise specific treatment to be executed by other health professionals.

## Method of Examination

Part I and Part II of the Board examination are given once each year, usually in May at such times and places as the Board designates. Part I is a written examination. This examination is divided into morning and afternoon periods of approximately 4 hours each. The questions are designed to test the candidate's knowledge of basic sciences and clinical management as related to PM&R and will be in the form of objective testing.

Part II is an oral examination. The oral examinations are given by the directors of the Board with the assistance of selected guest examiners. Each candidate will have three 40-minute oral examinations with three separate examiners.

Candidates will be expected to present in a concise, orderly fashion evidence of their proficiency in the management of various clinical conditions that come within the field of PM&R. During the oral examination, questions will be asked about diagnostic procedures, therapeutic procedures, and patient management. The candidate should be prepared to demonstrate familiarity with the literature of basic and clinical research as well as recent significant literature pertinent to PM&R. Conciseness and clarity of statement are expected. Evidence of the professional maturity of the candidate in clinical procedures and of factual knowledge will be sought.

If a candidate believes the scoring of his/her written examination is inaccurate, a request may be made to have the examination scored manually. The request must be filed in writing to the Board office within 30 days of notification of test results with explanation of reasons for concern and with payment of a \$50 fee for the manual rescore.

## Unethical and Irregular Behavior

Candidates who apply to take an examination must certify that the information they provide in their applications is true and accurate. If (1) any misrepresentation is discovered in the candidate's application, in any other information submitted to the Board, or in the identity of a person applying to take or taking the examination; (2) any financial or other benefit is offered by a candidate to any director, officer, employee, proctor, or other agent or representative of the Board in order to obtain a right, privilege, or benefit not usually granted by the Board to similarly situated candidates; (3) any irregular behavior during the examination, such as copying answers, sharing information, using notes, or otherwise giving or receiving aid, is discovered by observation, statistical analysis of answer sheets, or otherwise; or (4) any portion of the candidate's absence from the designated examination room for whatever reason and any duration is unexcused or is otherwise impermissible, the candidate in question shall be given written notice of the charges and an opportunity to respond in accordance with the appeals procedures set forth in the rules and regulations of the Board. If the Board determines that a violation has occurred, the Board may permanently bar the person(s) involved in the violation from all future examinations, invalidate the results of, or refuse to score, prior examinations taken by the person(s), withhold or revoke the certificate of the person(s), and/or take other appropriate action. If sanctions are imposed pursuant to the rules and regulations of the Board, the Board may notify legitimately interested third parties of its action.

If the Board determines that irregular behavior has occurred during an examination, the Board will make every effort to withhold the scores of only those candidates directly implicated in the irregularity. Nevertheless, in some instances the evidence of irregularity, though sufficiently strong to cast doubt on the validity of scores, may not enable the Board to identify the specific candidates involved in the irregularity. In such circumstances, the Board may withhold the scores of candidates not directly implicated in the irregularity and, if necessary, may require those candidates to take

an additional examination at a later date to ensure the validity of all scores.

The examination booklets are copyrighted as the sole property of the Board and must not be removed by the candidate from the test area or reproduced in any way. Any reproduction of the test booklet, in whole or in part, is a federal offense and also may subject the candidate to the sanctions listed above. No notes, textbooks, other reference materials, scratch paper, or recording devices may be taken into either the written or the oral certification examination.

Misrepresentation or alleged misrepresentation of a person as a diplomate of the ABPM&R or as having obtained a status of eligibility to take the certifying examination will be followed up by the Board seeking verifiable evidence of such misrepresentation from the individual in question and other sources. Once sufficient evidence for reasonable verification of such misrepresentation has been obtained, the Board will notify the individual and the related licensing agency or agencies of the evidence it has been able to obtain.

## Certificate

Upon approval of the application and the candidate's successful completion of the examinations, the Board will grant a certificate to the effect that the candidate has met the requirements of the Board. The recipient of a certificate will be known as a Certificant or a Diplomate of the American Board of Physical Medicine and Rehabilitation.

The Board began issuing 10-year time-limited Diplomate certificates in 1993. Recertification procedures and requirements are described in the following section. Certificates issued prior to 1993 have no time-limited stipulations nor will there be requirements for recertification. Residents entering a training program are hereby informed and must be aware of time-limited certification, which began in 1993.

A certificate granted by this Board does not of itself confer or purport to confer any degree or legal qualifications, privileges, or license to practice PM&R. The Board does not limit or interfere with the professional activity of any duly licensed physician who is not certified by this Board. Privileges granted physicians in the practice of PM&R in any hospital or clinic are the prerogatives of that hospital or clinic, not of this Board.

The names of consenting Diplomates of the Board appear in the *Official American Board of Medical Specialties Directory of Certified Medical Specialists* published by Marquis Who's Who, of New Providence, New Jersey.

## Recertification

### Guiding Principle of Recertification

The achievement of the original certification of PM&R demonstrates that the individual has met the requirements of the ABPM&R.

The guiding principle of the recertification program of the ABPM&R is to foster the continuing development of excellence in patient care and all aspects of the practice of PM&R by its Diplomates.

### Goals of Recertification

The ABPM&R through its recertification program seeks to encourage, stimulate, and support its Diplomates in a program of self-directed, lifelong learning through the pursuit of continuing medical education.

The recertification process will permit Diplomates to demonstrate that they continue to meet the requirements of the ABPM&R.

Recertification will also provide continuing assurance to patients and families served, funding agencies, and the public in general of the continuing up-to-date knowledge of PM&R Diplomates.

### Participants in the Recertification Process

Recertification is therefore offered on a voluntary basis to

- all Diplomates holding time-limited certificates issued by the ABPM&R and
- all Diplomates holding non-time-limited certificates issued by the ABPM&R.

Diplomates with time-limited certificates may renew every 10 years through the process of recertification. By formal application to the ABPM&R and having satisfied the general requirements listed below, Diplomates with time-limited certificates may take the recertification examination beginning 3 years prior to the expiration of their time-limited certification. To complete the recertification process, Diplomates holding time-limited certificates must then satisfy the special requirements described below and achieve a passing grade in the recertification examination of the ABPM&R.

Four years prior to the expiration of their time-limited certification, Diplomates will again be reminded by the ABPM&R of the steps involved in the recertification process.

Diplomates holding non-time-limited certificates may apply for the recertification examination starting in 1999 by formal application to the ABPM&R and by having satisfied the general and special requirements. However, once holding a time-limited certificate in addition to a non-time-limited certificate (which will remain valid indefinitely), Diplomates must follow the application process of Diplomates holding time-limited certification.

## Requirements for Recertification

### A. General Requirements for Admissibility to the Recertification Examination

Applicants for recertification must meet the following general requirements:

1. Possession of a valid and unrestricted license to practice medicine in the United States, a territory of the United States, or Canada.
2. Possession of a time-limited or a non-time-limited certificate from the ABPM&R.
3. Diplomates with time-limited certificates are automatically registered for the recertification process. The registration will be validated upon receipt of the annual fee, starting with year 2 following the receipt of the time-limited certificate.
4. Diplomates with non-time-limited certificates will be notified regarding the option to participate in the recertification process. Upon written request, Diplomates with non-time-limited certificates will be registered in the recertification process. This registration will be validated upon receipt of the annual fee 1 year following registration.
5. Completion of the ABPM&R application for recertification.

### B. Special Requirements for Admissibility to the Recertification Examination

1. Completion of a total of 500 hours of Continuing Medical Education credits during the 10-year recertification period (50 credits per year) is required. At least 300 hours of credits earned in the 10-year period must be AMA Category 1. The AMA Physicians' Recognition Award will be accepted toward fulfillment of this requirement. The Board will also accept AOA Categories 1 and 2 Continuing Medical Education credits.

In order to satisfy the CME requirement, participants will be required to report their progress toward completing recertification CME requirements to the Board annually from the date of issuance of the time-limited certificate on a form to be supplied.

2. All candidates must successfully complete the evaluative component of the recertification program, ie, they must attain a passing grade in a practice-oriented, nonproctored, open-book, take-home examination.

## Application

An application form to take the recertification examination may be obtained (as of 1999) by sending a written request to the office of the ABPM&R.

There is no limit on the number of times Diplomates may attempt to complete the recertification process.

## Admissibility Requirements for Diplomates With Delayed Participation or Non-participation in the Recertification Program

To become admissible to the recertification examination

1. Diplomates with delay of participation after receipt of their time-limited certificate will be required to
  - meet all requirements of the recertification program, including fees
  - have been an active participant in the recertification program for the previous 4 years prior to taking the examination.
2. Diplomates who do not apply for admission to the recertification program until 7 or more years from the date of receipt of their original, time-limited certification up to the expiration date of said certificate will be required to
  - pay \$200 reinstatement fee
  - pay all back annual fees
  - complete all requirements for recertification during the period of no more and no less than 4 years from the date of admission into the recertification program.
3. Diplomates who delay their application for active participation in the recertification program until year 10 following receipt of their time-limited certificate and do not complete all requirements for admissibility to the recertification examination by year 14 will no longer be eligible to participate in the recertification program.
4. Diplomates (and previous holders of a certificate from the ABPM&R) who choose not to participate in the recertification program but wish to earn a valid, time-limited certificate from the ABPM&R may apply for permission to take the certification examination of the ABPM&R.

## Recertification Examination

The examination will be offered for the first time in the year 2000 and annually thereafter.

The written examination for recertification will be clinically focused and offered in the form of a nonproctored, open-book, take-home examination. The examination will be prepared by the ABPM&R and will represent the broad range of professional activities encompassing the specialty. The profile of the examination will consist of test items relating to general physiatry and test items relating to special emphasis areas of physiatric practice from which the Diplomates will select emphasis areas that most closely match their practice profiles. Overall, 50% of the examination will relate to general physiatry and 50% will relate to more specialized areas of physiatric practice.

In regard to unethical and irregular behavior, please refer to the respective section previously printed.

## Certificates

Diplomates with time-limited certificates successfully completing the recertification process will receive a new 10-year time-limited

certificate with a starting date 10 years from the date of initial certification or the most recent recertification.

Diplomates with non-time-limited certificates receive a new additional time-limited certificate and receive a notation about this additional certification in the *Official American Board of Medical Specialties Directory of Medical Specialists* published by the American Board of Medical Specialties (ABMS) in conjunction with Marquis Who's Who. In the case that their time-limited certification lapses, their non-time-limited notation will continue to be listed.

### Certificates of Special Qualifications (SQ) in Spinal Cord Injury (SCI) Medicine

The application and examination processes are being developed for certification of special qualifications in SCI Medicine.

#### Requirements

- All candidates for the SQ in SCI Medicine must be current Diplomates in good standing of a Member Board of the ABMS, and must
  - have successfully completed a minimum of 1 year of approved fellowship training in SCI Medicine after residency training or
  - have at least 3 years of practice experience primarily in SCI Medicine beyond completion of residency training;
  - possess a valid and unrestricted license to practice medicine/surgery in the United States or Canada;
  - have successfully completed the subspecialty examination.
- After the first 5 years following initiation of the examination and approval of the first fellowship training program in SCI medicine, the candidate must
  - be a diplomate in good standing of a Member Board of the ABMS
  - have successfully completed 1 year of an approved fellowship in SCI medicine after Residency
  - be recommended for admissibility to sit for the subspecialty examination in SCI medicine by his/her SCI medicine fellowship program training director
  - possess a valid and unrestricted license to practice medicine/surgery in the United States or Canada
  - successfully complete the subspecialty examination.

## American Board of Plastic Surgery

#### 1995-1996 Officers and Directors

Henry W Neale, MD, Chair, Cincinnati, Ohio  
 Frank L Thorne, MD, Vice-Chair, Seattle, Washington  
 William D Morain, MD, Secretary-Treasurer, Lebanon, New Hampshire

Bruce M Achauer, MD, Orange, California  
 Gaspar W Anastasi, MD, Boston, Massachusetts  
 John Bostwick III, MD, Atlanta, Georgia  
 Richard H Dean, MD, Winston-Salem, North Carolina  
 Elof Eriksson, MD, Boston, Massachusetts  
 Kenna S Given, MD, Augusta, Georgia  
 Frederick R Heckler, MD, Pittsburgh, Pennsylvania  
 Henry K Kawamoto, Jr, MD, Santa Monica, California  
 Paul N Manson, MD, Baltimore, Maryland  
 Stephen J Mathes, MD, San Francisco, California  
 Timothy A Miller, MD, Los Angeles, California  
 William B Riley, Jr, MD, Sugar Land, Texas  
 Martin C Robson, MD, Bay Pines, Florida  
 Robert L Ruberg, MD, Columbus, Ohio  
 Robert C Russell, MD, Springfield, Illinois  
 David J Smith, Jr, MD, Ann Arbor, Michigan

#### 1996-1997 Officers-Elect

Martin C Robson, MD, Chair-Elect, Bay Pines, Florida  
 Robert L Ruberg, MD, Vice-Chair-Elect, Columbus, Ohio

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact The American Board of Plastic Surgery, Inc, to ascertain whether the information below is correct.)*

#### Introduction

The American Board of Plastic Surgery, Inc (ABPS), which was organized in June 1937 by representatives of various groups interested in this type of surgery, received recognition as a subsidiary of the American Board of Surgery in May 1938. The ABPS was given the status of a major specialty board in May 1941 by action of the Advisory Board for Medical Specialties as approved by the Council on Medical Education of the American Medical Association, which has designated certain specialty fields as being suitable to be represented by specialty boards.

The Board is organized under the laws of the State of Illinois for charitable, scientific, and educational purposes. No part of its net earnings shall inure to the benefit of any private member, director, officer, or other individual, nor shall the board ever declare or make to any such persons any dividend or other distribution. Nothing herein, however, shall prevent the payment of reasonable compensation for services rendered or the reimbursement of reasonable expenses incurred in connection with the Board's affairs.

Plastic surgeons certified by the Board are listed in the *Official ABMS Directory of Board Certified Medical Specialists*, published by Marquis Who's Who in cooperation with the American Board of Medical Specialties (ABMS).

#### Description of Plastic Surgery

Plastic surgery deals with the repair, reconstruction, or replacement of physical defects of form or function involving the skin, musculoskeletal system, cranio-maxillofacial structures, hand, extremities, breast and trunk, and external genitalia. It uses aesthetic surgical principles not only to improve undesirable qualities of normal structures but in all reconstructive procedures as well.

Special knowledge and skill in the design and surgery of grafts, flaps, free tissue transfer, and replantation is necessary. Competence in the management of complex wounds, in the use of implantable materials, and in tumor surgery is required. Plastic surgery has been prominent in the development of innovative techniques such as microvascular and cranio-maxillofacial surgery, liposuction, and tissue transfer. The foundation of surgical anatomy, physiology, pathology, and other basic sciences is fundamental to this specialty.

Competency in plastic surgery implies a special combination of basic knowledge, surgical judgment, technical expertise, ethics, and interpersonal skills in order to achieve satisfactory patient relationships and problem resolution.

### Sponsoring Organizations

The ABPS consists of 19 directors who manage the affairs of the organization. Eighteen directors are elected by the Board from names submitted by the following sponsoring organizations:

Association of Academic Chairmen of Plastic Surgery  
 The American Association for Hand Surgery  
 The American Association of Plastic Surgeons  
 The American College of Surgeons  
 The American Society for Aesthetic Plastic Surgery, Inc  
 The American Society for Surgery of the Hand  
 The American Society of Maxillofacial Surgeons  
 The American Society of Plastic and Reconstructive Surgeons, Inc  
 The American Surgical Association  
 The Canadian Society of Plastic Surgeons  
 The Council of Regional Societies of Plastic and Reconstructive Surgery  
 The Plastic Surgery Research Council  
 The Society of Head and Neck Surgeons

Once elected to the Board, that person's obligation will be primarily to the Board and not to the sponsoring organization.

In addition, one director is elected by the Board from names submitted by the American Board of Surgery.

These 19 individuals are the directors of the Board. Surgeons who fulfill the requirements of the Board and who are granted certification by the Board are known as Diplomates of The American Board of Plastic Surgery, Inc.

### Purposes

The essential purposes of the Board are

1. to establish requirements for the qualifications of applicants who request a certificate of their ability in the field of plastic surgery in its broadest sense.
2. to conduct examinations of approved candidates who seek certification by the Board.
3. to issue certificates to those who meet the Board's requirements and pass the respective examinations.
4. to do and engage in any and all lawful activities that may be incidental or reasonably related to any of the foregoing purposes.

The Board is not an educational institution, and certificates issued by the Board are not to be considered degrees. The certificate does not confer on any person legal qualifications, privileges, or license to practice medicine or the specialty of plastic surgery.

Standards of certification are clearly distinct from those of licensure; possession of a Board certificate does not indicate total qualification for practice privileges, nor does it imply exclusion of others not so certified. The Board does not purport in any way to interfere with or limit the professional activities of any licensed physician, nor does it desire to interfere with practitioners of medicine or any of their regular or legitimate activities.

It is not the intent nor has it been the function of the Board to define requirements for membership on the staff of hospitals, or to

define who shall or shall not perform plastic surgical operations. The Board is not a primary source of censure or primary review of ethical problems.

### Policies

It is the Board's prerogative to determine the professional, ethical, moral, physical, and mental fitness of any candidate for its certificate.

The Board will consider opinions expressed concerning an individual's credentials only if they are in writing and signed.

It is the policy of the Board to maintain its autonomy and independence from political and economical considerations that might affect plastic surgery.

The Board recognizes the role of legitimate advertising in the changing medical scene, but it does not approve of advertising that arouses unrealistic expectations, is false or misleading, minimizes the magnitude and possible risks of surgery, or solicits patients for operations that they might not otherwise consider.

Such advertising is improper and inconsistent with the high standards of professional and ethical behavior implied by certification by the ABPS. The Board takes statements regarding Board status seriously and may penalize persons misstating their status.

### General Requirements

The following requirements for admissibility are in agreement with those promulgated by the American Board of Medical Specialties (ABMS).

1. The Board will accept only those persons whose major professional activity is limited to the field of plastic surgery.
2. Moral and ethical fitness must be satisfactory to the Board and in conformity with the Code of Ethics of the American Society of Plastic and Reconstructive Surgeons, Inc. Practices that do not conform therewith may result in rejection of an application or in deferral of examination until such matters have been resolved satisfactorily.

The Board may deny a candidate the privilege of sitting for an examination, or may refuse issuance of a certificate, if it is found by additional disclosures or a recent change in status that the candidate no longer meets the general or professional requirements.

### Professional Requirements

The Board considers the requirements detailed in "Prerequisite Training and Requisite Training" to be minimal. Candidates are encouraged to take advantage of broadening experiences in other fields.

The Board reserves the right

1. to request lists of operations performed solely by the candidate for 1 or more years.
2. to request special and extra examinations: written, oral, or practical.
3. to request any specific data concerning the candidate that may be deemed necessary before making a final decision for certification.
4. to consider evidence that a candidate's practice after completion of training is not in accord with generally accepted medical or ethical standards, which may result in rejection of the application or deferral of the examination until such time as the matter has been satisfactorily resolved.

### Undergraduate Medical or Osteopathic Education

Before prerequisite training, candidates must have graduated from a medical school in a state or jurisdiction of the United States that is accredited at the date of graduation by the Liaison Committee for Medical Education (LCME), a Canadian Medical School accredited by the Committee on Accreditation of Canadian Medical Schools

(CACMS), or from a US osteopathic school accredited by the American Osteopathic Association (AOA).

Graduates of medical schools located outside the jurisdiction of the United States and Canada must possess a currently valid standard certificate from the Educational Commission for Foreign Medical Graduates (ECFMG) or have completed a Fifth Pathway program in an accredited school of medicine in the United States.

#### Official Evaluation of Prerequisite Training

Official evaluation of prerequisite training by the Board is required prior to the initiation of residency training in plastic surgery. This simple preliminary step will prevent later disappointment. It is the responsibility of all prospective trainees in plastic surgery to secure this evaluation. Each prospective trainee must obtain a Request for Evaluation of Training Form from the Board office prior to completion of prerequisite training. Along with the completed Request for Evaluation of Training Form, prospective candidates are required to submit a \$100 nonrefundable processing fee (made payable to The American Board of Plastic Surgery, Inc, in US funds) and a copy of their medical school diploma.

Directors of accredited residency training programs in plastic surgery must require all prospective trainees to have an official evaluation and approval of their prerequisite training by the Board before they begin training.

Approval for residency training in plastic surgery will be provided to those individuals who clearly meet the Board's stated requirements. Further information for detailed credential review will be obtained on all other individuals where training was in other than accredited programs.

Official evaluations will be made by the Credentials and Requirements Committee. Individual officers or members of the Board cannot and will not make such estimates or rulings. It should be emphasized that the answers to many questions require a decision by one or more of the committees of the Board. This applies particularly to evaluation of training and questions of admissibility. Decisions are referred to the entire Board at the next scheduled Board meeting.

The process of reaching a final decision may require several months, since the full Board meets only twice annually. March 1 and September 1 are the last postmarked dates for submission of written special requests and documentation for consideration by the Credentials and Requirements Committee.

The Board will issue neither a letter verifying prerequisite training nor an Application for Examination and Certification Form until the Request for Evaluation of Training Form has been received and approved.

#### Training Requirements

There are two major pathways toward obtaining acceptable graduate level training in plastic surgery: the Independent Model and the Integrated Model.

In an independent model, the candidate must complete both (1) prerequisite training and (2) requisite training (plastic surgery). In an integrated model, no such distinction exists.

Residents may transfer, prior to the last 2 years, from an independent type of program to another independent program and from an integrated type of program to another integrated program, but they may not exchange accredited years of training between the two different models.

The minimum acceptable residency year, for both prerequisite and requisite training, must include at least 48 weeks of full-time experience.

#### Independent Model

This consists of at least 3 years of general surgery residency training followed by 2 or 3 years of plastic surgery residency training.

#### Prerequisite Training

For United States or Canadian Doctors of Medicine or Osteopathy with their medical degree or osteopathic degree granted in the United States or Canada, one of the following pathways must be taken:

1. A minimum of 3 years of clinical training with progressive responsibility in the same program in general surgery is required. Rotating internships will not be accepted in lieu of a clinical year in general surgery. This program must be approved by the Residency Review Committee (RRC) for Surgery and accredited in the United States by the Accreditation Council for Graduate Medical Education (ACGME) or in Canada by the Royal College of Physicians and Surgeons for full training. The minimum of 3 years of clinical training with progressive responsibility in the same program in general surgery must be completed before the candidate enters a plastic surgery residency. The satisfactory completion of this requirement must be verified in writing by the general surgery program director (see "Verification of Prerequisite Training"). Or
2. An accredited residency training program in neurological surgery, orthopedic surgery, otolaryngology, or urology. Prospective candidates may initiate residency training in plastic surgery following satisfactory completion of the entire course of training in the United States or Canada, as prescribed for certification by the American Board of Neurological Surgery, the American Board of Orthopaedic Surgery, the American Board of Otolaryngology, or the American Board of Urology. They must meet and comply with the most current requirements in these specialties. Satisfactory completion of training must be verified in writing by the training program director (see "Verification of Prerequisite Training," below) and evidence of current admissibility to the respective specialty board's examination process in the United States is required.

#### *For Candidates With a Combined DMD or DDS/MD Degree Obtained in the United States or Canada*

Satisfactory completion of a residency program in oral and maxillofacial surgery approved by the American Dental Association (ADA) is an alternate pathway for prerequisite training prior to plastic surgery residency. The satisfactory completion of this training must be verified in writing by the oral and maxillofacial surgery program director. This program must include the integration of a medical school component resulting in a Doctor of Medicine (MD) degree.

This combined training must also include a minimum of 24 months of progressive responsibility on surgical rotations under the direction of the general surgery program director after receipt of the MD degree. The general surgery program director must verify in writing the completion of 24 months of general surgery training, the level of responsibility held, inclusive dates, and specific content of rotation. Rotations in general surgery during medical school, prior to the MD degree, will not be considered as fulfilling any part of the 24-month minimum requirement. If the general surgery component is completed at an institution other than the sponsoring institution of the oral and maxillofacial surgery residency, then this training must be completed consecutively, with all 24 months spent in the same general surgery program which has been reviewed by the RRC for Surgery and is accredited by the ACGME in the United States.

#### *For Doctors of Medicine with Medical Degrees Granted Outside the United States or Canada*

Satisfactory completion of an entire accredited residency training program in general surgery, neurological surgery, orthopedic sur-

gery, otolaryngology, or urology is required. Prospective candidates may initiate residency training in plastic surgery following satisfactory completion of the entire course of training in the United States or Canada, as prescribed for certification by the American Board of Neurological Surgery, the American Board of Orthopaedic Surgery, the American Board of Otolaryngology, the American Board of Surgery, or the American Board of Urology. They must meet and comply with the most current requirements in these specialties. Satisfactory completion of training must be verified in writing by the training program director, and evidence of current admissibility to the respective specialty board's examination process in the United States is required.

#### *Verification of Prerequisite Training*

To ensure written verification from the program director under whom the candidate completed prerequisite training, the Board of office will mail a verification form for completion and return by the program director. It is the candidate's responsibility to determine that the form has been completed and returned to the Board office.

#### **Requisite Training**

##### *Graduate Education in Plastic Surgery*

Training in plastic surgery for not less than 2 years is required, and the final year must be at the senior level. Prospective candidates entering a plastic surgery residency accredited for 3 years of training must complete the entire 3 years, with 1 year of senior responsibility.

Candidates beginning plastic surgery residency on or after July 1, 1995, will be required to complete both years of a 2-year program in the same institution or the last 2 years of a 3-year program in the same institution. In either instance, the final year must be at the senior level.

Training in plastic surgery must be obtained in either the United States or Canada. The Board recognizes training in those programs in the United States that have been reviewed by the RRC for Plastic Surgery and accredited by the ACGME or those programs in Canada approved by the Royal College of Physicians and Surgeons of Canada.

##### *Content of Training*

Candidates must hold positions of increasing responsibility for the care of patients during these years of training. For this reason, major operative experience and senior responsibility are essential to surgical education and training.

An important factor in the development of a surgeon is an opportunity to grow, under guidance and supervision, by progressive and succeeding stages to eventually assume complete responsibility for the surgical care of the patient.

It is imperative that a resident hold positions of increasing responsibility when obtaining training in more than one institution, and 1 full year of experience must be at the senior level. The normal training year for the program must be completed. No credit is granted for part of a year of training.

The Board considers a residency in plastic surgery to be a full-time endeavor and looks with disfavor upon any other arrangement. The minimum acceptable training year is 48 weeks. Should absence exceed 4 weeks per annum for any reason, the circumstances and possible makeup time of this irregular training arrangement must be approved by the RRC for Plastic Surgery, and documentation of this approval must be provided to the Board by the program director.

Training in plastic surgery must cover the entire spectrum of plastic surgery. It should include experience in both the functional and aesthetic (cosmetic) management of congenital and acquired defects of the head and neck, trunk, and extremities. Sufficient material of a diversified nature should be available to prepare the

trainee to pass the examination(s) of the Board after the prescribed period of training.

If the available material on a service is inadequate, the program director may correct the deficiency by establishing an affiliation with one or more surgeons on other services within that hospital or by regular rotation of residents on other approved affiliated services in order that a broad experience might be obtained. The trainee should be provided an opportunity to operate independently on suitable cases under more remote supervision.

This period of specialized training should emphasize the relationship of basic science—anatomy, pathology, physiology, biochemistry, and microbiology—to surgical principles fundamental to all branches of surgery and especially to plastic surgery. In addition, the training program must provide in-depth exposure to the following subjects: the care of emergencies, shock, wound healing, blood replacement, fluid and electrolyte balance, pharmacology, anesthetics, and chemotherapy.

#### **Accredited Residency Programs**

Information concerning accredited training programs for the Independent Model may be found in the *Graduate Medical Education Directory* (the "green book") published by the American Medical Association (AMA) under the aegis of the ACGME. Copies of this directory are available at many medical schools and libraries, or candidates may order the directory directly from the AMA by calling toll-free 800 621-8335, or by writing to: Order Department OP416796, American Medical Association, PO Box 109050, Chicago, IL 60610-9050.

The Board does not inspect or approve residencies. The RRC for Plastic Surgery inspects and makes recommendations for or against approval of a residency training program in plastic surgery only after the director of the residency has filed an application for approval with the Secretary of the Residency Review Committee for Plastic Surgery (515 N State Street, Chicago, IL 60610; 312 464-5404). The RRC consists of nine members, three representatives from each of the following: The American Board of Plastic Surgery, Inc, the American College of Surgeons, and the American Medical Association.

Neither the Board nor its individual members can be responsible for the placement of applicants for training. The Board does not maintain a list of available openings in programs. Prospective candidates seeking accredited training in plastic surgery should correspond directly with the directors of those training programs in which they are interested.

Most plastic surgery residencies participate in a special Plastic Surgery Matching Program. (For information, contact Plastic Surgery Matching Program, PO Box 7999, San Francisco, CA 94120; 415 923-3907.)

#### **Nonapproved Residencies**

No other residencies in the United States, Canada, or other countries are acceptable in lieu of those specified above. This in no way implies that quality training cannot be acquired elsewhere, but the Board has no method of evaluating the quality of such programs and must be consistent in its requirements.

The Board grants no credit for training, residency, and/or experience in disciplines other than those named.

#### **Integrated Model**

##### **United States Program**

Candidates must have a medical or osteopathic degree granted in the United States or Canada by an institution accredited by the LCME or the AOA.

Accreditation by the ACGME is required for all years of the training program.

Training of no less than 5 years of clinical residency under the authority and direction of the plastic surgery program director is required. No less than 24 months of this program must be concentrated plastic surgery training, and the final 12 months must entail senior clinical plastic surgery responsibility. The last 2 years of training must be completed in the same program.

#### Canadian Combined Program

This requirement will pertain to all those applying for admission to the ABPS examination process beginning in the year 2000, but candidates may begin such a course of training before then if they so desire.

The third year of training in the Canadian 5-year combined program must consist of varied rotations of a general surgery nature demonstrating progressive responsibility at a third-year level. This program must be approved by the Royal College of Physicians and Surgeons of Canada for full training.

Rotations may include: the alimentary tract; the abdomen and its contents; the breast, skin, and soft tissue; the head and neck, including trauma, vascular, endocrine, congenital, and oncologic disorders, particularly tumors of the skin, salivary glands, thyroid, parathyroid, and oral cavity; the vascular system, excluding the intracranial vessels, the heart, and those vessels intrinsic and immediately adjacent thereto; the endocrine system; surgical oncology, including coordinated multimodality management of the cancer patient by screening surveillance, surgical adjunctive therapy, rehabilitation, and follow-up; comprehensive management of trauma, including musculoskeletal, hand, and head injuries (responsibility for all phases of care of the injured patient is an essential component of general surgery); and complete care of critically ill patients with underlying surgical conditions in the emergency room, intensive care unit, and trauma/burn units. An entire year spent on one rotation, such as a burn unit, would not be acceptable.

A Request for Evaluation of Training Form must be completed and returned by the candidate to the Board office along with a \$100 nonrefundable processing fee in US funds (made payable to The American Board of Plastic Surgery, Inc).

A Verification Form must be completed and signed by both the director of postgraduate education for the university's department of surgery and the director of the university's training program in plastic surgery. After completion of plastic surgery training, the director of postgraduate surgical education and the plastic surgery program director will be required to complete and sign the last page of the Application for Examination and Certification Form.

#### Applying for Examination and Certification

The prime purpose of the Board is to pass judgment on the education, training, and knowledge of broadly competent and responsible plastic surgeons. Certification by the Board indicates qualification of a specialist at a superior level of excellence. The quality of training of surgeons, as shown by their successful completion of the Board examinations, will be reflected in their ability to achieve good results in practice.

The Board will issue no letters attesting to admissibility for its examinations to any person, institution, or organization until this formal application, along with the required supporting documents, has been received and approved.

#### The Application Process

In order to be admitted to the examination process leading to Board certification, prospective candidates should write to the Board office requesting application materials during the last 2 months of their residency. An Application for Examination and Certification Form will be provided. This should be completed and sub-

mitted to the Board office immediately following the completion of a candidate's residency training in plastic surgery.

Prospective candidates must submit a completed Application for Examination and Certification Form to the Board office within 2 years after completion of their residency in plastic surgery in order to be considered for admission to the examinations leading to Board certification.

#### Deadline for Submission of Application Material

Applications for admission to the upcoming Written Examination to be given in the spring of the following year must be postmarked on or before December 15 to avoid a late penalty fee.

#### Licensure

All candidates must have a currently valid registered full and unrestricted license to practice medicine in a state, territory, or possession of the United States or in a Canadian province, and they must continue to be licensed throughout the certification process. A temporary limited license, such as an educational, institutional, or house permit, is not acceptable. A photocopy of an active registration certificate bearing a date that will be valid at the time of examination(s) must be submitted by the candidate.

Commissioned officers of the medical service of the armed forces of the United States or Canada on active duty need not present evidence of current registration of licensure, but must provide appropriate information regarding their status.

#### Letters of Recommendation

If a candidate has completed training in more than one program in plastic surgery, the program director of the first year of training must verify to the Board, in writing, the satisfactory completion of that year of training. Additionally, the Board may require favorable evaluations and verification from other surgeons.

#### Residency Graduation Form (US Programs)

A Residency Graduation Form will be mailed by the Board office directly to the plastic surgery program director for completion at the end of the resident's training in plastic surgery. A single form will be sent for each resident and will require signatures in two places. The first signature, by the program director, will attest that the individual has completed a residency training program in plastic surgery accredited by the RRC for Plastic Surgery under his/her direction and that the accredited number of years included a year of senior responsibility. The second signature will signify that the program director recommends the individual for admission to the examination process of the Board.

If the program director elects not to sign either statement, the director is required to provide a full written explanation of the reason the required signature(s) is not provided. The individual's application cannot be processed, nor will the individual be admitted to the examination process of the Board, without both required signatures.

The Board has asked each program director to complete a Residency Graduation Form within 30 days of completion, by the trainee, of the prescribed duration of the program.

The program director must record any deficiencies that were responsible for the lack of signature(s) and discuss these with the individual. This written communication must be given to the individual and a copy must be forwarded to the Board office. If further educational training or experience is completed, the program director should request, within 30 days, that another Residency Graduation Form be sent for the required signature(s). If the individual is still felt to be deficient and not recommended for admission to the examination process of the Board, the program director again must communicate the cause for the lack of signature(s) to the Board office.

Failure on the part of the program director to complete the Residency Graduation Form within the stipulated framework will be con-

sidered an abrogation of the responsibility of the program director and the RRC for Plastic Surgery shall be so notified.

#### *Required Signatures (Canadian Programs)*

Plastic surgery residents who complete their training in Canada will be sent an Application for Examination and Certification Form that must be completed accurately and signed by them. It must also be completed and signed by both the director of postgraduate surgical education and the plastic surgery program director responsible for the resident's senior year. The signature of the director of postgraduate surgical education will signify that the resident has fulfilled all of the prerequisite and requisite graduate medical education requirements prescribed by the ABPS to the best of his/her knowledge. The two signatures by the plastic surgery program director will (1) attest that the resident has completed a plastic surgery residency accredited by the Royal College of Physicians and Surgeons of Canada, and has included a senior year of responsibility under his/her direction; and (2) recommend the resident for admission to the examination process of the ABPS.

#### **Notification of Admissibility**

A candidate whose Application for Examination and Certification Form is approved will be notified in writing. An Information Form and Identification Form will be sent with this notification. They are to be completed and returned to the Board office within 30 days of notification. Failure to complete and return these forms will prevent the candidate from receiving further information pertaining to the Written Examination.

If it appears that the stated requirements have not been met, further details may be requested. This information will be reviewed by the Credentials and Requirements Committee. The committee meets twice yearly (spring and fall), and decisions are not rendered at any other time.

Until the application has been received and approved, the Board will not inform any person, institution, or organization that a candidate is admissible to the examination process.

#### *Admissibility to the Examination Process*

Each qualified candidate shall be entitled to take an examination(s) as required by the Board.

All candidates must comply with the current regulations in effect for the year in which the examination is taken, regardless of the time the original application was approved. It is the responsibility of candidates to seek information concerning the current requirements for certification by the Board. The Board does not assume responsibility for notifying candidates of changing requirements or the impending loss of admissibility to take an examination. A new *Booklet of Information* is published yearly in July.

All candidates taking an examination of the ABPS must complete the entire examination.

Certification by any other specialty Board does not exempt candidates from any part of the examination process.

#### **Written Examination**

The Written Examination will be conducted in the spring each year or at any other time deemed suitable by the Board. The examination will be given on the dates specified and at the time specified. No exceptions will be made, and special examinations will be given only under unusual circumstances (see "Examination of Candidates With Disabilities" under "Special Situations").

#### **Admissibility to the Written Examination**

Candidates admissible to the examination process may take the Written Examination in the spring of the year following successful completion of residency in plastic surgery, provided the Application for Examination and Certification Form is approved.

Candidates approved for admission to the Written Examination prior to July 1, 1991, will be offered seven consecutive opportunities to appear for the Written Examination. Candidates may take the Written Examination five times during this 7-year period. Candidates who have not passed the Written Examination during this period will no longer be candidates for examination.

Candidates approved for admission to the Written Examination July 1, 1991, and thereafter, will be offered five consecutive opportunities to appear for the Written Examination. Candidates may take the Written Examination three times during this 5-year period. Candidates who have not passed the Written Examination during this period will no longer be candidates for examination.

In either situation, the satisfactory completion of an additional year of training is required before a candidate can be considered for readmission to the Written Examination. This additional year of training can be taken in a formal residency or a suitable plastic surgery preceptorship. This additional year of training must be approved in advance by the Credentials and Requirements Committee of the Board. Evidence of satisfactory completion of this year of training is required before further consideration for examination will be made.

If the Board approves the candidate's request for readmission to the Written Examination, two more consecutive opportunities to appear for the Written Examination will be offered. Once approval is received, the candidate must sit for examination at the first available opportunity. Candidates who do not successfully pass the Written Examination within these two consecutive opportunities will be required to repeat an entire plastic surgery residency to again be admissible to the examination process.

#### **Announcement Information**

Candidates who are admissible to the Written Examination will be sent annually, throughout their period of admissibility, an Announcement Letter, Booklet of Information, reply card (green), and a hotel reservation card, approximately 3 months before the date of the examination to be given in the spring of that year. When the reply card (green) is received, candidates must signify their intent to take the examination by completing and returning the reply card and examination fee immediately to the Board office.

Both sides of the reply card (green) must be completed. Otherwise candidates will not be scheduled for examination. Hospital appointments must be recorded on the reply card (green).

Candidates are responsible for their own travel, hotel accommodations, and expenses. A hotel reservation card will be included with the reply card (green). Candidates may use this if they wish to stay in the hotel at which the examination is to be given.

#### **Admission to Examination**

If the returned reply card (green) and examination fee for the Written Examination are not postmarked on or before March 1, a late penalty fee of \$200 will apply.

Reply cards (green) and examination fees postmarked March 2 up to and including March 15 will be considered only on a space-available basis, and the late penalty fee of \$200 must accompany these items. Reply cards (green) and examination fees postmarked after March 15 will not be accepted for admission to the spring Written Examination.

(The names of candidates who are late returning the reply cards [green] and examination fees will be kept on file. If openings develop by the withdrawal of other candidates, the late candidates may be admitted in the order of the receipt of the reply cards [green]. No candidate will be admitted less than 4 weeks preceding the examination.)

Once candidates have been scheduled for the Written Examination, they will be sent an admission card (white) 5 to 6 weeks be-

fore the date of the examination. Candidates must present their admission cards (white) when they register for the examination at both the morning and afternoon sessions. Printed on this card will be the candidate's name and current address; candidate number; the date, time, and location of the examination; the specific room in which the candidate is to take the examination; and the "Result Mailing Date." Candidates must use their candidate numbers throughout the examination.

Late arrival may result in denial of admission to the examination.

Advise the Board office immediately by telephone (215 587-9322) if the admission card (white) is lost prior to the examination.

#### **Withdrawal From Examination**

Candidates wishing to withdraw from the examination must send written notification postmarked at least 30 calendar days before the date of the examination. The examination fee will be refunded, less a processing charge of \$200. Candidates who withdraw from the examination after this date or who fail to appear for the examination will forfeit the entire fee. The Board may waive this rule if the circumstances warrant.

#### **Registration and Administration of the Examination**

All candidates must take the entire examination on the same day and at the same time.

Candidates must register for the morning and afternoon sessions at the date, time, and location specified on their admission cards (white). If for any reason candidates are delayed or cannot arrive on time, they must notify the proctor or the Board office. If candidates are unable to attend the examination, they must notify the Board office either by letter or by telephone prior to the time of registration for the morning session. Anyone who is more than 30 minutes late will not be admitted to the examination.

The Board office will provide each candidate with lead pencils for use during the examination. No other writing implements may be used.

Candidates are not permitted to bring any notes, textbooks, or other reference materials into the examination. Scratch paper is not permitted, but space for notes and calculations is provided in the Examination Book.

Examination Books are copyrighted and are the sole property of the ABPS. They must not be removed from the test area or reproduced. Reproduction of copyrighted material is a federal offense.

#### **Change of Address**

If a candidate's address, as it appears on the admission card (white), is incorrect or will change before the "Result Mailing Date," please enter the corrected or new address on the back of the admission card (white) in the space provided before turning it in to a proctor at the end of the afternoon session. Admission cards (white) will be collected from all candidates at the conclusion of the examination.

#### **Examination Schedule**

The Written Examination will consist of a morning session and an afternoon session. The sessions are not separate examinations, but are graded together as one examination and will not be separately administered.

The morning session is 3 hours and 15 minutes in duration, and the afternoon session is 3 hours in duration. Both sessions will consist of multiple-choice questions of two types (one best answer or multiple true-false).

In general, each test item consists of a question, a case history, or a situation followed by a list of possible answers. Instructions for completion of each type are given in the Examination Book that candidates will receive at the examination. Included in each Examination Book is an Answer Sheet upon which candidates must record their answers by filling in the appropriate circles (in pencil).

#### **Content of the Examination**

The subjects covered in the examination are listed below, and both sessions will cover the entire field of plastic surgery, with no differentiation in content between the morning and afternoon sessions:

1. Basic techniques, wound healing, microsurgery, transplantation
2. Burns, sepsis, metabolism, trauma, resuscitation, nutrition, endocrinology, shock, hematology
3. Pre- and postoperative care, anesthesia, cardiorespiratory care, complications, clinical pharmacology
4. Tumors of the head and neck, skin, and breast, including treatment by radiation therapy, immunotherapy, chemotherapy, and surgery
5. Trunk, lower extremity, musculoskeletal system, pressure ulcers, rehabilitation
6. Hand, peripheral nerves, rehabilitation
7. Maxillofacial and craniofacial surgery and microsurgery
8. Congenital anomalies, genetics, teratology, facial deformity, speech pathology, gynecology, and genitourinary problems
9. Aesthetic (cosmetic) surgery, psychiatry, and legal medicine
10. Basic knowledge of pathology (eg, the biologic behavior of neoplasms, inflammation, and repair)
11. Gross and functional anatomy, embryology

The questions for the examination cover subjects considered to be of fundamental importance to competent performance in the field of plastic surgery. Every effort is made to avoid "trick" questions, ambiguity, and questions involving irrelevant facts. All questions are analyzed by psychometric techniques to ensure their quality.

Candidates will pass or fail on the strength of their performance on the entire Written Examination.

#### **Results**

Letters of notification of the results (pass or fail) of the Written Examination will be mailed on the date indicated on the admission card (white). The time period between administration of the examination and notification is necessary to allow for extensive analysis and to ensure that individual results are reliable and accurate.

Results of the examination will be divulged to no one until after the Board result letter has had time to reach candidates. If a week has elapsed after the "Result Mailing Date" and candidates still have not received the letter from the Board, they may then call for information. Information will be given to no one but a candidate personally. The Board staff will verify candidates' identity prior to releasing results to them.

Each candidate will receive a single final grade (pass or fail) for the entire examination. To complete the Written Examination successfully, candidates must achieve a passing grade for the entire examination.

The score (pass or fail) on the examination will be determined by the total number of alternatives answered correctly. Therefore, candidates are encouraged to answer all items.

The Board will send a report to candidates' plastic surgery training director and to the RRC for Plastic Surgery, concerning the performance (pass or fail) of candidates on the Written and Oral Examinations.

#### **Pass**

If a candidate passes the Written Examination, he/she will be informed of this fact.

#### **Fail**

If a candidate fails the Written Examination, he/she will be informed of this fact.

In case of failure, the candidate must repeat the entire Written Examination.

### Hand Scoring

Hand scoring of the Written Examination will be performed upon written request. To request hand scoring, candidates must write to the Board office within 30 days from notification of the results. Candidates will be responsible for an extra charge for hand scoring of the examination. This charge will be determined by the Secretary-Treasurer of the Board. Currently, that fee is \$200.

## Oral Examination

### Admissibility to the Oral Examination

Prior to becoming admissible to the Oral Examination, candidates must have passed the Written Examination and have fulfilled the 2-year independent practice requirement as it applies to them.

Only those candidates who have submitted a 12-month case list compilation acceptable to the Board, along with the \$500 nonrefundable fee, will be sent an Announcement Letter, Booklet of Information, reply card (green), a hotel reservation card, and a list of ten cases for preparation as Case Reports approximately 3 months in advance of the date and place of the next Examination.

Candidates approved for admission to the examination process prior to July 1, 1991, will be offered seven consecutive opportunities to appear for the Oral Examination. Candidates may take the Oral Examination five times during this 7-year period. Candidates who have not passed the Oral Examination during this period will no longer be candidates for examination.

Candidates approved for admission to the examination process, July 1, 1991 and thereafter, will be offered five consecutive opportunities to appear for the Oral Examination. Candidates may take the Oral Examination three times during this 5-year period. Candidates who have not passed the Oral Examination during this period will no longer be candidates for examination.

In either situation, the satisfactory completion of an additional year of training is required before candidates can be considered for readmission to the Oral Examination. This additional year of training can be taken in a formal residency or a suitable plastic surgery preceptorship. This additional year of training must be approved in advance by the Credentials and Requirements Committee of the Board. Evidence of satisfactory completion of this year of training is required before further consideration for examination will be made.

If the Board approves the candidate's request for readmission to the Oral Examination, two more consecutive opportunities to appear for the Oral Examination will be offered. Once approval is received, the candidate must sit for examination at the first available opportunity. Candidates who do not successfully pass the Oral Examination within these two consecutive opportunities will be required to repeat an entire plastic surgery residency to again be admissible to the examination process.

### Practice Requirement

1. Candidates approved for admission to the examination process prior to July 1, 1986, do not have a practice requirement.
2. Candidates approved for admission to the examination process between July 1, 1986, and July 1, 1989, must have been in the independent practice of plastic surgery for at least 2 years.
3. Candidates approved for admission to the examination process between July 1, 1989, and July 1, 1995, must have been in the independent practice of plastic surgery in the same locale for at least 2 years. These years need not be consecutive.
4. Candidates approved for admission to the examination process July 1, 1995, and thereafter must have been in the independent practice of plastic surgery for at least 2 years. These years need not be consecutive.
5. The 12-month case list must come from cases done in the independent practice of plastic surgery beginning January 1 and end-

ing December 31 of the year preceding the year in which the Oral Examination is to be taken.

6. The 2 years of practice need not be consecutive, but the candidate must be in practice during the 12-month period required for compilation of the case list. Currently, that period ends on December 31 of the year preceding the Oral Examination.
7. Candidates must be actively engaged primarily in the practice of plastic surgery and hold active operating privileges in a hospital.
8. A fellowship is not considered independent practice.

### Instructions/Information Pertaining to the Oral Examination

The Oral Examination will be conducted each fall or at such other time as deemed suitable by the Board. The examination will be given on the dates and at the times specified. No exceptions will be made.

### Announcement Information

Candidates who are deemed admissible to the Certifying Examination will be sent annually, throughout their period of admissibility, an Announcement Letter, Booklet of Information, reply card (green), hotel reservation card, and a list of ten cases for preparation as Case Reports approximately 3 months before the date of the examination to be given in the fall of that year. When the reply card (green) is received, candidates must signify their intent to take the examination by completing and returning the reply card (green) and balance of the examination fee (\$700) immediately to the Board office.

Both sides of the reply card (green) must be completed. Otherwise candidates will not be scheduled for examination. Hospital appointments must be recorded on the reply card (green).

Candidates are responsible for their own travel, hotel accommodations, and expenses. A hotel reservation card is included with the reply card (green). Candidates may use this card if they wish to stay in the hotel at which the examination is to be given.

### Admission to Examination

If the returned reply card (green) and balance of the examination fee (\$700) for the Oral Examination are not postmarked on or before September 1, a late penalty fee of \$300 will apply.

Reply cards (green) and balance of the examination fee (\$700) postmarked September 2 up to and including September 15 will be considered only on a space-available basis, and the late penalty fee of \$300 must accompany these items. Reply cards (green) and balance of the examination fee (\$700) postmarked after September 15 will not be accepted for admission to the fall Oral Examination.

(The names of candidates who are late returning the reply cards [green] and balance of the examination fee [\$700] will be kept on file. If openings develop by the withdrawal of other candidates, the late candidates may be admitted in the order of the receipt of reply cards. No candidate will be admitted less than 4 weeks preceding the examination.)

Once candidates have been scheduled for the Oral Examination, they will be sent an admission card (white) 5 to 6 weeks before the date of the examination. Printed on this card will be each candidate's name and current address; assigned candidate number; the date, time, and location of the examination; the specific room in which candidates are to assemble; and the "Result Mailing Date."

A separate mailing will contain ten folders and labels for assembling and binding of the selected case reports. It is imperative that each candidate place the assigned candidate number, which appears on the admission card (white), on each label to be affixed to the cover of each case report, along with the other required information.

Advise the Board office immediately by telephone (215 587-9322) if the admission card (white) is lost prior to the examination.

*Withdrawal From Examination*

Candidates wishing to withdraw from the examination must send written notification postmarked at least 30 calendar days before the date of the examination. The examination fee will be refunded, less a processing charge of \$300. Candidates who withdraw from the examination after this date or who fail to appear for the examination will forfeit the entire examination fee. The Board may waive this rule if the circumstances warrant.

*Requirements for Case Reports*

The following materials, collated in this order, must be present in each of the case reports submitted. (Candidates may use tabs, if they so desire, when assembling their Case Reports.)

1. A brief narrative summary of the preoperative, operative, and postoperative course of the patient. Include a final separate paragraph entitled "outcome," and indicate here the outcome of the treatment and the final condition of the patient. This paragraph will appear at the bottom of the same page for the narrative summary.
2. Pre- and postoperative photographs; approximately 3½×5-inch black-and-white or color prints glued on 8½×11-inch white bond paper. Intraoperative photographs are strongly recommended. Diagrams or simple drawings may be substituted for intraoperative photographs. Descriptive legends and dates of the photos must be placed adjacent to each photo. Transparencies will not be accepted.
3. Photocopies of the original operative reports.
4. Photocopies of the original anesthetic records.
5. Photocopies of pertinent laboratory data.
6. Photocopies of the pathologist's report.
7. Photographs of pertinent x-rays or scans. (Actual x-rays are unacceptable.) Each x-ray or scan should be dated in a manner that is easily visible.
8. Photocopies of the original progress notes, including the patient's history and physical examination, and all postoperative and post-discharge progress notes, both in the hospital and from the office records, including the initial consultation. If legibility is a problem, include a typewritten copy also.
9. Photocopies of the actual bill(s) submitted to the patient. The actual dollar amount of the fee should be deleted. A printed copy of the bill must be included for all bills generated via electronic billing.

In the event that more than one procedure is performed on the patient during the 12-month case list period, include all procedures and hospitalization(s) that fall within the 12 months. You are not required to document procedures that fall prior to or after the 12-month period. However, if these procedures increase understanding of the case they may be included at the candidate's discretion. Documentation for procedures falling outside the 12-month period does not have to be complete—the candidate may be selective here.

Note: If the records are not in English, an accurate and complete English translation must accompany them.

*Presentation of Case Reports*

Candidates will be asked to assemble the ten selected Case Reports in the folders provided by the Board office and to bring these case reports to the fall Oral Examination.

During the examination candidates must be prepared to defend the choice of operation and to present alternate treatment plans considered. Hospital and office records must clearly identify the candidate as the attending physician and surgeon. However, the candidate need not necessarily be the admitting physician, so long as he/she is clearly the attending plastic surgeon. Cases done by a resident under the candidate's supervision may be chosen by the Board and will be considered in the same way as cases done personally.

Each report must be typed or reproduced on standard, letter-sized white paper (8½×11 inches) with the candidate's full name and assigned candidate number, the number of the case, the hospital (or other identifying) number, the principal diagnosis, and the primary operation listed on the title page. Bind the cases singly in the folders supplied by the Board. (Candidates may use tabs, if they so desire, when assembling their Case Reports.) Do not place any pages or photographs in acetate (sheet protectors). Photos must be glued to white bond paper.

Group all operative notes, anesthesia records, photographs, etc, together in chronologic order such that all operative notes will appear in one location in the book, all photographs in one location, etc.

In the circumstances of excessively long hospitalizations resulting in progress note sections of such thickness that they cannot be bound in one case folder, this section may be debrided of nonpertinent notes and then bound separately, brought to the examination, but retained by the candidate and not turned in with the Case Reports. A notation of this necessity should appear at the beginning of the progress note section. Thus the candidate will produce this extra material only upon request of the examiners.

Candidates must provide a list of all ten cases. The list must be typed on a single sheet of white bond paper and be bound at the beginning of the first case in its folder. The list must be identified with the candidate's name and assigned candidate number. For each case, include the following information:

1. *Category*
  - Aesthetic
  - Burn
  - Cancer
  - Congenital
  - Skin
  - Trauma
  - Other*
    - Anatomy
    - Head and Neck
    - Breast
    - Hand
    - Upper Extremity
    - Trunk
    - Lower Extremity
    - Genitalia

Note: Cases must be categorized exactly as was done on the 12-month case list compilation.

2. Patient's hospital (or other) identifying number
3. Primary diagnosis
4. Procedure(s) done by the candidate

The Board regards the Case Reports submitted as important evidence of the candidate's basic ability to carry out plastic surgical procedures and to organize and present information in a succinct and complete fashion.

Improper or disorganized preparation of this material will be sufficient cause to disqualify a candidate for continued examination.

*Disqualification on Case Reports*

If a candidate is disqualified for continuation in the examination process because the case reports are judged unacceptable (for whatever reason), it will not be recorded as a failure, but is counted as one of the opportunities to appear. However, because the Board has incurred expenses to provide a candidate with an examination, the examination fee, less the processing charge of \$300, will be refunded.

**Examination Schedule**

The Oral Examination will occupy 1 full day. Late arrival may result in denial of admission to the examination. The Board office will as-

sign the day (second or third day) on which candidates will be examined. This assignment is by random computer selection. The Board regrets that half of the candidates (those selected for examination on the third day) will have an empty day (the second day). However, it is still necessary that all candidates turn in cases on the first day in order for examiners to have a full day for review of the cases.

#### *First Day*

8:00 am–9:00 am

All candidates register and hand-deliver case reports to the room designated on the admission card (white).

11:30 am–12:30 pm

Orientation Conference for candidates for discussion of Oral Examination format. Attendance is mandatory.

1:00 pm–7:00 pm

Candidates should be available in their hotel rooms (or reachable by telephone) during this time frame in case the Board wishes to contact them regarding the examination on their cases.

#### *Second Day*

7:00 am

Candidates assemble for instructions

7:45 am–12:30 pm

Oral Examinations—Case Reports

1:45 pm–5:30 pm

Oral Examinations—Theory and Practice

6:15 pm–7:15 pm

Voluntary Debriefing Session

#### *Third Day*

7:00 am

Candidates assemble for instructions

7:45 am–12:30 pm

Oral Examinations—Case Reports

1:45 pm–5:30 pm

Oral Examinations—Theory and Practice

6:15 pm–7:15 pm

Voluntary Debriefing Session

Please note: The times of the Examination Schedule are subject to change and will be finally announced on the morning of the examination.

#### *Instructions and Procedures*

Candidates will receive specific instructions concerning the examination at the assembly on the morning of the day of examination. Candidates will also be given a schedule showing the time and the location of each examination session.

Failure to appear on time for any session of the examination will lead to a grade of fail on that section. Candidates should be outside the examination room 5 minutes before the assigned time. It is not necessary for candidates to announce their presence. If, however, a candidate has not been invited into the examination room by the examiners by 10 minutes after the scheduled time, the candidate should notify the temporary Board office immediately.

The Board has made every effort to assign candidates to examiners whose knowledge of the candidate's background would not bias their evaluation of performance. If a candidate finds that an examiner to whom he/she has been assigned played a role in the candidate's training, is a close friend or relative, is a close professional associate, or has examined the candidate previously, the Board staff must be notified immediately. However, unless conflicts are identified in advance of the actual examination, the conduct and grades of that session cannot be contested on the basis of prior contact or knowledge.

#### **Description of the Examination**

Each examination session is designed to evaluate the candidate's breadth and depth of knowledge, the ability to apply it in the solution of a wide range of clinical problems, and matters related to ethics. Each session is structured in that the examiners are given a schema to be followed. This approach ensures uniformity and prevents duplication. Each of the examiners on each team is expected to pose problems and questions to candidates.

All examiners are diplomates of the American Board of Plastic Surgery, Inc, are active in the practice and/or teaching of plastic surgery, and have been certified by the Board for more than 5 years. They are respected members of the profession and known for their surgical knowledge, expertise, and scientific contributions. They have been instructed in the technique and purposes of the examination process. Each team includes a senior examiner and a guest examiner.

The Oral Examination is given on 1 day and consists of two parts.

1. A 1-hour oral examination on ten major cases (see Case Reports) selected by the Board and indicative of the candidate's work in the field of plastic surgery; and
2. A 45-minute oral examination prepared by the Board on the theory and practice of plastic surgery.

Each candidate will be examined by two teams of examiners. Grades will be given by all four examiners, and all four grades combined will determine the passing or failing status of each candidate.

The Board is determined that the examination shall be as comprehensive and objective as practical. Its intention is that every candidate be provided an equal opportunity to become Board certified. The same standard is applied to each candidate insofar as is possible.

#### *Change of Address*

If a candidate's address, as it appears on the admission card (white), is incorrect or will change before the "Result Mailing Date," please enter the corrected or new address on the back of the admission card (white) in the space provided. Candidates should deliver the admission card (white), indicating the corrected or new address, to the temporary Board office at the examination center before 11 am on the day they are scheduled to appear for the Oral Examination.

#### *Debriefing Session*

On the evenings of the second and third days, there will be voluntary debriefing sessions for candidates taking the examination that day. The Board encourages candidates to attend for the purpose of evaluating the examination just completed.

#### **Results**

Every candidate will be evaluated by each member of the examining teams, and performance may be discussed in detail by the entire Board. The final decision regarding certification will be rendered by the entire Board at its meeting following the completion of the fall Oral Examination. Do not call the Board office for information. Do not call your examiners.

Letters of notification of the results (pass or fail) of the Oral Examination will be mailed on the date indicated on the admission card (white). Results of the examination will be divulged to no one until after the Board result letter has had time to reach candidates.

If a week has elapsed after the "Result Mailing Date" and the candidate still has not received the letter from the Board, he/she may then call for information. Information will be given to no one but a candidate personally. The Board staff will verify candidates' identity prior to releasing results to them.

#### *Examination Performance*

Candidates desiring information concerning performance after they have received the letter of notification may correspond, within 30

days of notification, by writing to the chair of the Oral Committee at the Board office. Candidates will be responsible for an extra charge for information concerning their performance. This charge will be determined by the Secretary-Treasurer of the Board. Currently, that fee is \$200.

**Subsequent Case List Compilation**

Candidates for the 1996 Oral Examination will be required to provide the Board with a compilation of operative cases and hospitalized patients for a 12-month period beginning January 1, 1995, and ending December 31, 1995.

The method of compilation of the case list will use a computerized program available on an IBM- or Mac-compatible 3.5-inch floppy disk. The computerized mechanism provides a standardized list that will facilitate review. Candidates with IBM- or Mac-compatible office equipment or those desiring to rent such services will find the menu-driven program easy to complete.

The printed list will be in chronological order for each institution (hospital, office-based surgery, etc) and include patient's name, hospital (or other) identifying number, date of birth, sex, date of operation, diagnosis, procedure performed (if any), CPT codes plus modifiers (identical to those used for billing on that case), and outcome including complications.

The appropriate floppy disk for compiling the 12-month case list will be sent to candidates when they return the "Disk Request Form" to the Board office. Disk requests for the 1996 Oral Examination will be honored up to and including December 31, 1995. Absolutely no disk requests will be honored after this date.

Preparation of the case list using the program provided by the Board office can be selected from menu options. To print in the desired format requires a "landscape-capable" (horizontal) laser printer. A vertically oriented printout (for review purposes) can be obtained from a simple dot-matrix printer. Because this system is menu driven, it should prove simple to use by offices with IBM- or Mac-compatible equipment. Offices not having IBM- or Mac-compatible equipment may choose to have their raw list transferred to this form by renting stenographic service. After generation of the case lists and preparation of the additional material, the disk will be returned to the Board office with an original and a copy of the Candidate Case Summary Sheet (obtainable via computer disk) and completed case lists (affidavits for each institution are automatically printed out on the last page of each institution's case list).

**Instructions for Data Compilation**

A helpful suggestion is to begin compiling the case list on a weekly or monthly basis, not waiting until January to start compilation on the IBM- or Mac-compatible disk.

1. It is essential that complete information is provided under diagnosis and procedure. Give an accurate written description of the diagnosis and the operative procedure(s) as taken from the operative note. Do not use ICD-9 and CPT codes in place of the written description of the diagnosis and procedure(s). If the case was nonoperative, include a diagnosis taken from the discharge summary. Include *all* CPT codes plus modifiers (identical to those used for billing on that case) applicable for each case. Military, Veterans Affairs, Kaiser Permanente, Shriners Burn hospitals, and candidates practicing in Canada are exempt from using CPT codes. Everyone else must record the CPT codes used for insurance billing purposes as well as all cases that were not billed to insurance (eg, aesthetic/cosmetic).
2. Do not list assistant cases, namely cases billed by the candidate as an assistant surgeon. This exclusion does not cover cases performed by a resident and attended by the candidate or cases billed as cosurgeon; such cases should be included on the case list.

3. It is essential that information be provided under "outcome." A short statement with respect to the outcome of each case will help guide the Board. Not all cases "heal without problems." Examples would include "necrosis of tip of flap" or "normal sensation returned, but index finger stiff after tendon repair." Outcome recording using the computer program will be provided by Number Selection—only numbers 3, 4, and 5 require written explanation.
4. The list must be keyed for multiple operative procedures on the same patient. This keying is automatic for the computer program, but hospital (or other) identifying numbers and names are consistent for a patient with multiple procedures (eg, if a patient is listed at more than one institution, a consistent number must be used to identify the patient).
5. All operative procedures must be included, whether inpatient, ambulatory outpatient, or office-based surgery. All patients hospitalized by the candidate as the admitting physician must also be included, even if the patient is managed nonoperatively. Outpatient surgery performed in the office (moles) that does not require a dictated note does not need to be included, but the Board would suggest that the candidate err in the direction of inclusion rather than exclusion of cases from the list. Inpatient consultations on other services that did not culminate in an operation performed by the candidate need not be included.
6. All admitted emergency room patients and all outpatient emergency room cases that required an operative note must be included.
7. The completed list(s) must be signed by the medical records librarian of each institution (hospital, ambulatory surgery center, etc) and be properly notarized as a complete list of the respective candidate's operative experience. Operations performed by the candidate in the office must also be listed and signed by the appropriate office personnel who can attest to completeness.
8. Two Candidate Case Summary Sheets (original and copy) must be submitted. This form will facilitate the review process of the Board. This form will be directly generated from the program by menu selection.
9. Two copies (an original and a copy) of the complete compiled list of cases of the 12-month experience of January 1, 1995, to December 31, 1995, including the signed and notarized affidavits, two Candidate Case Summary Sheets, and a check in the amount of \$500 (nonrefundable) made payable to the American Board of Plastic Surgery, Inc. (US funds only), must be postmarked on or before February 1, 1996, in order for a candidate to be considered for admission to the November 21-23, 1996, Oral Examination. These materials should not be placed in binders or notebooks.

*Submission of Data*

1. Print your 12-month case list.
2. The affidavits must be signed by the medical records librarian of each institution and notarized (see 7 under "Instructions for Data Compilation").
3. Make a copy of the entire case list including the signed and notarized affidavits.
4. Place the original 12-month case list, including the signed and notarized affidavits for each institution, in a separate compilation. Also make a separate compilation for each of the copies. Please be sure to keep all pages in numerical order. The signed and notarized affidavits from each institution will appear at the end of each institution's 12-month case list. Staple each institution's case list together.

Keep separate both the original and copy of the printed sheet that includes the six-digit candidate number, name, address, telephone number(s), and candidate affidavit.

5. Take the stapled case list, including the signed and notarized affidavits for the first institution (case list starts with page 1), and staple the "Candidate Affidavit Sheet" to the top of this section only. Follow the same process for the copy of the first institution.
6. Place all of your stapled original 12-month case lists together, including the signed and notarized affidavits; place the computer-generated Candidate Case Summary Sheet on bottom; and attach all of this together using a binder clip or a rubber band. Follow the same process for your stapled copies of the 12-month case lists including the signed and notarized affidavits, using a copy of the computer-generated Candidate Case Summary Sheet. Do not place this material in binders or notebooks.
7. You are now ready to mail your completed case list information, the completed disk, and \$500 (nonrefundable) fee to the Board office. Make your check payable to The American Board of Plastic Surgery, Inc (must be in US funds).

In order to ensure delivery of your materials, we suggest that you send your materials by a carrier providing assurance of delivery and receipt. Most overnight carriers can furnish this information within 30 minutes of delivery. We strongly discourage you from calling the Board office to check on receipt of materials, since inquiry calls of this nature greatly hamper the Board staff in processing the enormous volume of materials received at this time.

#### Reminder

Candidates who do not provide the required items in the manner outlined will not be considered for admission to the fall 1996 Oral. The items submitted will be returned to the candidate. Unequivocally no exceptions can be made regarding incomplete lists.

The absolute postmarked deadline for two sets of the computer-generated 12-month case list (including the signed and notarized affidavits and the Candidate Case Summary Sheet) is February 1, 1996. A \$500 (nonrefundable) fee must be enclosed to provide for review of the case list and selection of ten cases for preparation as Case Reports. The floppy disk must be included with the printed materials. No lists or other materials will be accepted after this post-marked date.

It is the responsibility of each candidate to keep copies of all materials submitted to the Board. The Board staff will not make copies of incomplete information for candidates. Make sure that all materials have been proofread and properly collated. Check to be certain that all pages have been numbered in sequence. Page numbers will appear in the upper right-hand corner of each page.

#### Photographic Documentation

Particular emphasis should be placed on the necessity of photographic documentation. Preoperative and postoperative photographs are mandatory on all cases, and intraoperative photographs may aid in further illustration of the clinical problem.

The Board advises candidates who have not acquired the habit of routine photographic documentation of all patients to do so at their earliest convenience. Any cases from this 1-year period may be selected. Therefore, all cases during this year must have photographic documentation, including all hand cases (ie, carpal tunnel cases, etc).

#### Board Review/Selection Process

The Board will review the Candidate Case Summary Sheet and Candidate's Case List to determine if the candidate's operative list reflects an experience that is sufficiently mature in the representative areas of the field of plastic surgery to permit examination of the candidate for certification as an expert in the specialty. In the event that the case list offered is not adequate to allow selection of cases, the candidate will be deemed ineligible for the fall Oral Examination. This will constitute one of the opportunities to appear

for the Oral Examination, but will not count as an unsatisfactory performance.

The candidate will be allowed to submit another list of cases for the following year. Written notification regarding case lists inadequate to allow for selection of Case Reports will be mailed by July 15, 1996, or sooner, if possible. In the meantime, candidates are asked not contact the Board office prior to that date with respect to the list.

The Board will select ten cases from the candidate's compiled 12-month case list and request each candidate to prepare Case Reports. The selected Case Reports will be prepared in the same format and with similar requirements as in past years—pre- and postoperative photographs, operative reports, pathology reports, x-rays where pertinent, postoperative office progress notes, and a copy of the actual bill submitted for services to the patient. The actual dollar amount of the fee should be deleted. A printed copy of the bill must be included for all bills generated via electronic billing.

The list of Board-selected cases for preparation as Case Reports will be mailed to candidates by July 15, 1996, along with an Announcement Letter, Booklet of Information, reply card (green), and a hotel reservation card for the November 21-23 (Thursday-Saturday), 1996 Oral Examination. Candidates are asked not to contact the Board office prior to that date with respect to the list.

Please be advised that the format for the 1997 Fall Oral Examination will be similar in nature and will require a 12-month case list (January 1, 1996, to December 31, 1996).

#### Fee Schedule

##### Processing

**US \$100**

The processing fee (\$100) must be submitted with the Request for Evaluation of Training Form and is not refundable.

##### Registration

**US \$400**

The registration fee (\$400) must be submitted with the Application for Examination and Certification Form and is not refundable.

##### Written Examination

**US \$800**

The \$800 Written Examination fee is a separate fee over and above the \$400 Registration Fee submitted with the Application for Examination and Certification Form. The fee for the Written Examination (\$800) must be submitted when the reply card (green) requesting examination is returned to the Board office. The fee for the Written Examination must accompany the card only if a candidate wishes to be scheduled for the examination.

##### Oral Examination

**US \$1,200 (total amount)**

A \$500 (nonrefundable) fee must be enclosed with the 12-month case list to provide for review of the case list and selection of ten cases for preparation as Case Reports. The balance of the examination fee (\$700) must be submitted with the reply card (green) requesting a reserved examination slot.

Fees must be submitted in US currency only. Foreign currencies, including Canadian, are unacceptable.

A charge of \$50 will be made whenever a check in payment of a fee is returned for nonpayment.

Fees are subject to change by the Board. The fee schedule applicable to current examinations will apply regardless of when a candidate is approved for admission to the examination process.

The Board is a nonprofit organization, and the fees of candidates are used solely for defraying the actual expenses of the Board. The directors of the Board serve without remuneration. Because of the limited number of plastic surgeons certified by this Board, it may be necessary for the Board to request a voluntary annual contribution from its diplomates.

### Repeat Examination Fee

Fees for repeat examinations are the same as for the current original examinations.

### Refunds

For the Written Examination, a refund of the examination fee (less a processing charge of \$200) will be granted, provided the candidate submits a written request for withdrawal postmarked at least 30 calendar days prior to the date of the examination.

For the Oral Examination, a refund of the examination fee (less a processing charge of \$300) will be granted, provided the candidate submits a written request for withdrawal postmarked at least 30 calendar days prior to the date of the examination.

Candidates who notify the Board office in writing (for either the Written or Oral Examination) in a letter postmarked less than 30 calendar days prior to the examination date of their intent to withdraw, or who fail to appear for examination, will forfeit the entire examination fee. The Board may waive this rule if the circumstances warrant.

### Special Situations

#### Appeals Policy

The Board has established a policy relative to resolution of questions or disagreements regarding its decisions on admissibility to examination; the form, contents, administration or results of the Written Examination; the administration of the Oral Examination; and the revocation of certificates. If an individual has a concern in any of these areas, it should be expressed in writing to the Board office, and a copy of the Appeals Policy will be sent to that individual.

#### Examination of Candidates With Disabilities

The ABPS complies with the Americans with Disabilities Act by making a reasonable effort to provide candidates who have proven disabilities with modifications of its examination process that are appropriate for such disabilities. No modification will be made that alters the measurement of the skills or knowledge that the examination process is intended to test. Any disability that a candidate believes requires such a modification in the Board's examination process must be identified and documented by the candidate within 60 days after the candidate is notified of admissibility to the examination process or within 60 days after the candidate learns of such disability, whichever is later.

#### Examination Irregularities

The validity of scores on the Board's examinations is protected by every means available. The Board will not report a score that it has determined to be invalid (ie, that does not represent a reasonable assessment of the candidate's knowledge or competence sampled by the examination). The performance of all candidates is monitored and may be analyzed for the purposes of detecting invalid scores.

The Written Examination will be supervised by proctors to ensure that the examination is properly conducted. If evidence by observation or analysis suggests that a candidate's scores may be invalid because of irregular behavior, the Board will withhold those scores pending further investigation and the affected candidate will be notified.

Examples of irregularities affecting the validity of scores would include (but not be limited to) the following: (1) using notes; (2) sharing information or discussing the examination in progress; (3) copying answers from another candidate; (4) permitting one's answers to be copied; or (5) unauthorized possession, reproduction, or disclosure of examination questions or other specific information regarding the content of the examination, before, during, or after the examination.

In such circumstances, and upon analysis of all available information, the Board will make a determination as to the validity of the scores in question. If the Board determines that the scores are invalid, it will not release them, and notification of that determination may be made to legitimately interested third parties.

Candidates or other persons who are directly implicated in an irregularity are subject to additional sanctions. For example, the Board may bar such persons permanently from all future examinations, terminate a candidate's participation in an ongoing examination, invalidate the results of the candidate's examination, and withhold or revoke a certificate or take other appropriate action. Candidates or other persons subject to additional sanctions will be provided with a written notice of the charges and an opportunity to respond to such charges in accordance with the appeals procedure established by the Board.

#### Substance Abuse or Chemical Dependency

Applicants with a history of abuse of a controlled substance or chemical dependency will not be admitted to any examination unless they present evidence satisfactory to the Board that they have successfully completed the program of treatment prescribed for their condition, and the Board is satisfied that they are currently free of such substance abuse or chemical dependency.

### Certification

After candidates have met the requirements for admissibility and passed the examinations of the Board, certificates attesting to their qualifications in plastic surgery will be issued by the Board. A surgeon who is granted certification by the Board is known as a diplomate of the Board.

It shall be the prerogative of the Board to determine the fitness, professionally and ethically, of any candidate for a certificate; and the Board, for cause, may defer or deny certification to any candidate.

#### Certificates

Certificates issued by the Board shall be in such form as the directors may from time to time determine. They shall be signed by the Chair, the Vice-Chair, and the Secretary-Treasurer of the Board and shall have placed upon them the official seal of the Board.

Beginning in 1995, certificates issued by the Board will be dated and will be valid for 10 years. Revalidation will be accomplished by the Board's recertification process.

Certificates of the Board shall state that the holder has met the requirements of the Board and is certified by the Board as a medical specialist in plastic surgery and is entitled to be known as a "diplomate of the American Board of Plastic Surgery, Inc." The names of all diplomates will be submitted to the American Board of Medical Specialties (ABMS) for publication in its directory unless they notify the Board in advance that they do not wish to be listed.

#### Revocation

Any certificate issued by the Board shall be subject to revocation at any time that the Board determines that an individual was not properly qualified to receive it.

Each certificate issued by the Board shall be subject to revocation if the physician so certified has made any misstatement of material fact, or has failed to make any statement of material fact, in his or her application for such certificate or in any other statement or representation to the Board or its representatives, or has otherwise acquired the certificate by deception. Upon revocation the certificate shall be returned to the Board.

The Board shall have the jurisdiction and right to determine whether or not the information placed before it is sufficient to constitute grounds for the revocation of any certificate. The individual

will be provided with a copy of the appeals policy of the Board, and this policy will be observed in pursuing resolution of the problem.

#### **Certification of Added Qualifications in Surgery of the Hand**

The Board offers an examination for Certification of Added Qualifications in Surgery of the Hand (CAQSH). The examination is described in a separate CAQSH Booklet, which may be obtained from the Board office upon request.

#### **Foreign Certificates**

Persons holding the foreign certificate issued prior to June 30, 1973, by the Board must relinquish their certificates to the Board in the event that they return to the United States for the purpose of practicing plastic surgery. Such individuals may apply for examination and certification in the manner described herein.

#### **Inquiries as to Status**

The Board considers a candidate's record not to be in the public domain. When an inquiry is received by the Board regarding an individual's status with the Board, a general—but factual—statement is provided that indicates that person's location within the process of certification. The Board provides this information only to individuals, organizations, and institutions with a reasonably valid "need to know" for professional reasons.

A candidate who has fulfilled the established prerequisite and requisite training requirements and has submitted an Application for Examination and Certification Form that has been approved and who is currently admissible to the examination process of the ABPS may use the term "Board Eligible," but only for such length of time as such candidate is still admissible.

The directors may adopt such further rules and regulations governing requirements, examinations, and issuance and revocation of certification as they may from time to time determine.

### **Examination Dates**

#### **Written Examination**

April 12, 1995 (Friday)  
Philadelphia, Pennsylvania, and San Francisco, California  
April 4, 1997 (Friday)  
Philadelphia, Pennsylvania, and San Francisco, California

#### **Oral Examination**

November 9-11, 1995 (Thursday-Saturday)  
Chicago, Illinois  
November 21-23, 1996 (Thursday-Saturday)  
Chicago, Illinois

### **Important Dates**

#### **Application Process**

##### *January 15*

Absolute cutoff for receipt of all application material for admission to the spring Written Examination. A late penalty fee of \$200 must accompany these items postmarked December 16 up to and including January 15.

Any application material postmarked after January 15 will not be accepted for admission to the spring Written Examination.

##### *April 30*

Potential candidates for examination and certification (senior/chief residents) are advised to write to the Board office requesting an Application for Examination and Certification Form during the last 2 months of their residency, but no later than June 30. Application material will not be sent to prospective candidates after December 15.

##### *December 15*

The last date Board office will send out application material for admission to the spring Written Examination.

The last postmarked date for application material for admission to the spring Written Examination before a late penalty fee of \$200 will apply.

#### **Written Examination**

##### *March 1*

The last postmarked date for reply cards (green) and examination fees for the spring Written Examination, before a late penalty fee of \$200 will apply. Reply cards (green) and examination fees postmarked after this date will be considered only on a space-available basis, and the late penalty fee will apply.

##### *March 2-15*

Reply cards (green) and examination fees postmarked March 2 up to and including March 15 will be considered only on a space-available basis, and the late penalty fee of \$200 must accompany these items.

Any reply cards (green) and examination fees postmarked after March 15 will not be accepted for admission to the spring Written Examination.

#### **Oral Examination**

##### *February 1*

The 12-month case list for prospective candidates for the upcoming Oral Examination must be postmarked on or before this date to be considered for admission to the fall Oral Examination. A nonrefundable fee of \$500 must be enclosed to provide for review of the case list and selection of ten cases for preparation as Case Reports.

##### *July 15*

The list of Board-selected cases for preparation as Case Reports will be mailed to candidates for the fall Oral Examination.

##### *September 1*

Last postmarked date for reply cards (green) and balance of examination fee (\$700) for the Oral Examination, before a late penalty fee of \$300 will apply. Reply cards (green) and balance of the examination fee (\$700) postmarked after this date (September 1) will be considered only on a space-available basis, and the late penalty fee will apply.

##### *September 2-15*

Reply cards (green) and balances of the examination fee (\$700) postmarked September 2 up to and including September 15 will be considered only on a space-available basis, and the late penalty fee of \$300 must accompany these items.

Any reply cards (green) and balance of the examination fee (\$700) postmarked after September 15 will not be accepted for admission to the fall Oral Examination.

##### *December 31*

The last date disk requests will be honored for compilation of the 12-month case list (January 1-December 31).

#### **Special Consideration**

##### *March 1*

The last postmarked date for submission of written special requests and documentation for consideration by the Credentials and Requirements Committee at the spring meeting.

##### *September 1*

The last postmarked date for submission of written special requests and documentation for consideration by the Credentials and Requirements Committee at the fall meeting.

*Note:* Fees must be submitted in US currency only. Foreign currencies, including Canadian, are unacceptable.

If there is a discrepancy between a metered postmark and an official United States Postal Service postmark, the latter will be considered official.

## American Board of Preventive Medicine

Joseph M Cannella, MD, MS, Chair, Princeton, New Jersey

Michael A Berry, MD, MS, Vice Chair for Aerospace Medicine, Houston, Texas

David C Deubner, MD, MPH, Vice Chair for Occupational Medicine, Toledo, Ohio

Anita S Curran, MD, MPH, Vice Chair for Public Health and General Preventive Medicine, New Brunswick, New Jersey

James M Vanderploeg, MD, MPH, Secretary Treasurer, Houston, Texas

Jeffrey R Davis, MD, MS, Galveston, Texas

Alan M Ducatman, MD, MSc, Morgantown, West Virginia

William R Elsea, MD, MPH, Atlanta, Georgia

Ruth Ann Etzel, MD, PhD, Atlanta, Georgia

Robert L Goldberg, MD, FACOEM, Modesto, California

Mark Bernarr Johnson, MD, MPH, Lakewood, Colorado

Dorothy S Lane, MD, MPH, Stony Brook, New York

Glenn Mitchell, MD, MPH, Fort Rucker, Alabama

Royce Moser, Jr, MD, MPH, Salt Lake City, Utah

Alfred K Neumann, MD, MPH, Los Angeles, California

Michael D Parkinson, MD, MPH, Bolling Air Force Base, District of Columbia

Judith Rubin, MD, MPH, Baltimore, Maryland

Alice R Ring, MD, MPH, Executive Director, Schiller Park, Illinois

Constance R Hyland, Administrator, Schiller Park, Illinois

*(Please note that this is not an official document of the American Board of Preventive Medicine, Inc. The Board cannot accept responsibility for errors made in the printing of this material. Further, these criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Preventive Medicine to ascertain whether the information below is current, or to request official policies and procedures of the Board.)*

### Requirements for Admission to Examinations

Each applicant for a certificate in aerospace medicine, occupational medicine, or public health and general preventive medicine is required to meet certain requirements to be admitted to the certifying examination. Such requirements are determined by the Board.

Approval for admission to the examination can be established only after the review of a complete application by the full Board at one of its semiannual meetings. No individual member of the Board is authorized to give an opinion on the admissibility of candidates.

For the information of applicants, such requirements are summarized below.

#### General Requirements

1. Graduation from a medical school in the United States that at the time of the applicant's graduation was accredited by the Liaison Committee on Medical Education, a school of osteopathic medicine approved by the American Osteopathic Association, an accredited medical school in Canada, or a medical school located outside the United States and Canada that is deemed satisfactory to the Board.

2. An unrestricted and currently valid license to practice medicine in a state, territory, commonwealth, or possession of the United States or a province of Canada.
3. A year of supervised postgraduate clinical training provided as part of an accredited residency or internship program and comprising experience involving direct patient care.
4. Successful completion of a course of graduate academic study and award of a Master of Public Health or equivalent degree, the course content of which shall include biostatistics, epidemiology, health services management and administration, and environmental health. If the institution itself does not have or award the Master of Public Health degree or equivalent, the Board will consider individual exceptions.
5. Residency practicum of not less than 1 year that is accredited by the Accreditation Council for Graduate Medical Education (ACGME) in the specialty area for which certification is being sought and that shall have provided supervised experience in the practice of the field of preventive medicine and planned instruction, observation, and active participation in a comprehensive organized program (practicum year).
6. A period of not less than 1 year of full-time special training or research in, or teaching or practice of, the field of preventive medicine in which certification is being sought (practice year).
7. The applicant must have been engaged in essentially full-time training for, or practice in, the specialty area for which certification is being sought for at least 2 of the 5 years preceding application for certification.

#### Special Requirements in Aerospace Medicine

1. A period of not less than 1 year of supervised training and instruction accredited in the field of aerospace medicine is required. (See 5 under "General Requirements," above.)
2. A period of not less than 1 year of full-time special training or research in, or teaching or practice of, aerospace medicine. (See 6 under "General Requirements," above.)
3. The applicant must have been engaged in training for, or the practice of, aerospace medicine for at least 2 of the 5 years preceding application for certification. (See 7 under "General Requirements," above.)

#### Special Requirements in Occupational Medicine

1. A period of not less than 1 year of supervised training and instruction, accredited in the field of occupational medicine, is required. (See 5 under "General Requirements," above.)
2. A period of not less than 1 year of full-time special training or research in, or teaching or practice of, occupational medicine. (See 6 under "General Requirements," above.)
3. The applicant must have been engaged in training for, or the practice of, occupational medicine for at least 2 of the 5 years preceding application for certification. (See 7 under "General Requirements," above.)

#### Special Requirements in Public Health and General Preventive Medicine

1. A period of not less than 1 year of supervised training and instruction, accredited in the field of public health and general preventive medicine, is required. (See 5 under "General Requirements," above.)
2. A period of not less than 1 year of full-time special training or research in, or teaching or practice of, public health and general preventive medicine. (See 6 under "General Requirements," above.)
3. The applicant must have been engaged in training for, or the practice of, public health and general preventive medicine for at least 2 of the 5 years preceding application for certification. (See 7 under "General Requirements," above.)

## Equivalencies for Accredited Training

Persons graduating from a school of medicine or school of osteopathic medicine prior to January 1, 1984, who have not formally completed all of the components previously described may be considered for admission to the examination if their training and experience are judged by the Board to provide suitable equivalency for formal training.

The Board will consider granting equivalency credit toward satisfying training requirements for such factors as

1. teaching or completion of graduate course work in the four core areas of epidemiology, biostatistics, health services management and administration, and environmental health; and
2. periods of full-time practice, research, or teaching in the field of preventive medicine in which certification is sought. A total of 8 years of full-time practice is required if no other specialty certification is held, but may be reduced to 6 years if certification is held in another specialty recognized by the American Board of Medical Specialties (ABMS). For those with an MPH or equivalent degree but no practicum year, a period of 4 years of full-time practice is required in the field of preventive medicine for which certification is being sought, a period that can be reduced to 3 years if other ABMS specialty certification is held.

Each applicant is considered individually by the Board in accordance with the existing guidelines. Applications must be received by June 1 of each year. Requirements must be completed by August 1 of the year in which the applicant wishes to sit for the examination.

Persons graduating from a school of medicine or school of osteopathic medicine after January 1, 1984, will be admissible to the examination only after completing accredited residency training in preventive medicine. No equivalency pathways will be considered for such graduates except as follows.

### Special Equivalency Pathway for ABPM Diplomates

The Board will consider granting an exception to the above requirement for persons graduating after January 1, 1984, who have completed a residency in any field of preventive medicine, been certified in that field, and are applying for certification in an additional preventive medicine field.

## Application

Individuals seeking to apply for admission to the examination should write to the Executive Director of the Board for application forms.

## Examination

The examination is a 1-day written examination given in the late fall of each year. It is a multiple-choice examination, with the morning portion covering the core knowledge of preventive medicine and the afternoon portion covering aerospace medicine, occupational medicine, or public health and general preventive medicine.

Applicants requiring special examination accommodations due to a disability should contact the Board office for assistance at least 1 month prior to the examination.

## Reapplication and Reexamination

An applicant approved for admission to the examination who fails to take the examination the year he or she is notified of approval to sit for the examination, or the following 2 years, or who failed to pass the examination within this 3-year approval period, is required to file a new application and pay a new application fee.

Applicants not approved for admission to the examination may request reconsideration of their applications on the basis of new or additional information within 2 years of the filing date of the original application, with payment of the re-review fee.

Candidates not passing the examination may, upon timely registration and payment of appropriate fee, be admitted to reexamination within their approval period.

A candidate who has failed to pass the examination on two occasions may be required to have additional training, in accordance with recommendations from the full Board, before being admitted to further examination.

## Multiple Certification

An individual may apply sequentially for admission to examination in more than one field of preventive medicine. Applicants may not apply in more than one area in a given year. An applicant must fulfill the individual requirements of each field in which application is made and cannot double count the same periods for practice time. Practicum training may not be counted twice except as described under Equivalencies for Accredited Training: Special Equivalency Pathway for ABPM Diplomates.

## Certification

Upon satisfactory completion of the examination, a certificate will be issued stating that the applicant has been found to possess special knowledge in the specified field of preventive medicine. The certificate will be signed by the officers of the Board and will have the seal of the Board affixed. Each certificate remains the property of the Board, but the person to whom it is issued is entitled to its possession unless it is revoked.

Any certificate issued by the Board may be revoked if evidence, satisfactory to the Board, is presented that the applicant was not eligible to receive it at the time of issuance; or that any pertinent fact had been misstated, misrepresented, or concealed; or that licensure to practice medicine has been suspended or revoked. Note: The issuance of a certificate to a person does not constitute membership on the Board.

## Time-Limited Certificates

Please note: By action of the Board in August 1994, the ABPM will issue 10-year, time-limited certificates, beginning in 1998, to candidates who pass the certifying examination given in November 1997 and thereafter.

## Notice of Certification

The examination results, without individual identifiers, are reviewed by the full Board during its January meeting. Final determination of candidates' certification status is made at that time.

Candidates who have taken the examination may expect to be notified of results by mail within 3 months after taking the examination.

## Fees

The members of the Board serve without compensation. Fees are based on the actual expenses incurred in review of applications; examination development, administration, and scoring; and office administration.

A nonrefundable application fee of \$250 is required if the applicant holds an MPH or equivalent degree and has completed an ACGME-accredited residency in the field of preventive medicine in which certification is sought.

A nonrefundable application fee of \$400 is required if the applicant is applying through the equivalency pathway.

A nonrefundable re-review fee of \$50 is required to reactivate an application within 2 years of the original review.

The examination fee of \$1,150 is due 45 days prior to the examination. The examination fee is nonrefundable within 45 days of the examination.

*Note:* All fees are reviewed annually and are subject to change at the direction of the Board. Please contact the Board office for the current fee schedule.

### Listing of Individuals Certified

A list, current to the date of publication, of persons to whom certificates have been issued by the Board may be found in the *Official ABMS Directory of Board Certified Medical Specialists*.

### Reporting of Changes of Address

Once certified, physicians should notify the following offices of any changes of address:

1. The American Board of Preventive Medicine, Inc.
2. The Records and Circulations Department, American Medical Association, 515 N State St, Chicago, IL 60610, the office that maintains a master file of all physicians in the United States.
3. Marquis Who's Who, 121 Chanlon Rd, New Providence, NJ 07974, publisher of the *Official American Board of Medical Specialties Directory of Board Certified Medical Specialists*.

### Important Dates

**June 1:** Deadline for completed application forms, application fees, and re-review requests to be received in the Board Office for the November examination.

**July 15:** Deadline for receipt of supplemental application information.

**August 1:** Deadline for completion of requirements to sit for the November examination.

**August:** Meeting of the Board to determine admissibility of applicants to November examination. Letters of notification of admissibility for November examination are mailed to candidates after the August Board meeting. Notification cannot be given by telephone.

**October:** Deadline for examination fee to be received in the Board office for approved candidates who wish to sit for the November examination. Date varies from year to year, and is stated in letter of admissibility.

**November:** Annual 1-day written examination in Chicago, Illinois. Date will vary from year to year and is stated in letter of admissibility.

**January:** Meeting of the Board to determine the pass/nonpass score for the previous November examination.

**February:** Results of November certifying examination sent by mail to candidates after the Board meeting. Notification cannot be given by telephone.

## American Board of Psychiatry and Neurology

Mark L Dyken, MD, President, Indianapolis, Indiana  
 Lenore C Terr, MD, Vice President, San Francisco, California  
 Michael P McQuillen, MD, Secretary, Rochester, New York  
 Kenneth Z Altshuler, MD, Treasurer, Dallas, Texas  
 Marvin A Fishman, MD, Member-at-Large, Houston, Texas

*(Please note that this is not an official document of the American Board of Psychiatry and Neurology, Inc. The Board cannot accept responsibility for errors made in the printing of this material. Please contact the Board's Executive Office for official policies and procedures of the Board.)*

Throughout this section, the American Board of Psychiatry and Neurology may be referred to as the "Board" or the "ABPN." References to "residency" refer to entry at the PGY-2 level unless stated otherwise. "Accredited or approved programs" refers to programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) or the Royal College of Physicians and Surgeons of Canada (RCPC).

### General Information Pertaining to All Candidates

#### History

The American Board of Psychiatry and Neurology, Inc (ABPN) is a nonprofit corporation that was founded in 1934 following conferences of committees appointed by the American Psychiatric Association, the American Neurological Association, and the then Section on Nervous and Mental Diseases of the American Medical Association. This action was taken as a method of identifying the qualified specialists in psychiatry and neurology.

#### Composition of the Board

The Board consists of 16 members. Membership on the Board is distributed among the Board's nominating organizations as follows: five psychiatrists from the American Psychiatric Association, three psychiatrists from the American Medical Association, four neurologists from the American Neurological Association, and four neurologists from the American Academy of Neurology. Each of these organizations proposes nominees to represent it on the Board, but the Board itself selects its members. The Board is independently incorporated. Elections to fill the places of members whose terms have expired take place annually. Neurology and psychiatry are always equally represented on the Board. The Board holds meetings several times each year for the purpose of examining candidates and transacting business.

#### Mission Statement

The goal of the ABPN is to enhance the quality of psychiatric and neurologic care through the voluntary certification process and thereby serve the public interest.

Methods for achieving that goal include, but are not limited to, efforts to

1. Describe, in terms of knowledge and skills, a physician with special expertise in evaluation, diagnosis, and treatment of patients with psychiatric and/or neurologic disorders, or who require psychiatric and/or neurologic assessment
2. Set the standards for knowledge and skills required for certification
3. Construct and administer examinations designed to evaluate those skills and knowledge
4. Monitor, evaluate, and improve the standards and procedures of the certification process
5. Participate in the appropriate Residency Review Committees (RRCs) of the ACGME to set standards for the quality and scope of residency training programs to ensure that their graduates will obtain necessary training credit toward certification
6. Issue certificates and other forms of recognition to successful candidates
7. Make available lists of diplomates who have fulfilled the requirements for certification
8. Inform the public, other professions, and other medical organizations of the purposes, activities, and responsibilities of the corporation, and
9. Participate in the activities of the American Board of Medical Specialties (ABMS) and its member boards.

#### Rules and Regulations

In carrying out its specified functions, the Board has formulated rules and regulations to guide its activities and to indicate to applicants and other interested persons its policies regarding training requirements, examinations, fees, etc. These rules and regulations are amended from time to time. The statements contained in this brochure are the most recent amendments and represent the current policy of the Board.

The Board shall have authority to issue from time to time, and thereafter to amend, rules and regulations relating to the issuance and revocation of certificates as to qualification in the practice of psychiatry or neurology, or both, or their recognized subspecialties.

#### Certificates

The Board currently issues eight types of certificates: (1) psychiatry, (2) neurology, (3) neurology with special qualification in child neurology, (4) child and adolescent psychiatry, (5) added qualifications in geriatric psychiatry, (6) added qualifications in clinical neurophysiology, (7) added qualifications in addiction psychiatry, and (8) added qualifications in forensic psychiatry. An applicant may be certified in more than one area. The applicant shall receive a separate certificate for each area in which he or she qualifies. Each certificate shall be in such form and for such period of time as may be specified by the Board.

#### Recertification

Effective October 1, 1994, all individuals achieving Board certification by the ABPN in psychiatry, neurology, neurology with special qualification in child neurology, and child and adolescent psychiatry are issued 10-year, time-limited certificates. All certificates for added qualifications are valid for 10 years from the date issued.

#### Revocation of Certificates

The Board shall have authority to revoke any certificate issued by it or to place a certificate holder on probation for a fixed or indefinite time if

1. the certificate was issued contrary to or in violation of the bylaws or any rule or regulation of the Board.

2. the person to whom the certificate was issued made any material misstatement or omission of fact to the Board in his/her application or otherwise.

Certification shall continue in force only so long as the holder has an unlimited license to practice medicine in the diplomate's state, commonwealth, territory, or possession of the United States or province of Canada. A full and unrestricted medical license must be maintained even if a physician is out of the country for extended periods of time. It is the responsibility of the candidate to inform the Board immediately upon a change in licensure status.

*Effective in the year 2007 the Board will no longer accept Canadian licenses.*

#### Unethical Behavior of Candidates

Since the Board believes that the ethics of candidates for certification are of concern, it has adopted the following rules:

1. The falsification of credentials will be cause for the Board's refusal to admit a candidate to examination for at least 4 years.
2. The Board will consider legal action against anyone who forges an ABPN certificate, copies ABPN examinations or otherwise uses them in conflict with copyright laws, or in any other way violates the legal prerogatives of the Board. Such activities will also be cause for the Board's refusal to admit a candidate to examination for at least 4 years.
3. Scores on the Part I examination may be invalidated for reasons of irregular behavior that indicates cheating. Statistical analyses may be used to confirm such behavior. If the examination score is invalidated, the candidate may submit a written appeal within 30 days of notice on invalidation. An appeal fee of \$325 must accompany the written appeal. The Committee to Review Appeals will review the materials and recommend action to the Board. The Board will review the materials and make a decision that, in all cases, will be final and binding on the Board and on the candidate. All correspondence or other materials should be sent to the Board office. If the examination score is invalidated because of irregular behavior, the Board will not consider the candidate for examination for a period of at least 4 years. A repeat application and Part I examination fee will be required.
4. Irregular behavior that indicates cheating on the Part II examination may be considered sufficient reason to invalidate the candidate's score. In that event, the Board will not consider the candidate's repeat application for Part II for a period of at least 4 years. Another Part II examination fee will be required.
5. "Irregular behavior that indicates cheating" shall include, but not be limited to, the following conduct: (a) copying of answers from another candidate's examination; (b) knowingly permitting another candidate to copy one's answers on an examination; (c) unauthorized possession, reproduction, or disclosure of materials, including examination questions or answers, before, during, or after the examination; (d) use of audio equipment to record any part of the Part II examination; (e) offering any financial or other benefit to any director, officer, employee, proctor, diplomate, or other agent or representative of the Board in return for any right, privilege, or benefit that is not granted by the Board to other similarly situated candidates or persons.
6. Notification of the Board's action may be sent to legitimately interested third parties, including the American Medical Association, state medical societies, and appropriate specialty societies.
7. A proposal to impose upon a candidate one of the penalties identified in paragraphs 1, 2, 4, and 6 hereof shall constitute a "negative determination" subject to the "Appeal Procedure for Negative Determinations Regarding Applications" or the "Appeal Procedure for Negative Determinations Regarding Part II Examinations."

8. Upon the expiration of the 4-year period cited in paragraphs 1, 2, 3, and 4 hereof, the candidate may send to the Board a written request for lifting of the ban, together with a written explanation of the reasons for lifting of the ban that will then be reviewed by the Board for a final decision. The decision will be final and binding on the Board and on the candidate. All correspondence or other materials should be sent to the Board office.

#### Board Eligibility

The ABPN, in accordance with the policy of the ABMS, does not recognize or use the term "Board eligible," and does not issue statements concerning "Board eligibility." The Board informs an applicant of admissibility to examination only when the applicant has an active, approved application on file in the Board office.

#### Examiners and Committee Members

Any individual who participates in any review course that is publicized as being a Board review course, or in any course that could be construed as a Board review course, or who has edited or provided written or audiovisual materials for publications identified as preparation for Board examinations, should not participate as an examiner in any Part II examinations, child and adolescent psychiatry examinations, or as a member of a Board committee for at least 12 months subsequent to the course of publication of any written or audiovisual materials.

### Application/Training Requirements

#### Application

Deadline for receipt of completed applications in the Board office for the November 6, 1996, Part I examination is February 1, 1996.

All licensing and training requirements must be met by June 30, 1996.

A physician who wishes to be examined by the Board shall complete, sign, and file with the executive vice president an application on the current official application form. The application must include the required application and Part I examination fees and supporting data. Supporting data consist of

1. documentation of all residency training by a copy of certificates of training including exact dates, or a letter of verification of training from the training director(s) including exact dates of training. If the resident is still in training, a letter from the training director documenting that the resident is in the final year of training and that training will be completed by June 30, 1996, must be submitted. Immediately after the resident has completed training, a letter verifying successful completion of training must be submitted by the training director. Documentation of successful completion of training completed by June 30, 1996, must be in the Board office no later than July 15, 1996.
2. documentation of PGY-1 by a letter of verification from the training director describing the exact length and content of rotations completed during PGY-1. If the PGY-1 was a full year of internal medicine, pediatrics, or family practice, a photocopy of the certificate of completion including the exact dates may be submitted in lieu of the letter from the training director.
3. a photocopy of current unlimited license renewal registration showing the expiration date. If the candidate has a temporary (education or training) license at the time of application, he/she must submit a copy of the current unlimited license in the state, commonwealth, territory, or possession of the United States or province of Canada in which he/she practices before being allowed to take the Part II examination.

*Effective in the year 2007 the Board will no longer accept Canadian licenses.*

4. four autographed photographs. Heavy cardboard-backed photos or peel-apart photos will not be accepted. Photos should be passport-size and may be either black-and-white or color photos.

The "Information for Applicants" booklet and the application are reviewed each year and may be obtained from the Board office. Only current applications will be accepted. Photocopies of applications will not be accepted.

Applications submitted without fees will not be accepted. Fees received without applications will be returned.

Part I application and examination fees are neither refundable nor transferable.

Part I sites are assigned based on the order in which applications are received and approved in the Board office. If a site is filled to capacity, the second choice will be assigned. If the second choice site is filled to capacity, the third choice will be assigned, etc.

An acknowledgment postcard accompanies each application. That card, when stamped, self-addressed, and enclosed with the application, will be returned to the candidate as acknowledgment that the application has been received by the Board office.

Once the card is returned to the candidate, it may take up to 16 weeks for the candidate to receive information regarding the status of the application. Applications are reviewed in order of receipt.

An applicant who does not receive notification from the Board office by August 1, 1995, of the acceptance or rejection of his/her application should contact the Board office.

#### Applicants With Disabilities

The Board recognizes that physicians with disabilities may wish to take the Board's examinations and will attempt to make accommodations for applicants with verified disabilities. The Board supports the intent of the Americans with Disabilities Act (ADA).

You are reminded, however, that "auxiliary aids (and services) can only be offered that do not fundamentally alter the measurement of skills or knowledge the examination is intended to test" [Americans with Disabilities Act, Public Law 101-334 §309 (b)(3)]. Applicants must advise the Board in writing if they are requesting any accommodations from the Board due to a disability no later than the deadline for submitting their application for the Part I examination. The applicant may be asked to submit appropriate documentation of the disability and a description of previous accommodations provided during other examinations. If the Board deems it necessary, an independent medical assessment may be requested at the expense of the ABPN.

The Board office has TDD (Telecommunications Device for the Deaf) capability. Using it, hearing impaired persons can communicate with the Board as easily as dialing 708 374-4223 and typing in a message.

#### General Requirements

The applicant must

1. be a graduate of an accredited medical school in the United States or Canada, or of an international medical school only if it is listed by the World Health Organization.
2. have an unlimited license to practice medicine in the state, commonwealth, territory, or possession of the United States, or a province of Canada, in which he/she practices. All applicants are required to submit copies of licenses with current registrations and expiration date with their Part I applications. Any candidate submitting a temporary (education or training) license at the time of application for Part I will be required to submit a copy of his/her current/unlimited license before being allowed to take the Part II examination.

*Effective in the year 2007 the Board will no longer accept Canadian licenses.*

3. have satisfactorily completed the Board's specialized training requirements in psychiatry, neurology, neurology with special qualification in child neurology, or any of its subspecialties.

References to "residency" refer to entry at the PGY-2 level unless stated otherwise.

Residency training must be in the specialty in which the applicant seeks certification. No residency training credit can be given for time spent in a residency program in another specialty. Training programs approved by the RRCs and accredited by the ACGME can be found in the current issue of the *Graduate Medical Education Directory*, published by the American Medical Association. This directory includes the *Essentials of Accredited Residencies in Graduate Medical Education*.

Training may be completed on a part-time basis, provided that it is no less than half-time, and credit will not be given for less than 1-year blocks of training except under special circumstances, which must be approved by the ABPN Credentials Committee.

Training programs may develop individual leave or vacation time for residents in accordance with the overall institutional policy. Leave or vacation time may not be utilized to reduce the total amount of required residency training or to make up deficiencies in training.

To ensure continuity of training, the Board requires that 2 of the 3 years of residency training be spent in a single program. On occasion, the Board will consider alternate patterns of training that have not included the required 2 years spent in a single program, provided that the total residency permitted the applicant to assume progressive levels of responsibility and that a comprehensive curriculum was covered. In such cases, it is the responsibility of the applicant to provide detailed documentation from the respective training directors outlining training content, duties, and responsibilities. Each case will be considered on an individual basis.

### Appeal Procedure for Negative Determinations Regarding Applications/Licensure

The rejection of credentials for admission to an examination is considered a "negative determination." An applicant who has submitted a formal application and receives a negative determination regarding his/her application may appeal by complying with the following procedures:

Within 30 days after date of notice of a negative determination, the applicant may, by writing, indicate his/her request for a formal appeal of his/her application rejection. The following materials must accompany this request: appeal fee of \$350 and any additional written information tending to rebut the negative determination. All correspondence and other materials should be sent to the Board office.

For psychiatry applicants, the Committee on Credentials for Psychiatry will review the materials and recommend action to the Psychiatry Council consisting of all current psychiatry directors. The Psychiatry Council will review the materials and make a decision that, in all events, will be final and binding on the council, on the Board, and on the applicant.

For neurology and neurology with special qualification in child neurology applicants, the Committee on Credentials for Neurology will review the materials and recommend action to the Neurology Council, consisting of all current neurology directors. The Neurology Council will review the materials and make a decision that, in all events, will be final and binding on the council, on the Board, and on the applicant.

Any candidate who does not satisfy the Board's licensure requirement may submit a letter of appeal to the Board office. The appeal materials will be sent to the respective Credentials Committee, which will review the materials and make a recommendation to the

respective council. The council will vote on the recommendation of the committee.

### Certification in Psychiatry

An applicant who seeks admission to examination for certification in psychiatry must have satisfactorily completed an approved PGY-1 and 3 full years of postgraduate, specialized residency training in a psychiatry program accredited by the ACGME or the RCPSC.

1. Training Requirements for Physicians Who Entered Residency Training Programs on or After July 1, 1977, and Before July 1, 1986

Two patterns of training are acceptable:

- A. Three Years Training Following a First Postgraduate Year

Prior to entering an approved 3-year training program in psychiatry a physician must have completed 1 year of approved training after receiving the degree of Doctor of Medicine or Doctor of Osteopathy that included a minimum of 4 months of internal medicine, pediatrics, or family practice. Or

- B. Four-year Training Programs

A 4-year program in psychiatry would be acceptable, with the provision that no less than 4 months during one of the years (preferably the first year) be spent in an approved program providing supervised, direct responsibility for the general medical care of children and/or adults.

2. Training Requirements for Physicians Who Entered Residency Training Programs on or After July 1, 1986, and Before July 1, 1997

Two patterns of training are acceptable:

- A. A broad-based clinical year of accredited training in the United States or Canada in internal medicine, family practice, or pediatrics; or an ACGME-approved Transitional Year Program that included a minimum of 4 months of primary care; or an ACGME-approved residency in a clinical specialty requiring comprehensive and continuous patient care plus 3 full years of postgraduate, specialized residency training in a psychiatry program accredited by the ACGME or the RCPSC. Or

- B. Four-Year Training Program

Four years of training in an ACGME-approved program in psychiatry would be acceptable, with the provision that no less than 4 months during one of the years of training be spent in an approved program providing supervised, direct responsibility for the general medical care of children and/or adults.

Effective July 1, 1988, all osteopathic physicians entering a PGY-2 in psychiatry must have successfully completed an approved PGY-1 as described above.

Effective January 1, 1994, all physicians who trained in Canada must have completed an approved PGY-1 as described above plus 4 years of postgraduate, specialized residency training in a psychiatry program accredited by the RCPSC.

3. Training Requirements for Physicians Entering Residency Training in Psychiatry on or After July 1, 1997

An applicant seeking admission to examination for certification in psychiatry and entering residency training on or after July 1, 1997, must complete the following training in ACGME-approved programs. Two patterns of training are acceptable:

- A. A broad-based clinical year of ACGME-approved training in the United States in internal medicine, family practice, or pediatrics; or an ACGME-approved transitional year program including a minimum of 4 months of primary care; or an ACGME-approved residency in a clinical specialty requiring comprehensive and continuous patient care plus 3 full years of postgraduate, specialized residency training in a psychiatry program accredited by the ACGME. Or

- B. Four years of training in an ACGME-approved program in psychiatry would be acceptable, with the provision that no less than 4 months during one of the years of training be spent in an approved program providing supervised, direct responsibility for the general medical care of children and/or adults.

### Training Credit From the United Kingdom

The following criteria apply to all applicants for psychiatry who began their psychiatric residency training on or after July 1, 1976. Applicants who have completed residency training in the United Kingdom prior to July 1, 1976, must meet the criteria outlined in the section Applicants with Non-US, Non-Canadian, or Non-UK Training.

For each year of psychiatric residency training completed in an approved hospital program in the United Kingdom, 1 year of training credit will be given toward eligibility for examination by the Board in psychiatry.

The hospital program must be among those approved by the Visiting Inspecting Specialty Committee in Psychiatry of the Royal College of Psychiatrists.

In order to obtain credit for 2 or 3 years of approved training in the United Kingdom, at least 2 years of the training must be spent at the same training center in psychiatry.

The applicant will be responsible for sending the details of his/her training to the Board office, along with verification of this training from the approved hospital or hospitals in the United Kingdom. The applicant's program director must certify that the applicant was engaged in full-time residency training.

As of July 1, 1985, all applicants for admission to examination who are requesting credit for training done in the United Kingdom must have an approved year of primary care training in the United States or Canada. The exception is restricted to those applicants who hold the Member of the Royal College of Psychiatrists (MRCPsych) certificate and completed training in its entirety in the United Kingdom. If training in its entirety (internship and residency training) was not completed in the United Kingdom, the applicant must complete an additional year of approved primary care training in the United States or Canada.

All physicians entering residency training in psychiatry on or after July 1, 1997, must complete the training as described above (Training Requirements for Physicians Entering Residency Training in Psychiatry on or After July 1, 1997). No credit will be granted for training completed in programs that are not accredited by the ACGME.

### Applicants With Non-US, Non-Canadian, or Non-UK Training

The following criteria pertain to all applicants whose residency training was undertaken at a center located outside the United States, Canada, or the United Kingdom (with the exception of applicants who completed residency training in the United Kingdom prior to July 1, 1976).

The candidate must possess an unlimited license to practice medicine in a state, commonwealth, territory, or possession of the United States or a province of Canada.

The candidate must successfully complete a comparable national certification examination in the country of training in the specialty in which the physician is seeking admission to examination. The candidate must have achieved such certification within the past 7 years. If certification was achieved earlier, then the candidate must have had 1 year of clinical practice in a setting in which his/her professional work has been observed by at least two ABPN diplomates in that specialty and documented by two letters of sponsorship from such diplomates.

- The only certifications recognized by the Board for psychiatry are
1. MRCPsych (Member of the Royal College of Psychiatrists)
  2. FRANZCP (Fellow of the Royal Australian and New Zealand College of Psychiatrists)
  3. FF Psych (SA) of the South African Medical and Dental Council (Fellowship of the Faculty of Psychiatry of the College of Medicine of South Africa)
  4. Israel's Specialty Certification of the Scientific Council of the Israel Medical Association

All applicants with non-US, non-Canadian, or non-UK training who do not meet the above criteria must complete training as listed under "Certification in Psychiatry."

As of July 1, 1985, all applicants for admission to examination must have an approved year of primary care training in the United States or Canada. The exception is restricted to those applicants who hold a certificate and training in its entirety (internship and residency training) in one of the above-mentioned countries. If training in its entirety was not completed in the country issuing the certificate, the applicant must complete an additional year of approved primary care training in the United States or Canada.

All physicians entering residency training in psychiatry on or after July 1, 1997, must complete the training as described above (Training Requirements for Physicians Entering Residency Training in Psychiatry on or After July 1, 1997.) No credit will be granted for training completed in programs that are not accredited by the ACGME.

### Certification in Neurology

An applicant who seeks admission to examination for certification in neurology must have satisfactorily completed an approved PGY-1 (see below for specifics) and 3 full years of postgraduate, specialized residency training in a neurology program accredited by the ACGME or the RCPSC.

1. Training Requirements for Physicians Who Entered Residency Training on or After July 1, 1987, and Before July 1, 1991

(For neurology training requirements pertinent to physicians who entered residency training prior to July 1, 1987, see Appendix.)

Two patterns of training are acceptable:

- A. Three years of training following a first postgraduate year

Prior to entering an approved 3-year residency training program in neurology a physician must have completed 1 year of approved graduate training after receiving the degree of Doctor of Medicine or Doctor of Osteopathy as follows:

Physicians entering neurology residency training as of July 1, 1987, and before July 1, 1991, may enter neurology residency training programs only after an initial first year of graduate training in accredited programs in internal medicine in the United States or Canada or an ACGME-approved Transitional Program that includes at least a 6-month experience in internal medicine. Or

- B. Four-Year Training Program

Four years of training in a neurology program approved by the ACGME for 4 years of training is acceptable.

2. Training Requirements for Physicians Entering Residency Training in Neurology on or After July 1, 1991, and Before July 1, 1994.

Two patterns of training are acceptable:

- A. A full year of training in internal medicine, or, as an acceptable alternative, a full year in which a minimum of 8 months of training must be in internal medicine, the details of which must be documented by the internal medicine training director. The composition of these 8 months cannot include rotations in neurology or emergency medicine. To ensure that these 8 months constitute a high-quality experience, they

should be obtained with an emphasis on progressive responsibility for the resident.

In addition, all physicians will be required to complete 3 full years of postgraduate, specialized residency training in a neurology program accredited by the ACGME or the RCPSC. Or

**B. Four-Year Training Program**

Four years of training in a neurology residency program approved by the ACGME for 4 years of training is acceptable.

**3. Training Requirements for Physicians Entering Residency Training as of July 1, 1994, and Before July 1, 1997**

Two patterns of training are acceptable:

- A.** A full year of training in internal medicine, or, as an acceptable alternative, a full year in which a minimum of 6 months of training must be in internal medicine, the details of which must be documented by the internal medicine training director. The composition of these 6 months cannot include rotations in neurology or emergency medicine. To ensure that these 6 months constitute a high-quality experience, they should be obtained with an emphasis on progressive responsibility for the resident.

At least 2 months of the additional 6 months must be spent in pediatrics and/or emergency medicine. No more than 2 months of the remaining 4 months may be spent in neurology.

In addition, all physicians will be required to complete 3 full years of postgraduate, specialized residency training in a neurology program accredited by the ACGME or the RCPSC. Or

**B. Four-Year Training Program:**

Four years of training in a neurology program approved by the ACGME for 4 years of training is acceptable.

Effective July 1, 1988, all osteopathic physicians entering a PGY-2 in neurology must have successfully completed an approved PGY-1 as described above.

Physicians who trained in accredited programs in Canada must have successfully completed an approved PGY-1 as described above plus 4 years of postgraduate, specialized residency training in a neurology program accredited by the Royal College of Physicians and Surgeons of Canada. (These requirements apply to those who began training in neurology in Canada on or after July 1, 1994.)

**4. Training Requirements for Physicians Entering Residency Training in Neurology on or After July 1, 1997.**

Two patterns of training are acceptable:

- A.** A full year of training in internal medicine in an ACGME-approved program, or, as an acceptable alternative, a full year in which a minimum of 6 months of training must be in internal medicine, the details of which must be documented by the internal medicine training director. The composition of these 6 months cannot include rotations in neurology, pediatrics, or emergency medicine. To ensure that these 6 months constitute a high-quality experience, they should emphasize progressive responsibility for the resident. At least 2 of the additional 6 months must be spent in internal medicine, pediatrics, or emergency medicine. No more than 2 of the remaining 4 months may be spent in neurology. In addition, all physicians will be required to complete 3 full years of postgraduate, specialized residency training in a neurology program accredited by the ACGME. Or

- B.** Four years of training in a neurology program approved by the ACGME for 4 years of training is acceptable.

**5. Applicants With Non-US or Non-Canadian Training**

The following criteria pertain to all applicants whose residency training was undertaken at a center located outside the United States or Canada. The candidate must possess an unlim-

ited license to practice medicine in a state, commonwealth, or territory of the United States or province of Canada.

As of July 1, 1985, the only residency training that will be considered is training completed in programs approved by the ACGME in the United States or by the RCPSC in Canada.

In lieu of a PGY-1 in an accredited program in the United States or Canada, the following certificates in internal medicine will be accepted:

- A.** MRCP(UK)—United Kingdom's Member of the Royal College of Physicians  
**B.** MRACP—Australia and New Zealand's Member of the Royal Australasian College of Physicians  
**C.** FCP(SA)—South Africa's Fellow of the College of Physicians  
**D.** MRCP(I)—Ireland's Member of the Royal College of Physicians

The candidate must have achieved certification within the past 7 years. If certification was achieved earlier, then the candidate must have had 1 year of clinical practice in a setting in which his/her professional work has been observed by at least two ABPN diplomates in that specialty and documented by two letters of sponsorship from such diplomates.

For neurology training requirements pertinent to non-US- or non-Canadian-trained physicians who entered residency training prior to July 1, 1985, see Appendix.

All physicians entering residency training in neurology on or after July 1, 1997, must complete the training as described above (Training requirements for Physicians Entering Residency Training in Neurology on or After July 1, 1997). No credit will be granted for training completed in programs that are not accredited by the ACGME.

### **Certification in Neurology With Special Qualifications in Child Neurology**

Proper preparation for the practice of child neurology requires that the practitioner be a qualified neurologist who has had additional training in pediatrics and child neurology. To qualify for this certificate, a different type of preparation and certifying examination are required. The same diploma will be used, the only difference being that instead of certifying qualification in "neurology," it certifies qualification in "neurology with special qualification in child neurology."

An applicant seeking admission to examination for certification in neurology with special qualification in child neurology must have completed the following training in ACGME-approved programs or programs approved by the RCPSC. All training must be completed after receiving the degree of Doctor of Medicine or Doctor of Osteopathy.

1. Three patterns of training are acceptable for 2 of the 5 years of training:
  - A.** The usual pathway is 2 years of training in general pediatrics. This is the only pathway that allows the applicant admission for examination by both the American Board of Pediatrics and the ABPN. Or
  - B.** Effective for individuals entering training as of July 1, 1992, 1 year of training in general pediatrics and 1 year of research in the basic neurosciences. The basic neurosciences pathway was created as an alternative track for residents who are planning a research career in academic child neurology. The year of basic neurosciences would provide training in a research discipline related to child neurology and is intended to increase the trainee's knowledge base and competitiveness for federal and nonfederal grant support. The trainee must make at least an 80% time commitment to basic neurosciences during this year of training. For the purpose of this training track, "basic neurosciences" is defined as laboratory research related to the

cellular or molecular basis of neurologic diseases. Examples of relevant basic disciplines include molecular neurogenetics, neurochemistry, neuropharmacology, neurophysiology, neuroanatomy, neuroimmunology, developmental neurobiology, biophysics, and cell biology. This track of training must be approved by the Board prior to completion of the 5 years of training. Or

- C. Effective for individuals entering training as of July 1, 1991, 1 year of training in general pediatrics and 1 year of training in internal medicine. An acceptable alternative to the 1 year of internal medicine is a full year in which a minimum of 8 months of training must be in internal medicine, the details of which must be documented by the internal medicine training director. The composition of these 8 months cannot include rotations in neurology or emergency medicine.

Effective for individuals entering training as of July 1, 1994, an acceptable alternative to the 1 year of internal medicine is a full year in which a minimum of 6 months of training must be in internal medicine, the details of which must be documented by the internal medicine training director. The composition of these 6 months cannot include rotations in neurology or emergency medicine. To ensure that these 6 months constitute a high-quality experience, they should be obtained with an emphasis on progressive responsibility for the resident.

At least 2 months of the additional 6 months must be spent in internal medicine, pediatrics, and/or emergency medicine. No more than 2 months of the remaining 4 months may be spent in neurology.

In lieu of this year of internal medicine the following certificates will be accepted:

1. MRCP(UK)—United Kingdom's Member of the Royal College of Physicians
  2. MRACP—Australia and New Zealand's Member of the Royal Australasian College of Physicians
  3. FCP(SA)—South Africa's Fellow of the Royal College of Physicians
  4. MRCP(I)—Ireland's Member of the Royal College of Physicians
2. Effective for individuals entering residency training as of July 1, 1991, 3 years of residency training in a child neurology program approved by the ACGME or a child neurology program approved by the RCPSC must be completed.

Effective for individuals entering residency training prior to July 1, 1991, 3 years of residency training in a neurology program approved by the ACGME or a neurology program approved by the RCPSC must be completed. One of these 3 years must be devoted to clinical child neurology.

Effective January 1, 1994, all physicians who trained in Canada must have successfully completed an approved PGY-1 as described above plus 4 years of postgraduate, specialized residency training in a child neurology program accredited by the RCPSC.

3. Training Requirements for Physicians Entering Residency Training in Child Neurology on or After July 1, 1998

An applicant seeking admission to examination for certification in neurology with special qualifications in child neurology must complete the following training in ACGME-approved programs. All training must be completed after receiving the degree of Doctor of Medicine or Doctor of Osteopathy.

Three patterns of training are acceptable for 2 of the 5 years of training:

- A. The usual pathway is 2 years of training in general pediatrics in an ACGME-approved program. This is the only pathway that allows the applicant admission for examination by both the American Board of Pediatrics and the ABPN. Or

B. One year of training in general pediatrics in an ACGME-approved program and 1 year of research in the basic neurosciences. The basic neurosciences pathway was created as an alternative track for residents who are planning a research career in academic child neurology. The year of basic neurosciences would provide training in a research discipline related to child neurology and is intended to increase the trainee's knowledge base and competitiveness for federal and nonfederal grant support. The trainee must make at least an 80% time commitment to basic neurosciences during this year of training. For the purpose of this training track, "basic neurosciences" is defined as laboratory research related to the cellular or molecular basis of neurologic diseases. Examples of relevant basic disciplines include molecular neurogenetics, neurochemistry, neuropharmacology, neurophysiology, neuroanatomy, neuroimmunology, developmental neurobiology, biophysics, and cell biology. This track of training must be approved by the Board prior to completion of the 5 years of training. Or

C. One year of training in general pediatrics in an ACGME-approved program and 1 year of training in internal medicine in an ACGME-approved program. An acceptable alternative to the 1 year of internal medicine is a full year of ACGME-approved training that includes a minimum of 6 months of internal medicine, the details of which must be documented by the internal medicine training director. The composition of these 6 months cannot include rotations in neurology, pediatrics, or emergency medicine. To ensure that these 6 months constitute a high-quality experience, they should be obtained with an emphasis on progressive responsibility for the resident.

At least 2 of the additional 6 months must be spent in internal medicine, pediatrics, or emergency medicine. No more than 2 months of the remaining 4 months may be spent in neurology.

In addition, all physicians will be required to complete 3 full years of postgraduate, specialized residency training in a child neurology program accredited by the ACGME.

All physicians entering residency training in neurology with special qualifications in child neurology on or after July 1, 1998, must complete the training as described above (Training requirements for Physicians Entering Residency Training in Child Neurology on or After July 1, 1998). No credit will be granted for training completed in programs that are not accredited by the ACGME.

## Examinations

The Board does not endorse or recommend any texts or other teaching aids identified as "Board preparation" material. Furthermore, the Board does not have any affiliation with or responsibility for programs identifying themselves as "Board Review Courses."

Though the purpose of the examination is to test the qualifications of the candidate in psychiatry or neurology, or both, it must not be forgotten that both these medical disciplines constitute part of the broad field of general medicine. The Board requires proficiency in neurology on the part of those it certifies in psychiatry and vice versa, but examines the candidate in accordance with the certificate he/she seeks.

Written examinations: As of 1995, the ABPN is using *DSM-IV* as the primary authority on psychiatric diagnostic nomenclature for its written examinations.

Oral examinations: Beginning in 1996, the ABPN will use *DSM-IV* as the primary authority for psychiatric diagnostic nomenclature.

Each candidate must pass both Part I and Part II of the examination given by the Board. Each examination shall cover such subjects as the Board may determine.

The Board may conduct examinations at such times and places as it deems appropriate. The Board reserves the right to limit the number of candidates admitted to any scheduled examination. The administration and grading of all examinations shall be the sole discretion of the Board. After completion of such examinations, the candidate will be notified in writing by the executive vice president as to the results.

The Board is not liable for candidate travel and/or other related expenses incurred as a result of an examination cancellation.

## Part I Examination

### A. Part I Examination Procedures

The Part I examination is given once a year on a regional basis throughout the United States and Canada, as well as in selected sites outside the continental limits of the United States. Applicants will be expected to indicate, in order of preference, their choice of four examination sites. Every effort is made to accommodate candidates in the locale of their choice.

Request for transfer to another site must be made in writing at least 90 days prior to the Part I examination. Changes will be made subject to space availability.

An applicant will be advised in writing by the Board of acceptance for examination.

One month prior to the examination candidates will receive an admission notice specifying their examination site and time to report for examination.

All applicants are required to sit for the Part I examination for which they have applied. Applicants who fail to do so will be required to request and submit a new application, supporting documentation, and the application and Part I examination fees.

A candidate who passes Part I shall, upon request, submit to the executive vice president a check payable to the Board to cover the fee for Part II. The Part II examination is given three to four times a year at selected locations in the United States. Candidates who pass Part I will automatically be assigned to a Part II examination with a specific date and location. The limited space available and the complicated logistics involved in administering the Part II examination make it extremely difficult for the Board to allow candidates to select either the site or the date for the Part II examination. Candidates assigned to the Part II examination are expected to be present as scheduled. All candidates will be scheduled for Part II within 1 year following notification of successful completion of Part I.

A candidate who fails the initial Part I examination may, upon payment of the Part I reexamination fee, repeat the examination the following year. Reexaminees who do not sit for reexamination as scheduled will be required to request and submit a new application, all supporting documentation, and the application and Part I examination fees. Two failures necessitate reapplication (request for a new application, all supporting documentation, and the application and Part I examination fees).

Effective March 1987, a passing grade on the Part I examination dated March 1987, or thereafter, will be valid for a period of 6 years, or three attempts to complete the Part II examination successfully, whichever comes first.

### B. Part I Examination Content—Psychiatry

Successful completion of the Part I written examination in psychiatry and neurology is required of candidates seeking certification in psychiatry.

The psychiatric portion of the examination will include questions on the following areas in psychiatry: normal and abnormal growth and development through the life cycle, biological and psychosocial

dimensions of psychiatry, and clinical psychiatry (phenomenology, diagnosis, and treatment).

The neurologic portion of the examination will include questions on the following areas in neurology: neuroanatomy, neuropathology, neuropharmacology and clinical diagnostic procedures (including questions on cerebrospinal fluid, neuro-ophthalmology, electroencephalography, and neuroimaging), and therapy and clinical neurology (management of patients with neurologic disorders).

### C. Part I Examination Content—Neurology

Successful completion of the Part I written examination in psychiatry and neurology is required of candidates seeking certification in neurology or neurology with special qualification in child neurology.

The neurologic portion of the examination will include questions on the following areas in adult and child neurology: neuroanatomy, neuropathology, neurochemistry, neurophysiology, basic and clinical neuropharmacology, neuroimmunology/neurovirology, genetics, neuroendocrinology, neuroimaging, neuro-ophthalmology, neuro-otology, and cerebrospinal fluid.

The psychiatric portion of the examination will include questions on the following areas in psychiatry: developmental and other disorders of childhood, psychopathology and diagnostic criteria, the doctor-patient relationship, behavioral and personality changes associated with structural alterations, alcoholism and substance abuse, altered states of consciousness, memory disorders and cortical dysfunction, psychiatric problems associated with medical disease, diagnostic procedures, psychopharmacology, and nonpharmacologic therapeutic modalities.

### D. Appeal Procedure for Negative Determinations Regarding Part I Examinations

A failing grade on the Part I examination is considered a "negative determination." A candidate who receives a negative determination may appeal by complying with the following procedures:

Within 30 days after date of notice of a negative determination, the unsuccessful candidate may indicate, in writing, his/her request to have his/her examination hand scored. The appeal fee of \$300 must accompany the request. The candidate will be informed of the results of the hand scoring in writing, which, in all events, will be final and binding on the Board and on the candidate. All correspondence and other materials should be sent to the Board office.

## Part II Examination

### A. Part II Examination Procedures

All successful Part I candidates will receive a notice of assignment to a Part II examination, together with a request to submit the required examination fee. Along with this request, candidates will be asked to sign a statement that they possess a current unlimited license in the state, commonwealth, territory, or possession of the United States or province of Canada in which they practice.

Scheduling for the Part II examination will be made on a regional basis as often as possible. Candidates who fail to take Part II as scheduled by the Board will be required to reapply for the Part II examination.

The limited space available and the complicated logistics involved in administering the Part II examination make it extremely difficult for the Board to allow candidates to select either the site or the date for examination. It is the candidate's privilege to decline the assigned examination, but there is no guarantee that another date or location will be available within the year's examination cycle.

Candidates who do not pay the Part II examination fee for their scheduled examination by the deadline specified will be removed from the roster of candidates for that examination. Such candidates will be required to request and submit a Part II application in order

to be scheduled for a future Part II examination. Examination fees will be requested at the appropriate time.

Candidates who pay their Part II examination fee but fail to appear at their scheduled Part II examination will forfeit the fee. Such candidates will be required to request and submit a Part II application in order to be scheduled for a future Part II examination. Examination fees will be requested at the appropriate time.

One month prior to the date of the assigned Part II examination, a candidate will receive informational materials and an admission notice specifying the date, time, and place to report for registration. Candidates are requested to report for registration only at the date and time indicated on the admission notice. Registration schedules are arranged to accommodate candidates in accordance with their examination schedules.

### *1. Policy for Retaking the Part II Examination*

A passing grade on the Part I examination dated March 1987, or thereafter, will be valid for a period of 6 years or three attempts to complete the Part II examination successfully, whichever comes first.

Psychiatry candidates must pass both sections of the Part II examination. A candidate who fails one or both sections of the examination must repeat both sections at each subsequently scheduled examination until he/she passes both sections at the same examination.

Neurology candidates must pass all three (two adult and one child) sections of the Part II examination. A candidate must repeat the section or sections he/she failed at each subsequently scheduled examination until he/she passes all the sections.

Child neurology candidates must pass all three (two child and one adult) sections of the Part II examination. A candidate must repeat the section or sections he/she failed at each subsequently scheduled examination until he/she passes all the sections.

Candidates who are unsuccessful in the Part II examination during the allotted time period will be required to request and submit a new Part I application, documentation, and the application and Part I examination fees.

### *2. Procedures for Retaking the Part II Examination*

Candidates who have failed the Part II examination are automatically assigned to another Part II examination and are required to be present as scheduled. Candidates who fail to take the reexamination at the time specified are required to request and submit a Part II application. When possible, candidates submitting the Part II application will be scheduled for examination within 1 year from the date the Part II application is received in the Board office. Due to space limitations in the Part II examinations, a wait longer than 1 year may become necessary. Candidates will be scheduled for examination based on space availability and order of receipt of application. A request for the examination fee will be made at that time. The examination fee should not be sent with the application.

Candidates who have submitted a Part II application may choose to decline two invitations to Part II examinations. If the third invitation is declined, the candidate will be required to request and submit a new Part II application and will be placed at the end of the waiting list once the application is received in the Board office.

Candidates should be aware of the expiration date of their passing the Part I examination and the number of times they have taken the Part II examination.

### *3. Rules of Forfeiture of Part II Examination Fee*

A candidate who is unable to attend the Part II examination to which he or she has been admitted and who fails to notify the executive vice president in writing at least 90 days before the date of such examination shall forfeit the examination fee.

## **B. Part II Examination Content**

Part II, an oral examination, will include the examination of patients under the supervision of one or more examiners. The manner of examining patients, and the reasoning and deductions therefrom, will constitute an important part of the examination. Knowledge of basic science principles, special diagnostic procedures, and management recommendations and risks are also essential parts of the examination, which is focused upon evaluation of clinical skills.

Candidates are expected to discuss their findings with their examiners. Questions frequently cover such areas as diagnosis, differential diagnosis, treatment, prognosis, and management. Reference to the basic sciences of psychiatry and neurology may be made.

Psychiatry candidates will take two examinations:

One 1-hour examination in clinical psychiatry (patient)

One 1-hour examination in clinical psychiatry (audiovisual)

In the patient section, the psychiatry candidate will be given approximately 30 minutes to examine a patient under the supervision of one or more examiners. Following the examination of the patient, the candidate will be examined by one or more examiners. This section will stress physician-patient interaction, conduct of the clinical examination, capacity to elicit clinical data, formulation, differential diagnosis and prognosis, therapeutic management, and knowledge of therapies. Additional questions may be addressed to the basic science of psychiatry.

The audiovisual section will consist of a videotaped psychiatric examination approximately 20 minutes in length, which the candidate will observe. Candidates will then be individually examined by one or more examiners with particular reference to the content of the tape. This discussion may also include other clinical topics.

Neurology candidates will take three examinations:

One 1-hour examination in clinical neurology (patient)

One 1-hour examination in clinical neurology (without patient)

One 1-hour examination in clinical child neurology (without patient)

Child neurology candidates will take three examinations:

One 1-hour examination in clinical child neurology (patient)

One 1-hour examination in clinical child neurology (without patient)

One 1-hour examination in clinical neurology (without patient)

In the neurology and child neurology patient sections, the candidate will be given approximately 30 minutes to examine the patient under the supervision of one or more examiners. During the conduct of the examination, the candidate's ability to obtain an adequate history and perform a neurologic examination will be observed. Following the examination of the patient, the discussion with the examiner, which will be approximately 30 minutes in length, will focus on the evaluation of the findings and discussion of the diagnosis, treatment, and management. This discussion may not be limited to the patient examined and may also include other clinical topics. The examiners may also ask additional questions concerning the basic science of neurology.

Multiple written vignettes of patient encounters will be utilized as a basis for discussion of diagnosis and treatment in those sections in which there is no patient present.

Since candidates in child neurology are to be certified in neurology with special qualification in child neurology, it is agreed that those candidates will be expected to pass a 1-hour oral examination in clinical neurology (without patient), which is set at the same level of difficulty established for neurology candidates. The pass/fail standards for that hour in clinical neurology (without patient) will be the same whether the candidate is seeking certification in neurology or in neurology with special qualification in child neurology.

### C. Feedback to Unsuccessful Candidates on the Part II Examination

A failing grade on a Part II examination is considered a "negative determination." Within 30 days after date of notice of a negative determination, the unsuccessful candidate may, by writing, indicate his/her request for feedback. The fee for providing feedback is \$100 and must accompany the written request. After such request, the candidate will be provided information concerning his/her performance in the form of a checklist of categories passed and not passed. All correspondence or other materials should be sent to the Board office.

### D. Appeal Procedure for Negative Determinations Regarding Part II Examinations

A failing grade on a Part II examination is considered a "negative determination." A candidate who receives a negative determination may appeal by complying with the following procedures.

Within 55 days after date of notice of a negative determination, the unsuccessful candidate may indicate, in writing, his/her request for a formal appeal of the examination results. The following materials must accompany this request: appeal fee, which is equal to the candidate's reexamination fee, and written information tending to rebut the negative determination. All correspondence and other materials should be sent to the Board office.

For psychiatry candidates the Committee to Review Appeals for Psychiatry will review the materials and recommend action to the Psychiatry Council, consisting of all current psychiatry directors. The Psychiatry Council will review the material and make a decision that, in all events, will be final and binding on the council, on the Board, and on the candidate.

For neurology or neurology with special qualification in child neurology candidates, the Committee to Review Appeals for Neurology will review the materials and recommend action to the Neurology Council consisting of all current neurology directors. The Neurology Council will review the materials and make a decision that, in all events, will be final and binding on the council, on the Board, and on the candidate.

## Subspecialization

### A. Committee on Certification in Child and Adolescent Psychiatry

In February 1959, the ABPN, in concurrence with the ABMS, established a Committee on Certification in Child Psychiatry. This was done to establish officially the field of child psychiatry as a definite area of subspecialization in psychiatry and to provide a means of identifying the properly trained and experienced child psychiatrist as distinguished from those who claim proficiency in this field without adequate background and qualifications. In November 1987, the name of the committee was changed to the Committee on Certification in Child and Adolescent Psychiatry.

The actual mechanics of certification of qualified candidates and the establishment of basic policies have been delegated by the Board to the committee, which operates under the supervision of and in accordance with the policies of the Board. The committee presently consists of six members certified in child and adolescent psychiatry by the ABPN and one member certified by the American Board of Pediatrics.

The committee holds meetings each year for the purpose of examining candidates and transacting business.

Each applicant for certification in child and adolescent psychiatry must be certified by the Board in the specialty of psychiatry prior to applying for examination in child and adolescent psychiatry. Training must be completed by the application deadline. The general policies regarding training, application, and examination in

child and adolescent psychiatry are contained in the pamphlet "Information for Applicants for Certification in Child and Adolescent Psychiatry," which is available from the Board office.

Please note that applicants may submit application for examination in psychiatry after successful completion of the PGY-1, 2 years of residency training in psychiatry, and 1 year of residency training in child and adolescent psychiatry.

### B. Committee on Certification for Added Qualifications in Geriatric Psychiatry

In November 1989, the ABPN, in concurrence with the ABMS, established a Committee on Certification for Added Qualifications in Geriatric Psychiatry. This was done to establish officially the field of geriatric psychiatry as a definite area of subspecialization in psychiatry and to provide a means of identifying the properly trained and experienced geriatric psychiatrist.

The actual mechanics of certification of qualified candidates have been delegated by the Board to the committee, which operates under the supervision of and in accordance with policies of the Board.

Each applicant for certification in geriatric psychiatry must be certified by the Board in the specialty of psychiatry prior to applying for examination for added qualifications in geriatric psychiatry. The general policies regarding training, application, and examination in geriatric psychiatry are contained in the pamphlet "Information for Applicants for Certification of Added Qualifications," which is available from the Board office.

### C. Committee on Certification for Added Qualifications in Clinical Neurophysiology

In October 1990, the ABPN, in concurrence with the ABMS, established a Committee on Certification for Added Qualifications in Clinical Neurophysiology. This was done to establish officially the field of clinical neurophysiology as a definite area of subspecialization in neurology and psychiatry and to provide a means of identifying the properly trained and experienced clinical neurophysiologist.

The actual mechanics of certification of qualified candidates have been delegated by the Board to the committee, which operates under the supervision of and in accordance with the policies of the Board.

Each applicant for certification in clinical neurophysiology must be certified by the Board in the specialty of neurology, neurology with special qualification in child neurology, or psychiatry prior to applying for examination for added qualifications in clinical neurophysiology. The general policies regarding training, application, and examination in clinical neurophysiology are contained in the pamphlet "Information for Applicants for Certification of Added Qualifications," which is available from the Board office.

### D. Committee on Certification for Added Qualifications in Addiction Psychiatry

In October 1991, the ABPN, in concurrence with the ABMS, established a Committee on Certification for Added Qualifications in Addiction Psychiatry. This was done to establish officially the field of addiction psychiatry as a definite area of subspecialization in psychiatry and to provide a means of identifying the properly trained and experienced addiction psychiatrist.

The actual mechanics of certification of qualified candidates have been delegated by the Board to the committee, which operates under the supervision of and in accordance with the policies of the Board.

Each applicant for certification in addiction psychiatry must be certified by the Board in the specialty of psychiatry prior to applying for examination for Added Qualifications in Addiction Psychiatry. The general policies regarding training, application, and examination in addiction psychiatry are contained in the pamphlet

"Information for Applicants for Certification of Added Qualifications," which is available from the Board office.

**E. Committee on Certification for Added Qualifications in Forensic Psychiatry**

In November 1992, the ABPN, in concurrence with the ABMS, established a Committee on Certification for Added Qualifications in Forensic Psychiatry. This was done to establish officially the field of forensic psychiatry as a definite area of subspecialization in psychiatry and to provide a means of identifying the properly trained and experienced forensic psychiatrist.

The actual mechanics of certification of qualified candidates have been delegated by the Board to the committee, which operates under the supervision of and in accordance with the policies of the Board.

Each applicant for certification in forensic psychiatry must be certified by the Board in the specialty of psychiatry prior to applying for examination for added qualifications in forensic psychiatry. The general policies regarding training, application, and examination in forensic psychiatry are contained in the pamphlet "Information for Applicants for Certification of Added Qualifications," which is available from the Board office.

**Special Programs**

**A. Supplementary Certification**

A candidate who has been certified in psychiatry, neurology, or neurology with special qualification in child neurology may apply for supplementary certification in another primary specialty upon submission of a new Part I application and Part I examination fee. The candidate will be scheduled for the next available Part I examination in the supplementary subject. The credentials for such other certificate must be acceptable to the Board.

More than one application may be on file simultaneously. It is the responsibility of the applicant to contact the Board office to avoid possible conflicts in examination scheduling.

**1. Dual Certification in Psychiatry and Neurology**

Applicants seeking certification in both psychiatry and neurology who began residency training prior to January 1, 1988, must have completed the following 5 years of ACGME-approved postgraduate training:

- a. A PGY-1 that meets requirements for either psychiatry or neurology;
- b. Two years of approved residency in psychiatry in a single training program; and
- c. Two years of approved residency in neurology in a single training program.

Applicants seeking certification in both psychiatry and neurology who began residency training as of January 1, 1988, must have completed the following ACGME-approved postgraduate training:

- a. A PGY-1 that meets the requirements for entry into a neurology program;
- b. Either (1) 6 full years of postgraduate residency training in approved programs in the United States or Canada, including 3 full years in psychiatry and 3 full years in neurology, or (2) at the discretion and approval of both training directors and in accordance with RRC requirements, the applicants may complete 5 full years of postgraduate training in approved programs in the United States or Canada, including 2 full years of residency training in psychiatry in a single program, 2 full years of residency training in neurology in a single program, and a full year that is jointly sponsored and coordinated by the psychiatry and neurology training directors to allow the resident to successfully complete all of the essentials for an approved residency program in psychiatry and an approved residency program in neurology.

The 5 years of residency training are usually taken at one approved institution but may be taken at no more than two approved institutions. An application for examination may be submitted after completion of an approved PGY-1, 2 full years of approved residency training in one specialty, and the full year of approved, jointly sponsored residency training.

**2. Dual Certification in Neurology and Neurology With Special Qualification in Child Neurology**

Applicants who have achieved certification in neurology and who wish to be certified in neurology with special qualification in child neurology will need to obtain the following additional training:

- a. A minimum of 12 months of general pediatric training completed in a program accredited by the ACGME or the RCPSC; and
- b. Twelve months of training in clinical child neurology completed in a program accredited by the ACGME or the RCPSC.

A maximum of 3 months of child neurology training obtained during a neurology residency may be applied toward the required 12 months of child neurology training only if the 3 months was accomplished in an ACGME-approved child neurology program or a child neurology program accredited by the RCPSC. The neurology program director must document that this training was accomplished in an ACGME-approved child neurology program or a child neurology program accredited by the RCPSC.

Candidates will be required to request and submit a new completed Part I application and a \$350 processing fee. Such candidates will not be required to retake the Part I examination in neurology. The Part II examination fee will be requested after the application has been approved. Two 1-hour examinations in child neurology will be taken during the Part II examination.

**3. Dual Certification in Child and Adolescent Psychiatry and in Neurology With Special Qualification in Child Neurology**

An applicant who wishes to obtain certificates both in child and adolescent psychiatry and in neurology with special qualification in child neurology must meet the following requirements:

- a. Certification by the Board in the specialty of general psychiatry prior to applying for examination in child and adolescent psychiatry (a minimum of 2 years of approved residency training in general psychiatry is required), and
- b. Completion of the requirements for certification in neurology with special qualification in child neurology.

**B. Triple-Board Requirements**

The ABP, the ABPN, and the Committee on Certification in Child and Adolescent Psychiatry of the ABPN have developed a committee that is overseeing training via a different format in six programs. This is a 5-year curriculum with 24 months of pediatrics, 18 months of adult psychiatry, and 18 months of child and adolescent psychiatry. Completion of the program will satisfy the training requirements for certification in all three areas. Physicians pursuing training in one of these six programs may not apply for examination until all training has been completed. The six approved programs are Albert Einstein College of Medicine, Brown University, Mount Sinai School of Medicine, Tufts University School of Medicine, the University of Kentucky, and the University of Utah. For further information please contact the ABPN.

**C. Combined Training Leading to Certification by Two Boards**

The approved combined training programs are listed in the *Graduate Medical Education Directory*, or a listing may be obtained by writing the ABPN. The Board currently has the following programs:

**1. Dual Certification in Psychiatry/Internal Medicine**

The ABPN and the ABIM have approved programs for combined psychiatry/internal medicine residency training.

### 2. Dual Certification in Neurology/Internal Medicine

The ABPN and the ABIM have approved programs for combined neurology/internal medicine residency training.

### 3. Dual Certification in Neurology/Physical Medicine and Rehabilitation

The ABPN and the American Board of Physical Medicine and Rehabilitation have approved programs for combined neurology/physical medicine and rehabilitation residency training.

## Appendix

### 1. Neurology training requirements for physicians who entered residency training prior to July 1, 1987

Satisfaction of the following training requirements for residency is mandatory for physicians entering training programs on or after July 1, 1977, and before July 1, 1987, for neurology.

Two patterns of training are acceptable.

- A. Three-Year Training Following a First Postgraduate Year: Prior to entering an approved 3-year training program in neurology a physician must have completed 1 year of approved training after receiving the degree of Doctor of Medicine or Doctor of Osteopathy. This year of clinical experience should emphasize internal medicine, pediatrics, or family practice. The following programs would be acceptable.

The Categorical First Year, Categorical\* First Year, and the Flexible First Year are in accord with those defined by the Department of Graduate Medical Education, American Medical Association. These were in effect from 1977 through 1981. Effective July 1982, ACGME-approved first postgraduate year training programs include only Categorical First Year, Categorical\* First Year, and Transitional Programs.

1. Categorical First Year: These are first-year programs planned, sponsored, and conducted by a single, approved residency program as part of that residency. The content of such a first year will be limited to the specialty field of the sponsoring residency program.

The Categorical First Year (beginning after 1977 and before 1986 for neurology candidates) must be completed in internal medicine, family practice, pediatrics, surgery, or obstetrics and gynecology.

2. Categorical\* First Year: The asterisk designates a first-year program that was planned, sponsored, and supervised by a single, approved residency program as part of that residency's program of graduate medical education, the content of which was not limited to the single specialty of the sponsoring residency program but may have included experience in two or more specialty fields.

The Categorical\* First Year in neurology must have included at least 4 months with direct patient care responsibility in internal medicine, family practice, or pediatrics.

3. Flexible First Year: The first year will be sponsored by two or more approved residencies and will be jointly planned and supervised by the residencies that sponsor it. The content of a flexible first year must include 4 months of internal medicine, but the remainder of the year may be designed in accordance with the purposes of the two or more sponsoring residency programs and the interests and needs of the students.
4. Transitional Programs: Transitional programs are provided for physicians who desire in their first or later graduate year an experience in several specialties prior to embarking on further training in a single specialty. The criteria for a Transitional Year are outlined in the *Graduate Medical Education Directory*, published by the American Medical Association.

### B. Four-Year Training Programs:

A neurology residency program approved by the ACGME for 4 years of training would be acceptable.

### 2. Applicants With Non-US, Non-Canadian Training

The following criteria pertain to all applicants whose residency training was undertaken at a center located outside the United States or Canada prior to July 1, 1985. The applicant must possess an unlimited license to practice medicine in a state, commonwealth, or territory of the United States, or province of Canada.

#### A. Applicants From the United Kingdom

For each year of residency training completed in an approved hospital program in neurology in the United Kingdom, 1 year of training credit will be given toward eligibility for examination by the Board in neurology. The hospital program must be among those approved by the Visiting Inspecting Specialty Committee in Neurology of the Royal College of Physicians.

In order to obtain credit for 2 or 3 years of approved training in the United Kingdom, at least 2 years of the training must be spent at the same training center in neurology.

The applicant will be responsible for sending the details of his or her training to the Board office, along with verification of this training from the approved hospital or hospitals in the United Kingdom. The applicant's program director must certify that the applicant was engaged in full-time residency training. Credit for approved residency training in the United Kingdom will be given only for training begun on or after July 1, 1976. Applicants who have completed residency training in the United Kingdom prior to July 1, 1976, must meet the criteria outlined in the section on applicants with non-US, non-Canadian, or non-UK Training, listed below.

#### B. Applicants With Non-US, Non-Canadian, or Non-UK Training

The following criteria pertain to all applicants whose residency training was undertaken at a center located outside the United States, Canada, or the United Kingdom (with the exception of applicants who completed residency training in the United Kingdom prior to July 1, 1976):

1. The candidate must have had full-time specialty training in a manner equivalent in length of time and content to that required for US training
2. The candidate must successfully complete a comparable national certification examination in the country of training in the specialty in which the physician is seeking admission to examination, and
3. The candidate must have achieved certification within the past 7 years. If certification was achieved earlier, then the candidate must have had 1 year of clinical practice in a setting in which his or her professional work has been observed by at least two ABPN diplomates in that specialty and documented by two letters of sponsorship from such diplomates.

The only certifications recognized by the Board as clearly equivalent are

1. MRCP (Member of the Royal College of Physicians)
2. MRACP (Member of the Royal Australian College of Physicians)
3. Certification by the RCPSC

 H Rodney Withers, MD, Los Angeles, California

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Radiology to ascertain whether the information below is current.)*

## Certificates

A certificate will be issued to each candidate who has finished a prescribed and approved period of training and study and has passed a written and oral examination demonstrating an adequate level of knowledge and ability in diagnostic radiology and/or diagnostic radiology with special competence in nuclear radiology, or radiation oncology in accordance with the definitions as stated in the Bylaws and Rules and Regulations of the American Board of Radiology (ABR).

A certificate granted by the Board does not of itself confer, or purport to confer, any degree or legal qualifications, privileges, or license to practice radiology.

## Definitions

1. Diagnostic radiology is that branch of radiology that deals with the utilization of all modalities of radiant energy in medical diagnosis and therapeutic procedures utilizing radiologic guidance. This includes, but is not restricted to, imaging techniques and methodologies utilizing radiations emitted by x-ray tubes, radionuclides, ultrasonographic devices, and radio-frequency electromagnetic radiation emitted by atoms.
2. Nuclear radiology is that branch of radiology that involves the analysis and imaging of radionuclides and radiolabeled substances for diagnostic imaging and related in vivo techniques.
3. Radiation oncology is that branch of radiology that deals with the therapeutic applications of radiant energy and its modifiers, and the study and management of cancer and other diseases.

## Certificates of Added Qualifications

A certificate will be issued to each Diplomate certified in either radiology or diagnostic radiology who has finished a prescribed and approved period of training and study and has passed an oral examination demonstrating an adequate level of knowledge and ability in the area of expertise for which he or she has applied in accordance with the definitions stated in the Bylaws and Rules and Regulations of the ABR.

## Definitions

1. Pediatric radiology is the branch of radiology dealing with children.
2. Vascular and interventional radiology is the branch of radiology involved with the diagnosis and treatment of diseases using percutaneous methods guided by various radiologic imaging modalities.
3. Neuroradiology is that branch of radiology dealing with (1) the brain and its coverings, (2) the skull base and ENT, and (3) the spine.

## Qualifications of Applicants for Certification by the ABR

Each applicant for admission to an examination for a certificate to be issued by the ABR in diagnostic radiology, diagnostic radiology with special competence in nuclear radiology, and/or radiation oncology shall be required to present evidence satisfactory to the Board that the applicant has met the following standards:

1. General Qualifications: That the applicant is a specialist in diagnostic radiology, diagnostic radiology with special competence in nuclear radiology, and/or radiation oncology as outlined in Article II, Section 2, of the Rules and Regulations, and is recognized by his/her peers to have high moral and ethical standards in his/her profession.
2. General Professional Education: Graduation from a medical school accredited at the date of graduation by the Liaison Committee on Medical Education of the American Medical Association, or the Royal College of Physicians and Surgeons of Canada, or from a College of Osteopathic Medicine approved by the American Osteopathic Association. If the applicant is a graduate of a medical school outside the United States or Canada, the applicant must be screened with approval by an agency approved by the Board of Trustees.
3. Special Training: This period of special training shall be as the Board of Trustees, by resolution or motion, shall determine from time to time.
 

Effective for candidates beginning their training July 1, 1981, and thereafter, the Board of Trustees shall require a written statement from the program director attesting that the applicant will have satisfactorily completed the prescribed special training at the time of the written examination and is prepared to take that examination.
4. In special instances these requirements may be modified by majority vote of the entire Board of Trustees or by the executive committee acting in its stead.
5. If the program director fails to indicate in writing that the applicant is adequately trained and prepared for the examination, documentation of the reason(s) must be submitted along with evidence that the candidate has been appropriately apprised of his/her deficiencies. The executive committee of the Board will notify the applicant in writing that an appeals mechanism exists, as outlined in paragraphs 6 and 7 below.
6. In utilizing the appeals mechanism, the applicant must provide the executive committee of the Board with a written statement describing the reasons that he/she believes will support his/her

appeal. The executive committee may ask the program director to submit a written response to the applicant's appeal.

7. The executive committee must reach a final decision with the least possible delay in order that an applicant who wins his/her appeal does not lose the opportunity to be accepted for the examination for which he/she has applied.

### Diagnostic Radiology

Candidates beginning their training in diagnostic radiology after June 30, 1984, will be required to have 4 years of approved postgraduate training in a department approved to train in diagnostic radiology by the Residency Review Committee (RRC) for Diagnostic Radiology representing the Council on Medical Education and accredited by the Accreditation Council for Graduate Medical Education (ACGME), exclusive of an internship or clinical year (if the latter is required by the program director). A minimum of 6 months, but not more than 12 months, must be spent in nuclear radiology in the 4-year program. Candidates may spend no more than 8 months in rotations outside the parent institutions.

Residents must have basic cardiac life support certification; advanced cardiac life support certification is encouraged.

It is not the intent of the ABR for programs to use any of the 4 years for traditional fellowship training.

Effective for residents beginning their training July 1, 1991:

In a 4-year approved residency program, not more than 12 months shall be spent in a single discipline (research is considered a discipline).

The designation of "fellowship" is reserved for training beyond the 4-year residency.

In a 4-year program, the resident is expected to remain in that program for all 4 years. If a transfer to another program is necessary or desired, that transfer must have the agreement of both program directors and the prospective notification to, and approval of, the ABR.

Candidates will be considered for the written examination when they have completed 36 of the required 48 months of approved training, or if they will complete this amount by September 30 of the year in which the examination is given.

A maximum of 3 months may be spent in radiation oncology (therapeutic radiology).

Candidates beginning their graduate medical education after January 1, 1997, will be required to have 5 years of approved training with a minimum of 4 years in diagnostic radiology. The other year must be accredited clinical training in internal medicine, pediatrics, surgery or surgical specialties, obstetrics and gynecology, neurology, family practice, emergency medicine, or any combination of these. This clinical year will usually be the first postgraduate year. No more than a total of 3 months may be spent in radiology and/or pathology. All clinical training must be in an ACGME, American Osteopathic Association, or equivalent approved program.

### Diagnostic Radiology With Special Competence in Nuclear Radiology

The ABR will give a special examination leading to a certificate in diagnostic radiology with special competence in nuclear radiology to those diplomates in radiology, roentgenology, diagnostic radiology, or diagnostic roentgenology who have fulfilled the requirement of 1 full year of formal training in nuclear radiology in an approved department of diagnostic radiology, nuclear medicine, or diagnostic radiology with special competence in nuclear radiology. This examination will consist of three examiners. The categories to be covered are (1) bone, bone marrow, genitourinary tract, tumor, and abscess localization; (2) central nervous system, endocrinology, gastrointestinal tract, hepatobiliary tract, and spleen; and (3) cardiopulmonary systems.

Candidates applying for certification in diagnostic radiology with special competence in nuclear radiology in 1991 must first be certified in diagnostic radiology. They must have a minimum of 12 months of approved training in nuclear radiology. Credit will be given for any training obtained during the 4 years of diagnostic radiology residency prior to December 31, 1996.

Beginning January 1, 1997, candidates will be required to have had a minimum of 1 year full-time training in nuclear radiology in a department approved for training in nuclear radiology by the RRC for Diagnostic Radiology or in a department approved for training in nuclear medicine by the RRC for Nuclear Medicine and accredited by the ACGME. No credit will be given for any nuclear training obtained during the 4 years of diagnostic radiology residency after January 1, 1997.

### Radiation Oncology

Candidates beginning their training in radiation oncology after June 30, 1975, and who have not had an approved internship, will be required to have 4 years of approved postgraduate training. Three of these years must be spent in a department approved to train in radiation oncology by the RRC for Radiation Oncology representing the Council on Medical Education and accredited by the ACGME. The other (PG-1) year may be spent in one of the following programs: internal medicine; surgery; pediatrics; family practice; obstetrics and gynecology; or flexible, transitional, or categorical radiation oncology.

The 3-year residency training period must include training in pathology and training in the therapeutic aspects of nuclear medicine. Credit may not exceed 3 months for time spent in either subject. A maximum of 3 months' training in diagnostic radiology will be allowed.

Candidates in this category will be eligible for the written examination when they have completed the required 48 months of approved training, or if they will complete this amount by September 30 of the year in which the examination is given.

Effective in 1995, successful candidates will be issued a 10-year time-limited certificate in radiation oncology.

Candidates beginning their training in radiation oncology after January 1, 1996, will be required to have 4 years of approved training in radiation oncology. The requirement of a PGY-1 clinical year remains. The 4 years of training in radiation oncology may be obtained in a program offering a 4-year residency in radiation oncology or by a 1-year fellowship following a 3-year residency. This fellowship must be at an institution approved for ACGME graduate medical education training in other fields since the RRC does not currently approve fellowships in radiation oncology.

### Application and Fee

Application for examination must be made in exact duplicate (two original copies on prescribed forms that may be obtained from the secretary). No photocopy or any other kind of copy will be accepted. The data summary form enclosed with the application is an integral part that must be completed. These forms shall be forwarded with the required data, three unmounted photographs autographed on the front, and the current application fee (US currency) by the deadline established for filing. A personal check should be made payable to the American Board of Radiology, Inc. Applications for the written examination to be given in any year will not be accepted prior to July 1 of the preceding year and must be filed no later than the deadline of September 30 of the preceding year. The application fee will cover both the written and the oral examinations, provided the candidate is successful on his/her first attempt in both the written and oral examinations.

Incomplete applications will not be accepted. The postmark affixed to the last item received to complete the application must be on or before the deadline date.

All applications must be typed or neatly printed (in ink).

In the event of withdrawal of an application, only a portion of the fee can be refunded.

Beginning July 1, 1981:

A candidate will have three consecutive opportunities to pass the written examination, beginning with the written examination for which he/she is first declared admissible. If a candidate fails to accomplish this, he/she must submit a new application and the fee in effect at that time. Failure to accept an appointment, cancellation of an appointment, or failure to appear for a scheduled written examination will be regarded as one of the three opportunities.

A candidate who fails the written examination after three attempts must submit a new application together with the fee in effect at that time.

A candidate who has passed the written examination will have three consecutive opportunities to appear for and pass the oral examination, beginning with the oral examination for which he/she is first declared admissible. If a candidate fails to accomplish this, he/she must submit a new application and the fee in effect at that time and reinitiate the examination process, including the written examination. Failure to accept an appointment, cancellation of an appointment, or failure to appear for a scheduled oral examination will be regarded as one of the three opportunities.

A candidate who finds it necessary for any reason to cancel acceptance of an appointment for either the written or oral examination shall be required to submit an additional fee. This amount represents administrative costs to the Board. A candidate who fails to appear for an examination without notifying the office of the ABR at least 20 days prior to the first date of the examination will be charged the full application fee in existence at the time of payment. (Under certain circumstances, the ABR, entirely at its discretion, may excuse such a candidate from this penalty, provided the reason for such absence is substantiated in writing.)

### Objectives of the Written Examination

In 1965 it became apparent to the Board of Trustees of the ABR that the then-current oral examination could not cover the entire burgeoning field of radiology without the addition of more segments and, in turn, more examiners. This would impose a further burden not only on candidates but also on the Board itself. It was decided, therefore, to search for other methods of examination. At that time, it was agreed to adopt a written examination to be given annually as a prerequisite for the oral examination. The content of the examination was to include the basic sciences of anatomy, pathology, physiology, and pharmacology as these subjects relate to clinical practice. Also to be included were radiological techniques, radiological physics, and radiation biology.

Thus, the content of the examination in radiation oncology now includes the basic sciences of physics, radiation biology, and clinical oncology as well as anatomy, pathology, physiology, and chemotherapy as these subjects relate to the clinical practice of radiation oncology.

A pool of multiple-choice questions was developed, and the first examination was given in 1969 to all candidates seeking certification in diagnostic radiology and in radiation oncology.

### Content of Written Examination in Each Field

Each examination consists of approximately 450 multiple-choice questions, to be administered over a period of approximately 8 hours. About one-half of the questions are distributed on the after-

noon of one day, and the other half distributed on the morning of the following day.

New written examinations are formulated each year in all categories of radiology, and the content of the examinations is carefully evaluated in order to keep pace with new information and developments. Even the number of questions in each category may be changed as necessity dictates from year to year.

Beginning in 1987, a candidate who passes the diagnostic portion but fails physics must repeat the physics portion and pass before admission to the oral examination.

Beginning in 1984, a candidate who takes the written examination in diagnostic radiology and fails the diagnostic portion but passes physics must repeat the diagnostic portion but will not be required to repeat physics.

Beginning in 1984, a candidate who takes the written examination in radiation oncology and passes the clinical portion but fails either physics or radiation biology must repeat only the portion that he/she failed. Those candidates who fail the physics and the radiation biology portions of the examination or the clinical oncology portion of the examination must repeat the entire examination.

Candidates in diagnostic radiology may expect to be asked questions on magnetic resonance imaging in the written and oral examinations.

### Oral Examination

Oral examinations are given at a time designated by the Board of Trustees. At the present time, the oral examinations are conducted yearly in May and/or June.

Admissibility to the oral examination is determined by the executive committee. Experience has shown that to delay taking the oral examination does not benefit the candidate.

No recording device of any kind may be brought to the examination.

#### Content of Oral Examination for Diagnostic Radiology

The categories to be covered are bones and joints, chest, gastrointestinal tract, genitourinary tract, neuroradiology, cardiovascular radiology, nuclear radiology, ultrasonography, pediatric radiology, and breast radiology. Questions may be asked on interventional techniques and magnetic resonance imaging.

#### Content of Oral Examination for Radiation Oncology

Effective in 1993, candidates applying for examination in radiation oncology will be examined for a period of 30 minutes each by eight examiners. The subject matter of this examination concerns the clinical management of malignant disease and is usually presented according to the anatomical site of the primary tumor. The anatomical sites are divided into the following eight categories: gastrointestinal malignancies; gynecologic malignancies; genitourinary malignancies; diseases of the reticuloendothelial system; head, neck, and skin; breast; central nervous system and pediatric malignancies; and lung and mediastinum, soft tissue, and bone. Brachytherapy techniques and the effect of radiation on normal tissue may be included in all categories.

### Reexaminations

#### Failures

A candidate who fails or conditions the oral examination in diagnostic radiology or in radiation oncology may be scheduled for reexamination. The reexamination fee in effect at that time must be submitted.

Candidates in diagnostic radiology who have conditioned one, two, or three categories in the oral examination will be reexamined by two examiners in each conditioned category. Candidates in radiation oncology who have conditioned one or two categories in the

oral examination will be reexamined by two examiners in each conditioned category. Candidates must pass the reexamination by both examiners in each category to remove the condition.

Effective July 1, 1981, a candidate who has failed the oral examination three times must start the examination procedure from the beginning with the submission of a new application, pay the fee in effect at that time, and retake the entire written examination.

### Status of a Physician

The Board will reply to an inquiry concerning the status of a physician with one of the following statements:

1. The physician is Board certified.
2. The physician is in the examination process.
3. The physician is neither certified nor in the examination process.

Note: No official status of "Board qualified" or "Board eligible" is recognized by the Board.

### Final Action of the Board

The final action of the Board is based on the applicant's professional record, training, and attainment in the field of diagnostic radiology, diagnostic radiology with special competence in nuclear radiology, or in radiation oncology, as well as on the results of his/her examination. This Board has been organized to assist qualified radiologists to become recognized in their communities as men and women competent to practice diagnostic radiology, diagnostic radiology with special competence in nuclear radiology, or radiation oncology.

### Revocation of Certificates

Certificates issued by this Board are subject to the provisions of Articles of Incorporation and the Bylaws. According to Article IX, Section 4, of the Bylaws, any certificate issued by the Board of Trustees shall be subject to revocation in the event that

1. the issuance of such certificate, or its receipt by the individual so certified, shall have been contrary to, or in violation of, any provision of the Certificate of Incorporation of this, the American Board of Radiology, or of these Bylaws or rules and regulations adopted by the Board of Trustees; or
2. the individual so certified shall not have been eligible in fact to receive such certificate; or
3. the individual so certified shall have made any misstatement of fact in the application, or in any other communication, to the corporation or its representatives; or
4. the individual so certified shall have been convicted by a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the Board of Trustees, moral turpitude; or
5. the license to practice medicine of the individual so certified shall be revoked.

Before any such certificate shall be revoked, a notice shall be sent by registered or certified mail to the last known address of the holder of such certificate, as it appears on the records of this corporation, setting forth the act, omission, or conduct alleged or complained of, and giving the holder of such certificate a reasonable opportunity to answer in writing thereto. Such certificate holder shall have not less than 30 days in which to reply thereto. The Board of Trustees may, at its discretion, make such further investigation as it deems necessary and proper.

The Board of Trustees of this corporation shall have the sole power, jurisdiction, and right to determine and decide whether the evidence or information before it is sufficient to constitute one of the grounds for revocation of any certificate issued by this corporation, and the decision of such Board of Trustees in the premise shall be final.

### Specialty of Surgery (General Surgery) Defined

The Board interprets the term "general surgery" in a comprehensive but specific manner, as a discipline having a central core of knowledge embracing anatomy, physiology, metabolism, immunology, nutrition, pathology, wound healing, shock and resuscitation, intensive care, and neoplasia, which are common to all surgical specialties.

The general surgeon is one who has specialized knowledge and skill relating to the diagnosis and preoperative, operative, and postoperative management in the following areas of primary responsibility:

1. Alimentary tract
2. Abdomen and its contents
3. Breast, skin, and soft tissue
4. Head and neck, including trauma; vascular, endocrine, congenital, and oncologic disorders—particularly tumors of the skin, salivary glands, thyroid, parathyroid, and the oral cavity
5. Vascular system, excluding the intracranial vessels, the heart, and those vessels intrinsic and immediately adjacent thereto
6. Endocrine system
7. Surgical oncology, including coordinated multimodality management of the cancer patient by screening, surveillance, surgical adjunctive therapy, rehabilitation, and follow-up
8. Comprehensive management of trauma, including musculoskeletal, hand, and head injuries; the responsibility for all phases of care of the injured patient is an essential component of general surgery
9. Complete care of critically ill patients with underlying surgical conditions in the emergency room, intensive care unit, and trauma/burn units

Additionally, the general surgeon is expected to have significant preoperative, operative, and postoperative experience in pediatric, plastic, general thoracic, and transplant surgery. Also, the surgeon must have understanding of the management of the more common problems in cardiac, gynecologic, neurologic, orthopedic, and urologic surgery, and of the administration of anesthetic agents.

The general surgeon must be capable of employing endoscopic techniques, particularly proctosigmoidoscopy and operative cholecystoscopy, and must have experience with a variety of other endoscopic techniques, such as laryngoscopy, bronchoscopy, esophagogastroduodenoscopy, colonoscopy, and laparoscopy. The general surgeon should have opportunity to gain knowledge and experience of evolving technological methods, eg, laser applications and endoscopic operations.

### Meaning of Certification

The Board considers certification to be based upon a process that includes the educational and evaluation phases and an examination phase. It holds that undergraduate and graduate education are of the utmost importance and requires the program director's endorsement, attesting that the applicant has had an appropriate educational experience and has attained a sufficiently high level of knowledge, judgment, and skills to be prepared for designation by the Board's certificate as a specialist in surgery, upon successful completion of the examinations, and to enter into independent practice of the specialty.

### Graduate Education in Surgery

#### I. General Information

The purpose of graduate education in surgery is to provide the opportunity to acquire a broad understanding of human biology as it relates to disorders of a surgical nature and the technical knowledge and skills appropriate to be applied by a specialist in surgery. This goal can best be attained by means of a progressively graded curriculum of study and clinical experience, under guidance and supervision of senior surgeons, that provides progression through succeeding stages of responsibility for patient care up to the final one of complete management. Major operative experience and senior/chief responsibility at the final stage of the program are essential components of surgical education. The Board will not accept into the process of certification anyone who has not had such an experience in the specialty of surgery, as previously defined, regardless of the number of years spent in educational programs.

The graduate educational requirements set forth on these pages are considered to be the minimal requirements of the Board and

should not be interpreted to be restrictive in nature. The Board recognizes that the time required for the total educational process should be sufficient to provide adequate clinical experience for the development of sound surgical judgment and adequate technical skill. These requirements do not preclude additional desirable educational experience, and program directors are encouraged to retain residents in a program as long as is required to achieve the necessary level of qualifications.

The integration of basic sciences with clinical experience is considered to be superior to formal courses in such subjects. Accordingly, while recognizing the value of formal courses in the study of surgery and the basic sciences at approved graduate schools of medicine, the Board will not accept such courses in lieu of any part of the required clinical years of surgical education.

The Board may at its discretion require that a member of the Board or a designated diplomate observe and report upon the clinical performance of an applicant before establishing admissibility to examination or awarding certification.

While a program may develop its own vacation, illness, and other leave policies for the resident, 1 year of approved residency toward the Board's requirements must be 52 weeks in duration and must include at least 48 weeks of full-time surgical experience. Furthermore, unused vacation and other leave time may not be accumulated to reduce the overall duration of residency expected by the Board.

All phases of the graduate educational process must be completed in a manner satisfactory to the Board.

#### II. Acceptable Programs

The residency programs in surgery in the United States that are reviewed and approved by the Residency Review Committee (RRC) for Surgery and the Accreditation Council for Graduate Medical Education (ACGME) are acceptable to the Board as an adequate educational experience.

In Canada, those university residency programs in surgery that are accredited by the Royal College of Physicians and Surgeons offer an acceptable educational experience. Applicants from such programs must meet the Board's specific requirements and cannot receive credit for postgraduate surgical education in countries other than the United States or Canada.

Except as mentioned above, participation in postgraduate surgical education programs in countries other than the United States is not creditable toward the Board's educational requirements unless under the specific conditions set forth in the section Credit for Foreign Graduate Education.

Listings of accredited programs in the United States may be found in the *Graduate Medical Education Directory*, published annually by the American Medical Association under the aegis of the ACGME.

### Requirements for Certification in Surgery

#### I. General

- A. Must have demonstrated to the satisfaction of the authorities of one's graduate educational program in surgery, to one's peers, and to the Board, that one has attained the level of qualifications in surgery required by the Board.
- B. Must have a moral and ethical standing satisfactory to the Board and in conformity with the Statements on Principles of the American College of Surgeons and its interpretations.
- C. Must be actively engaged in the practice of surgery as indicated by holding admitting privileges to a surgical service in an accredited hospital, or be currently engaged in pursuing additional graduate education in a component of surgery or one of the other recognized surgical specialties.

- D. Must have a currently registered full and unrestricted license to practice medicine granted by a state or other US jurisdiction, or by a Canadian province. The license must be valid no later than 6 months following completion of the residency in surgery. A temporary limited license, such as an educational, institutional, or house staff permit, is not acceptable to the Board.
- E. Must hold a permanent, unconditional, unrestricted, and unexpired license to practice medicine or osteopathy in one state or jurisdiction of the United States or province of Canada. The applicant must inform the Board of any conditions or restrictions in force on any medical license he or she holds. When there are two restrictions or conditions in force on any of the applicant's medical licenses, the Credentials Committee of the Board will determine whether the applicant satisfies the licensure requirement of the Board.

## II. Educational

### A. Undergraduate Medical Education

1. Must have graduated from an accredited school of allopathic or osteopathic medicine in the United States or Canada.
2. Graduates of schools of medicine from countries other than the United States and Canada must present evidence of final certification by the Educational Commission for Foreign Medical Graduates (ECFMG).
3. Graduates of allopathic medical schools in the United States and its territories not accredited by the Liaison Committee for Medical Education (LCME) who have successfully completed the licensure requirements in a US jurisdiction are deemed to have appropriate undergraduate medical credentials.

### B. Graduate Education in Surgery

1. Must have satisfactorily completed a minimum of 5 years of progressive education following graduation from medical school in a program in surgery accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada.
2. Must have completed all phases of graduate education in surgery in a program in surgery so accredited. Experience obtained in accredited programs in other recognized specialties, although containing some exposure to surgery, is not acceptable. A flexible or transitional first year is not creditable toward the Board's requirements as a PGY-1 unless it is accomplished in an institution having an accredited program in surgery and at least 6 months of the year is spent in surgical disciplines.
3. Must have, in a program accredited for a minimum of 5 years, at least 4 years of clinical surgical experience with progressively increasing levels of responsibility. There must be no less than 36 months devoted to the primary components of surgery (general surgery), as previously defined. The entire chief resident experience must be devoted to the primary components of the specialty of surgery. No more than 4 months of the chief residency may be devoted to any one of the primary components of surgery. During junior years, a total of 6 months may be assigned to nonsurgical disciplines such as medicine, gastroenterology, or pediatrics. Training in surgical pathology and endoscopy is considered to be surgical, but obstetrics and ophthalmology are not. No more than a total of 12 months during junior years may be allocated in any one surgical specialty other than general surgery. One year of the minimal 5 may be spent in laboratory research.
4. Must have 12 months in the capacity of chief resident in general surgery. The Board considers the terms "chief resident" and "senior resident" to be synonymous and to mean the 12 months in the program in which the resident assumes the ultimate clinical responsibilities for patient care under the supervision of the teaching staff. The majority of the 12 months of

chief residency must be served in the final year. To take advantage of a unique educational opportunity in a program during a resident's final year, however, a portion of the chief residency may be served in the next to the last year, provided it is no earlier than the fourth clinical year and has been approved by the RRC for Surgery followed by notification to the Board. The chief residency must be spent only in the parent or an integrated institution unless rotation to an affiliated institution has been approved by the RRC for Surgery.

5. The Board expects a residency year to include no less than 48 weeks of full-time surgical training.
6. All phases of the graduate educational process must be in accordance with the Special Requirements for Residency Training in General Surgery as promulgated by the ACGME and approved by the RRC for Surgery.
7. The Board believes that for optimal surgical education the resident should spend at least the final 2 residency years in the same program.

## III. Operative Experience

Applicants for examination must meet the criteria established by the RRC, ie, a minimum of 500 procedures in the chief/senior year. This must include operative experience in each of the areas of primary responsibility included in the definition of surgery (general surgery) set forth previously.

Each applicant must submit a tabulation of the operative procedures performed as surgeon and those performed as first assistant or teaching assistant. The Board provides an operative experience form for this purpose when application material is obtained by the applicant. The resident's record form, available to program directors for residents' use through the RRC for Surgery, may be submitted in lieu of the Board's operative experience form.

In tabulating cases toward Board requirements, credit may be claimed "as surgeon" when the resident has actively participated in the patient's care; has made or confirmed the diagnosis; has participated in selection of the appropriate operative procedure; has either performed or been responsibly involved in performing the critical portions of the operative procedure; and has been a responsible participant in both pre- and postoperative care.

When previous personal operative experience justifies a teaching role, residents may act as teaching assistants and list such cases for the fourth and fifth years only. You may claim credit as a teaching assistant when you have actually been present and scrubbed and acted as an assistant to guide a more junior trainee through the procedure. This must have been accomplished under the supervision of the responsible member of the senior staff. An individual cannot claim credit as both responsible surgeon and teaching assistant.

Applicants must also list the number of patients with multiple organ trauma and with critical surgical problems for whom they had primary management responsibility but operation was not required. Failure to submit a complete and properly authenticated list of operative procedures will constitute an incomplete application.

Applicants are advised to keep copies of the lists of operative work they submit for their records, as the Board cannot furnish copies.

## IV. Special Information for Program Directors

- A. Program directors are cautioned that appointment of residents at advanced levels without being certain that their previous training is in accordance with the Board's requirements may result in the affected residents not being accepted by the Board upon completion of the program. In any case in which there is question, program directors should make inquiry of the Board prior to taking action.

- B. According to the Special Requirements for Residency Training in General Surgery promulgated by the ACGME, special approval of the RRC for Surgery must be obtained (1) if a chief resident is assigned to an institution other than the parent one or an "integrated" one; (2) if rotations to any one approved "affiliate" exceed 6 months; (3) if more than 1 year of the total program is spent away from the parent and integrated institutions; or (4) if more than 6 months' total is spent in any assignment outside the parent, the integrated, or approved affiliated institutions. The Board concurs in this, and deviations from these stipulations will be considered unacceptable training.
- C. Since the RRC does not act upon the adequacy of postgraduate surgical education outside the United States, program directors must request the Board's approval, in advance, if they wish periods of training abroad to be creditable toward the Board's requirements. The Board will rule on individual requests.

**Credit for Military Service**

Credit will not be granted toward the minimum requirements of the Board for service in the armed forces, the Public Health Service, the National Institutes of Health, or other governmental agencies unless the service was as a duly appointed resident in an accredited program in surgery.

**Credit for Foreign Graduate Education**

Acceptance for examination and certification by the American Board of Surgery is based upon satisfactory completion of the stated requirements in accredited residency programs in surgery in the United States. Regardless of an individual's professional attainments here or abroad, no credit will be granted directly to an applicant for surgical education in a foreign country. The Board will consider granting partial credit only upon the request of the program director of an accredited program who has observed the applicant as a junior resident for 9 to 12 months and wishes to advance the applicant to a higher level in that program. The credit granted will not be valid until the applicant has successfully completed that program. If the applicant moves to another program, the credit is not transferable and must again be requested by the new program director.

Applicants from accredited Canadian programs must have completed all of the requirements in the Canadian program or in combination with an accredited US program. No credit for postgraduate surgical education outside the United States and Canada will be granted to those applicants seeking certification who completed a Canadian program. Applicants from Canadian programs must complete the Board's stipulated requirements.

**Requirements Governing Admissibility to Examinations for Certification in Surgery**

1. An applicant is admissible to the examinations only when all of the preliminary and graduate educational requirements of the Board currently in force at the time of receipt of the formal application have been satisfactorily fulfilled; the operative experience has been reviewed and deemed acceptable; the general credentials are in order; the program director has certified to the Board in writing that the applicant has attained the required clinical skills; and the formal application has been reviewed and approved. The applicant then must successfully complete the Qualifying Examination before becoming a "candidate for certification" and admissible to the Certifying Examination.
2. Applicants will be offered five opportunities to take the Qualifying Examination within the 5-year period following approval of their formal application, at centers designated by the Board in accord with their last recorded address. Applicants who do not submit

their application to the Board within 3 years of completing a program accredited by the ACGME or who do not take the Qualifying Examination within 2 years following approval of the application will no longer have any status with the Board and will not be reconsidered for admission to examination.

If Applicants are not successful in completing the Qualifying Examination within the stated admissibility period, the satisfactory completion of an additional year of remedial education in general surgery will be required in order to be reconsidered for admission to examination under the same conditions as listed above. This must be in a general surgery program accredited by the ACGME, which has agreed to structure the remedial year according to the Board's guidelines. The Board's approval of the proposed remedial experience must be secured in advance.

3. The Certifying Examination will be offered to those who have passed the Qualifying Examination, and have thus become "candidates for certification," at the earliest time consistent with the Board's geographical examination schedule.

Candidates will be offered three, and only three, opportunities to appear for examination during the 5 academic years after completion of the Qualifying Examination. The admissibility expiration date shall be established as June 30 of the fifth calendar year after passing the Qualifying Examination. An opportunity offered that is refused or not taken will be counted as one of the three available.

After three opportunities (ie, failure at Certifying Examinations and/or opportunities refused, including failure to appear for a scheduled examination), a candidate will no longer be admissible to examination, regardless of the original expiration date for admissibility. Satisfactory completion of an additional year of remedial education in general surgery in an accredited program that has agreed to structure the remedial year according to the Board's guidelines, with a favorable endorsement to the Board from the program director, will be required in order to be considered for admission to examination. This year must be approved in advance by the Board.

If the Board approves the candidate's application for readmission to the Certifying Examination upon completion of the specified additional year of residency in general surgery, the candidate will then be offered three further opportunities within the ensuing 5 years. If not successful within that time, the candidate cannot again be considered until completion of a minimum of 3 years of residency in general surgery, including a chief year, in an accredited program and with favorable endorsement to the Board by the program director. The candidate must then reapply as a "new applicant." This necessitates submission of a reapplication for admission to examination and all supporting documents, payment of the established fees, and successful completion again of the Qualifying Examination before advancing to the status of "candidate for certification."

4. Those who, 10 years after approval of their original application or reapplication, have not become certified and from whom there has been no written communication, will no longer be considered active applicants. If they wish to reapply later, they will be considered "new applicants" and must fulfill the requirements then in place.
5. The Board, on the basis of its judgment, may deny or grant an "applicant" or "candidate for certification" the privilege of examination whenever the facts in the case are deemed by the Board to so warrant.

The Board does not use or sanction the terms "Board eligible" or "Board qualified." The standing of an individual with the Board varies according to the current status of credentials and will be so reported.

## Special Certification

The Board has been authorized by the American Board of Medical Specialties to award certification of special or added qualifications in certain disciplines related to the overall specialty of surgery to those diplomates of this Board who meet the defined requirements. These disciplines include general vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care.

The Board considers all of the above disciplines to be an integral part of the specialty of surgery and expects that all surgeons certified in surgery by this Board will be qualified to practice in these areas if they so desire and demonstrate the capability, even though they may not have obtained additional certification. The certificates of special or added qualifications are designed to recognize those diplomates who have acquired, through advanced education, experience, and other activities, qualifications in these disciplines beyond those expected of the well-trained general surgeon.

Those seeking the American Board of Surgery's certification of special or added qualifications must have a currently valid certificate in surgery issued by the Board; must have completed the required additional education in the discipline beyond that required for general certification; must have operative experience and/or patient care data acceptable to the Board; and must show evidence of dedication to the discipline by the means specified by the Board and receive favorable peer review by recognized diplomates in the particular discipline. Finally, successful completion of the prescribed examinations is required.

Those who are interested in obtaining information regarding certification in general vascular surgery, pediatric surgery, surgery of the hand, or surgical critical care may obtain it from the Board upon request.

## Examinations Offered by the Board

The Board offers examinations leading to certification in surgery, general vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care, as well as in-training examinations in general surgery and in pediatric surgery.

The examinations for certification are offered to individuals, but the in-training examinations are offered to program directors for their use as an educational assessment of the individual resident's grasp of surgical fundamentals.

The Board notifies candidates for general and special certification of their performance on examinations. The Board also reports examinee performance to the director of the program in which the candidate completed the final year of residency. All reports pertaining to in-training examinations are provided only to program directors.

All examinations are developed by directors of the American Board of Surgery with contributions by invited examination consultants.

### I. Examinations for Certification in Surgery

#### A. Qualifying Examination

This examination is written and is offered once a year in the fall. It is given simultaneously in a number of locations in the United States.

Applicants whose applications have been approved by the Board are sent annually, throughout their period of admissibility, an announcement of the examination. With the announcement is a reply card that must be returned to the Board with other specified material if the applicant wishes to be scheduled for this examination. Shortly before the date of examination, an admission card is sent to the applicant indicating the specific location of the examination center and reporting times, with a pamphlet describing the examination and the types of questions to be expected.

The 1-day Qualifying Examination consists of multiple-choice questions designed to evaluate knowledge of general surgical principles and the basic sciences applicable to surgery.

Successful completion of the Qualifying Examination is a requirement for all to attain the status of "candidate for certification" and admission to the Certifying Examination.

Those unsuccessful on the Qualifying Examination may review the examination at the Board office if such a request is made within 90 days after examination results are mailed. The review requires an appointment and payment of a fee.

#### B. Certifying Examination

Examinations are held six times a year within the continental United States. Candidates for certification will receive an announcement of the examination to which they may be assigned, based on their geographic location, approximately 2 months prior to the examination session, with a reply card that must be returned at once if a candidate wishes to be included in that examination. Failure to return or late return of a card will result in that examination's being counted as one of the three opportunities to be offered. If the Board cannot accommodate a candidate at that particular examination, it will not be counted as an opportunity. A candidate assigned to an examination will be sent an admission card indicating the specific time and place to report for examination.

The examinations are conducted by members of the American Board of Surgery and selected associate examiners who are diplomates of the Board and usually from the local geographic area.

The examinations consist of three oral sessions conducted by teams of two examiners each, directed toward determining the candidate's understanding of clinical entities, level of surgical judgment, problem-solving ability, and sensitivity to moral and ethical issues. During all sessions, the ability to apply knowledge of anatomy, physiology, pathology, biochemistry, and bacteriology to clinical problems is also evaluated.

### II. Examinations for Certification of Special or Added Qualifications

The Board offers examinations for certification of special or added qualifications in general vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care. These examinations are described in separate pamphlets pertaining to the respective disciplines, which may be obtained from the Board office upon request.

### III. In-Training Examinations

The Board offers annually to directors of accredited residency programs in surgery and in pediatric surgery written In-Training Examinations that are designed to measure the general level of knowledge attained by residents regarding the fundamentals of the basic sciences and management of clinical problems related to surgery and to pediatric surgery. The In-Training Examination in surgery is constructed to evaluate the knowledge of the resident who has completed 2 years of graduate education in surgery but, at the program director's discretion, may be administered to anyone. It is also designed to meet the first milestone required by the *Essentials* for residencies in general surgery. Directors of accredited programs in pediatric surgery should find the pediatric surgery In-Training Examination useful in the evaluation of all residents in their programs.

The Board will normally furnish pertinent information to the directors of all accredited programs in surgery and in pediatric surgery several months in advance of each year's examination and ascertain the number of test booklets desired. The examinations, administered by the participating program directors, take place each winter.

Program directors should take note of the fact that the Board does not contact each integrated or affiliated institution in which residents are located, but depends upon the director of the program

to order an adequate number of test booklets for all residents in the total program, which includes not only the parent institution but also all those included under the program designation in the *Graduate Medical Education Directory*.

It is important to note that the In-Training Examinations are not offered to individuals, but only to program directors.

The In-Training Examinations are not required by the Board as part of the certification process.

The In-Training Examinations are prepared by the Board as an evaluation instrument for program directors, to be used as an assessment of residents' progress and not as a pool of questions for study or other purposes. Duplication and improper use of the examination material defeats the purpose of the examinations and will not be tolerated by the Board. The examinations are protected under the copyright laws.

### Application for Examination for Certification in Surgery

In the early spring, the Board will mail a booklet of information and a preliminary evaluation form to all residents who, according to the Board's records, will be expected to complete their residency that summer in surgery programs accredited by the ACGME. This form must be completed precisely and be received in the Board office no later than May 1. Applicants should not submit documents, testimonials, letters of recommendation, case reports, or other information unless requested to do so by the Board.

If, after review of the information submitted on the preliminary evaluation form, it is determined by the Board that applicants have met, or will meet, the educational requirements for admission to examination in the past or current year, a formal application for admission to examination will be sent to the applicant.

The application for admission to examination must be completed and returned, to be received in the Board office by no later than July 15. An application is not considered to be complete unless the form is accompanied by all required documents, including a copy of the applicant's current registration of a valid and unrestricted state medical license, an identification form with a photograph attached, a completed American Board of Surgery operative experience list or a copy of the resident's record, and a check for \$200.

If the completed application is received between July 15 and August 15, a late fee will be charged. No applications will be accepted after August 15.

Applicants who complete the educational requirements after September 30 will not be considered for admission to the Qualifying Examination in that year, but must wait until the following year.

The acceptability of an applicant does not depend solely upon the completion of an approved program of education, but also upon information available to the Board regarding professional maturity, surgical judgment, technical capabilities, and ethical standing.

Applicants who have submitted an application for examination form will be notified regarding admissibility to examination.

### Fees

Registration (prior to July 15) (payable with application form and nonrefundable)	US \$200
Registration (late—July 15 to August 15) (payable with application form and nonrefundable)	US \$450
Qualifying Examination (payable with reply card)	US \$400
Certifying Examination (payable with reply card)	US \$600

Fees for reexamination are the same as shown above for each examination.

Each fee for examination or reexamination includes a US \$200 processing charge that is not refunded if an individual withdraws after being scheduled for an examination.

To withdraw, one must notify the Board office at least 15 business days before a scheduled examination. Failure to appear for examination, or withdrawal without giving at least 15 business days' notice, will result in forfeiture of the entire fee for examination.

Fees are subject to change as directed by the Board.

The Board is a nonprofit organization. The directors of the Board, except those on the executive staff, serve without remuneration.

### Issuance of Certificates

A candidate who has met all requirements and has successfully completed the examinations of the American Board of Surgery in one or another of the areas of certification will then be issued a certificate by this Board, signed by its officers, attesting to qualifications in that area.

The Board issues certificates in surgery, general vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care. Those certified in surgery prior to December 31, 1975, were issued a certificate with no indication of time-limited validity. All certificates issued on or after January 1, 1976, bear a limiting date of 10 years, after which they are no longer valid.

Those whose certificates have expired and who have not achieved recertification will no longer be listed in the directory as diplomates in the discipline concerned.

### Recertification

The American Board of Surgery offers recertification in surgery to its diplomates and in all the disciplines in which it offers certification of special or added qualifications. The Board considers recertification to be voluntary in the same connotation as is the original certification.

The purpose of recertification is to demonstrate to the profession and the public, through periodic evaluations, that the surgical specialist has maintained continuing qualifications on a currently acceptable level in the diplomate's chosen area of practice. The American Board of Surgery believes that such periodic evaluation of its diplomates is in their own interest as well as in the public interest.

A Diplomate can initiate the recertification process when certification has been held at least 7 years. Pamphlets outlining requirements for recertification in the various disciplines may be obtained from the Board upon request. To facilitate receiving the Board's mailings pertaining to the recertification process, it is important for all diplomates to notify the Board promptly whenever their addresses change.

### Recertification in Special Disciplines

Recertification in special disciplines is offered to diplomates holding certificates in general vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care.

Details concerning requirements for recertification in the disciplines mentioned above are similar to those for recertification in surgery, and pertinent pamphlets may be obtained from the Board upon request.

### Inquiry as to Status

The Board considers an individual's record not to be in the public domain. When a written inquiry is received by the Board regarding an individual's status, a general but factual statement is provided that indicates the person's location within the examination process.

## Special Situations

### Irregularities

The furnishing of false information to the Board or examination irregularities may result in the rejection of an application, the barring of an applicant from examination, the denial or revocation of a certificate, or other appropriate sanctions, as set forth more fully in the application for admission to examination and the instructions to examinees.

### Substance Abuse

Applicants with a history of substance abuse will not be admitted to any examination unless they present evidence satisfactory to the Board that they have successfully completed the program of treatment prescribed for their condition. Further, the Board must be satisfied that they are currently free of substance abuse.

### Disabilities

The American Board of Surgery complies with the Americans with Disabilities Act by making a reasonable effort to provide Board applicants who have documented disabilities with modifications in its examination process that are appropriate for such disabilities but that do not alter the measurement of the skills or knowledge that the examination process is intended to test. Any disability that an applicant believes requires such a modification in the Board's examination must be identified and documented by the applicant within 60 days after the applicant is notified of admissibility to examination or within 60 days after the applicant learns of such disability, whichever is later.

### Reconsideration and Appeals

The Board has adopted a policy with regard to reconsideration and appeals of decisions adverse to applicants regarding their individual credentials and admissibility to the examinations and questions regarding the form, administration, and results of examinations. A copy of that policy is available from the Board office to anyone considering a request for reconsideration or an appeal. A request for reconsideration, which is the first step, must be made in writing to the Board office within 90 days of receipt of notice from the Board of the action in question.

### Revocation of Certificate

Any certificate issued by the American Board of Surgery, shall be subject to revocation at any time that the directors shall determine, in their sole judgment, that a candidate who has received the certificate falsified any part of the application or the required documentation, or was in some respect not properly qualified to receive it.

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Thoracic Surgery to ascertain whether the information below is current.)*

## General Requirements

Certification by the American Board of Thoracic Surgery may be achieved by fulfilling the following requirements:

1. Certification by the American Board of Surgery (for information, the applicant should see the current Booklet of Information available from the American Board of Surgery, 1617 John F Kennedy Blvd, Philadelphia, PA 19103);
2. Completion of a thoracic surgical residency, approved by the Residency Review Committee (RRC) for Thoracic Surgery, that provides adequate education and operative experience in cardiovascular and general thoracic surgery;
3. An ethical standing in the profession and a moral status in the community that are acceptable to the Board;
4. A satisfactory performance on the American Board of Thoracic Surgery examinations;
5. A currently registered full and unrestricted license to practice medicine granted by a state or other US jurisdiction. The license must be valid at the time of application for admission to examination. A temporary limited license such as an educational, institutional, or house staff permit is not acceptable to the Board.

## Residency Requirements

Candidates must have fulfilled all of the residency requirements of the Board in force at the time their applications are received.

Candidates for certification must complete a minimum of 24 months of residency training in thoracic and cardiovascular surgery in a program approved by the RRC for Thoracic Surgery. This must include 12 months of senior responsibility, which should be continuous. The director of the thoracic training program is required to approve the application form by signature, certifying that the candidate has satisfactorily completed the residency in thoracic surgery as described above.

Education and adequate operative experience in both general thoracic surgery and cardiovascular surgery are essential parts of any approved thoracic surgery residency program, irrespective of the area of thoracic surgery in which a candidate may choose to practice.

## Operative Case Criteria

### Effective for Candidates Applying in 1996

The operative experience requirement of the American Board of Thoracic Surgery has two parts. One is concerned with the intensity or volume of cases and the other with the distribution of cases (index cases).

#### 1. Surgical Volume (Intensity)

The Board's operative experience requirements include an annual average of 125 major operations performed by each resident for each year that the program is approved by the RRC for Thoracic Surgery. In a 2-year program, this requirement is met if a resident performs a total of 250 major cases over the course of his or her residency; in a 3-year program, the resident must perform 375 major cases.

This guideline on intensity of cases conforms with the Special Requirements in Thoracic Surgery as published by the Accreditation Council for Graduate Medical Education and the RRC for Thoracic Surgery.

The application of any candidate whose supervised operative experience fails to meet the requirement of an annual average of 125 major operations with a minimal number of 100 in any one year will be referred to the Credentials Committee for review.

#### 2. Index Cases (Distribution)

The applications of candidates whose operative experience does not include the required number of index cases as listed below will be sent to the Credentials Committee for review. The number of index cases required to meet the minimal acceptable standards in the various areas are

Lungs, pleura, chest wall—50

    Pneumonectomy, lobectomy, segmentectomy—30

    Other—20

Esophagus, mediastinum, diaphragm—15

    Esophageal operations—8

    Other—7

Congenital heart—20

Acquired valvular heart—20

Myocardial revascularization—35

Pacemaker implantations/closed EP—10

Bronchoscopy and esophagoscopy—25

Endoscopic procedures may be counted for credit whether they are performed as independent procedures or immediately preceding a thoracic operation.

Major vascular operations outside the thorax should be listed.

The Board recognizes that supervised operative experience in a well-organized teaching setting that is approved by the RRC for Thoracic Surgery protects the patient, who, in most instances, is the personal and identifiable responsibility of a faculty surgeon. This supervised experience optimally prepares the candidate to begin the

independent practice of cardiothoracic surgery after the completion of residency.

The Credentials Committee has been authorized by the Board to reject a candidate if his or her operative experience during the thoracic surgery residency is considered to be inadequate. The candidate, the program director, and the RRC for Thoracic Surgery will be notified if such action is taken.

Even though emphasis on one or another facet of thoracic surgery (pulmonary, cardiovascular, esophageal, thoracic trauma, etc) may have characterized a candidate's residency experience, the candidate is nevertheless held accountable for knowledge concerning all phases of the field, including extracorporeal perfusion (physiological concepts, techniques, and complications), cardiac devices, management of dysrhythmias, and thoracic oncology. In addition, a candidate should have had responsibility for the care of pediatric general thoracic surgical patients and be competent in video-assisted thoroscopic surgery. The candidate should also have an in-depth knowledge of the management of acutely ill patients in the intensive care unit. This requires an understanding of cardiorespiratory physiology, respirators, blood gases, metabolic alterations, cardiac output, hyperalimentation, and many other areas. By virtue of his/her residency in thoracic surgery, the candidate is expected to be fully qualified in the surgical care of critically ill patients.

## Operative Experience Credit

Credit will be allowed for supervised operative experience in a well-organized teaching setting only when the following criteria are met:

1. The resident participated in the diagnosis, preoperative planning, surgical indications, and selection of the appropriate operation;
2. The resident performed under appropriate supervision in a well-organized teaching setting approved by the RRC for Thoracic Surgery those technical manipulations that constituted the essential parts of the procedure itself;
3. The resident was substantially involved in postoperative care.

Supervision and active participation by the thoracic surgery faculty are required in preoperative, intraoperative, and postoperative care.

The Board also emphasizes that first-assisting at operations is an important part of resident experience, particularly in complex or relatively uncommon cases, such as certain kinds of congenital heart operations to correct congenital heart defects or disorders of the esophagus.

## Applications

Before applying for examination, prospective candidates should consider whether they are able to meet the minimum requirements of the Board, which include certification by the American Board of Surgery. They should then submit a letter to the office of the Secretary of the Board, briefly outlining their thoracic surgery residency experience and requesting an application.

An application will be sent to candidates who have completed residency programs that have been approved by the RRC for Thoracic Surgery. Each applicant should consult with his/her program director regarding the correct way to complete the operative case list forms.

The American Board of Thoracic Surgery takes particular note of the problems facing those with a disability and stands ready to alter its examination procedures in such a way that individuals who are competent to practice thoracic surgery have the opportunity to take the Board's examination under circumstances that accommodate the individual's disability. Individuals requiring special consideration because of a disability should notify the Board at least 60 days before the August 1 deadline for submitting an application.

Candidates are notified of their eligibility for examination when their applications have been approved.

## Examinations

It is the policy of the American Board of Thoracic Surgery to consider a candidate for examination only after he/she has completed a thoracic surgery residency program approved by the RRC for Thoracic Surgery.

Separate written and oral examinations are held annually at times and places determined by the Board. Information regarding the dates and places of the examinations is published in the Examination and Licensure column of the *Journal of the American Medical Association*, the *Journal of Thoracic and Cardiovascular Surgery*, and the *Annals of Thoracic Surgery*.

### Part I—Written Examination

The examination consists of a written examination designed primarily to assess cognitive skills.

### Part II—Oral Examination

Successful completion of the Part I (written) examination is a requirement for admission to the Part II (oral) examination. The oral examination is designed to test the candidate's knowledge, judgment, and ability to correlate information in the management of clinical problems in general thoracic and cardiovascular surgery.

### Examination Sequence

Candidates should apply for the examination within 5 years of the satisfactory completion of their thoracic surgery residency. Any candidates applying after 5 years or more will be considered individually, and recommendations for additional training will be made before they will be eligible to apply for examination.

After a candidate is declared eligible for the written examination (Part I), he or she must pass Part I within 4 years. The candidate who successfully completes Part I of the examination then must pass Part II within the succeeding 4 years.

Candidates who fail an examination (Part I or Part II) are eligible to repeat the examination the following year.

Candidates who fail either Part I or Part II of the examination three times, or do not pass either part of the examination within the allotted time period of 4 years, will be required to complete an additional thoracic surgical educational program that must be approved in advance by the Board before they will be permitted to re-take the examination. Candidates who complete the required additional training must file an addendum to their application, have their eligibility for examination reviewed by the Credentials Committee, and pay a new registration fee. They will be given two more opportunities to take the examination (Part I or Part II) within the succeeding 2 years.

Candidates who fail either Part I or Part II a fifth time will be required to complete another approved thoracic surgery residency before they will be eligible to reapply for examination by the Board.

### Fees

Registration fee (not refundable)	\$370
Part I examination fee	\$875
Part I reexamination fee	\$875
Part II examination fee	\$925
Part II reexamination fee	\$925

Candidates who do not appear for their scheduled examination (Part I or Part II) or who cancel less than 6 weeks prior to either examination may forfeit their examination fee.

The Board is a nonprofit corporation, and the fees from candidates are used solely to defray actual expenses incurred in conducting examinations and carrying out the business of the Board. The directors of the Board serve without remuneration.

## Appeals

Individuals who receive an unfavorable ruling from a committee of the Board may appeal such determination by mailing a notice of appeal to the office of the American Board of Thoracic Surgery within 30 days of the date such ruling was mailed. A copy of the appeals procedure will be mailed to the candidate.

The only appeal permitted if an applicant fails the written examination is a request for a hand rescoring to verify the accuracy of the score as reported. This request must be made within 30 days of the time the examination results are received by the candidate.

The only appeal with respect to the oral examination is the opportunity to request immediate reexamination following the completion of the oral examination. A candidate who believes that any of his/her examiners have been unfair or biased during a portion of the oral examination may request reexamination by another examiner. The grade on reexamination will be the final grade of the candidate for that portion of the examination.

## Chemical Dependency

Qualified applicants who have a history of chemical dependency that has been reported to the Board and who submit documentation suitable to the Board that their dependency has been under control for a period of at least 2 years will be admitted to the examination process.

For candidates who are already in the examination process and develop a chemical dependency as reported to the Board, the process will be suspended until the candidate can provide documentation suitable to the Board that the condition has been under control for a period of 2 years. At that time, the candidate will be readmitted to the examination process. The requirement to be accepted for examination within 5 years of completion of an approved thoracic surgery residency will not be waived.

## Certification

After a candidate has met the requirements for eligibility and passed the examination, a certificate attesting to the candidate's qualifications in thoracic surgery will be issued by the Board. The certificate is valid for 10 years.

## Recertification

Applicants who are certified in thoracic surgery are issued certificates that are valid for 10 years from the date of certification, after which the certificates will no longer be valid. Certificates can be renewed before expiration by fulfilling the requirements for recertification specified by the American Board of Thoracic Surgery at that time. A recertification booklet is available upon request.

## Denial or Revocation of Certificate

No certificate shall be issued or a certificate may be revoked by the Board if it determines that

- the candidate for certification or Diplomate did not possess the required qualifications and requirements for examination, whether such deficiency was known to the Board or any committee thereof before examination or at the time of issuance of the certificate, as the case may be;
- the candidate for certification or Diplomate withheld information in his/her application or made a material misstatement or any other misrepresentation to the Board or any Committee thereof, whether intentional or unintentional;
- the candidate for certification or Diplomate was convicted by a court of competent jurisdiction of any felony or misdemeanor involving moral turpitude and, in the opinion of the Board, having a material relationship to the practice of medicine;

- d. the candidate for certification or Diplomate had his or her license to practice medicine revoked or was disciplined or censured by any court or other body having proper jurisdiction and authority because of any act or omission arising from the practice of medicine; or
- e. the candidate for certification or Diplomate had a history of chemical dependency or developed such during the certification process and failed to report same to the Board.

 Bingham Farms, MI 48025  
 810 646-9720

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Urology to ascertain whether the information they have is current.)*

### Purpose

The American Board of Urology, Inc, hereinafter sometimes referred to as "the Board," was organized to encourage study, improve standards, and promote competency in the practice of urology. Its objective is to identify for the public's knowledge those physicians who have satisfied the Board's criteria for certification and recertification in the specialty of urology. Certification by the Board does not guarantee competence in practice, but does indicate that the physician has completed certain basic training requirements and has demonstrated at the time of examination a fund of knowledge and competence in the care of those patients whose cases were reviewed by the Board, as described elsewhere in this publication.

### Functions of the Board

The Board arranges and conducts examinations testing the qualifications of voluntary candidates and grants and issues certificates to accepted candidates duly licensed to practice medicine. The Board holds the power to revoke such a certificate.

The Board endeavors to serve the public, hospitals, medical schools, medical societies, and practitioners of medicine by preparing lists of urologists whom it has certified. Lists of Diplomates of this Board are published in the American Medical Association's *Directory of Physicians in the United States* (signified in biographical data by symbol "95") and the *Official American Board of Medical Specialties Directory of Board Certified Medical Specialists*.

The Board is not responsible for opinions expressed concerning an individual's credentials for the examinations or status in the accreditation process unless they are expressed in writing and signed by the President or Executive Secretary of the Board.

### Associations of the Board

The nominating societies of this Board and sponsors of its activities are the American Urological Association, the American Association of Genito-Urinary Surgeons, the American Association of Clinical Urologists, the Society of University Urologists, the American College of Surgeons, and the Urology Section of the American Academy of Pediatrics.

The American Board of Urology and the various other specialty boards are members of the American Board of Medical Specialties (ABMS), which includes as associate members the Association of American Medical Colleges, the American Hospital Association, the Federation of State Medical Boards of the USA, the National Board of Medical Examiners, and the Council of Medical Specialty Societies.

The ABMS, in conjunction with the Residency Review Committee (RRC) for Urology and the Accreditation Council for Graduate Medical Education (ACGME), has established academic standards for specialization, which the American Board of Urology, Inc, has adopted. Such standards are found in the *Graduate Medical Education Directory* published by the American Medical Association (AMA).

Training programs in urology are reviewed by the RRC for Urology, which consists of representatives from the American Board of Urology, Inc, the Council on Medical Education of the AMA, and the American College of Surgeons. Upon recommendation by the RRC, the ACGME determines the accreditation status of each program.

A list of approved residencies for training in urology may be found in the AMA's *Graduate Medical Education Directory*.

### Limitations of Functions of the Board

Application for certification is entirely voluntary. Only one certificate for each qualified individual is issued by the Board.

The Board makes no attempt to control the practice of urology by license or legal regulation, and in no way interferes with or limits the professional activities of any duly licensed physician.

### Requirements

An applicant may initiate application for certification by the American Board of Urology during the final year of his or her residency training or at some point thereafter. For details of the certification process see "Certification Process." Every applicant, however, must meet certain basic requirements as follows:

#### A. Prerequisites

1. Except as noted below, the applicant must be a graduate of a medical school approved by the Liaison Committee on Medical Education (LCME) or a school of osteopathy approved by the Bureau of Professional Education of the American Osteopathic Association (AOA) and have completed a urology residency program accredited by the ACGME (see *Graduate Medical Education Directory*, Section II, "Essentials of Accredited Residencies in Graduate Medical Education") or the Royal College of Physicians and Surgeons of Canada (RCPSC).
2. A minimum of 5 years of postgraduate education is required, of which 12 months must be spent in general surgery and 36 months must be spent in clinical urology. Of the remaining 12 months, a minimum of 6 months must be spent in general surgery, urology, or other clinical disciplines relevant to urology. All of the above training must be in ACGME-approved programs. Irrespective of the training format provided, the final 12 months of training must be spent as a chief resident in urology. The chief residency should be part of a planned program curriculum, as outlined in a preapproved rotation provided to the Board. A minimum of 12 months must be served as chief resident in urology

with appropriate clinical responsibility under supervision in institutions that are part of the ACGME-approved program.

Variations shall not be granted for individuals to take pre-urology training out of sequence after the completion of their urology residency. Pre-urology credit will be given only to individuals who have trained in ACGME-approved or RCPSC-approved training programs. Lesser degrees of training shall not receive such approval.

Any resident who intends to transfer to another urology residency program during the urologic portion of the training must obtain the approval of the Board prior to the change. The resident must petition the Board in advance for said approval. The Board also requires the written acknowledgment and approval of both program directors.

In regard to leaves of absence for parental leave, illness, injury, disability, alcohol or substance abuse, and vacation during residency training in urology, no more than 10% of the time allocated to the clinical training portion of the residency program can be omitted.

To be admissible to the certification process of the Board, the resident must have completed in a satisfactory manner the training requirements of his/her specific program in effect at the time of acceptance in the program, as established by the RRC for Urology or the Accreditation Committee of the RCPSC.

3. To meet the requirements for admissibility to the certification process of the Board, a Canadian-trained urologist must have graduated from a US or Canadian medical school approved by the LCME and have completed the previously described pre-urology and urology requirements with the final year as chief resident, in programs approved by the ACGME or the Accreditation Committee of the RCPSC. Upon successful completion of this training, the candidate may sit for the Qualifying (Part I) Examination of the American Board of Urology.

To be admissible to the Certifying (Part II) Examination, the Canadian-trained candidate must be certified by the RCPSC.

4. Foreign medical graduates from schools outside the United States providing an equivalent medical background who have completed an ACGME-approved urology residency and the prerequisite ACGME-approved pre-urology training in the United States may also qualify for examination by the American Board of Urology. All such applicants must have a valid ECFMG certificate from the Educational Commission for Foreign Medical Graduates.
5. In addition to the training requirements noted above, applicants seeking certification by the American Board of Urology must also have a valid medical license that is not subject to any restrictions, conditions, or limitations. The applicant must inform the American Board of Urology of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the American Board of Urology will determine whether the applicant satisfies the licensure requirement of the American Board of Urology.
6. The applicant must demonstrate competence in clinical practice. The Board will obtain evidence of this through a review of logs of cases performed by the applicant and by direct communication with the applicant's peers.
7. Applicants who have a history of chemical dependency will not be admitted to the Qualifying (Part I) or Certifying (Part II) Examination unless they present evidence to the Board that they have satisfactorily completed the program of treatment prescribed for their condition. In addition, any such applicants for the Certifying (Part II) Examination may have a site visit of their practices by a representative of the Board.

8. Deviations from the requirements described above may be permitted at the discretion of the Board when the Board is satisfied that the deviation provides equivalent or superior education or training. Any such deviations must be approved by the Board before the applicant enters the urological portion of training. A \$300 administrative fee is assessed for Board review of non-ACGME-approved training. Notarized documentation of all such training must accompany the request. The Board office deadlines for receipt of agenda materials for the next Credentials Committee meeting are January 1 and June 1 of the current year.

## B. Application

1. A special application form provided by the Executive Secretary shall be completed by the applicant and returned to the Board office by overnight courier for guaranteed receipt. Application must be in the Board office by November 1 in order to permit the applicant to be admitted for the Qualifying (Part I) Examination the following May or June. Applications and documentation material postmarked before but not received in the Board office by November 1 will incur a late fee of \$300. No applications will be accepted after December 1. No application will be considered by the credentials committee or the Board unless it is submitted by the deadline set forth and is complete and includes all supporting documentation described in this part. The Executive Secretary will determine if an application is complete.
2. The application must be accompanied by a notarized copy of a graduation certificate from a medical school approved by the LCME or from a school of osteopathy approved by the Bureau of Professional Education of the AOA and by specific verification (such as a notarized certificate or an original letter from that program's director) of successful completion of the pre-urology post-graduate training requirement in a program approved by the ACGME. Pre-urology training must be documented separately from urology training.

Graduates of medical schools not approved by the LCME, the Bureau of Professional Education of the AOA, or the Accreditation Committee of the RCPSC must furnish a notarized copy of a valid ECFMG certificate (or Fifth Pathway certificate).

3. A portion of the examination fee shall be paid at the time the application is submitted, as specified under "Fees."
4. For each applicant, the director of the program where the applicant finished residency must complete an evaluation form supplied by the Board. This evaluation must be received in the Board office by March 1 preceding the Qualifying (Part I) Examination given the following May or June. An application from a senior resident must also be accompanied by a letter from the program director confirming that the applicant is expected to have completed successfully 1 year of training in the capacity of senior or chief resident during the calendar year in which the Qualifying (Part I) Examination is to be taken. The applicant is responsible for ensuring that these supporting documents are received in the Board office at the indicated time.
5. Applicants for certification must be approved by the Credentials Committee and the Board. Additional information may be requested by the Executive Secretary. No duty or obligation to assist any applicant in completing the application is implied.
6. As a condition of application to the certification process, applicants and candidates must sign a waiver allowing the Board to release examination results achieved in the Qualifying and Certifying Examinations to their residency program director and to the RRC for Urology.
7. If you require special aids or assistance due to a physical or mental disability during the Board examinations, please indicate this on the application. You will be expected to submit appropriate

documentation substantiating your disability. The Board reserves the right to verify your disability.

### C. Fees

1. The current examination fee may be changed without notice. This fee reimburses the Board for expenses incurred in preparing and processing the applications and examinations of the candidate. No fees are refundable.  
Unused fees will be credited for the next available examination only, and if they are not utilized at the first available opportunity, credit will be disallowed.
2. Payment of \$825 must accompany the initial application for the Qualifying (Part I) Examination, except in the case of senior residents, who shall pay \$575 as the fee for the initial application. Only senior residents may delay the fee payment until January 5. An additional fee of \$825 must accompany application for the Certifying (Part II) Examination. An applicant or candidate secures no vested right to certification as a result of paying an examination fee.
3. Cancellation fees are as follows:  
\$500 failure to appear  
\$300 unexcused absence  
\$200 excused absence (in cases of personal or family illness/death).
4. Only one excused absence is permitted, at the discretion of the Board, and extends the period of admissibility for 1 year. The excused absence fee of \$200 will be assessed. Following one excused absence, any subsequent absences are classified as unexcused. There will be no further extensions of admissibility, and an unexcused absence fee and reinstatement fee, if any, will be assessed. Applications will be considered inactive if two successive examination appointments are canceled by the applicant. A reinstatement fee is assessed after two consecutive absences. If the candidate does not already exceed the 5-year time limit, he or she may regain active status by paying the reinstatement fee of \$600 plus an additional fee for an unexcused absence or for a nonappearance.
5. A \$300 late fee will be assessed for any application and/or documentation and/or fees not received in the Board office by the prescribed deadlines. Overnight courier is recommended. A \$100 fee will be assessed for all returned checks.
6. The fee for the Preliminary Examination is \$400.
7. The application fee for recertification is \$900.
8. The fee for a site visit by a Board representative is \$2,000 plus expenses.

### The Certification Process

Applicants approved by the Board to enter the certification process must complete both a written Qualifying (Part I) Examination and, after passing this examination, a subsequent Certifying (Part II) Examination. Assessment of clinical competence through review of practice logs and peer review will also be carried out prior to admission to the Certifying (Part II) Examination. Applicants who have not applied to take the Qualifying (Part I) Examination within 5 years of the completion of their urological residency will be required to pass a written Preliminary Examination before being permitted to enter the certification process. The Preliminary Examination is given each November during the annual In-Service Examination. Contact the Board office before August 15 for information.

Applicants who have not completed certification within 5 years of the first scheduled Qualifying (Part I) Examination to which they have applied will be required to pass a written Preliminary Examination before being allowed to reenter the certification process at the Part I level (see paragraph above).

Certification must be achieved within 5 years of the first scheduled Qualifying (Part I) Examination after entering the certification process.

### A. Qualifying (Part I) Examination

The Qualifying Examination is a written examination given in May or June of each year simultaneously at several different locations. An applicant failing the Qualifying (Part I) Examination must repeat it the next year unless the absence is excused by the Board office (see "Fees"). Failure to retake the examination at the first available opportunity will result in administrative withdrawal of the application.

The applicant must pass the Qualifying (Part I) Examination in sufficient time to allow for completion of the certification process within the 5 years of active candidacy allotted. (See "The Certification Process," above.)

The Qualifying Examination is designed to assess knowledge of the entire field of urology and allied subjects.

This includes andrology (including infertility), calculous disease (including endourology and shock-wave lithotripsy), congenital anomalies, pediatric urology, female urology, infectious diseases, neurourology and urodynamics, obstructive diseases, psychological disorders, renovascular hypertension and renal transplantation, sexuality and impotence, adrenal diseases and endocrinology, trauma, and urologic oncology.

### B. Certifying (Part II) Examination

Candidates for the Certifying (Part II) Examination must have met all training requirements and have passed the Qualifying (Part I) Examination. The Certifying (Part II) Examination includes assessment of clinical competence through review of practice logs and peer review and three practical examinations (an oral examination and written examinations in urologic imaging and pathology). In addition, the candidate must have engaged in a minimum of 18 months of urological practice with primary patient responsibility in a single community, an academic institution, or in the armed forces. A yearly extension of the period of admissibility may be granted for fellowships relevant to urology of 1 year or longer. Credit is subject to Board approval; fellowship training must be documented. Six months credit toward the 18-month practice period requirement may be awarded an individual for fellowship training approved by the Board. Persons who spend 1 or more years in postresidency fellowship training should notify the Board in writing.

Application for admission to the Certifying (Part II) Examination is made by completing the Supplemental Application Form available from the Board office. This application must be returned by overnight courier for guaranteed receipt and be received in the Board office by July 1 prior to the Certifying Examination of the following year. In addition, a minimum 1-year log of all major and minor cases performed as the primary surgeon must be prepared in accordance with the form provided by the American Board of Urology. This log must be verified by the candidate and notarized. The log materials must be received in the Board office by November 15 prior to the Certifying Examination the following year. Overnight courier is recommended.

Applicants will be assessed \$300 for logs received between November 15 and December 1. No surgical logs will be accepted after December 1.

The oral examination, urologic imaging examination, and pathology examination are all regarded as separate examinations.

In the event of failure of any one of the three, only the failed examination need be repeated.

Extensions of the period to complete certification are granted by the Board because of extenuating or special circumstances (eg, involvement in a fellowship of 1 or more years' duration, subject to

Board approval, and deferral for an inadequate surgical log). The candidate should request such extensions in writing, including the reason.

The candidate must successfully complete all three parts of the Certifying (Part II) Examination within 5 years of the first scheduled Qualifying (Part I) Examination after entering the certification process. To reenter the process, it is necessary to pass a written Preliminary Examination and reenter the certification process at the Qualifying (Part I) Examination level. Extensions are granted by the Board because of extenuating or special circumstances (eg, involvement in a fellowship of 1 or more years' duration, subject to Board approval, and deferral for an inadequate surgical log).

### C. Steps in the Certifying Examination

#### 1. Assessment of Clinical Competence

Urology is the specialty that deals with the medical and surgical disorders of the genitourinary tract, including the adrenal gland. Candidates must demonstrate knowledge, competence, and surgical experience in the broad domains of urology, such as infertility, impotence, calculous disease, endourology, extracorporeal shock-wave lithotripsy, neurourology, urodynamics, urologic imaging, uropathology, female urology, pediatric urology, infectious disease, obstructive disease, psychologic disorders, renovascular disease, transplantation, genitourinary sexuality, trauma, and oncology.

Candidates for the Certifying (Part II) Examination must be in the full-time practice of urology and must be licensed to practice medicine in the area of current practice activity. As evidence of competency, the candidate must submit a log of cases performed as primary surgeon during the most recent 12 to 18 months in the area of current practice, as described earlier in this section.

In the case of military or public health physicians subject to unexpected changes of assignment, the Board may accept cases from the previous assignment. Photostatic copies of patient records from the patient care facility and/or office record of any one or more of the above cases may be requested by the Board. The candidate shall be responsible for obtaining patient consent for the disclosure of patient records to the Board or for ensuring that the patient records disclosed to the Board do not contain any patient-identifying information. The candidate is expected to furnish such records within 1 month of the request.

Surgical log review is an important component of the certification process. While there is no minimum number of cases established for an acceptable log, a surgical experience well below the norm for the peer group may be a cause for the Board to delay the certification process until there is sufficient experience to adequately assess a candidate's practice pattern and management.

The Board will review the surgical logs of urologic subspecialists in the context of the expected subspecialty experience. The 5-year period of admissibility for completing certification will be extended one time by 1 year for candidates whose certification is delayed because of an inadequate surgical log.

To further ascertain and document the candidate's qualifications for certification, the American Board of Urology will solicit information and comments from appropriate individuals, such as fellow practitioners, or from organizations, such as medical societies and licensing agencies. The Board will be authorized by the candidate and will be held harmless to conduct investigations of professional ethics, reputation, and practice patterns. Under no circumstances will the source of peer review letters be revealed to any person other than members of the American Board of Urology.

Upon receipt of the practice logs and peer review information, the credentials of the candidate will be reviewed by the Credentials Committee of the Board. Evidence of ethical, moral, and professional behavior and an appropriate pattern of urologic practice, including experience with an adequate volume and variety of clinical material, will be sought. Areas of inadequacy may be a cause for de-

ferment or discontinuation of the certifying process until these areas are clarified or corrected. Actions of the Board to achieve clarification may include

- a. inquiry into practice irregularities by the Credentials Committee of the Board.
- b. request for certified copies of candidate's health care facility and/or office records for review.
- c. invitation to appear before the Board for a personal interview.
- d. a site visit to the candidate's community at the candidate's expense.
- e. other appropriate measures that may be deemed necessary to assess apparent deviations from standard urologic practice.

The candidate will not be permitted to continue the certification process until the Board has satisfied itself of the appropriateness of the candidate's practice pattern and professional behavior. The Board may elect to defer continuation of the certification process, pending investigation and resolution of any inadequacies or deviations. It may deny certification when serious practice deviations or unethical conduct are involved. These include, but are not limited to, cheating on or improper or disruptive conduct during any examination conducted by the Board, the solicitation or distribution of examination materials, and misrepresentation of an applicant's or candidate's status in the certification process.

Any candidate for certification or recertification who does not respond to all questions present on the application or who misrepresents the information requested shall be deferred from the process for 1 year.

#### 2. Oral, Pathology, and Urologic Imaging Examinations

These examinations are given annually in January or February at a single site. The pathology and urologic imaging examinations are written and are based on projected photographic slide material. The oral examination is an interactive process between examiner and candidate during which an assessment is made of ability to diagnose and manage urologic problems. Since the candidate has passed the Qualifying (Part I) Examination, the examiner presumes in the oral examination that the candidate has a satisfactory degree of cognitive knowledge of urology. Therefore, the oral examination will concentrate upon the following:

- a. Problem-Solving Ability. Evaluation is made of the candidate's ability to collect pertinent information systematically, integrate it, assess the problem, and propose an appropriate solution.
- b. Response to a Change in a Clinical Situation. The candidate's ability to manage changing clinical conditions is evaluated through the flexible interaction between the examiner and the candidate. Changed clinical conditions may be posed arbitrarily by the examiner in order to assess various responses by the candidate, or may be developed by the examiner from the outcome of management recommendations offered by the candidate during the interview.
- c. Professional Behavior in the Role of a Urologist. The candidate's attitude, interaction with the examiner, and expression of patient management concerns contribute to the assessment of professional behavior.

### Unforeseeable Events

Certain unforeseeable events such as a natural disaster, war, government regulations, strikes, civil disorders, curtailment of transportation, and the like may make it inadvisable, illegal, or impossible for the Board to administer an examination to a candidate at the scheduled date, time, and location. In any such circumstance, the Board is not responsible for any expense the candidate may have incurred to be present for the examination or may incur for any future or substitute examination.

### Final Action of the Board

Final action regarding each applicant is the sole prerogative of the Board and is based upon the applicant's training, professional rec-

ord, performance in clinical practice, and the results of the examinations given by the Board.

Regardless of the sequence by which the various steps of certification may have been accomplished, the process itself is not considered complete until the Board's final action. At any point in the process, the Board may delay or even deny certification upon consideration of information that appears to the Board to justify such action.

The activities described under "Requirements" and "The Certification Process" in this publication proceed from the certificate of incorporation and bylaws, which state the nature of the business, objects, and purposes proposed to be transacted and carried out by this corporation.

### Appeals Procedure

The Board has established an appeals process for candidates denied certification, or for diplomates with time-limited certificates denied recertification. An appeal must be initiated by a candidate or diplomate within 30 days after the mailing by the Board of the adverse decision. The candidate or diplomate must provide written notice requesting a hearing to appeal the Board's decision and cite the specific reasons given by the Board that are alleged to be erroneous. A copy of the appeals process may be obtained from the Board office upon written request by the affected party.

### Board-eligible Status

The American Board of Urology does not use or recognize the term "Board eligible" in reference to its applicants or candidates. A candidate is not certified (ie, does not become a diplomate) until all components of the certification process are successfully completed.

Active candidacy for Board certification shall begin when the candidate first makes application for the Qualifying Examination (which must occur within 5 years of completing the residency), and the candidate must have passed the Certifying Examination within 5 years of active candidacy. When the 5-year period of candidacy has expired, the individual is no longer a candidate for certification.

### Recertification

Certificates issued by the American Board of Urology on or after January 1, 1985, expire on the anniversary of the date of issue and are valid for 10 years only. A physician who fails to be recertified by the expiration date is no longer a diplomate of the Board. It is recommended, therefore, that diplomates possessing a time-limited certificate make plans to obtain recertification beginning up to 3 years before the expiration date of their current certificate.

The office of the American Board of Urology will notify diplomates holding a time-limited certificate 3 years prior to its expiration. At that time a handbook entitled "Information for Applicants for Recertification," which details the Recertification process, will be provided. This handbook is also available on request from the Board office.

Diplomates are responsible for keeping the Board office informed of address changes.

### Revocation of Certificate

Certificates issued by this Board are the property of the Board and are issued pursuant to the rules and regulations of the Board. Each certificate is issued to an individual physician who, by signature, agrees to revocation of the certificate in the event that

1. the issuance of such certificate or its receipt by the physician so certified shall have been contrary to, or in violation of, any provision of the Certificate of Incorporation, Bylaws, or rules and regulations of the Board in force at the time of issuance; or

2. the physician or party certified shall not have been eligible to receive such certificate, irrespective of whether or not the facts constituting ineligibility were known to, or could have been ascertained by, the Directors of the Board at the time of issuance of such certificate; or

3. the physician or party so certified shall have made a material misstatement of fact in application for such certificate or in any other statement or representation to the Board or its representatives; or

4. the physician so certified shall at any time have neglected to maintain the degree of competency in the practice of the specialty of urology as set up by the Board, and shall refuse to submit to reexamination by the Board; or

5. the physician so certified has been found by the Board to be guilty of unethical practices or immoral conduct or of conduct leading to revocation of license. These objective standards include conduct that violates state medical laws, rules, and regulations of local and state medical boards and relevant AMA guidelines, and conduct leading to revocation of license to practice medicine in any state, regardless of continuing licensure in any other state.

The Board of Trustees of this corporation shall have the sole power, jurisdiction, and right to determine and decide whether the evidence and information before it is sufficient to constitute one of the grounds for revocation of any certificate issued by this Board.

When the Board is made aware of facts possibly constituting grounds for revocation, the Board will give the physician written notification identifying the specific facts that have come to its attention. The Board may require any physician so certified to appear before the Board of Trustees or before any one or more of them, or before an individual designated by the Board upon not less than 20 days' written notice, and to show cause at that time and place specified in the notice why the certificate may not be revoked on any one of the grounds specified in such notice. The diplomate may bring to this hearing persons or documents in defense of any actions.

The failure of any physician so notified to appear as required in such notice, without due excuse deemed sufficient to the Board of Trustees, shall constitute ipso facto cause for revocation of the certificate. The decisions of the Board of Trustees relating to all matters under this section shall be final and binding.

The diplomate will be required to attest that he/she has read and understands the above provisions regarding the grounds for revocation of certificate issued and the procedures to be followed in determining whether or not a certificate should be revoked and to agree to hold the Board, its officers, and agents harmless from any damage, claim, or complaint by reason of any action taken in good faith and consistent with such procedures.

### Trademark and Seal

The trademark and seal of the American Board of Urology are registered. Any unauthorized use of the trademark and seal is prohibited without express permission of the Board.

### Examination Dates for 1996-1997

#### Qualifying (Part I) Examination

June 6, 1996

June 5, 1997

#### Certifying (Part II) Examination

February 22-24, 1996

February 19-21, 1997

#### Change of Address

Notifying the Board office of a change of address is the responsibility of the candidate for certification.

# Appendix C

## Medical Licensure Requirements

Information in Appendix C was provided by the American Medical Association (AMA) Department of Database Products in cooperation with the Office of Physician Credentials and Qualifications. Tables 1 through 6 summarize the licensure policies of state boards. It is strongly recommended that candidates contact the specific state board for the most current information on licensure requirements in that state. The name and address of each state board and the corresponding officers are listed in Table 7.

All tables are reprinted from *US Medical Licensure Statistics and Current Licensure Requirements*, 1996 edition, published by the AMA. Additional information can be obtained from the following resources.

### Policies for Initial Licensure for Graduates of US Medical Schools

All states require a written examination for initial licensure. Certification by the National Board of Medical Examiners (NBME) can be used as an avenue to licensure in the United States for those certified as diplomates prior to implementation of the United States Medical Licensing Examination (USMLE) and for examinees taking a combination of NBME and/or USMLE examinations who passed at least one part or step prior to December 31, 1994. The last regular administration of Part I of the NBME examination occurred in 1991, Part II in April 1992, and Part III in May 1994. The NBME certificate will no longer be issued following certification of these examinees.

Policies of state medical boards for initial medical licensure for graduates of US medical schools appear in Table 1. All licensing jurisdictions except Texas and the Virgin Islands will endorse certificates from the NBME earned prior to the USMLE under certain circumstances. The Texas licensing board will endorse NBME certificates and state licenses based on the NBME certificate for reciprocal endorsement candidates only. Texas will not endorse an NBME certificate held by a candidate who has never been licensed. The reciprocal endorsement candidate must pass the Federation of State Medical Boards' Special Purpose Examination (SPEX) in Texas or be American Specialty Board-certified or recertified. Those graduates who are not licensed by endorsement of the NBME certificate must have passed the Federation Licensing Examination (FLEX) prior to January 1994 or pass the USMLE, which is currently used by all states as the medical licensing examination. Most licensing authorities state that there is no limit to the length of time for which they endorse the NBME certificate.

Although some state medical boards allow physicians to take USMLE Step 3 with little or no graduate medical education (GME), all of the boards require graduate training, usually 1 year, before issuing a license. However, Connecticut, Guam, Maine, Michigan, New Hampshire, New Mexico, Pennsylvania, South Dakota, and Washington require 2 years. Illinois requires 2 years of GME for persons entering training programs after January 1, 1988, and Nevada requires 3 years.

Licensing boards require applicants to provide detailed personal information on an application form, plus letters of reference and other evidence of good moral character. They also require payment of a licensing fee. They may require photographs, fingerprints, or other means of identification.

### **Policies for Licensure of Graduates of Non-US Medical Schools**

Most of the state medical boards will accept GME in Canada as equivalent to training undertaken in the United States. Forty-two states will issue a medical license to a graduate of a Canadian medical school who holds a license in one of the provinces of Canada. Thirty-four licensing boards, under certain specified conditions, endorse a Licentiate of the Medical Council of Canada certificate held by an international medical graduate.

In the most recent survey conducted by the AMA Department of Database Products, 44 states indicated that international medical graduates who hold a Fifth Pathway certificate, but do not hold a standard Education Commission for Foreign Medical Graduates (ECFMG) certificate, can be admitted to the licensing examination. Fifth Pathway Certificate holders must pass Steps 1 and 2 of the USMLE prior to entering ACGME-accredited GME programs.

Candidates for licensure who did not graduate from a US medical school are permitted by 9 state boards to take the USMLE before they have had GME in a US or Canadian hospital. Although a passing score on the USMLE (which is used by the ECFMG for certification purposes) or the ECFMG certificate is required for licensure by most state medical boards, 19 boards now require both. Candidates are not awarded a license until they have undertaken 1 or more years of training in the United States and have met other specific requirements of the individual boards, eg, an ECFMG certificate, personal interview, payment of fees, etc. International medical schools must be state-approved in 24 US states or territories, including Alabama, Arizona, Arkansas, Colorado, Connecticut, District of Columbia, Georgia, Guam, Idaho, Kentucky, Maryland, Minnesota, Mississippi, Missouri, Montana, New Mexico, North Dakota, Oklahoma, Oregon, Puerto Rico, Rhode Island, South Dakota, Tennessee, and Wyoming. California does not generally approve foreign schools in connection with licensure eligibility, but if there are concerns regarding the quality of education, the Board will ask the school to complete a questionnaire and furnish documentation.

### **Current Board Standards for Administering the US Medical Licensing Examination**

In 1990, the Federation of State Medical Boards (FSMB) and the NBME established the USMLE, a single examination for assessing US and international medical school students or graduates seeking initial licensure by US licensing jurisdictions. The USMLE replaced the two-examination sequences used in the medical licensing process, FLEX and the certifying examination of the NBME, as well as the Foreign Medical Graduate Examination in the Medical Sciences (FMGEMS), formerly used by the ECFMG for certification purposes.

The USMLE is a single-examination program with three steps. Each step is complementary to the others; no step can stand alone in the assessment of readiness for medical licensure. Each USMLE step is composed of multiple-choice questions, requires 2 days of testing, and is administered semiannually.

The USMLE Step 1 assesses whether an examinee understands and can apply key concepts of basic biomedical sciences, with an emphasis on principles and mechanisms of health, disease, and modes of therapy. Step 2 assesses whether an examinee possesses the medical knowledge and understanding of clinical science considered essential for providing patient care under supervision, including emphasis on health promotion and disease prevention. Step

3 assesses whether an examinee possesses the medical knowledge and understanding of biomedical and clinical science considered essential for the unsupervised practice of medicine, with emphasis on patient management in ambulatory settings.

Steps 1 and 2 are administered to students and graduates of US and Canadian medical schools at test centers established by the NBME, and application materials are usually available at these medical schools. Steps 1 and 2 are administered by the ECFMG to students and graduates of foreign medical schools; application materials are available only through the ECFMG. Step 3 is the responsibility of the individual medical licensing jurisdictions. Step 3 application materials for physicians who have successfully completed Steps 1 and 2 are available from medical licensing authorities or from the FSMB.

Students who enrolled in US medical schools beginning in the fall of 1990 and international medical graduates who applied for ECFMG examinations beginning in 1993 have access to only the USMLE for purposes of licensure. Because some medical students and physicians had already successfully completed some part of the NBME or the FLEX examination sequences before implementation of the USMLE, certain combinations of the examination may be considered by medical licensing authorities as comparable to existing examinations. The USMLE program recommends that such combinations be accepted for medical licensure only if completed prior to the year 2000.

Most medical licensing authorities require completion of Steps 1, 2, and 3 within a 7-year period. This 7-year period begins when the medical student or graduate first passes Step 1 or Step 2. Some licensing authorities also set a limit on the number of attempts allowed to pass each step and have established as an eligibility requirement for Step 3 the completion, or near completion, of at least 1 year of GME. Information on specific examination requirements within each licensing jurisdiction, as well as the fee for the USMLE examination Step 3, are listed in Tables 4 and 5.

### **Clerkship Regulations**

For purposes of this publication, a *clerkship* is defined as clinical education provided to medical students. Table 6 lists the 25 states that evaluate the quality of clinical clerkships in connection with an application for licensure. In most cases, state medical boards report that clerkships for US medical school students must be in hospitals affiliated with Liaison Committee on Medical Education-accredited medical schools. Clerkships for international medical students must be in hospital departments with ACGME-accredited residency programs. Thirteen states require additional and/or more specific bases of evaluation.

Seventeen state medical boards have state regulations for clerkships provided in their states to students of foreign medical schools. Of these, three state medical boards report that such clerkships are forbidden, and 15 states permit training only in hospitals with accredited residency programs.

### **Restricted Licenses and Educational Permits**

Fifty boards issue educational permits, limited and temporary licenses, or other certificates for the restricted practice of medicine. The terms for the issuance of such certificates vary. Certificates may be issued for hospital training of those eligible for licensure; supervised employment in state or private hospitals; and full-time practice until the next regular session of the licensing board. Permits must generally be renewed once a year with a stipulated maximum number of renewals allowed (usually 5 years).

Amendments to the Immigration and Nationality Act made through Public Law 94-484 and the Health Professions Educational Assistance Act of 1976 establish requirements for the admission of

foreign national physicians to the United States, whether for permanent residence or for participation in GME programs. The amendments require that foreign national graduates of non-US medical schools pass an examination determined by the Secretary of Health and Human Services to be the equivalent to Parts I and II of the NBME examination. The amendments also require that foreign national medical graduates demonstrate competence in oral and written English.

The Secretary of Health and Human Services has determined that Steps 1 and 2 of the USMLE, which is prepared by the NBME and administered by the ECFMG, is the equivalent of Parts I and II

of the NBME examination for purposes of the amendments to the Immigration and Nationality Act. This examination is given at examination centers abroad and in the United States. Applications for the examination and questions should be addressed to the Educational Commission for Foreign Medical Graduates, 3624 Market St, Philadelphia, PA 19104, USA.

Graduates of non-US medical schools who are citizens of the United States and lawful permanent residents of the United States also must pass the USMLE in order to be provided with the ECFMG certificate.

<sup>1</sup> Special Purpose Examination.

<sup>2</sup> Oral examination is required; after 5 years (CA).

<sup>3</sup> No information provided.

<sup>4</sup> Prior to January 1, 1964, candidate must be board-certified or will be required to pass USMLE Step 3 or SPEX.

<sup>5</sup> Persons entering GME programs prior to January 1, 1988, need 1 year; from January 1, 1988 on, 2 years are required.

<sup>6</sup> One additional year of GME is required if applicant failed an exam or any part of an exam 3 or more times and did not pass prior to October 1, 1992. The training must occur after the last failure.

<sup>7</sup> For applications received on or after January 1, 1992.

<sup>8</sup> SPEX required unless specialty board certified.

<sup>9</sup> Must be enrolled in a GME program.

<sup>10</sup> Must apply for a public service license in order to take exam.

<sup>11</sup> One year is required, if physician had no US training prior to July 1, 1987.

<sup>12</sup> Canadian accepted only if graduated from a Canadian school.

<sup>13</sup> One year required if graduated from medical school prior to July 28, 1985.

\*All State Boards of Medical Examiners consider Canadian citizens who have graduated from an accredited Canadian medical school on the same basis for licensure as graduates of accredited US medical schools.

<sup>1</sup> Applicant must have received LMCC in or after May 1970. If examination was taken prior to May 1970, applicant must be board-certified or must successfully complete USMLE Step 3 or the SPEX.

<sup>2</sup> Must be endorsed by provincial licensing board.

<sup>3</sup> LMCC will be considered only in conjunction with a valid Canadian provincial license.

<sup>4</sup> One year formal GME or the equivalent required.

<sup>5</sup> By vote of the board.

<sup>6</sup> At discretion of the board.

<sup>7</sup> Applicant must have received LMCC in or after May 1970. (WA—after December 31, 1969; WI—January 1, 1978.)

<sup>8</sup> A license in another US jurisdiction is required before LMCC will be considered in Puerto Rico.

This summary should be verified by direct communication with the corresponding officer of the licensing board in the state. In all states licenses based on the endorsement/acceptance of a physician's credentials are granted to those physicians meeting all state requirements—at the discretion of the licensing board.

\* Both a passing score on the ECFMG exam and the ECFMG Certificate are required.

<sup>1</sup> Oral examination is required.

<sup>2</sup> Must include 4 months of general medicine.

<sup>3</sup> Oral examination may be required.

<sup>4</sup> ECFMG certificate is required if applicant is not a graduate of a foreign medical school certified by the Florida Board of Medicine and none have been approved yet. Graduates of certified foreign medical schools where the language of instruction is other than English must demonstrate competency in English.

<sup>5</sup> No information provided.

<sup>6</sup> Varies by specialty. Canadian training not accepted.

<sup>7</sup> One-year residency required for persons entering residency training prior to January 1, 1988. January 1, 1988 or after, 2 years are required.

<sup>8</sup> Near completion of 2 years.

<sup>9</sup> Only in conjunction with a valid Canadian provincial license and provided all other licensure requirements are met.

<sup>10</sup> May be counted as 1 year of required GME.

<sup>11</sup> GME taken outside the US or Canada may be found qualifying under certain circumstances.

<sup>12</sup> One year if graduated prior to July 1, 1992 from an international medical school approved by the board.

<sup>13</sup> Must be enrolled in a GME program.

<sup>14</sup> Must apply for a public license in order to take examination.

<sup>15</sup> a) If an applicant has not completed 3 years of GME but has met all other licensing requirements and has successfully completed 1 year of GME in the US or Canada in a program approved by the board, and if the board finds that the applicant has other professional experience and training that is substantially equivalent to the second and third years of GME, the applicant may be deemed eligible for licensure. b) Three years of GME in the United Kingdom is considered to be equivalent to 1 year of GME in the US or Canada. The board requires board certification or successful passage of SPEX in order to be considered for one of these two exceptions.

<sup>16</sup> Training to the second-year level.

<sup>17</sup> If passed in or after May 1970 (PA); January 1, 1978 (WI). If passed before January 1, 1978 (TN). If passed after December 31, 1969 (WA).

<sup>18</sup> One year is required, if physician had US GME prior to July 1, 1987.

<sup>19</sup> American specialty board certification required within 10 years.

<sup>20</sup> Just United States.

<sup>21</sup> One year if graduate of medical school prior to July 28, 1985.

<sup>1</sup> There are, however, requirements for remedial training after 2 failed attempts.

<sup>2</sup> No information provided.

<sup>3</sup> Near completion of 2 years.

<sup>4</sup> Varies by specialty. Canadian training not accepted.

<sup>5</sup> An applicant who has passed the ECFMG exam before July 1, 1984 shall have satisfactorily completed 3 years of GME in a program approved by the board in a board-approved hospital or institution.

<sup>6</sup> An applicant who fails to achieve a passing score on USMLE Step 3 within 5 years from the first time he or she sat for USMLE Step 3 shall not be eligible to again sit for USMLE Step 3 until the applicant has completed 1 year of graduate clinical training in a program approved by the board in a board-approved hospital or institution.

<sup>7</sup> Must be enrolled in a GME program.

<sup>8</sup> After 5 attempts, candidate must demonstrate additional education, training, or experience acceptable to the board, before being permitted to repeat the examination (NJ); after 3 attempts, further training is required (OK).

<sup>9</sup> Must repeat the entire sequence if not passed within 7 years.

<sup>1</sup> In most cases, boards reported that clerkships must be in hospitals affiliated with LCME-accredited medical schools or ACGME-accredited residency training programs. States requiring additional and/or more specific bases for evaluation are noted with an asterisk (\*).

<sup>2</sup> Includes US citizens who are studying medicine in foreign medical schools.

<sup>3</sup> May complete up to 18 of required 72 weeks in non-approved training.

<sup>4</sup> Under certain circumstances.

**Table 7. Whom to Write — Officers of Boards of Medical Examiners in the United States and Possessions**

**Alabama**

Larry D. Dixon, Executive Director, Alabama State Board of Medical Examiners, PO Box 946, Montgomery 36101

**Alaska**

Leslie G. Haywood, Executive Secretary, Licensing Division of Occupational Licensing, State Medical Board, 3601 C St, #722, Anchorage 99503

**Arizona**

Mark R. Speicher, Executive Director, Arizona Board of Medical Examiners, 1651 E Morten, Ste 210, Phoenix 85020

**Arkansas**

Peggy P. Cryer, Executive Secretary, Arkansas State Medical Board, 2100 River Front Dr, Suite 200, Little Rock 72202

**California**

Ron Joseph, Executive Director, Medical Board of California, 1426 Howe Ave, Ste 100, Sacramento 95825

**Colorado**

Susan Miller, Program Administrator, Board of Medical Examiners, 1560 Broadway, Ste 1300, Denver 80202

**Connecticut**

Joseph Gillen, PhD, Section Chief, Connecticut Department of Health, Physician Licensure, 150 Washington St, Hartford 06106

**Delaware**

Rosemarie S. Vanderhoogt, Officer Manager, Board of Medical Practice of Delaware, Cannon Bldg, PO Box 241, Dover 19903

**District of Columbia**

James Granger, Acting Executive Director, Board of Medicine, 614 H Street, Rm 108, Washington, DC 20001

**Florida**

Marm M. Harris, EdD, Executive Director, Board of Medical Examiners, 1940 N Monroe St, Tallahassee 32399-0770

**Georgia**

Andrew Watry, Executive Director, Composite State Board of Medical Examiners, 166 Pryor St SW, Rm 424, Atlanta 30303

**Guam**

Teofila P. Cruz, Administrator, Board of Medical Examiners, PO Box 2816, Agaña 96910

**Hawaii**

Constance Cabral, Executive Secretary, Board of Medical Examiners, PO Box 3469, Honolulu 96801

**Idaho**

Darlene Thorsted, Executive Director, State Board of Medicine, PO Box 83720-0058, Boise 83720-0058

**Illinois**

Pat Eubanks, Manager, Medical Unit, Department of Professional Regulations, Illinois Board of Medical Examiners, 320 W Washington, 3rd Fl, Springfield 62786

**Indiana**

Laura Langford, Executive Director, Indiana Health Professions Bureau, 402 W Washington St, Rm 041, Indianapolis 46204

**Iowa**

Ann Martino, PhD, Executive Director, Board of Medical Examiners, Capitol Complex, Executive Hills West, 1209 E Court Ave, Des Moines 50319

**Kansas**

Charlene K. Abbott, Licensing Administrator, State Board of Healing Arts, 235 S Topeka Blvd, Topeka 66603

**Kentucky**

C. Wm. Schmidt, Executive Director, Board of Medical Licensure, 310 Whittington Pkwy, Louisville 40222

**Louisiana**

Paula M. Mensen, Administrative Manager, Louisiana State Board of Medical Examiners, 630 Camp St, PO Box 30250, New Orleans 70190-0250

**Maine**

Randal C. Manning, Executive Director, Maine Board of Licensure in Medicine, 2 Bangor St, State House Station, 137, Augusta 04333

**Maryland**

Michael Compton, Executive Director, Board of Physician Quality Assurance, 4201 Patterson Ave, Baltimore 21215

## Medical Schools in the United States

### Alabama

- 00102 University of Alabama School of Medicine  
Birmingham, AL 35294  
00106 University of South Alabama College of  
Medicine  
Mobile, AL 37788

### Arizona

- 00301 University of Arizona College of Medicine  
Tucson, AZ 85724

### Arkansas

- 00401 University of Arkansas College of Medicine  
Little Rock, AR 77205

### California

- 00502 University of California, San Francisco  
School of Medicine  
San Francisco, CA 94143  
00506 University of Southern California School  
of Medicine  
Los Angeles, CA 90033  
00511 Stanford University School of Medicine  
Palo Alto, CA 94305  
00512 Loma Linda University School of Medicine  
Loma Linda, CA 92350  
00514 University of California, Los Angeles  
School of Medicine  
Los Angeles, CA 90024  
00515 University of California, California College  
of Medicine  
Irvine, CA 92717  
00518 University of California, San Diego School  
of Medicine  
La Jolla, CA 92093  
00519 University of California, Davis School of  
Medicine  
Davis, CA 95616

### Colorado

- 00702 University of Colorado School of Medicine  
Denver, CO 80262

### Connecticut

- 00801 Yale University School of Medicine  
New Haven, CT 06510  
00802 University of Connecticut School of Medicine  
Farmington, CT 06032

### District of Columbia

- 01001 George Washington University School of  
Medicine  
Washington, DC 20037  
01002 Georgetown University School of Medicine  
Washington, DC 20007  
01003 Howard University College of Medicine  
Washington, DC 20059

### Florida

- 01102 University of Miami School of Medicine  
Miami, FL 33101  
01103 University of Florida College of Medicine  
Gainesville, FL 32610  
01104 University of South Florida College of  
Medicine  
Tampa, FL 33612

### Georgia

- 01201 Medical College of Georgia  
Augusta, GA 30912  
01205 Emory University School of Medicine  
Atlanta, GA 30322  
01221 Morehouse School of Medicine  
Atlanta, GA 30314  
01222 Mercer University School of Medicine  
Macon, GA 31207

### Hawaii

- 01401 University of Hawaii John A Burns School  
of Medicine  
Honolulu, HI 96822

### Illinois

- 01601 Rush Medical College of Rush University  
Chicago, IL 60612  
01602 University of Chicago, Pritzker School of  
Medicine  
Chicago, IL 60637  
01606 Northwestern University Medical School  
Chicago, IL 60611  
01611 University of Illinois College of Medicine  
Chicago, IL 60612  
01642 Finch University of Health Sciences/The  
Chicago Medical School  
North Chicago, IL 60064  
01643 Loyola University of Chicago,  
Stritch School of Medicine  
Maywood, IL 60153  
01645 Southern Illinois University School of  
Medicine  
Springfield, IL 62708

### Indiana

- 01720 Indiana University School of Medicine  
Indianapolis, IN 46223

### Iowa

- 01803 University of Iowa College of Medicine  
Iowa City, IA 52242

### Kansas

- 01902 University of Kansas School of Medicine  
Kansas City, KS 66103

### Kentucky

- 02002 University of Louisville School of Medicine  
Louisville, KY 40292  
02012 University of Kentucky College of Medicine  
Lexington, KY 40536

### Louisiana

- 02101 Tulane University School of Medicine  
New Orleans, LA 70112  
02105 Louisiana State University School  
of Medicine in New Orleans  
New Orleans, LA 70112  
02106 Louisiana State University School  
of Medicine in Shreveport  
Shreveport, LA 71130

### Maryland

- 02301 University of Maryland School of  
Medicine  
Baltimore, MD 21201  
02307 Johns Hopkins University School of  
Medicine  
Baltimore, MD 21205  
02312 Uniformed Services University of  
the Health Sciences, F Edward Hebert  
School of Medicine  
Bethesda, MD 20014

### Massachusetts

- 02401 Harvard Medical School  
Boston, MA 02115  
02405 Boston University School of Medicine  
Boston, MA 02118  
02407 Tufts University School of Medicine  
Boston, MA 02111  
02416 University of Massachusetts Medical School  
Worcester, MA 01605

### Michigan

- 02501 University of Michigan Medical School  
Ann Arbor, MI 48109

- 02507 Wayne State University School of Medicine  
Detroit, MI 48201
- 02512 Michigan State University College of  
Human Medicine  
East Lansing, MI 48824

## Minnesota

- 02604 University of Minnesota Medical School  
Minneapolis, MN 55455
- 02607 University of Minnesota, Duluth School of  
Medicine  
Duluth, MN 55812
- 02608 Mayo Medical School  
Rochester, MN 55905

## Mississippi

- 02701 University of Mississippi School of  
Medicine  
Jackson, MS 39216

## Missouri

- 02802 Washington University School of Medicine  
St Louis, MO 63110
- 02803 University of Missouri, Columbia School of  
Medicine  
Columbia, MO 65212
- 02834 Saint Louis University School of Medicine  
St Louis, MO 63104
- 02846 University of Missouri, Kansas City School  
of Medicine  
Kansas City, MO 64108

## Nebraska

- 03005 University of Nebraska College of Medicine  
Omaha, NE 68105
- 03006 Creighton University School of Medicine  
Omaha, NE 68178

## Nevada

- 03101 University of Nevada School of Medicine  
Reno, NV 89557

## New Hampshire

- 03201 Dartmouth Medical School  
Hanover, NH 03756

## New Jersey

- 03305 UMDNJ-New Jersey Medical School  
Newark, NJ 07103
- 03306 UMDNJ-Robert Wood Johnson Medical  
School  
Piscataway, NJ 08854

## New Mexico

- 03401 University of New Mexico School of  
Medicine  
Albuquerque, NM 87131

## New York

- 03501 Columbia University College of Physicians  
and Surgeons  
New York, NY 10032
- 03503 Albany Medical College of Union University  
Albany, NY 12208
- 03506 State University of New York at Buffalo  
School of Medicine  
Buffalo, NY 14214
- 03508 State University of New York Health  
Science Center at Brooklyn College of  
Medicine  
Brooklyn, NY 12203
- 03509 New York Medical College  
Valhalla, NY 10595
- 03515 State University of New York Health  
Science Center at Syracuse College of  
Medicine  
Syracuse, NY 13210
- 03519 New York University School of Medicine  
New York, NY 10016
- 03520 Cornell University Medical College  
New York, NY 10021
- 03545 University of Rochester School of Medicine  
and Dentistry  
Rochester, NY 14642
- 03546 Albert Einstein College of Medicine of  
Yeshiva University  
New York, NY 10461
- 03547 Mount Sinai School of Medicine of City  
University of New York  
New York, NY 10029
- 03548 State University of New York at Stony  
Brook, School of Medicine  
Stony Brook, NY 11794

## North Carolina

- 03601 University of North Carolina at Chapel Hill  
School of Medicine  
Chapel Hill, NC 27514
- 03605 Bowman Gray School of Medicine of Wake  
Forest University  
Winston-Salem, NC 27103
- 03607 Duke University School of Medicine  
Durham, NC 27710
- 03608 East Carolina University School of  
Medicine  
Greenville, NC 27834

## North Dakota

- 03701 University of North Dakota School of  
Medicine  
Grand Forks, ND 58202

## Ohio

- 03806 Case Western Reserve University School of  
Medicine  
Cleveland, OH 44206
- 03840 Ohio State University College of Medicine  
Columbus, OH 43210
- 03841 University of Cincinnati College of  
Medicine  
Cincinnati, OH 45267
- 03843 Medical College of Ohio at Toledo  
Toledo, OH 43699
- 03844 Northeastern Ohio Universities College of  
Medicine  
Rootstown, OH 44272
- 03845 Wright State University School of Medicine  
Dayton, OH 45401

## Oklahoma

- 03901 University of Oklahoma College of Medicine  
Oklahoma City, OK 73190

## Oregon

- 04002 Oregon Health Sciences University School  
of Medicine  
Portland, OR 97201

## Pennsylvania

- 04101 University of Pennsylvania School of  
Medicine  
Philadelphia, PA 19104
- 04102 Jefferson Medical College of Thomas  
Jefferson University  
Philadelphia, PA 19107
- 04112 University of Pittsburgh School of Medicine  
Pittsburgh, PA 15261
- 04113 Temple University School of Medicine  
Philadelphia, PA 19140
- 04114 Pennsylvania State University College of  
Medicine  
Hershey, PA 17033
- 04115 Medical College of Pennsylvania/  
Hahnemann University School of  
Medicine  
Philadelphia, PA 19102

## Puerto Rico

- 04201 University of Puerto Rico School of  
Medicine  
San Juan, PR 00936
- 04202 Ponce School of Medicine  
Ponce, PR 00732
- 04203 Universidad Central del Caribe Escuela de  
Medicina  
Cayey, PR 00633

## Rhode Island

- 04301 Brown University Program in Medicine  
Providence, RI 02912

**South Carolina**

- 04501 Medical University of South Carolina  
College of Medicine  
Charleston, SC 29425
- 04504 University of South Carolina School of  
Medicine  
Columbia, SC 29208

**South Dakota**

- 04601 University of South Dakota School of  
Medicine  
Vermillion, SD 57069

**Tennessee**

- 04705 Vanderbilt University School of Medicine  
Nashville, TN 37232
- 04706 University of Tennessee College of  
Medicine  
Memphis, TN 38163
- 04707 Meharry Medical College School of  
Medicine  
Nashville, TN 37208
- 04720 East Tennessee State University,  
James H Quillen College of Medicine  
Johnson City, TN 37614

**Texas**

- 04802 University of Texas Medical Branch at  
Galveston  
Galveston, TX 77550
- 04804 Baylor College of Medicine  
Houston, TX 77030
- 04812 University of Texas Southwestern Medical  
School at Dallas  
Dallas, TX 75235
- 04813 University of Texas Medical School at San  
Antonio  
San Antonio, TX 78284
- 04814 University of Texas Medical School at  
Houston  
Houston, TX 77225
- 04815 Texas Tech University Health Science  
Center School of Medicine  
Lubbock, TX 79430
- 04816 Texas A & M University College of Medicine  
College Station, TX 77843

**Utah**

- 04901 University of Utah School of Medicine  
Salt Lake City, UT 84132

**Vermont**

- 05002 University of Vermont College of Medicine  
Burlington, VT 05405

**Virginia**

- 05101 University of Virginia School of Medicine  
Charlottesville, VA 22908
- 05104 Virginia Commonwealth University, Medical  
College of Virginia  
Richmond, VA 23298
- 05107 Eastern Virginia Medical School of the  
Medical College of Hampton Roads  
Norfolk, VA 23501

**Washington**

- 05404 University of Washington School of Medicine  
Seattle, WA 98195

**West Virginia**

- 05501 West Virginia University School of Medicine  
Morgantown, WV 26506
- 05502 Marshall University School of Medicine  
Huntington, WV 25701

**Wisconsin**

- 05605 University of Wisconsin Medical School  
Madison, WI 53706
- 05606 Medical College of Wisconsin  
Milwaukee, WI 53226

\*Total number of US GME programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) and combined specialty programs surveyed by the AMA as of December 12, 1994.

†Includes resident physicians on duty August 1, 1994, reported through the 1994 AMA Annual Survey of GME Programs. A total of 399 (5.4%) programs did not respond by April 30, 1995. For 364 programs, the resident physicians reported in the most recent completed survey were counted; for 35 programs with National Residency Match Program data, the new residents were entered and existing residents moved into their next year in program or graduated.

‡Gender was not indicated for 359 residents (0.4%).

§Medical school type was not indicated for 2965 residents (3.0%).

¶Dermatopathology is a subspecialty related to the core disciplines of dermatology and pathology.

<b>Total</b>	<b>97 832</b>	<b>19 293</b>

\* Specialty and subspecialty programs are accredited by the Accreditation Council for Graduate Medical Education (ACGME).

† A total of 399 programs (5.4%) did not respond by April 30, 1995. For 364 programs, the resident physicians reported in the most recent completed survey were counted; for 35 programs with National Residency Match Program data, the new residents were entered and existing residents moved into their next year in program or graduated. A total of 101 residents were missing year-of-program information.

‡ Dermatopathology is a subspecialty related to the core disciplines of dermatology and pathology.

Appendix II, Table 5.—Race or Ethnic Origin of Resident Physicians on Duty August 1, 1994, by Type of Medical School From Which They Graduated\*

<b>Total</b>	<b>814</b>	<b>805</b>	<b>49</b>	<b>1668</b>

\*A sponsoring institution is the entity that assumes final responsibility for a GME program. Most GME programs are undertaken by a specific clinical department within a hospital or other health care institution; a hospital, medical school, or educational consortium is usually the institution sponsoring a program.

†A participating institution (formerly "affiliated institution") may be a hospital or other health care site that provides specific learning experiences within a multi-institutional GME program and that is recognized by at least one Residency Review Committee as providing a major portion of required training.

‡A primary clinical site exists when the location of the primary teaching institution differs from that of one sponsoring institution.

# Make informed decisions about the business of practice management

**New!**

*New Practice Success! series answers your questions about practice management in a non-technical easy-to-read format.*

Now you can have access to four new practice management publications designed and specifically written for you, the practicing physician and staff in the solo or small group practice environment. They are economically priced at \$44.95 each and are available now.  
Call today!

## **Personnel Management in the Medical Practice: The Physician's Handbook for Successful Personnel Management**

Helps you adhere to employment laws, prepare practice staff job descriptions, manage the hiring and termination processes, set up accurate personnel files, establish policies and procedures, conduct performance appraisals, administer employee compensation and develop an employee handbook.

**Order # OP700995XT**

## **Financial Management of the Medical Practice: The Physician's Handbook for Successful Budgeting, Forecasting and Cost Accounting**

Walks you through budgeting and forecasting, revenue and cost accounting, controlling overhead, internal control systems, financial statement relationships and reporting of practice operating results.

**Order # OP701195XT**

## **Managing Managed Care in the Medical Practice: A Physician's Guide to Success and Survival**

Helps you to understand the basics of managed care, the advantages of participation, analyzing the contract, utilization review, Medicare, marketing and ethical issues.

**Order # OP701095XT**

## **Managing the Medical Practice: The Physician's Handbook for Successful Practice Administration**

Offers the administrator sensible systems and guidelines involving the management of staff, employee relations, personnel and financial management, operations, marketing the practice, and risk management.

**Order # OP701295XT**

**800 621-8335**

### **Priority Code XT**

Visa, MasterCard, Optima or American Express accepted. Shipping charges apply. Add local taxes if applicable.

To have an order form or descriptive information on managed care, statistical and coding products faxed directly to you, call the *Information on Request* Faxline at 800 621-8335.

**American Medical Association**

Physicians dedicated to the health of America

# Why some physicians succeed under capitation while others just get by

**Increase your profitability and achieve greater clinical autonomy.**

Capitated arrangements are growing dramatically and your ability to effectively deal with capitation will determine your financial future. If done incorrectly, you can reduce or restrict your income.

If you have the right information and manage it well, you stand to increase your profitability and achieve greater clinical autonomy through capitated payment plans. A new book, *Capitation: The Physicians' Guide*, developed specifically for the physician by the American Medical Association, describes those issues you must confront in understanding capitation, assessing and negotiating a capitation contract, and the right ways to practice and profit within it.

***Capitation: The Physicians' Guide* will help you:**

- Master the concepts of capitation, how it works, how it differs from fee-for-service, how it can become an important source of revenue for your practice, and how it can actually increase your clinical autonomy.
- Negotiate a profitable capitation agreement by understanding the contract's elements and their implications for your practice.
- Reduce financial uncertainty by learning to compute capitation rates and evaluate their true value.
- Select the right consultants for contract negotiations.
- Choose the right strategies for adapting your practice and management style to succeed in capitation.

**Guarantee** Your satisfaction is guaranteed. If *Capitation: The Physicians' Guide* does not provide you the benefits described, return the book within 30 days for full refund.
