Requirement Number	Definition of Graduate Medical Education  Fellowship is advanced graduate medical education beyond a core residency program for physicians who desire to enter more specialized practice. Fellowship-trained physicians serve the public by providing subspecialty care, which may also include core medical care, acting as a community resource for expertise in their field, creating and integrating new knowledge into practice, and educating future generations of physicians. Graduate medical education values the strength that a diverse group of physicians brings to medical care, and the importance of inclusive and psychologically safe learning environments.  Fellows who have completed residency are able to practice autonomously in their core specialty. The prior medical experience and expertise of fellows distinguish them from physicians entering residency. The fellow's care of patients within the subspecialty is undertaken with appropriate faculty supervision and conditional independence. Faculty members serve as role models of excellence, compassion, cultural sensitivity, professionalism, and scholarship. The fellow develops deep medical knowledge, patient care skills, and expertise applicable to their focused area of practice. Fellowship is an intensive program of subspecialty clinical and didactic education that focuses on the multidisciplinary care of patients. Fellowship education is often physically, emotionally, and intellectually demanding, and occurs in a variety of clinical learning	Requirement Number	Definition of Graduate Medical Education Fellowship is advanced graduate medical education beyond a core residency program for physicians who desire to enter more specialized practice. Int.A.		[None]	
	In addition to clinical education, many fellowship programs advance fellows' skills as physician-scientists. While the ability to create new knowledge within medicine is not exclusive to fellowship-educated physicians, the fellowship experience expands a physician's abilities to pursue hypothesis-driven scientific inquiry that results in contributions to the medical literature and patient care. Beyond the clinical subspecialty expertise achieved, fellows develop mentored relationships built on an infrastructure that promotes collaborative research. IV.B.	<u>-</u>	[None]	ACGME Competencies The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.
D. D. 4	The program must integrate the following ACGME Competencies into the		
IV.B.1.		[None]	The program must integrate all ACGME Competencies into the curriculum.
IV.B.1.a)	,	4.3.	ACGME Competencies – Professionalism Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. (Core)
IV.B.1.b)	Patient Care and Procedural Skills	[None]	
	Fellows must be able to provide patient care that is patient- and family-centered, compassionate, equitable, appropriate, and effective for the treatment of health problems and the promotion of health. (Core)	4.4.	ACGME Competencies – Patient Care and Procedural Skills (Part A) Fellows must be able to provide patient care that is patient- and family- centered, compassionate, equitable, appropriate, and effective for the treatment of health problems and the promotion of health. (Core)
IV.B.1.b).(1).(a)	Fellows should demonstrate the ability to manage patients with chronic diseases on an ongoing basis. (Detail)	4.4.a.	Fellows should demonstrate the ability to manage patients with chronic diseases on an ongoing basis. (Detail)
IV.B.1.b).(1).(b)	Fellows should demonstrate the ability to formulate diagnostic strategies and therapeutic plans for acute and chronic skin conditions and develop an ongoing relationship with families of children with chronic skin problems. IV.D.	Scholarship  Medicine is both an art and a science. The physician is a humanistic scientist who cares for patients. This requires the ability to think critically, evaluate the literature, appropriately assimilate new knowledge, and practice lifelong learning. The program and faculty must create an environment that fosters the acquisition of such skills through fellow participation in scholarly activities as defined in the subspecialty-specific Program Requirements. Scholarly activities may include discovery, integration, application, and teaching.  The ACGME recognizes the diversity of fellowships and anticipates that programs prepare physicians for a variety of roles, including clinicians, scientists, and educators. It is expected that the program's scholarship will reflect its mission(s) and aims, and the needs of the community it serves. For example, some programs may concentrate their scholarly activity on quality improvement, population health, and/or teaching, while other programs might choose to utilize more classic forms of biomedical research as the focus for scholarship. VI.A.2.	Supervision and Accountability		Supervision and Accountability Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate, and monitor a structured chain of responsibility and accountability as it relates to the supervision of all patient care.  Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each fellow's development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.
